ADMINISTRATION REPORT

OF THE

Central Provinces.

FOR 1892-93.

PART I.

INTRODUCTION.

In the second part of this Report, detailed facts and figures are given for the calendar year 1892 respecting the Judicial, Jail, Police and Medical Departments; for the agricultural year 1891-92, for the Agricultural Department; for the forest year 1892-93, regarding the Forest Department, and for the official year 1892-93 in respect of the remaining Departments, with the exception of the portions devoted to Municipal and Local Board administration, the period dealt with in each case depending on the dates prescribed for the submission of the various Annual Reports by Heads of Departments. Owing to the late submission of the Municipal and District Council Reports, it has been impossible to include them in the present report. The facts and figures given refer therefore to the official year 1891-92. As the results of the Census taken in February 1891 have now been published (in the Provincial Census Report), the standard reference sections (1 to 6) of Chapter I of Part II have, in accordance with the orders of the Government of India, been re-written. A summary of the results of the Census of 1891 has been embodied in the same chapter. The standard section on Education (Section I of Chapter VII) has also been re-cast.

2. Before entering on the administrative details of the year 1892-93, the principal facts which illustrate the progress of the Province during the decade that has elapsed since the standard sections were last revised may be briefly noticed.

3. The population of the Central Provinces has, during the interval, increased from 11½ to nearly 13 millions. The total acreage under cultivation has simultaneously risen from 15,516,800 to 18,037,800. Railway communication has been extended to the eastern confines of the Province and onward to Calcutta, broad-gauge being substituted for the short metre-gauge line which in 1882 was open for a few miles out of Nagpur. Branch lines have been opened to Katni on the north and to Sambalpur on the south. A complete system of Provincial roads has been planned and partly executed. A new colliery is being worked at Umaria. Pottery works have been started at Jubbulpore. Factories of all kinds numbered only 2 in 1882, and are now 16. The value of the commercial traffic of the country reached Rs. 10,15,61,866 in 1892-93, as compared with Rs. 5,73,46,961, which is the average of the five years beginning in 1883. The total revenue (Imperial, Provincial and Local) of the Province has

risen from Rs. 1,28,58,000 (in round figures) in 1882-83 to Rs. 1,57,55,000 in 1892-93; and the expenditure from Rs. 70,09,000 to Rs. 81,61,000. Schools have increased in number from 1,565 to 2,210; and scholars from 89,506 to 135,225. Colleges have increased by 1, High Schools by 7, English Middle Schools from 54 to 72, and Primary Schools from 1,457 to 1,918. There are now 30 libraries and literary societies, against 16 in 1882; 10 Vernacular and English newspapers have come into existence; and 9 districts have private printing presses. Dispensaries, which numbered 82 at the beginning of the decade, are now 110, and the number of patients treated has risen from 592,843 to 972,427. Changes have occurred in the system of registration, which prevent a direct comparison of the crime statistics of 1892 with those of 1882; but a review of the figures from 1887 to 1892 shows that the offences against property were somewhat less numerous in the last-named than in the first-named year. The total number of persons disposed of by Magistrates was 43,000 in 1892 and 41,540 in 1891, as compared with 41,423 in 1882. The daily average number of persons in confinement in the jails of the Province was 4,155 ten years ago and 4,747 in 1892. In view of the fact that the strength of the Police force has been reduced from 8,384 (the total in 1882) to 8,073, while the population has increased, these particulars speak well for the orderly character of the people. The strength of the Magistracy has risen (chiefly through the appointment of more Honorary Magistrates) from 178 to 332. The number of civil suits instituted in 1882 was 92,648, while in the year under review it was 101,498. Civil tribunals now number 203, as compared with 156 at the beginning of the decade; and whereas the local Bar included only 7 Barristers and 66 Pleaders in 1882, it has now the imposing strength of 24 Advocates (of whom 17 are Barristers) and 138 Pleaders. The number of Municipalities has decreased from 61 to 55; but, on the other hand, District Councils and Local Boards are now in existence under a scheme of Local Self-Government which had not been formulated ten years ago. Of the 20 Military officers who were members of the Commission in 1883, only 8 now remain. Within the last twenty months two native gentlemen (Statutory Civilians) have for the first time in the history of the Province been appointed to district charges.

With the growth of population and business the administrative staff has necessarily been increased, though not in all respects in proportion to the increase in work. The *cadre* of Assistant Commissioners has been raised from 13 to 18, but this standard has not as yet been worked up to. There are 8 Assistant District Superintendents of Police, instead of 2. The 33 Extra-Assistant Commissioners of 1882 have added 11 to their number. Twenty-two Munsiffs have come to the relief of Tahsildars overburdened with civil work. Two Assistant Sessions Judges represent an inadequate addition to the superior Courts of law. Fourteen Assistant Surgeons and 156 Hospital Assistants and Native Doctors do the work performed by 10 Assistant Surgeons and 95 Hospital Assistant and Native Doctors in 1882. A Settlement Department has come into existence, and the Secretariat has been strengthened by the addition of a Revenue Secretary and an Under Secretary.

4. The charge of the Province was held throughout the year 1892-93 by Sir A. P. MacDonnell, K. C. S. I. The chief administrative measures of the year may be summed up as follows. The Provincial Civil Service was organised upon the basis prescribed by the Government of India; and two native gentlemen (Statutory Civilians) were appointed to the charge of districts.

Primary education was set upon a new and promising path by the establishment (with the assistance of a Provincial grant) of numerous aided schools. The system of Local Audit for the accounts of District Councils, Municipalities and Court of Wards estates was adopted and applied in practice. Local Self-Government was extended to the zamindari areas of Chhattisgarh and Chanda. A new Public Works Division was established. The superior Police staff was strengthened by the appointment of two new Assistant District Superintendents, and "Court Inspectors" were appointed to every district. The substitution of Provincial for private police was carried to completion in the zamindaris of Chhattisgarh.

5. The scheme for the Provincial Civil Service was published in the Provincial Gazette on the 22nd February 1893. It provides for the transfer to that service of 1 District Headship, 2 posts of Assistant Commissioner, 1 post of Registrar, 1 post of Assistant to the Commissioner of Settlements and Agriculture, and 2 Small Cause Court Judgeships; while the number of Extra-Assistant Commissionerships (excluding these appointments) is fixed at 44. The posts of Registrar and of Assistant to the Settlement Commissioner, and the Small Cause Court Judgeships have already been transferred to the Provincial Service, in accordance with this scheme; and the two posts of Assistant Commissioner will be made over as soon as the prior claims of civilians now in the service have been met. A Statutory Civilian is in charge of a district, it being held that his claim is prior to that of existing members of the Provincial Service. Special qualifications for admission to the Provincial Civil Service were prescribed when the scheme was published; and Tahsildars, Munsiffs and Naib-Tahsildars were declared to belong to the Subordinate Civil Service, recruited upon a different basis.

6. As was stated in last year's Report, the sum of Rs. 25,000 was allotted from Provincial revenues at the beginning of 1892-93 to the different District Councils for the opening of new Primary schools upon the "Combined" system. This system of grants-in-aid is so called because it combines a fixed monthly grant (or subsistence allowance) to the schoolmaster, with a result grant proportioned to his success in training scholars up to the examination standard. As many as 300 Vernacular Primary Schools were opened during the year upon this basis, in villages where there was a demand for education; and the number of Vernacular Primary School pupils has increased by nearly 23 per cent.

7. The system of Local Audit of the accounts of local bodies was planned by Sir A. MacDonnell upon the lines of the similar scheme which has, the Chief Commissioner understands, been for some time operative in Bengal. The establishment includes four travelling Auditors (one for each Division) under the supervision and control of an Examiner; and its cost is partly met by a percentage rate levied from the local bodies and estates with whose accounts it deals. The Auditors visit all the district headquarters and municipal towns in their respective Divisions, and subject the accounts of District Councils, Municipal Committees, Court of Wards estates and Government factories to a searching examination. The reports furnished by the Auditors are scrutinised by the Examiner before being passed on to the Chief Commissioner. Copies of the audit-memoranda are furnished to the local bodies or officers concerned. By this plan any defalcations, any faulty

system of accounts, and any breaches of standing orders are brought, without fail, to the notice of the Administration, which can at once call for explanations or issue the necessary orders for remedying what is wrong. The Chief Commissioner has been much impressed by the practical advantages of this system, which is a decided improvement upon the old procedure of audit by Commissioners and the Comptroller's Office at Nagpur.

8. The zamindaris of the Chhattisgarh Division and of Chanda have hitherto been excluded from the operation of the Local Self-Government Act. They have now been brought within its scope, the zamindaris being treated as "circles" under section 3 of the Act, and either formed into independent groups under a Local Board, consisting of the zamindars themselves as representatives of their "circles" or linked with existing groups—according as considerations of locality and convenience dictated. By this plan the zamindars acquire the dignity and responsibilities of Local Board members without in any way impairing their control over their estates.

9. In order to establish more effective access between the head-quarters of the several districts situated on the Satpura Range, Sir A. MacDonnell decided to connect them by metalled roads, and to establish a new Public Works Division (termed the "Plateau Roads Division") for the execution of this scheme and for the development of communications on the plateau generally. At the same time the demand for improved communications in the Feudatory States which lie to the east of the Province led to the formation of a special establishment to deal exclusively with public works in States and zamindaris under management in the Chhattisgarh Division. The cost is met from the funds of the estates concerned, and the staff is regarded as on foreign service. The benefits resulting from the opening up of these comparatively inaccessible tracts will be felt not only in these Provinces, but in the territories of the Madras Presidency, upon which some of the States abut.

10. In connection with the proposals of the Government of India for recruiting in England a certain proportion of the superior Police staff, Sir A. MacDonnell brought to notice the weakness of the establishment of Assistant Superintendents of Police, and obtained sanction to its being increased from 6 to 8.

The two additional officers were recruited from among the Gentlemen Inspectors serving in the Burma Police; and have joined their appointments since the close of the year.

11. Under the orders contained in Notification No. 787, dated the 18th February 1887, no officer of Police of lower rank than an Inspector could conduct the prosecution of police cases before a Magistrate. The reduction in the number of Inspectors which accompanied the revision of the scale of pay of the Police force rendered it difficult for them to perform this duty; and, after consulting Commissioners of Divisions, Sir A. MacDonnell came to the conclusion that an officer of the class of Sub-Inspector should be appointed to each district, under the title of "Court Inspector," for the performance at head-quarters of the work connected with the prosecution of important criminal cases in the Magistrates' Courts. The sanction of the Government of India was therefore obtained to a modification of existing orders; and by Notification No. 4001, dated the 25th May 1893, Sub-Inspectors have been authorized to

conduct the prosecution of criminal cases in the Courts of Magistrates. A "Court Inspector" (of the grade of Sub-Inspector) has now been appointed to each district.

12. From the 1st September 1892, the Police management of certain zamindaris in the Chhattisgarh Division was assumed, under the orders of the Government of India, by the district authorities; and the strength of the Provincial Police force was, with a view to this step, increased by 2 Sub-Inspectors, 34 Head-constables and 154 constables.

A scheme was brought into effect during the year by which the Mounted Police are employed to patrol selected highroads instead of being retained at head-quarters and used as station messengers. The *sowars* are to be called in during the rains for instruction in drill and musketry.

GENERAL SUMMARY.

13. The following General Summary presents in a brief form the leading facts and figures detailed in Sections 7 and 8 of Chapter I and in Chapters II to VIII of Part II of this Report.

Relations with Feudatory States.

14. To take Political matters first in order. Of the seven Feudatory States in the Central Provinces which are administered by their own Chiefs, the only one which gave trouble during the year was Chhuikhadan. Here an empty treasury, unpaid public servants and general financial disorder made interference necessary. The Chief was at first obstructive, but ultimately allowed the necessary reforms to be initiated, and conferred on his Diwan the executive and judicial powers which he had hitherto withheld.

The Chief of Nandgaon received the title of Raja Bahadur on the 1st of January, in recognition of his liberality and public spirit in the matter of the Raipur Water-Works and the Water-Works at Raj-Nandgaon.

15. The sanction of the Government of India was obtained during the year to the Kanker State being taken under management, owing to the mental aberration of the Maharaja. On the other hand, the administration of the Sakti State was made over to Rup Narain Singh, son of the deposed Chief.

16. The people in the Feudatory States are reported to be, in general, contented. The marked rise in agricultural prices which the railway and the development of trade have brought about has added to the means of the cultivating classes and raised the standard of comfort. There are large tracts of fertile land still uncultivated; but as yet it is only in the neighbourhood of the railway and of the main trade routes that a demand for land is springing up.

17. Education continues to make some progress, 19 new schools having been opened during the year. Pandhri has in all States replaced the petty taxes formerly in force. Rules have been issued defining the duties of Police officers in States under management and the powers of control exercised by the chief Executive officers. A scale of armament for the Police of each State has been determined. Suitable jail accommodation has now been everywhere

provided. Settlement work was in progress during the year in 12 out of the 15 Chiefships. In nearly every State the fixed expenditure is much less than the normal receipts; and annual budgets are framed and observed. Raigarh paid off its debt during the year, and the last instalment of the loans due by Kalahandi, Bastar and Rehrakhol will probably be liquidated before 1894.

18. Passing to matters of internal administration, the first subject calling for notice is the work of those departments which deal with the maintenance of public order and the administration of justice. First among these is the Police Department.

Police.

19. Excluding public and local nuisances, the number of offences reported in 1892 was 21,933, as compared with 20,857 in the preceding year. This increase of 1,076 cases is almost entirely due to a rise in the number of offences against property, the total of which had been declining for two years past. The prevalence of cholera in several districts and of high prices in others led to the commission of a large number of small thefts. A considerable percentage of the robberies reported were also of a very petty character. At the beginning of the fourth quarter of the year two large zamindaris, aggregating over 3,000 square miles of territory, were added to the charge of the *Khalsa* Police, and the reported crime from this area has increased the Provincial total. Dacoities (true cases) numbered 26, as compared with 22 in the preceding year; but in only two districts—Saugor and Bilaspur—were they the work of professionals. In both these districts police action against dacoits was attended with marked success, their notorious leaders having been captured in Saugor, while two large bands were apprehended in the Bilaspur District.

20. The number of cases investigated by the police rose from 18,442 (in 1891) to 19,165. The percentage of cases investigated to cases reported at the same time fell from 78·16 to 77·86, and of cases convicted to cases investigated from 58·58 to 56·93. The percentage of persons convicted to persons arrested by the police decreased from 77·87 to 75·29. The percentage of stolen property recovered was 33, as against 34 in the previous year. These unfavourable results must be in great measure attributed to the petty character of the offences against property, which formed the bulk of the criminal record of the year.

Criminal Justice.

21. The number of criminal cases which came before Magistrates was 30,145, as compared with 28,941 in the preceding year. 2,839 cases were rejected under Section 203, Criminal Procedure Code, and 339 were declared false. The balance of 'true' cases—26,967—exceeds by 640 only the total for 1891. This increase results chiefly from a rise of 454 in the number of offences against property, under the influence of the causes referred to in paragraph 19 above. The total number of accused persons disposed of by the Magistrates was 43,000, against 41,540 in the preceding year. Stipendiary Magistrates disposed of 69·1 per cent. of these, and Honorary Magistrates of 30·9 (as against 29·9 in the previous year). The percentage of convictions was 54·3, as compared with 56·2 in 1891 and 54·9 in 1890.

22. The total number of persons punished in Magisterial Courts was 23,534, or 8 more than in the preceding year. Owing to the increase in petty thefts committed by juveniles or by indigent persons, the proportion of light sentences of whipping (10 stripes and under) increased from 7·3 to 8·7; while that of light fines decreased from 85·4 to 83·2. Sentences of imprison-

ment passed by Magistrates numbered 6,052, as against 6,514 in the preceding year.

23. The average duration in police cases was 5·8 days, as against 5·4 in 1891; and in complaint cases 24·2, as against 28·4. The average duration of cases tried by Courts of Session was 68 days, as compared with 46·7 in 1891 and 48·1 in 1890. The cause in the case of the Additional Sessions Judges appears to have been the unduly crowded state of the files.

The number of appeals disposed of by all classes of Courts rose from 2,694 to 2,897.

Jails.

24. The number of convicts imprisoned during the year was 6,760, as compared with 7,316 in 1891; and the daily average number of prisoners of all kinds in confinement was 4,747. The fact that fewer sentences of imprisonment were passed by the Courts (light whippings being more frequently resorted to) has been already mentioned. The higher daily average of prisoners is due to the larger number of long-term prisoners remaining over from the previous year at the commencement of 1892. Of the 6,760 convicts admitted to jail, 4,918, or 72·7 per cent., were under sentence of imprisonment not exceeding six months. Last year the percentage was 74. Sentences not exceeding three months show, on the whole, a satisfactory decrease.

25. The number of punishments of all kinds awarded to prisoners was 5,276, as compared with 3,867 in the previous year; and the ratio of punishments per cent. to the total number of prisoners rose from 29·91 to 41·86. Of the 5,276 punishments, 3,599 were "Minor" and 1,591 "Major" punishments. No fewer than 1,079 of the "Major" punishments were awarded by the Superintendent of the Nagpur Central Jail—an officer who has since been transferred to another appointment. Corporal punishment was inflicted in 175 cases, the proportion to the grand total of punishments being 3·31. Resort to corporal punishment is decreasing.

26. The vital statistics show that there was a large increase in 1892, as compared with 1891, in the number of prisoners admitted to hospital, and an increase (though not in the same degree) in the daily average number sick and in the number of deaths. The daily average number of convicts sick was in the ratio of 32·2 *per mille* (as against 28·4 *per mille* in 1891). The total number of deaths rose from 137 (in 1891) to 204. Cholera was exceedingly virulent in Chhattisgarh during 1892, and 112 deaths from that disease occurred in the three jails of that Division. Fever and pneumonia were prevalent in the Central Jails of Nagpur and Jubbulpore.

Civil Justice.

27. The number of Civil Courts open at the end of 1892 was 203, as against 199 at the close of the preceding year. The number of suits instituted rose to 101,498. In 1891, the total had fallen to 95,249, after exceeding 100,000 for a period of seven successive years. The number of cases disposed of rose from 94,153 to 100,819. The number pending at the year's end was 11,070, as against 10,391 in 1891 and 9,295 in 1890. Cases pending for over four months were, however, fewer (445 as against 510), and the increase in arrears is attributed to the heaviness of the judicial work of three districts, the staff of which has since been strengthened. The relief afforded to Deputy Commissioners by the appointment of Civil Judges is further evidenced by the

decline in the number of suits disposed of by the former from 77 to 66. In eight districts Deputy Commissioners did no Original Civil work at all.

28. The number of first appeals instituted in 1892 is 7,458, as compared with 6,804 in the preceding year. Deputy Commissioners were relieved by Civil Judges of nearly 1,200 more cases than in 1891—trying only 1,881 regular appeals and 75 miscellaneous appeals, against 2,872 and 217 respectively. From the point of view of general administration this is an excellent result; but more of the time thus gained might with advantage have been given to the supervision of the working of the Subordinate Courts. The need for this supervision is indicated by the increase in the number of hearings in contested cases and the rise in the duration of uncontested cases.

The Civil Judicial business disposed of by Commissioners during the year consisted of only seven appeals. Sanction was given at the close of 1891 to the appointment of two Judicial Assistants to Commissioners. The appointments were made with effect from the 1st January 1892; and the officers selected to fill them disposed of 345 civil appeals. The Judicial Assistants are also Additional Sessions Judges, and the criminal business on their files was so considerable as to interfere with the punctual discharge of their duties as Courts of Civil Appeal. Application has accordingly been made to the Government of India for sanction to the appointment of two more Divisional Judges.

29. Departing slightly from the order of subjects observed in Part II of this Report, the health and public instruction of the people of the Province may be dealt with next in succession, Vital Statistics and Medical Relief taking precedence of Education.

Vital Statistics.

30. The number of births registered in 1892 was 364,745, or 15,173 less than in 1891. There has not been so low a birth-rate (38·39 per thousand) recorded since 1886; and the number of births is less than the total of 1882. The number of deaths registered was 324,348, or 10,984 in excess of the previous year. The excess is entirely due to the severe prevalence of cholera in a few districts. The climatic conditions—excessive heat and drought followed by heavy rainfall within a limited period—were very similar to those which characterised the year 1889, when cholera was more destructive than in the year under review. The mortality was high from March to September, and the number of victims to the disease was 39,972. The highest death-rate (46·66 per thousand) was reached in the Raipur District, in which the deaths from cholera were 16,949, as compared with 1,840 in the previous year. The number of deaths from small-pox, on the other hand, was 995 only. The Chhattisgarh Division and Saugor suffered a little from this disease, but elsewhere the mortality caused by it was trifling—a fact which speaks well for the vaccination work of the Province. The mortality from fever (the greatest scourge of the Province) was smaller in 1892 than in the preceding year, the deaths registered as due to this cause numbering 188,017, or 2,533 less than in 1891.

Dispensaries.

31. The number of Dispensaries of all kinds open at the close of the year was 110, as compared with 111 at the close of 1891; another Dispensary has since the close of the year, however, been opened in the Raipur District. There was an increase in the attendance of both in-door and out-door patients, the total attendance amounting to 972,427, against 912,876 in the previous year. There was an increase of 1,906 in the number of surgical operations.

Particular attention is being paid to the necessity of preventing in-door Dispensaries from degenerating into poor-houses for the homeless sick, whereby respectable persons are kept out of them, and subscriptions languish. Orders have issued for the construction of refuges for sick travellers apart from the Dispensary wards.

Vaccination.

32. The Vaccination returns show a decrease of 9,400 in the number of operations as compared with the work of the previous year. The decrease occurred partly in primary operations, and partly in re-vaccinations; but was greater in the latter. This result is to a certain extent due to the introduction of the new system of animal vaccination, the opposition to which in some of the districts appears, however, to be rapidly disappearing as experience is gained of the convenience attending it. It is noticeable that the number of infants successfully vaccinated has increased steadily from year to year, until the remarkable result has been attained that three-fourths of the infants surviving to the age of twelve months have been vaccinated.

Education.

33. Public Schools have increased from 1,908 to 2,210, or by 15 per cent., and pupils from 114,157 to 135,225, or by 18 per cent. Colleges and High Schools remain the same in number. Vernacular Middle Schools have increased by 19, and English Middle Schools have decreased by 1. The number of Primary Schools for boys on the 31st March 1893 was 1,776 with 100,560 pupils, as compared with 1,493 schools and 83,683 pupils on the corresponding date of the year 1892. Schools of this class have thus increased by nearly 19 per cent., and pupils by a little over 20 per cent. The increase is greater than has been shown in any previous 20 years in the educational history of the Province. The circumstances under which it has occurred have been explained in the introduction to this summary. In order to provide an adequate teaching staff to meet the further development of Primary education, training classes for village schoolmasters have been attached to the principal Vernacular Middle Schools in each district, bonuses being offered to the head-masters who succeed in passing students by the Teacher's Certificate Examination. With the increase in schools and schoolmasters an increase in the inspecting agency is essential, and proposals for strengthening the inspectorate have been submitted to the Government of India.

34. With regard to Secondary education an increase in the number of Middle and High Schools is not at present wanted. What is needed is the provision of suitable boarding accommodation for students who come from a distance. Steps have been taken to open boarding-houses at Raipur, Hoshangabad, Chhindwara and Seoni; and the importance of the matter has been impressed on all District Councils and Municipalities.

35. The publication of the rules for admission to the Provincial Civil Service, following upon the issue (in November 1890) of rules for admission to the Subordinate Civil Service and of rules (in November 1891) for admission to the service of District Councils and Municipal Committees—in all of which educational qualifications are insisted on—constitutes a very practical endowment of higher education; and what is now to be aimed at is the encouragement of a practical as distinguished from a purely literary training. A small step in this direction was taken during the year by placing the "School Final Examination" of the Allahabad University on a par with the ordinary Matriculation

Examination for the purpose of the rules for admission to ministerial appointments in the public service.

36. The total expenditure on Education in 1892-93 was Rs. 8,67,439, as compared with Rs. 8,63,900 in the preceding year. Of the total expenditure 37·6 per cent. was met from Provincial funds, as against 44 per cent. in 1891. Fee receipts show a large rise—from Rs. 95,969 to Rs. 1,03,351—owing partly to the operation of the new scale of fees and partly to the opening of new schools.

37. The Departments connected with Production and Distribution—that is to say, Agriculture, Forest, Trade and Public Works—are the next to claim attention. As the administration of the land is closely connected with agriculture, the work done by the Survey and Settlement Department may be fittingly noticed in this place.

Survey and Settlement.

38. During the year the assessments which had been sanctioned for the whole of the Damoh and parts of the Saugor, Jubbulpore, Wardha and Nagpur Districts were brought into practical effect by being formally announced to the people. Assessment work was in progress in seven districts, and according to the present programme settlement operations in the Jubbulpore, Narsinghpur and Wardha Districts will be completed by the 31st March 1894. Excluding the gradual re-survey of zamindari villages in the Chhattisgarh Division, cadastral survey preparatory to settlement was in progress in five districts, the total outturn being 3,731 square miles, and the average cost rate per square mile Rs. 33. By the end of the current year, the cadastral survey of the whole malguzari area, with the exception of a portion of the Mandla District, will have been completed.

The gradual survey of the more well-established villages of the zamindari estates in the Chhattisgarh Division was taken in hand after the completion of the recent settlements in the districts of that Division, in the course of which these estates were settled in summary fashion only. The total area surveyed was 655 square miles, at a rate per square mile varying from Rs. 26 to Rs. 30.

The ryotwari settlement of waste lands in the Charwa tract of the Hoshangabad District has given satisfactory results. Over 100 square miles of land have been allotted. Similar operations have been undertaken in the Nimar District.

Weather, Crops and Prices.

39. The rains commenced in good time and the rainfall was again generally above the average. Abnormally heavy rain occurred in October in the northerly districts, which was of great benefit to the rabi sowings. Good rain fell in January, but the prospects of a bumper crop were ruined by wet weather in February and March, which brought on a widespread attack of rust. The rice, cotton and linseed crops were fairly satisfactory, but the wheat crop throughout the Provinces was about 10 per cent. below the average. Prices throughout the year were as a rule high.

Forests.

40. The total area administered by the Forest Department during the year (10,124 square miles in the Northern Circle and 9,889 in the Southern Circle) differs slightly only from the totals of the previous year, such changes

as have occurred being due either to correction of areas previously recorded, or to small additions to or exclusions from reserved forest made for the purpose of providing larger *nistar* areas for villages. Good progress has been made in the Northern Circle as regards the excision of forest areas for purposes of cultivation, but little has been done in the Southern Circle in this direction as yet.

The areas under fire protection amounted to 5,634 square miles, as against 3,870 in 1891-92. The percentage of area successfully protected came to 99, as against 94.

Forest Survey operations were in progress during the year in Raipur, Bhandhara, Balaghat, Jubbulpore and Narsinghpur; while the Survey of India party was at work in Nimar.

The forest income during the year was Rs. 14,48,508, against Rs. 13,59,890 in 1891-92; and the expenditure rose from Rs. 8,03,916 in that year to Rs. 9,79,590. As the figures for the current year are for the 15 months ending on 30th June 1893, no real comparison is possible. For the financial year 1892-93, however, the figures for receipts are Rs. 6,19,873 in the Northern Circle and Rs. 6,10,981 in the Southern Circle, as against Rs. 6,69,720, and Rs. 6,90,179 in the previous year. The falling off is ascribed in the Northern Circle to the effect of the new grazing rules and to the fact that no timber was removed by departmental agency; while in the Southern Circle it is said that intending purchasers of forest produce hung back in the belief that there would be a further lowering of forest rates.

Among the most important administrative changes made during the year were the inauguration of a Provincial Working Scheme in anticipation of the elaboration of a regular Working-Plan, and the reduction of grazing rates, coupled with the abolition of the distinction between forest and forest in respect of grazing.

A Working-Plans officer was employed in the Southern Circle during the year, but no Working-Plan has as yet been sanctioned in this or in the Northern Circle. Several plans were submitted to the Conservator of the latter Circle, but were found defective. A proposal to appoint a junior officer in each Forest Division as special Working-Plans officer has been recently approved by the Chief Commissioner. In the Northern Circle 248 village supply Coppice-working Circles have been opened, their boundaries defined and coupes for the forward fellings of 1893-94 marked off. A considerable amount of valuation fellings has also been done departmentally with a view to gaining a more accurate knowledge of the average outturn per acre of forest.

41. The total imports of the year amounted to 77½ lakhs maunds valued at 406½ lakhs rupees, and the exports to 170 lakhs maunds of the value of 609 lakhs rupees. Imports have been increasing steadily during the past three years. Exports, consisting as they do mainly of raw produce, vary very much with fluctuations of season. The opening up, however, of the Chhattisgarh country by the Bengal-Nagpur Railway has produced an increase, in 1891-92 and 1892-93, of 54 and 41 lakhs maunds of exports. Owing to the continuous rise in agricultural prices the value of the export trade has at the same time increased very largely. The coal traffic has expanded and the trade in iron and in kerosine oil shows a remarkable growth. Contrary to common opinion, the export of cotton has been increasing, the statistics disproving the idea that the extended cultivation

Trade.

of short-stapled cotton is lessening the demand for Central Provinces produce. The extension of the Bengal-Nagpur Railway to Calcutta has not as yet diverted any part of the Chhattisgarh wheat trade from Bombay, although the Chhattisgarh districts lie well to the Calcutta side of the midway point. The export of rice is now second only to the wheat trade and during the year under report represented a value of over a crore of rupees. Half of the rice exported was consigned to Bombay, Calcutta receiving about a sixth. The internal trade of the Provinces was considerably in excess of that of the year preceding. The export of Nagpur Mill-made cotton goods to Chhattisgarh accounted for 18¾ lakhs rupees, and the traffic in rice from Chhattisgarh was valued at 19¾ lakhs rupees.

Public Works.

42. The expenditure on public works was only slightly in excess of the previous year's total. The new Law Courts were commenced in May 1892, and by the close of the year two-thirds of the work had been finished. Since the close of the year the work has been completed, and the building was opened by the Chief Commissioner in August last. Accommodation has been provided in the building for the Courts of the Judicial Commissioner, Commissioner and Sessions Judge, and the offices of the Commissioner of Settlements and Agriculture, the Conservator of Forests, and the Inspector of Education, Southern Circle. Additions and alterations were also made during the year to the District Courts of Nagpur, Seoni, Khandwa, Hoshangabad, Raipur and Bilaspur.

The outlay during the year on "Original Works—Communications" was chiefly incurred on the establishing of the Plateau Roads Division—having its head-quarters at Chhindwara. This Division was formed for the purpose of carrying out extensions and improvements in the system of roads connecting the Sadar Station of Betul, Chhindwara, Seoni, Balaghat and Mandla, between which there has hitherto been no direct communication.

The Balram Dass Water-Works in the Feudatory State of Nandgaon were completed, the commencement of which had been formally inaugurated by the Chief Commissioner on the 10th December 1892.

There was a falling off in the total output from the Warora Colliery of 5,751 tons. The decrease is ascribed to the reduction in the demand by the Great Indian Peninsula Railway Company.

The output from the Umaria Colliery exceeded the demand, the balance in coal remaining at the end of the year amounting to 8,354 tons.

Revenue and Finance.

43. Passing finally to the subject of Revenue and Finance it is to be noted that the Provincial Revenue of the year was Rs. 55,66,094, as against Rs. 81,87,791 in 1891-92. This apparent diminution is partly due to the fact that under the terms of the last Provincial contract the land revenue was wholly Provincial, and a contribution to Imperial revenues, fixed for each year of the contract, was deducted from the gross amount of land revenue credited as the Imperial share. Under the terms of the new contract, however, which came into force on the 1st April 1892, only one-fourth of the land revenue is Provincial, and a lump assignment of Rs. 22,05,000 is made from Imperial to Provincial revenues. Inter-Provincial adjustments are also discontinued under the new contract. After adding the lump assignment of Rs. 22,05,000 to Land Revenue and excluding the contributions to and from Local revenues, the actual Provincial revenue and expenditure of the year 1892-93 amounted to Rs. 77,71,094 and Rs. 79,07,669 respectively, as compared with Rs. 81,87,791 and Rs. 79,44,014

for the year 1891-92. The decrease in revenue was partly due to a falling off of over Rs. 64,000 in Forest revenues, principally owing to the unseasonable weather, which prevented people from resorting to the forest during the carting season. Receipts under the head "Education" were smaller by Rs. 65,000, owing to the transfer of a number of schools within municipal limits to municipal management and also to the discontinuance of the sale of books at the Government Book Depôt on its transfer to private agency. Jails showed a decrease of nearly Rs. 21,000, mainly due to the abolition of the School of Industry.

Expenditure fell by a little over Rs. 36,000; an increase under Land Revenue, Forest, Stamps, General Administration and Police being counterbalanced by a decrease of 2½ lakhs under the Public Works Department. The increase under Land Revenue is chiefly owing to greater expenditure on Settlement operations, the cost of which varies from year to year. The increase under Police is due to re-organization of the District Police, which came into effect from the 1st May 1892. Other smaller increases which occurred arose from the revised adjustment of revenue and expenditure under the terms of the new contract.

The final outcome of the year's transactions is that the Provincial balance has decreased from Rs. 20,54,339 on the 1st April 1892 to Rs. 18,32,006 on the 31st March 1893. It is still upwards of 10 lakhs in excess of the minimum fixed by the Government of India.

Excise.

44. The net revenue in the Excise Department shows a small increase during 1892-93 compared with the increase in the previous year, which amounted to over Rs. 1,10,000 over the net revenue of 1890-91. This diminished increase seems to indicate that the culminating point has been reached. The rise in the receipts from country liquor continued in spite of the closing of 32 stills and 90 shops, and was accompanied by the introduction of a much stricter control over the manufacture and sale of country liquor in the Nimar District by the introduction of the bonded warehouse system of issuing spirits from bond on payment of duty according to strength. This system has since the close of the year been introduced into the Nagpur District, and preparations are being made to introduce it into other selected districts with effect from the 1st April 1894.

Special enquiries were made throughout the Province as to whether the use of ganja was supplanting that of country liquor or opium. The amount of ganja sold during the year under review has increased from 1,156 maunds to 1,194 maunds, but receipts from country liquor have expanded to a greater extent than those from ganja, and the classes of people who use ganja and opium, respectively, are, in these Provinces, it is said, distinct from one another and are not recruited from each other's ranks. The apparent reason for the increase in ganja consumption is the growing use of the Government drug in the large zamindari and feudatory areas of Chhattisgarh and the more effective check placed on smuggling in some of the Khalsa districts.

Stamps.

45. The gross receipts from Stamp Revenue in 1892-93 differed by only Rs. 4,708, or less than 1 per cent., from those of the previous year. Such slight falling off as occurred was due to diminished receipts from judicial stamps, the income under which head during 1891-92 was, owing to the Courts having been open throughout the year, unusually large. The total is still, however, considerably larger than in 1890-91 or any of the three preceding years. The increased

activity which was noticed last year in enforcing the provisions of the Stamp Act was not maintained in 1892-93, the number of documents impounded being only 558 as compared with 918 in 1891-92.

Registration.

46. The gross income of the Registration Department was Rs. 1,12,129, as against Rs. 1,10,986 in the previous year. The number of Registration Offices increased by two, and the total number of registrations rose from 29,790 to 31,103, the increase being spread over all districts except five. The class of special salaried Sub-Registrars is slowly but steadily replacing the class of *ex-officio* Sub-Registrars, and wherever the change is introduced an improvement in work and income usually follows. Six more Sub-Registrars of the former class were appointed during the year.

NAGPUR:
The 10th February 1894.

Secretariat Press, Nagpur:—15-2-94—325.

PART II.

CHAPTER I.—PHYSICAL AND POLITICAL GEOGRAPHY, &c.

1.—Physical features of the country, area, climate and chief staples.

1. The Central Provinces lie between the 18th and the 25th degree of north latitude, and extend from the 76th to the 86th degree of east longitude; they stretch from Bundelkhand to the north to the Madras Presidency in the south, from the frontier of Bengal in the east to independent Malwa and to the Deccan in the west; the extreme length from north to south is 500 miles, and the breadth from east to west 600 miles. Their area is 115,936 square miles, of which 86,501 are purely British territory, and the remainder the territory of dependent Native Chiefs. Of the ancient divisions of India, they comprise portions of Hindustan and Malwa, and nearly the whole of Gondwana, but include no portion of the Deccan proper. They are bounded on the north by the independent States of Bundelkhand, of which the principal are Tehri and Panna; on the west and north-west by the British district of Chanderi Lalatpur belonging to the North-Western Provinces, by Bhopal, by Holkar's territory and Khandesh, by Berar and the Nizam's dominions; on the south and south-east by the Nizam's dominions, and by the Madras district of Rajamandri; on the east by the Jeypur Chiefship under Madras jurisdiction, by those portions of Bengal known as the Tributary Mahals and by the Rewa State. The Central Provinces therefore occupy a vast tract of country in the centre of the Peninsula. They are enclosed on nearly every side by foreign territory and are cut off geographically from other British Provinces.

2. Geographically the Provinces are divided into two parts by the Satpura range of hills that runs south of the Nerbudda river from east to west. The range embraces within itself considerable tracts of table land which have been formed into districts, and speaking generally the Province is divided into districts north of the Satpuras, districts on the Satpura plateaus, and districts south of the Satpuras. Commencing at the lofty plateau of Amarkantak, the range extends westwards as far as the Western Coast. From Amarkantak an outer ridge runs south-west for about one hundred miles to a point known as the Saletekri hills in the Balaghat district, thus forming, as it were, the head of the range, which, narrowing as it proceeds westward from a broad tableland to two parallel ridges bounding on either side the valley of the Tapti, ends, so far as this Province is concerned, at the famous hill fortress of Asirgarh. Beyond this point the Raj Pipla hills, which separate the valley of the Nerbudda from that of the Tapti, complete the chain as far as the Western Ghats. The mean elevation of the range is about 2,500 feet above the sea, but many of the peaks and some of the tablelands have an elevation of more than 3,500 feet. The plateaus of Amarkantak and Chauradadar in the easterly Mandla district rise to a height of nearly 3,500 feet, the height of the hill of Khamla in the Betul district in the west of the Province is 3,700 feet; the general height

of the Chikalda hills overlooking the Berar plain still further to the west, is estimated at 3,700 feet; and the Pachmarhi hills east of Betul rising abruptly from the Nerbudda valley culminate in Dhupgarh at an elevation of 4,500 feet. Just east of Asirgarh there is a break in the range, through which the Railway from Bombay to Jubbulpore and the road to Central India pass, at which the elevation is not more than 1,240 feet above the sea. West of Asirgarh the range is continued through Khandesh to the Western Ghats by a belt of mountainous country, 40 to 50 miles in breadth, at an average height at the crest of the chain of but a little under 2,000 feet above the sea, while many peaks rise above 3,000 feet, and some as high as 4,000 feet. The whole length of the range is scarcely less than 600 miles, while the breadth diminishes from 100 miles at its head across Balaghat and Mandla to the narrow ridges of Nimar. On the tablelands of this range east of Asirgarh lie the districts of Betul, Chhindwara, Seoni, Balaghat and Mandla.

North of the range, low hills, offshoots of the Satpuras, form the south-eastern boundary of the Jubbulpore district and stretching northward approach the Kaimur hills, which with the Bhanrer hills—both branches of the Vindhyan range—bound Jubbulpore to the north and west and form the eastern scarp of the plateau on which lie the districts of Damoh and Saugor, the most northerly in the Province. These ranges attain a height of 2,500 feet.

Extending eastward from Amarkantak to within a few miles of the Eastern Coast a succession of ranges of mountains, which are offshoots of the Vindhyan chain, separate the Sambalpur plain, the most easterly portion of the Central Provinces, from Chota Nagpur.

To the south the Province is shut in by the wide mountainous tract which stretches from the Bay of Bengal through Bastar to the Godavari, and west of that river is continued onward to the rocky ridges and plateaus of Khandesh by a succession of ranges that enclose the plain of Berar along its southern border.

3. The plain country of the Province lies in two great divisions to the north and south of the great central range of mountains. North of the Satpuras we have the rich valley of the Nerbudda, which may be said to commence towards the north of the Jubbulpore district, and to extend westward through the district of Narsinghpur as far as the western limit of Hoshangabad, a distance of nearly 300 miles. The elevation of the valley above the sea falls from 1,400 feet at Jubbulpore to 1,120 at Hoshangabad. In breadth it is about 30 miles, extending between the Satpuras and the southern scarp of the Vindhyas. This great plain, 10,613 square miles in extent, contains for the most part land of the greatest fertility cultivated with wheat, cotton and sugar-cane. The continuation of the valley west of Hoshangabad forms the northern portion of the district of Nimar, the further limit of which touches the Khandesh district of the Bombay Presidency. Towards the river, though rich in parts, the tract of country is wild and desolate, but nearer the base of the hill range the country forms itself into a large natural basin of fertile land which is highly cultivated.

South of the Satpuras and of the ranges that run eastward towards the Bay of Bengal and complete the central chain of mountains, we have first, beginning from the east, Sambalpur, which with all its Native States and Zamindaris extends over an area of 16,000 square miles, and may be considered

the central basin of the Mahanadi. Separated from Sambalpur by ranges of hills running southward from the central chain lies the great plain of Chhattisgarh at a mean elevation above the sea of 1,000 feet; it has an area of 24,000 square miles and forms the upper basin of the Mahanadi. Further to the west, and again divided off by hills, is the great plain of Nagpur, extending over 24,000 square miles. Its general surface inclines towards the south from 1,000 feet above the sea at Nagpur to 750 feet at Chanda.

4. The principal rivers which, with their tributaries, drain this wide region, are the Nerbudda, the Mahanadi, the Waingangа and the Wardha.

The Nerbudda, rising in the high tableland of Amarkantak, for the first two hundred miles of its course winds among the Mandla hills, which form the head of the Satpura range; then, at Jubbulpore, passing through the rocky gorge known as the "marble rocks," it enters its proper valley between the Vindhyan and Satpura ranges; and, bordered closely by them the whole way, pursues a nearly direct westerly course for 500 miles to the Gulf of Cambay. It receives the whole drainage of the northern slopes of the Satpuras, the watershed of the Vindhyan tableland which bounds its valley to the north being almost entirely northward. Confined in a narrow valley between two ranges of hills, the Nerbudda presents the general characteristics of a mountain stream. From the great declivity of its bed and the nature of its tributaries it has no great depth of water excepting in the monsoon, and it is almost everywhere fordable in the hot weather. It flows between lofty banks from 40 to 100 feet in height, in some places formed of rock, in others of deep alluvial deposit. Its bed along the greater part of its length is a sheet of basalt, seldom exceeding 150 yards in width, which has been upheaved in ridges which cross it diagonally. These elevations occur every few miles, and cause natural barriers, above which the water remains in pools more or less deep, but in which the current is slack in the dry weather. The feeders of the Nerbudda are numerous, but they are all mountain torrents, rising in the neighbouring hills and having short courses; comparatively few retain a running stream throughout the year, and by far the greater number present in the hot weather only a succession of stagnant pools.

The Mahanadi rises in the wild mountains of Bastar that close in the Chhattisgarh plain to the south. In the first part of its course, taking a northerly direction, it drains the eastern portion of that plain; then a little above Seorinarain it receives the waters which its first great affluent, the Seonath, has collected from the western portion of the plain; thence flowing for a while due eastward, its stream is augmented by the drainage of the hills of Uprora, Korba, and the ranges that separate Sambalpur from Chota Nagpur. At Padampur it turns towards the south, and, struggling through masses of rock, flows past the town of Sambalpur to Sonpur. In this section of its course it is joined by several tributaries which drain the plain of Sambalpur and the mountainous country to the south. From Sonpur it pursues a tortuous course among ridges and rocky crags towards the range of the Eastern ghat mountains, which it pierces by a gorge 40 miles in length. Emerging from the hills, it expands its bed and spreads itself over sands till it reaches Cuttack, where the delta commences by which its waters find their way into the Bay of Bengal. In the upper part of its course, in the districts of Raipur and Bilaspur, it has a broad sandy bed, but in its course through the Sambalpur territory it is more confined among rocks. A mighty river in the rains, and navigable, as far as Seorinarain,

for a few weeks after they have ceased, its stream falls rapidly, and in the hot months becomes fordable every few miles of its course within the bounds of this Province.

The Wainganga, rising in the Seoni plateau, winds among the hills of the central portion of that district towards its eastern border. A few miles east of Keolari it receives the Thanwar, and then turning southward, it emerges by a rocky gorge into the Nagpur plain, and continues its course due south through the Balaghat district; then traversing the districts of Bhandara and Chanda, it joins the Wardha fifty miles below the town of Chanda. It, with its affluents, drains the southern slopes of the Satpuras west of Mandla as far as the plateau of Multai, and also the greater part of the Nagpur plain. In the Seoni and Balaghat districts, its bed is a continuous sheet of basalt containing water in deep pools separated by broad basaltic barriers, in the indentations of which the divided stream trickles in the hot weather. In its course through the Nagpur plain it receives many large affluents, and flows for the most part over a broad sandy bed, interrupted here and there by rocky barriers. Its whole length, from its source to its junction with the Wardha, is about 350 miles. In the rains it is navigable for nearly two hundred miles of its course, but in the hot weather is almost everywhere fordable.

The Wardha, rising in the Satpuras between Nagpur and Betul, some seventy miles north-west of the former town, and flowing south-east, separates the districts of Nagpur, Wardha and Chanda from Berar and the Nizam's dominions. Its first great affluent is the Painganga, which drains the eastern and southern portions of the plain of Berar; this it receives a little above the town of Chanda, one hundred and ninety miles from its source. Sixty-four miles lower down it joins the Wainganga, and the united stream, flowing onward in the same direction for sixty miles under the name of the Pranhita, falls into the Godavari at Sironcha. Through the whole of its course above its junction with the Painganga the Wardha flows in a deep and rocky bed. In the monsoon it becomes a furious torrent, but in the hot months, in the upper part of its course, it retains little more than a succession of nearly stagnant pools, and is everywhere fordable.

This description of the four great rivers of the Province shows the rapid drainage of the country. All of them receive the drainage of immense areas, and have a course of several hundreds of miles; they are navigable for long distances during the rains; but their sources and the greater part of their catchment basins lie at a great elevation above the sea. The surface of a great part of the country through which they flow is rocky, and the fall towards the sea rapid, and they all flow in deep beds many feet below the level of the country which they drain. As, ordinarily, no rain sufficient to affect the water-supply falls between the cessation of one rainy season and the commencement of another, the streams annually run very low; even the large rivers become everywhere fordable, while the rivers of secondary magnitude are reduced to rivulets flowing in the middle of broad belts of sand or trickling over masses of rock.

5. Generally, the Central Provinces may be said to be a mountainous country in which hill and plain, plateau and valley alternate with each other. The northern districts which rest upon the Vindhyan range form a hilly and undulating country; to the south comes the Nerbudda valley between the Vindhyan and Satpura ranges, with hills always in view; then the Satpuras with their wide

plateaus, and to the south of them the Nagpur and Chhattisgarh plains separated from each other by hills and bounded by hill and forest in the south.

The slopes on both sides of the great central range of hills are covered with dense forest, and wide tracts of forest occur in the plain country south of the range; in fact there is not a district of the Province which has not many thousands of its acres covered by jungle and forest. On the other hand, in many parts of the Province the absence of trees forms a characteristic feature of the scenery. In the wide central area of the Chhattisgarh plain, or the uplands of the Satpuras, and over a great part of the Wardha valley, there is often scarcely a tree to be seen for miles.

6. The geological formation of the country presents very great variety, and can hardly be described without going into great detail; but it may be said, generally, that the superficial stratum covering the great Satpura range is trappean, though in parts of Balaghat, Seoni, Chhindwara and Betul crystalline rocks are uppermost, and over the Pachmarhi hills the sandstone also is uncovered. The Nerbudda valley contains a deep deposit of alluvium. North of the Nerbudda, trap again prevails over the Saugor district, while over the district of Damoh and the northern part of Jubbulpore are found the Vindhyan series of hard sandstone, limestone and shale. To the north-east of Jubbulpore and south of Rewa there is a strip of the coal-bearing series of sandstone, and these appear again in Korba to the north-east of Chhattisgarh. South of the great central range the crystalline rocks prevail in Sambalpur. The Vindhyan series underlie 12,000 square miles of the plain of Chhattisgarh, where they are mostly covered by deep beds of laterite. To the west of this, in the district of Bhandara and the northern part of Chanda, the crystalline rocks prevail, while to the south of Chanda and extending for some distance into Berar the coal-bearing series are again found. Over the western part of the plain of Nagpur and the greater part of Berar overflowing trap forms the superficial rock.

7. The climate, soil and cultivation vary greatly in different portions of the Province; and for purposes of description it is necessary to group the Provincial area in the following main physical divisions:—

Physical Division.		*Districts included.*
(1) The Vindhyan Division	...	Saugor and Damoh.
(2) The Nerbudda Valley	...	Jubbulpore, Narsinghpur and Hoshangabad.
(3) The Tapti Valley	...	Nimar.
(4) The Satpura districts	...	Mandla, Seoni, Chhindwara and Betul.
(5) The Nagpur plain	...	Wardha, Nagpur, Chanda, Bhandara and Balaghat.
(6) Chhattisgarh	...	Raipur and Bilaspur.
(7) The Uriya country	...	Sambalpur.

8. *Vindhyan Division.*—The Vindhyan division covers about a sixteenth part of the total area of the Province, and next to the Nerbudda valley it contains the largest proportion of cultivation. The climate of both Saugor and Damoh is salubrious, and the temperature is lower than in the districts of the Nerbudda valley. The staple crop of this part of the country is wheat, which in Saugor is grown in 59 per cent. of the cultivated area, and in Damoh in 43 per cent. Gram and other food-grains are extensively produced.

9. *The Nerbudda Valley.*—This valley is, perhaps, the most fertile tract in the Province; it has been described as in the cold weather "green from end to end with wheat." This is its staple product, more specially in Jubbulpore and Hoshangabad, where 46 and 57 per cent. respectively of the cultivated area is under wheat. In Jubbulpore there is also a considerable amount of rice cultivation and gram, and other food-grains as well as oil-seeds are extensively grown. Narsinghpur produces, besides wheat, sugarcane, cotton, gram, and the minor cereals; in Hoshangabad the crops are similar, but amongst oil-seeds, til is largely cultivated. Jubbulpore, from its elevated situation, has a generally lower temperature and more salubrious climate than either Narsinghpur or Hoshangabad; all three districts enjoy a regular rainfall.

10. *Nimar.*—The northern part of this district is much broken by low irregular hills, and is in consequence sparsely cultivated. The southern part, in the Tapti valley, is more open and cultivated, especially towards the west, where commences the rich alluvial plain that stretches into Khandesh. The rainfall is considerably lighter than further up the Nerbudda. The heat in the valleys of the Tapti and Nerbudda is severe during April and May; but at other seasons the air is cool and clear, and the climate salubrious, except in the jungle parts which are malarious during the latter part of the year. The chief crops grown in Nimar are juar and other cereals; they are for the most part kharif or monsoon crops, the lighter soil of the district being less adapted for the growing of winter wheat than the richer lands of the higher Nerbudda valley. Cotton and til occupy 18 and 9 per cent. of the cultivated area respectively.

11. *The Satpura Districts.*—Of these the most northerly is Mandla, which may be described as a mountainous tract comprising the valleys of many rivers. These valleys are extremely rich, containing frequently large tracts of fine black soil, but the inaccessibility of the country and its known unhealthiness have somewhat deterred settlers from entering the district. The population is largely aboriginal, and a great part of the cultivation is of the rudest possible description. The main crops are wheat, rice, kodo, kudki and other grains. Five-sixths of the area of the district is waste and forest land. South-west of Mandla lies the district of Seoni, consisting to a great extent of finely-cultivated plateaus and fertile valleys. The tablelands of Seoni and Lakhnadon have a varying height of from 1,800 to 2,200 feet; they are well cultivated, clear of jungle, and their temperature is always moderate. The soil of two-thirds of the cultivated area of the district, including all the loftier plateaus, is black soil; towards the south the surface contains a large proportion of clay, and rice is the crop mostly grown; but in the rest of the district the chief produce is wheat. Other cereals and pulses are also grown in large quantities; they represent about a third of the total cultivation of the district. To the east of Seoni comes the Chhindwara district. It has two distinct natural sub-divisions, the hill country above the slope of the Satpuras and a tract of low land beneath them to the south. The north of the district is occupied by zamindaris covering an area of 1,597 square miles; the whole of this part is mountainous and very sparsely cultivated. The remainder of the part above the ghats consists of a regular succession of hill and fertile valley, formed by the small ranges which cross its surface in a general direction east and west. The slopes of the Satpuras which intervene between the highlands and lowlands of the district are for the most part

covered with forest; below them lies a well-cultivated tract resembling the plain of Nagpur and Berar, on which it borders. The climate above the ghats is temperate and healthy, the elevation being in parts very considerable. The highest uplands are 2,500 feet above sea-level, but there are many points much higher; Chhindwara on the second level is 2,200 feet, and the third step above the ghats is about 1,900 feet, or 800 feet above Nagpur. The crops grown are wheat, juar and other grains; cotton occupies 9 and oil-seeds 14 per cent. of the cultivated area. Betul comprises the western part of the Satpura plateau. The district has a mean elevation of 2,000 feet and possesses in the open and cultivated parts a salubrious climate: but in the denser jungles malaria is prevalent after the rains. The richest tract is the part in which the chief town of Betul stands. To the south lies an undulating plateau, extending over the whole of the southern face of the district, and finally merging into the wild and broken line of ghats, which lead down to the lower country of the plains. To the north and west the country is poor and little cultivated, the western portion specially being a mass of hill and jungle inhabited by Gonds and Korkus. The principal agricultural staples of the district are wheat and pulses, but sugarcane is also an important product. The large proportion of "other crops" shown in the statement is due mainly to the great extent of area entered in the agricultural returns as under fodder crops.

Of the Satpura country the best part has been seen to be the open tablelands of Seoni, Chhindwara and Betul. Of the rest the greater portion consists of hill and forest, and the population, except in the richer valleys, is scanty and backward. The combined area of the hill districts is 16,708 square miles, or one-seventh of the area of the Province.

12. *The Nagpur plain.* The extreme western portion of this Maratha country, comprising the northern part of Wardha and the western part of Nagpur, is broken and hilly, being intersected by spurs running out from the range of the Satpuras. The surface of these hills is in general rugged and stony, but the valleys and lowlands intersecting and adjoining them are extremely fertile and are rich with corn and garden cultivation. Further down the Wardha valley, along the left bank of the river, lies a rich cotton-producing country, comprising the whole southern portion of the Wardha district, and extending east across the border of Nagpur and south into the north-west corner of Chanda. Of the whole cultivated area of Wardha, a third is sown with cotton, the other chief crops being juar, wheat and linseed, comprising a fourth, a fifth, and a seventh respectively of the total cultivation of the district. Next to Wardha comes the district of Nagpur. Hilly in the north and west, the centre and east of the district is a vast cultivated expanse; even here, however, its surface is hardly ever level, low detached hills and ridges jutting up in places above the plain. The drainage of this tract finds its way into the Wainganga, while the streams that drain the more broken country to the west of the district run to the Wardha. The mean elevation above the sea of the plain country is 1,000 feet in its central portion, lessening to below 900 feet towards the Wardha and Wainganga. The prevailing soil of the Nagpur district is the black cotton soil; and the principal crops grown are wheat, occupying 30 per cent., juar 25, cotton 12, linseed 10, and other grains and pulses 10 per cent., of the cultivated area. In point of climate, Nagpur and Wardha resemble one another; Nagpur, as will be seen, receives a slightly higher rainfall. The cold of the winter season is never severe, and in the hot weather, which lasts from April until

about the middle of June, the heat during the day is excessive; the mean temperature is therefore higher than in many other parts of India of the same height above the sea-level, but the climate of the districts is not considered unhealthy.

Passing east into the district of Bhandara in the valley of the Wainganga, we enter what has been called the Lake region of Nagpur. The surface of the district is diversified; in the west and north-west it is comparatively open, but in the interior the low country is crossed by several small ranges, branches of the Satpuras, running generally in a southerly direction and thickly covered with forest. To the east lies a belt of hill and jungle which, fringing the open lands of Chhattisgarh, separates the valley of the Mahanadi from the basin of the Godavari and its affluents. Lakes and tanks are numerous all through the district, but the chief exist in the southern tracts, scattered about wherever spurs of ranges, slopes, streams, or even inequalities of the ground render their formation possible. With the extensive irrigation thus available, the staple produce of the country is rice, with which 53 per cent. of the cultivated area is sown. Other crops are wheat, gram, and other cereals, besides linseed and sugarcane. The open country to the west of the Wainganga is comparatively healthy, but to the south and east fever prevails during the closing months of the year, as might be expected in a damp country where the numerous hills and rivers attract rain, where the jungles are still extensive, and where so much of the area is down with rice cultivation. To the north of Bhandara is situated the district of Balaghat, containing two well-marked natural divisions, the first forming the eastern part of the central plateau of the Satpuras, the second consisting of a rich lowland tract lying along the south of the district in the valley of the Wainganga. The first of these tracts is a vast undulating tableland broken into numerous valleys by irregular ranges of hills. The general height of these valleys is about 800 or 900 feet above the plains below and nearly 2,000 feet above the sea. By far the greater part of these highlands is covered with dense jungle, and there is a sparse population, consisting largely of Gonds and Baigas. The lowland portion of Balaghat is a fertile well-watered country, closely resembling the district of Bhandara which it adjoins. Rice is the principal product. Malaria is rife in the upland parts of the district for a considerable portion of the year.

The fifth and largest of the districts of the Nagpur plain is Chanda, covering an area of 10,749 square miles. Except in the extreme west, hills are thickly dotted over the whole face of the country, sometimes in detached ranges, sometimes rising isolated from the plain; east of the Wainganga they increase in height and form a broad tableland some 2,000 feet above the sea at the highest point. The district is thickly wooded. The soil over the greater portion of Chanda is red or sandy; as the Wardha and Wainganga are neared it changes to belts of heavy black loam and of yellow loam on the left bank of the Pranhita. Rice is the chief product, more especially in the southern part of the district; wheat, juar, cotton and pulses are also grown. The climate differs little from that of the Nagpur country, but in the fall of the year fever of a malarious type is prevalent all over the district.

The Nagpur plain may be looked upon as containing two well-defined tracts: the first, comprising the districts of Wardha, Nagpur and the north-west corner of Chanda, being essentially a dry crop country; while Bhandara,

Balaghat and the remainder of Chanda, which form the second tract, are in the main rice-producing.

13. *Chhattisgarh.*—The sixth division of the Province is the plain of Chhattisgarh, forming the upper basin of the Mahanadi and its tributaries. The whole of this tract is surrounded by ranges of hills, offshoots of the great central chain which, in the extensive zamindaris of Bilaspur, skirts the plain country on the north. Below the hills to the west and south there is a broad belt of fertile black soil, embracing the western portion of the Bilaspur district, the Feudatory States of Kawardha, Chhuikhadan, Khairagarh and Nandgaon, and the southern border of Raipur. The centre of Chhattisgarh is an undulating cultivated plain intersected by numerous streams and copiously supplied with tanks. In this tract lies the greater portion of the khalsa or Government lands of the Raipur and Bilaspur districts. The Mahanadi flows along its eastern border, pursuing a north-easterly direction; on the right bank the hills come close to the stream, leaving but a small share of fertile plain between them and the river. Further to the east the whole country, comprising the southern and eastern zamindaris of Raipur, is hilly and covered with jungle. South of the Chhattisgarh plain lie the Feudatory States of Kankar and Bastar, both of them mountainous and sparsely inhabited by aboriginal races. The best parts of the latter dependency are those to the north-east and south-west, where the country is less hilly than in the north and centre. Of the immense tract that has just been described, covering an area of 37,448 square miles, it is only the great central plain that is thickly peopled and highly cultivated. The combined area of the districts of Raipur and Bilaspur—omitting the Raipur and Bilaspur tahsil zamindaris—and of the five States of Nandgaon, Khairagarh, Chhuikhadan, Kawardha and Sakti, which form the central plain, amounts to 15,514 square miles, out of which 7,410, or about 47·8 per cent., are under cultivation. Rice is the staple produce of the greater part of the country, but wheat, kodo and other food-grains and pulses are also grown. Linseed is another important staple; cotton is confined to the black soil tract to the west of Chhattisgarh, but its cultivation has of late years decreased, the little of it that is produced coming chiefly from the Native States. The average rainfall is 51 inches in Raipur and 46 in Bilaspur. The hills encircling the country generally ensure an adequate or nearly adequate supply of water, which is readily stored in the numberless tanks which are scattered over Chhattisgarh, so that a season of scarcity is very seldom known. Cholera and fever are the great scourges of the plain, the former frequently occurring in the hot weather, while fever is very prevalent towards the close of the rains. In the great hill tracts to the north and south the malaria at this season is of a virulent type.

14. *The Uria Country.*—The last division of the Province occupies the basin of the Central Mahanadi and of the streams which, taking their rise in the hilly barrier which separates the Uria country from Chhattisgarh, flow east into the main river. In the north-west corner of the tract, on the left bank of the Mahanadi, lies the Native State of Raigarh; the southern portion towards the river is fertile and well cultivated, but the northern and eastern parts are a mass of hill and jungle. Across the Mahanadi is Sarangarh; the State, except in the south and east, is generally level and well cultivated. Lower down the river, which divides it in two, lies the district of Sambalpur, the greater part of which is an undulating plain, out of which in places rise low ranges of hills. More than half the area of Sambalpur is occupied by zamindaris, the most important

of which, Borasambhar and Phuljhar, situated on its eastern border, contain large tracts of forest. The khalsa is generally well cultivated, more especially in the portion that lies to the south of the Mahanadi: the jungle has been almost completely cleared, and the country presents a well-settled appearance. Leaving Sambalpur the Mahanadi enters Sonpur, rather more than half of which is situated on its right or southern bank. The surface of the State is for the most part flat, and more than three-fifths of the total area is under cultivation. The north-eastern corner of the Uria country is occupied by the States of Bamra and Rairakhol. The southern portion of the Bamra State is covered with hill and forest, but in the north-west and centre the land is fertile and well cultivated. To the south of Sambalpur, situated in the valley of the Tel, a tributary of the Mahanadi, are the important States of Patna and Kalahandi. In both there are extensive level tracts, but a large proportion of the land is waste, the wildest part being the eastern half of Kalahandi, which lies along the range of the Eastern Ghats. Throughout the country which has been described the main crop grown is rice; in the khalsa portion of Sambalpur, for which alone returns are available, it occupies more than three-fourths of the total cultivated land. On the higher grounds, pulses, til and cotton are grown. Sambalpur possesses an abundant rainfall, the registered average being the highest in the Province. The Uria country has the reputation of being unhealthy; fever is prevalent from September to November, and, as in Chhattisgarh, cholera frequently makes its appearance.

2.—*Historical Summary.*

15. The early history of the Central Provinces would be the history of Gondwana, of the tribes who peopled India before the Aryans effected any settlement therein; but hemmed in all sides by mountain ranges and deep forests it is not wonderful that until comparatively modern times this central part of the Peninsula should have remained isolated from the rest of India. The Ramayana represents the hero Rama traversing the dense forest covering the interior of the Peninsula, and numerous are the places in the Central Provinces identified with the wanderings of Rama and Sita: but we cannot treat local legends as history, and early Hindu scriptures have nothing to tell of Gondwana. At a remote period, however, various Rajput races established themselves in certain localities and must have founded kingdoms of some importance. Thus the Haihayas, the Pramaras, and the Chauhans all claim to have ruled over the Nerbudda Valley. The claim of the first two rests on something more than mere assertion, for the Pramara kingdom of Malwa is well known, and there is sufficient probability that it extended over the Nerbudda Valley between the 11th and 13th centuries; the Haihayas must have preceded them and have been replaced by them. Another branch of the Haihaya Rajputs ruled at Ratanpur in Chhattisgarh until overthrown by the Marathas in the 18th century. To the south of the Satpura range a branch of the Pramaras established itself for a time at least somewhere in the present Nagpur Province at the period when the Haihayas were at Jubbulpore. Lastly, a Yavana dynasty is said to have made itself strong on the Seoni plateau of the Satpuras at a period antecedent even to that of the Rajput races mentioned above. But, after all, a few inscriptions and ancient ruins are all we have to go upon, and they afford but scanty material for re-constructing the past. Whether these kingdoms were simply military

kingdoms, established over an inferior race by a few adventurous conquerors, or whether they were the first results of a movement pushing the Aryan races to the south and east, because their borders had become too strait for them, it seems clear that the conquerors were swallowed up by the conquered, and that the lower race assimilated to itself the superior element, for as time goes on certain Gond kingdoms replace all other dynasties and divide between them the whole of Gondwana.

16. Until then it must be supposed that the Gonds remained divided into a large number of sects and clans each under its petty Chief: but in the history of all nations there comes a time when clans are merged in a nation and patriarchal rule is replaced by kingly power. This period set in for the Gonds about the 15th or 16th century. It was in the 16th century that the Chief of Garha Mandla extended his dominion so as to include Saugor and Damoh on the Vindhyan plateau, Jubbulpore, Narsinghpur and Jubbulpore in the Nerbudda Valley and the Seoni portion of the Satpuras. About the same time the Haihaya rulers of Ratanpur step into notice, and a little later the Gond Chiefs of Deogarh in the Satpuras make themselves scarcely less powerful than their brother chieftains of Mandla. The kings of Chanda in the extreme south, and Kherla on the western Satpura plateau, make up the four Gond rulers. It is by some considered doubtful whether the Kherla dynasty, which rose into power sooner than the others, was Gond or not, and their rule at any rate lasted but a short time. Embroiled in wars with the Bahmani kings of the Deccan and the Mohammadan princes of Malwa they ceased to exist before the end of the 15th century. The other kingdoms flourished, or perhaps it may be now correct to say existed, for a longer period. Garha Mandla acknowledged the supremacy of the Moghal Emperors, and Deogarh and Chanda also tendered their submission to the imperial power, but they all remained practically independent, their remoteness and inaccessibility doubtless preventing anything like interference in their affairs. Eventually the Deogarh prince turned Mohammadan, taking his independence, which was threatened, as the reward of his conversion, and it was not till the advent of the Marathas that the Gond rule came to an end.

17. Their rule was of a careless and peaceful nature, and their form of government of a feudal kind. The land was divided among smaller Chiefs, who were bound to maintain a number of followers and accompany the king when he went to war, but under such easy and unambitious princes, the feudal obligations of the subordinate Chiefs were not severe. It was during this period that Hindu immigrants first settled themselves permanently in the Nerbudda valley and in the interior. Coming at first in small numbers they were peaceably received by the Gonds, who readily assigned them lands and leave to cultivate them, and were content with a trifling return in kind. Gradually their numbers were increased by fresh settlers who in time became a formidable body, and before advancing cultivation the Gond Chiefs with their followers retired slowly to the hills and jungles, abandoning their former villages to the Hindu agriculturists. In Deogarh Hindu immigration received direct encouragement from the Gond ruler; and after the Gond prince Bakht Buland turned Mussulman he is said to have tempted Hindu cultivators and artificers to settle among his people by liberal promises and grants of land, and to have employed Mussulmans and Hindus in administering the country. Chanda remained more isolated from this movement, situated as it was in the remote south, but even there

Hindu settlers could not fail to penetrate, though in smaller numbers. In time the new race thus peacefully admitted must have acquired predominance over the inferior and almost stationary Gonds, but the incursions of Marathas brought about in a few years what might have taken many to effect.

18. It must not be supposed that the whole of the present area of the Central Provinces was parcelled out among these Gond Chiefs, and the limits of their kingdoms remained for long fixed or unchanged. The Mohammadan princes and generals settled in Malwa occupied at times some of the finest parts of the Nerbudda valley, chiefly in the Hoshangabad district. It could not but be either that with an Imperial seat of Government at Burhanpur, the country within a considerable radius was entirely under the Imperial Government: but in reality until the Marathas came the Gond kings or petty local Chiefs alternately relaxed and tightened their hold on these territories, and there was no other settled or recognized government.

19. After the Maratha incursions began, the history of the Province is part of the history of the Marathas. Raghoji Bhonsla, the founder of the Bhonsla State, received an order from the Peshwa in 1737, directing him to collect the Chauth of Berar and Gondwana, and in the following year he came to Nagpur, where he found the descendants of Bakht Buland divided against themselves; Wali Shah, an illegitimate son of Bakht Buland, having usurped the supreme power on the death of Chand Sultan, his legitimate brother, to the exclusion of that brother's sons. Raghoji at once took a part in the family war, put Wali Shah to death, and received, as an acknowledgment of his services, several districts on the Wainganga, besides a large sum of money. By 1743 Raghoji had managed to acquire the whole of the Deogarh kingdom, had penetrated into Chhattisgarh and rendered it tributary, and within the next ten years Chhattisgarh and Sambalpur and even Cuttack were added to the Bhonsla State, in which the Chanda kingdom was also merged. Raghoji's successor, Janoji, consolidated the various conquests made by Raghoji, and the two wars in which he was engaged with the Peshwa and the Nizam left his territory undiminished. The next Raja was Raghoji II, whose father, Madhoji, for a time acted as Regent. During his regency, Mandla and the upper Nerbudda valley were nominally added to the Nagpur dominions by a treaty with the Peshwa, and before the century closed Raghoji had acquired Hoshangabad and established himself in the Saugor districts. But the Bhonsla Raja was to suffer a reverse. In 1803 he combined with Scindia to oppose the British, was defeated, and had to cede Cuttack, Sambalpur and Berar, agreeing at the same time to receive a British Resident at his Court. Deogarh, Chhattisgarh, Chanda and the districts on the Nerbudda were all that was left to him. Sambalpur was afterwards restored, only to be ceded again after a few years. During his reign the people fell upon evil days. Under the first Bhonsla Rajas justice was well administered, crimes few, the revenues flourishing, the troops regularly paid and therefore contented, the ryots left to pursue their peaceful occupation; but afterwards, partly during the regency of Madhoji, chiefly under Raghoji II, times changed. The Bhonsla armies had met with reverses. The revenues of the reduced state had fallen from nearly a crore of rupees to sixty lakhs. The Raja would not rest content with his diminished income. He rack-rented the patels and cultivators, put up villages for sale to the highest bidder, withheld the pay of the troops, giving their wages often partly in the

shape of goods instead of money, and plundered the wealthy. Taxes were put upon almost every act of life, on every article bought or sold, and the Courts of Justice were used to fill the Exchequer. Not only did the rulers neglect to protect their people from the attacks of the Pindaris whose ranks were recruited from among those who had been plundered by them and reduced to beggary, but they actually supported them, receiving assistance from them in those times when they were engaged in warfare with each other. Add to these robber bands the Gonds and other hill tribes who had been rendered desperate and driven from their old possessions and who made forays on the villages within their reach, and some idea can be formed of the wretched state of the mass of the people. The Pindaris plundered, devastated and burnt throughout the country, growing so bold as to advance even to Nagpur and burn one of its suburbs. The mud forts seen to the present day in almost every village speak of the time when the cultivators might at any moment be called from their fields, and obliged to seek refuge in their roughly constructed forts, while they saw their fields devastated, their houses burnt, and their cattle driven away; and this went on throughout the length and breadth of the country until the robber hordes were finally put down by the determined efforts of British Officers.

20. Raghoji died in 1816, and his son Parsoji succeeded him: but, blind, lame and paralyzed, he was soon made away with by Apa Sahib, a nephew of the late Raja, who next ascended the throne. Up to this time Apa Sahib had been studiously cordial in his relations with the Resident and the British Government. He had managed to become Regent while Parsoji lived, but he knew there was a strong party against him headed by Baka Bai, widow of Raghoji II, and he did all in his power to secure the Resident's support. Thus in 1816 a treaty was signed whereby the British were to maintain six battalions of infantry with cavalry and artillery, while the Regent agreed that Parsoji should pay a subsidy of 7½ lakhs of rupees per annum and furnish a contingent of horse and foot. The contingent was found useless in the campaign against the Pindaris undertaken in the ensuing cold season, and in January 1817 Parsoji died, poisoned, as it was afterwards found out, at the instigation of Apa Sahib. After he had become Raja, Apa Sahib entered into negotiations with agents of the Peshwa: he coquetted with Scindia and encouraged the Pindaris, proceeding so far as to receive into his presence emissaries of the notorious robber Chitu and to confer on them dresses of honour. Outwardly he was still full of protestations of good faith and good-will towards the British, but he gradually continued to collect a considerable body of troops round Nagpur, and the Resident in haste sent to summon back the British troops from the neighbourhood of Hoshangabad, calling in such small forces as were nearer at hand. On the 14th of November the news reached Nagpur that the Peshwa had broken through his engagements with the British; and on the 24th the Raja informed the Resident that the Peshwa had sent him a khillut, with a golden standard and the title of Senapati. He intimated his of intention receiving in public the investiture with the title and honours on the following day. The Resident remonstrated in vain, and on the day following the Raja having been publicly invested with the title and honours, proceeded to join his camp at Takli and placed himself at the head of his troops. This was tantamount to a declaration of war, and the small British force without further delay occupied the hill of Sitabaldi, while expresses were sent off to bring up the Deccan Army from Berar. On the night of the 26th the Nagpur troops commenced an attack

on the hill, and the fight continued on the 27th, resulting in the utter defeat of the Raja's large force. Apa Sahib now hastened to disown any connection with the action of the troops, but the Resident refused to treat with him, and on reinforcements coming in rapidly, the Resident on the 15th December demanded the unconditional surrender of the Raja and the disbandment of his troops. Apa Sahib surrendered, but his troops prepared for resistance; they were attacked and routed, but some who had made themselves strong in the city did not capitulate till the 30th December.

After the reduction of the city the Resident entered into a provisional engagement to retain Apa Sahib on the throne on the following condition :—

"That he should cede all his territories to the northward of the Nerbudda as well as certain possessions on the southern bank and all his rights in Berar, Gawilgarh, Sirguja and Jushpur in lieu of the subsidy and contingent; that the civil and military affairs of his Government should be settled by ministers in the confidence of the British Government according to the advice of the Resident; that the Raja with his family should reside in the palace at Nagpur under the protection of the British troops; that the arrears of the subsidy should be paid up until the final transfer of the above-mentioned territories had taken place; that any forts in the territory which we might wish to occupy should immediately be given up; that the person whom he described as principally resisting his orders should, if possible, be seized and delivered up to the British Government, and that the two hills of Sitabaldi with the bazars and an adequate portion of land adjoining should be ceded to the British Government, which should be at liberty to erect on them such military works as might be deemed necessary."

On this condition Apa Sahib was permitted to return to his palace on the 9th January.

But no sooner had the British troops moved from Nagpur, than Apa Sahib renewed his intrigues, raised the Gonds, and sent secret instructions to the Kiladars not to surrender the forts which they were holding; and finally he applied to the Peshwa for assistance. Even within a day's march of Nagpur the Gonds were burning the villages belonging to the Baka Bai, the Raja's political opponent. The Resident now determined to arrest the Raja, and successfully effected his capture. He despatched him under escort towards Allahabad, but on the road Apa Sahib managed to corrupt his guards and he escaped in the dress of a sepoy. He fled to the Mahadeo hills where he joined Chitu, the Pindari leader, and ultimately made his way to the Panjab, whence he never returned. After the flight of Apa Sahib, Raghoji III, a minor, was placed on the throne by British authority. During the long minority and regency which ensued the Government was virtually conducted by the Resident, Sir Richard Jenkins. Some European officers were appointed to superintend the several districts, and a regular staff of native officials was appointed. The administration was superior to anything previously known, and it lasted till 1830, when the Government was assumed by the Raja himself. His reign was marked by no striking events, and he died in 1853, without heirs, begotten or adopted, when the kingdom lapsed to the British Government.

21. The transfer was accomplished without any excitement, the people showing no disinclination to the change of rule, but having on the contrary an agreeable recollection of the time when the country was administered by the Resident during the minority of the last Raja. Among the courtiers and connections of the Bhonsla family the assumption of the Government by the British was naturally unpopular, but they soon began to busy themselves about the pensions and allowances they were to receive, and nothing occurred to disturb

the inauguration of the new order of things. The Resident became Commissioner of the newly acquired Province, the system in force in the Panjab was introduced with slight modifications, and for the next seven or eight years the plan of re-organization and settlement quietly pursued its course. The mutiny in 1857 was at Nagpur a flash in the pan. There was disaffection among the Nagpur Irregular Cavalry and an understanding between them and some of the Mohammadans in the city, but their plans were foiled. The other troops at Sitabaldi were faithful, and the Kamptee force was also untainted with disloyalty. Six Native Officers of the Cavalry and two Mohammadan gentlemen of position and influence in the city were found guilty of attempted rebellion and were executed, and therewith ended all danger. In the districts of Chanda, Raipur and Sambalpur some of the smaller zamindars took to plundering with their followers, but they met with no support and were put down. At Raipur an unsuccessful attempt at a rising was made in January 1858 by a party of troops cantoned there.

After the mutiny year, preparations were made for effecting the land revenue settlement of the Province and for further improving the administrative and fiscal system, but little had been done up to the end of 1861, when the Nagpur Province ceased to be a separate Administration.

22. The story of the conquest of the northern parts of the Province by the Marathas may be more briefly told.

They were invited in 1733 to Saugor by Chhatrasal, the Chief of Panna, who held a large portion of the Saugor district. Hard pressed by Mohammad Khan Bangash, Governor of Allahabad and Malwa, he asked assistance of the Peshwa, who was not slow to afford it, and thereby acquire a footing. On Chhatrasal's death in 1735, he left one-third of his kingdom to the Peshwa, who sent an agent to take charge of his heritage. Thus commenced the rule of the Maratha Pandits of Saugor. They continued to hold office hereditarily, and in time the districts of Damoh, Jubbulpore and Narsinghpur came under their sway.

In 1742 the Peshwa had marched up the Nerbudda valley to attack Mandla, and he is said to have laid waste the country east of Jubbulpore, but a permanent footing was only acquired in part of the Hoshangabad district. Meanwhile, the Bhonslas were pushing up in the same direction, and between 1740 and 1775 the Bhonslas and the Bhopal rulers divided between them the principal part of the Hoshangabad district. At a somewhat later date warfare between the Bhopal and Maratha generals became almost incessant. In 1805, Scindia appeared on the scene and took Seoni in Hoshangabad; but three years afterwards he restored it to Nagpur. Finally, in 1808, the Bhonsla forces drove those of Bhopal beyond the Nerbudda. Before this the Bhonslas had managed to expel the Saugor family from Narsinghpur and Jubbulpore and to establish themselves in their place, thus securing to themselves almost the whole valley. At first the upper part of the valley escaped the misery which the lower part suffered from the constant warfare between the Bhopal and Nagpur forces and the impartial plundering of the Pindaris, who had waxed strong in that turbulent time; but at length the upper part was drawn into the vortex, and then oppression and extortion, rack-renting and judicial spoliation became rife throughout the Nerbudda territory of the Bhonslas. The cession of the Bhonsla territory in the Nerbudda valley has already been mentioned above,

and a treaty with the Peshwa in 1817 gave to the British those districts also which were nominally his. British rule in the Saugor and Nerbudda territories thus commences from 1818.

23. The administration of the territories then acquired by the British was not in the beginning altogether successful; the earlier land revenue settlements proved too heavy, the people were impoverished, no progress was made, and though there was peace and order, and an impartial administration of justice, there can be no question that the earlier years of the British rule pressed heavily on the people. The time came when the mistakes that had been made were recognized, and with more liberal settlements prosperity returned. This time came sooner in the Nerbudda than in the Saugor districts, but at the present time the oldest British possessions in the Province are probably the most thriving.

24. The Saugor and Nerbudda territories were from time to time placed under different Governments. Originally under the Supreme Government, they were afterwards placed under the Lieutenant-Governor of Agra. Again in 1842 the general control of them was invested in a Commissioner and Governor-General's Agent, in direct communication with the Supreme Government. Again at a later date the general jurisdiction was once more entrusted to the Government of the North-Western Provinces. The period was not one of unbroken quiet. In 1842 occurred what is known as the Bundela rising. It was chiefly confined to the Saugor district, and originated in an attempt to execute some decrees of a Civil Court on some landholders in the Saugor district. They resisted execution, killed the Police, burnt and plundered several towns; some Gond Chiefs joined in the rising, rebellion became general and extended to the neighbouring districts. It was not till the following year that the leaders were arrested and punished and the outbreak entirely quelled. The Province was afterwards re-organized, and an entirely new body of officers appointed. Fifteen years afterwards occurred the Mutiny of 1857.

25. After the Mutiny, the question of the better administration of the Provinces of Nagpur and the Saugor and Nerbudda territories, adjoining each other, but both cut off from other British territory, came before the Government of India for consideration, and it was determined to weld the two into one Province under a Chief Commissioner in direct subordination to the Supreme Government. The Government Resolution which brought about the change is dated the 2nd November 1861.

3.—*Form of Administration.*

26. The Administration of the Central Provinces is conducted by a Chief Commissioner on behalf of the Governor-General of India in Council as the Local Government of the territories in question. His Provincial staff consists of—

(1) Members of the Indian Civil Service, filling the cadre posts shown below.
(2) Members of the Provincial Civil Service.
(3) Members of the Subordinate Civil Service.
(4) District and Assistant Superintendents of Police.
(5) Officers specially recruited for the service of Departments requiring special knowledge—Engineering, Education, Medicine and Forestry.

Under Act XXXII of 1867 the Governor-General of India in Council has delegated to the Chief Commissioner the powers of a Local Government under Act V of 1861 (Police), save as to the appointment of Inspector-General of Police. The Chief Commissioner has also been authorised by the Government of India (with a restriction as to first appointments of *Europeans*) to make appointments and promotions in the Commission up to and including Deputy Commissioners of the 1st Class; appointments and promotions in the Education and Settlement Departments, excluding the posts of Inspector-General of Education and Commissioner of Settlements and Agriculture; and appointments and promotions in the Provincial Civil Service. In the case of offices carrying a rate of pay not exceeding Rs. 250 a month, the Chief Commissioner's power of making appointments and promotions is unrestricted.

27. The cadre posts reserved, in future, for officers of the Indian Civil Service* and constituting the Central Provinces "Commission" are the following:—

Administration ...	Chief Commissioner.	8
	Two Secretaries.	
	One Assistant Commissioner as Under Secretary.	
	Four Commissioners of Divisions.	
High Court (Judicial Commissioner) ...		1
District Judges (Judicial Assistants to Commissioners) ...		2
Heads of Districts (Deputy Commissioners) ...		17
Sub-Divisional charges (Assistant Commissioners) ...		16
General ...	Commissioner of Excise.	4
	Inspector-General of Police.	
	Commissioner of Settlements and Agriculture.	
	Political Agent, Chhattisgarh Feudatories.	
	Total	48

28. The Provincial Civil Service is composed of "Natives of India" selected according to rules approved by the Government of India and by the Secretary of State. The following posts have been allotted for this service:—†

1	Deputy Commissionership.
2	Small Cause Court Judgeships.
1	Post of Registrar, Judicial Commissioner's Court.
1	„ Assistant to the Commissioner of Settlements and Agriculture.
2	Posts of Assistant Commissioner.
44	„ Extra Assistant Commissioner.
51	

* Eight posts in the Commission are still held by Military officers; four are held by "Uncovenanted" officers; and two by "Statutory Civilians".

† Subject to claims of certain officers in the Commission recruited before the reservation was made.

29. The Subordinate Civil Service is recruited from natives of the Central Provinces who fulfil a certain educational standard, and includes the following posts :—

50	Tahsildars.
22	Munsiffs.
48	Naib-Tahsildars.
120	

30. District and Assistant District Superintendents of Police are recruited partly in England and partly in India. There are 18 District Superintendents of Police and 8 Assistants. With the exception of some head-quarters Inspectors and European Sergeants, the subordinate officers of the Police force are all natives of India.

31. The work of the following branches of the Administration of the Province is vested in special officers :—

Department.	Provincial Head of the Department.	Departmental Executive Officer (District or Divisional).
Public Works	Chief Engineer	Executive Engineer of the Public Works Division.
Settlements and Agriculture	Commissioner of Settlements and Agriculture	Settlement Officer.
Excise, Assessed Taxes and Stamps	Commissioner of Excise and of Miscellaneous Revenue.	Deputy Commissioner.
Education	Inspector-General of Education	Circle Inspector of Schools.
Police and Prisons	Inspector-General of Police and Prisons	District Superintendent of Police and Superintendent of the Jail.
Medical relief, Sanitation and Vaccination.	The Administrative Medical Officer.	Civil Surgeon.
Forests.	Conservators of Forests, Northern and Southern Circles.	Forest Divisional Officer.

The Postal and Telegraph services are controlled by officers of the Imperial service. In the department of Finance, the Chief Commissioner has the guidance of a Comptroller appointed by the Government of India. The Provincial Chief Engineer is also Secretary to the Chief Commissioner in the Public Works Department.

32. Next in the scale of executive authority to the Chief Commissioner come the Commissioners of Divisions, whose charges in three cases include five districts—in one (Chhattisgarh) only three. They are selected from among the members of the Commission, and they are responsible for the general administration of their respective Divisions.

33. The unit in the executive scheme is the Deputy Commissioner, whose duties are very various. He is the Chief Magistrate of a district, averaging in these Provinces 4,806 square miles in extent, and has special criminal powers of imprisonment up to seven years in certain cases. His original civil jurisdiction is unlimited in amount; and he exercises a general supervision over the

working of the Subordinate Civil Courts. He is also chief of the police; chief collector of revenue; conservator of the district forests; supervisor of popular education; marriage registrar; and head of the local agencies for the management of roads, ferries, encamping-grounds, public gardens, rest-houses and other public buildings not of an imperial character. These duties branch into many others too numerous to mention, but it may safely be said that the miscellaneous work of a Deputy Commissioner of a leading district often occupies more time than his regular duties. His district staff includes (*a*) one or more Assistant Commissioners (the *Sub-Divisional Officers* entered in the cadre of the Commission), (*b*) one or more Extra-Assistant Commissioners (members of the Provincial Civil Service), (*c*) a District Superintendent of Police, and (*d*) Tahsildars, Munsiffs and Naib-Tahsildars (members of the Subordinate Civil Service). The members of this staff (excepting the District Superintendent of Police) all exercise judicial powers, civil or magisterial, or both. He is assisted in matters requiring engineering knowledge by the Executive Engineer of the Division. For the charge of the forests he has the aid of a Forest Divisional Officer. In medical matters he has the services of a Civil Surgeon, who also, as a rule, holds executive charge of the District Jail. In the control of education he is aided by a Deputy Inspector of Schools. Of the 18 Deputy Commissionerships in the Province, 17 are reserved for members of the Commission, and one has been assigned to the Provincial Civil Service.

34. There is as yet no complete separation of judicial from executive charges. The only officers whose work is exclusively of a judicial character are:—

(*a*) The Judicial Commissioner (or High Court Judge).
(*b*) The two Judicial Assistants to Commissioners.
(*c*) Certain members of the Provincial and Subordinate Civil Services who are entrusted with civil judicial work only.

The powers of the Civil Courts are regulated by Act XVI of 1885, Section 4 of which runs as follows:—

"Besides the Courts of Small Causes established under the Provincial Small Cause Courts Act, 1887. . . . . there shall be the following classes of Civil Courts, namely:—

(*a*) the Court of the Judicial Commissioner.
(*b*) " " Commissioner.
(*c*) " " Deputy Commissioner.
(*d*) " " Assistant Commissioner of the first class.
(*e*) " " " " " second class.
(*f*) " " " " " third class.
(*g*) " " Tahsildar of the first class.
(*h*) " " " " second class."

By Section 12 the Chief Commissioner may by order in writing invest any person with all or any of the powers of the Courts (*b*), (*c*), (*g*) or (*h*) above. Persons invested with powers of the Court of a Commissioner are styled "Judicial Assistants to the Commissioner." Two members of the Indian Civil Service have, as already noted, been appointed Judicial Assistants, and have relieved Commissioners of all their civil work. Persons invested with powers of the Court of a Deputy Commissioner are styled "Civil Judges." Nearly every district in the Province has now a Civil Judge, selected from the ranks of the Provincial Civil Service; and Deputy Commissioners have thus been relieved

of the major portion of their civil judicial work. Persons invested with powers of the Court of a Tahsildar are styled "Munsiffs." The number of Munsiffs is now 22. They are members of the Subordinate Civil Service; and their appointment has enabled Tahsildars to devote more time to those revenue and executive functions which are of the essence of their duties.

The two Judicial Assistants are also Assistant Sessions Judges and share with Commissioners the sessions work of the Divisions to which they are attached. District Magistrates are assisted in the disposal of criminal business by the Assistant Commissioners, Extra-Assistant Commissioners and Tahsildars, most of whom exercise magisterial powers.

Before dismissing the subject of judicial administration it should be mentioned that much assistance has been rendered to the regular judicial staff, and justice has been in many cases brought home to the doors of the people, by the appointment of native Honorary Magistrates. Of these gentlemen there are now 219 in the Province, most of whom are landholders. A considerable proportion, however, belongs to the merchant and banker class. The honour is highly appreciated and eagerly sought, and it is but rarely that those to whom it is awarded are accused of abusing their powers.

35. Under the operation of the Central Provinces Local Self-Government Act (I of 1883) and the Central Provinces Municipal Act (XVIII of 1889) the Administration has enlisted the services of a large number of native gentlemen in the supervision of education, pounds, dispensaries and the construction of local works of public utility. Each district has its Local Boards and District Council, composed of elected representatives and members nominated by Government. There are 55 Municipalities whose affairs are managed by Municipal Committees, the majority of whose members are elected by the citizens.

4.—*Character of Land Tenures.*

36. The commencement of British rule found most villages of the open country in the hands of lessees (*patels* or *thekadars*) who held farms of the village land revenue from Government—generally for short periods. A single lessee often held the farms of several villages; but, speaking generally, under this system each village was let on a separate lease, and was held by a separate lessee of its own. Villages so managed were collectively known as the *khalsa*. But a very large area (over two-fifths of the whole, including a large proportion of the wilder portions of the Provinces) was held by persons whose rights were of a more substantial character, and who by grant or long prescription were possessed of groups of villages or tracts over which they claimed rights amounting in many respects to the proprietary status of English law. The tenure seems to have originally been in all cases a service tenure, and closely approximated in its incidents to certain features of the feudal system. And where the actual rendering of service had become obsolete, a trace of the original obligations of the tenure survived in the fact that its holder rendered to the Government less than a full land revenue assessment—in other words, that his money payment only represented a part of his responsibilities. Estates of this class are known

as *talukdaris* or *jagirdaris* in the north of the Provinces, and as *zamindaris* in the south. The families possessing them mostly represent clans or races which held ruling power in the past, and a very large number are of aboriginal descent. They are most numerous and important in the south-east corner of the Provinces. Of the tract included in the Chhattisgarh Division no less than four-fifths were held on zamindari tenure, and the area so held in the Chanda District was nearly one-half of the total.

37. A third class of villages were originally *khalsa*, but had come into the hands of persons or religious foundations to whom their revenue had been specially granted by the State. It is not easy to determine in all cases how far these grants included the ownership of the land in addition to the right to appropriate its revenue. But it is clear that generally these grantees (known generally as *muafidars*) held a far stronger position than the ordinary *khalsa* lessee, and indeed many of the grants expressly convey full out-and-out proprietorship of the soil.

The policy adopted at the Settlement of 1863 altogether relieved the Government of responsibility for enquiring into the precise extent of these various rights. It was decided to recognize as full proprietors all persons in possession of villages, whether as lessees, zamindars or muafidars. In the case of lessees such recognition amounted to a free grant of proprietorship; the concession was less in the case of zamindars or muafidars, but still amounted to a considerable augmentation of their powers. It added to pre-existing privileges the right to sell or mortgage them to others, and in this way introduced an innovation of very far-reaching effect.

38. Fifteen of the zamindari (or talukdari) estates were considered to be of sufficient importance to warrant their being constituted Feudatory States—that is to say, being altogether excluded from British India. The Chiefs hold on conditions of loyalty and good government, but are nominally free from direct interference save in the case of death sentences, which require the Chief Commissioner's confirmation. But as a matter of fact the Government has exercised a very large amount of control, owing mainly to the frequency with which the States have been taken under direct management, either from the minority or the misconduct of the Chief. Of the fifteen States, nine are now practically managed by Government officials, and only two have escaped direct management during the past 30 years. One of these States (Makrai) lies in the Hoshangabad District; the remainder are situated in the Chhattisgarh tract. They cover an aggregate area of 29,435 square miles, and pay to Government a land revenue tribute of Rs. 2,44,800. Their land revenue payments are in most cases liable to periodical enhancement.

The zamindars or talukdars who were simply declared proprietors of their estates received very different treatment in different cases. Talukdari estates in the northern districts, which formed the old "Saugor-Nerbudda" territories and came under British rule 36 years earlier than the rest of the Provinces, had by the time of the 1863 Settlement lost most of their distinctive features, and were simply settled with the talukdar, village by village, on the system followed in the khalsa, preserving, however, any claims to hold at less than a full revenue payment. On the other hand, the jagirs of Hoshangabad

and Chhindwara and the zamindaris of the Nagpur and Chhattisgarh country were settled by estates, not by villages, and in Chhindwara and Chanda a patent was conferred on each holder defining the incidents and privileges of his tenure and establishing an entail, the estate being inalienable, and not liable to partition. Similar restrictions were placed on the tenure of the Bilaspur zamindars, and have lately (at the recent re-settlement) been extended to the zamindars of Raipur and Sambalpur. The numerous and important zamindari estates in the Bhandara and Balaghat districts are on the other hand held free of special conditions—probably by an accidental omission—and are *primâ facie* liable to the ordinary rules of Hindu Law so far as transfer and succession are concerned. It may be added that the legal effect of the restrictions imposed by Government on the zamindari tenure is not quite free from doubt, but that they are absolutely necessary if it is desired to maintain the present families in possession. The zamindars as a class are ignorant and improvident, and under the ordinary law would speedily allow indebtedness to bring their estates to the hammer.

It has been already mentioned that the talukdari or zamindari status was subject to the obligation of military or police service. At the same time it generally carried some special privileges (which may be regarded as functions of the ruling power held by delegation), the most prominent of which were the rights to administer excise and levy a tax on traders (Pandhri). In the northern districts, the talukdars were relieved from police duties and deprived of their excise privileges (on payment of compensation) while the country was under the jurisdiction of the North-Western Provinces Government. The zamindars of Bhandara and Balaghat were similarly treated at or shortly after the settlement of 1863. Most of the Chhattisgarh zamindars retained their police responsibilities until the recent re-settlement, but have now been relieved of them; and the only estates the tenure of which at present comprises powers of police administration are the zamindaris of Chanda and the jagirdaris of Chhindwara and Hoshangabad. In the matter of excise, the policy of Government has been to leave the monopoly in the zamindar's hands in the case of remote or jungly estates, but to effect a radical change in the basis of his management. His monopoly is to be derived from a farm of the excise specially granted to him by Government and to be no longer regarded as an incident of the zamindari tenure. The only districts in which zamindars now manage excise are Raipur, Bilaspur, Sambalpur, Chanda, Chhindwara and Hoshangabad, and the new system has been introduced into all but the two last-named, compensation having been given for the curtailment of profit and of authority.

39. The effect of the general grant of proprietary rights was of course much wider in the case of *khalsa* than of zamindari villages: it did not merely extend or confirm rights which were at the time in existence, but created completely new rights, converting a leasehold into practically a freehold tenure the holders of which are now known as *malguzars*. The character and circumstances of the persons who profited by this concession differed very greatly in different districts. Originally no doubt the men who held the revenue farm of a village would as a rule be one of the village cultivators—*primus inter pares*—and would be in a position to really represent the village in its dealings with the Government. But under a stringent system of revenue farming such men

would gradually give place to outside speculators, and it is a deplorable fact that under the first 30 years of British administration in the Saugor-Nerbudda territories a very large number of villages came in this way into the hands of money-lenders. Similar transfers were also very numerous in the Nagpur country during the last days of Native rule; and hence it came about that the grant of proprietary rights which was intended to benefit the land-holding classes was in great measure a concession to the money-lending interest. A striking instance of this is given by the fine estates held by the well-known Marwari banker of Jubbulpore. To indicate the extent to which the grant of proprietary rights missed its aim in the cultivating classes it may be mentioned that out of 560 villages selected at random in the Nagpur and Wardha districts, nearly a third are owned by Brahmins.

It is probable that the revenue farm of each village was originally granted to a single person, but it is clear that sharing was recognized,—in other words that a farm could be held by a family as well as by an individual. Sharers in the village farm were admitted to a share in its proprietorship. But in a very large proportion of cases the grant of proprietary rights to malguzars resulted in the creation of a single proprietor for each village. It should be added that in some places—especially on the Bundelkhand border to the north and in the Wardha district of the Nagpur country—the claims to proprietary rights were found to be shared amongst a numerous body of persons connected with one another by family ties under a system of village management which showed some similarity to that of the *bhaya-chara* communities of Northern India. During the 30 years which have passed since the malguzars were made proprietors division of land or profits has been practically unchecked, and the most recent statistics show that the ownership of 27,724 villages is shared between 78,242 persons, giving an average of 2·8 sharers for each village.

In one of the 18 districts—Sambalpur—the policy of converting village farmers into proprietors, although formally enunciated, was not carried into effect. Much difficulty was experienced in this district in carrying out the operations of Settlement, which were incomplete by a time (1872) when the policy of conferring proprietary rights had come to be gravely doubted. After much consideration a compromise was effected. The farmers who had been promised proprietary rights were given these rights, but only in their demesne (locally known as *bhogra*) lands, and as regards the rest of the village area their position remained that of farmers (or thekadars) with a right to hold the farm undisturbed, so long as they paid the revenue. The village farm (or theka) follows the ownership of the bhogra lands, and can then be transferred or partitioned by transfer or partition of these lands.

40. A peculiar variety of the malguzari tenure is that in which the rights of the malguzar are shared in by a "superior proprietor". This tenure was introduced principally in order to protect from aggression men holding villages in talukdaris or zamindaris whose claims to remain in possession might be injuriously affected by the recognition of the absolute ownership of the zamindar. The most numerous class of persons made "inferior proprietors" were relations of the zamindar holding villages for maintenance, but in some cases the status was granted to deserving lessees who had earned a title to their villages

by founding or improving them. The number of lessees of this stamp to whom this protection was given was in some districts very small, and wholesale ejectments at the suit of the zamindar ensued, which have now been checked by the provision enabling a Settlement Officer to grant a village lessee in a zamindari a "protected status", under which he is secure from disturbance so long as he pays a fair rent. Speaking generally, villages held by inferior proprietors are managed entirely by them, the superior proprietor receiving an annual sum over and above the revenue (called *malikana*) in satisfaction of his claims.

41. The third class of proprietary villages—those originally held by revenue grantees (*muafidars*)—call for but little notice, as the wholesale grant of proprietary rights left their holders in no higher position than that of ordinary malguzars, apart from the revenue concession enjoyed by them. Villages of this class are most numerous in the Nagpur country, where, during the last days of Native rule, court favourites and others were able to secure grants of village revenues on extraordinarily slender grounds. When the village is held on a quit-rent fixed in perpetuity the grant is known as a "makta" or "ubari", and as a "mokasa" when the whole of the revenue is held by the assignee. Generally speaking, the grants of revenue were made subject to good behaviour and are personal and inalienable. But conferral of the malguzari tenure made the proprietorship of the assignee in the village lands—apart from their revenue—transferable at his will, and the assignee can realize money by selling his lands, though Government is at liberty to call upon the purchaser for a full revenue in cases where the original assignment of revenue was of a personal character. A large proportion of these *muafi* villages were originally held as religious endowments, and managed by a trustee. This trustee was not unfrequently made the recipient of proprietary rights, in which case the object of the original grant has of course been defeated. This error has not been made in the Sambalpur district, where grants of this description are very numerous; and by recognizing nothing beyond a grant of revenue in the so-called "Dewattar" villages the Government has effectually guarded against wholesale misappropriation by the manager of the day.

42. The areas held by Feudatory Chiefs or by private persons in proprietary right are :—

	Square miles.
Feudatory States	29,435
Zamindari area held under custom of primogeniture ...	14,130
Malguzari area (including talukdari and zamindari lands held under ordinary Hindu Law) ...	51,517

This leaves a balance on the total Provincial area of 20,854 square miles, which represent the Forest estate of Government—the lands, that is to say, which the Government holds as proprietor. This estate was formed by the reservation of jungle tracts (consisting either of whole villages or of parts of villages) in the *khalsa* at the time proprietary rights were granted to the malguzars. It was held unnecessary to include in this grant lands which in the past had played a merely nominal part in the village economy. But this view was carried into effect only in the *khalsa*, and in *zamindari* estates jungle lands were left untouched. The general rule was to allow each village an area of waste or jungle equal to

twice its cultivated area, and to exclude the surplus; but this principle was by no means strictly followed, and owing no doubt to the haste with which this part of the Settlement operations was forced to completion, cases are of very numerous occurrence in which villages were left with jungles far too large or far too small for their requirements. The area of reserved waste further included any cultivated villages for which no claimant whatever was forthcoming, as was frequently the case in the wilder parts of the Provinces where the population is mainly aboriginal. In excluding these waste lands the Government of the day had for its principal object their colonization through the hands and capital of people from the outside, and for many years settlers were tempted by very favourable terms either to purchase lands outright free of revenue, or to take them on clearance leases with the prospect of earning malguzari rights by successful reclamation. This policy subsequently gave way to one of exactly contrary tendency; alienation was prohibited, the extension of cultivation viewed with jealousy, and the whole area of Government property, cultivated villages included, brought under the provisions of the Forest Act. Of late years a compromise between these two extremes has been adopted. Jungle tracts of real importance from the forestry point of view are being gradually brought under permanent conservation, while culturable and cultivated lands are released from Forest Law and are thrown open to the public on a ryotwari tenure, each plot of ground or field being held direct from Government at a revenue assessed for a term of years, the payment of which secures the ryot against ejectment. The tenure is heritable, but not transferable. The districts in which this system has received the greatest extension are Mandla, Balaghat, Nimar and Hoshangabad. In the two first-named districts the ryotwari villages are mostly of long standing, and the ryotwari settlement has rather confirmed existing cultivation than extended it to new lands. In Nimar and Hoshangabad the lands dealt with were generally uncultivated, and the Settlement, by encouraging immigration from the outside, has added very largely to the resources of the districts as well as to the revenue of Government.

43. Coming now to subordinate tenures—tenures, that is to say, which are not held directly from Government—the first for mention is that known as the *malik-makbuza*, or plot proprietor. This was originally a ryoti tenure—marking cultivating as opposed to proprietary possession—and was created at the time of granting proprietary rights to malguzars in order to secure against unfair encroachment ryots who possessed very strong claims to consideration either from length of tenure or by the expenditure of money on improvements. A malik-makbuza holds at a separate assessment—which, however, he is bound to pay through the malguzar of the village in which his plot is situated—and possesses complete rights of transfer unfettered by a right of pre-emption on the part of the malguzar. Another class of persons whose status has been recognized as that of malik-makbuza are holders of revenue-free plots of land in grant from Government, who now enjoy the right of transferring these plots by sale or mortgage, although the revenue assignment may be liable to resumption on such alienation. And use was made of the tenure to protect village farmers in talukas or zamindaris against unjust ejectment at the hands of the talukdar or zamindar. The present provisions of law enabling Government to grant a protected thekadari status in these cases were not in force at the Settlement of 1863, and a course commonly followed was to declare the farmer to be a malik-

makbuza of the village demesne lands (*sir*) in case of his suffering ejectment at any time. Save in the Nimar district, where 33 per cent. of the lands are held in this right, the holders of the malik-makbuza tenure are not of much numerical importance.

Of tenants pure and simple the most privileged class is that possessed of the so-called "absolute occupancy" tenure, the principal incidents of which are heritability, transferability, subject to pre-emption on the part of the landlord, and fixity of rent for the term of Settlement. This status was granted to ryots whose claims, though hardly of sufficient strength to warrant the conferral of the proprietary (malik-makbuza) status, justified a more substantial concession than that of the simple "occupancy" tenure. The "occupancy" tenure has at the present day become the most important, as, unlike the malik-makbuza and absolute occupancy tenures, it could, until nine years ago, be gained by prescription as well as by grant at the time of Settlement. An occupancy tenant is entitled to hold at a rent to be fixed, not by his landlord but by a Revenue Officer; his tenure is heritable by direct* succession, but is not transferable save with the landlord's consent. Up till 1884 this status could be gained by 12 years' continuous possession of land, but by the Tenancy Act of that year the twelve years' rule was abrogated, and the means of acquiring occupancy rights limited to purchase by the payment of a premium equal to $2\frac{1}{2}$ years' rental. Very little advantage has as yet been taken of this provision. The so-called "ordinary" or non-occupancy class of tenants, though nominally enjoying several legal safeguards against oppression, have in reality been holding at the pleasure of their landlords, and in some tracts have been grossly rack-rented. Legally, an ordinary tenant, whether holding on a lease or not, cannot be ejected save for failure to pay his rent or on the ground that his holding consists entirely of the landlord's demesne (*sir*) land. Practically, he has in the past been ejected at his landlord's will, and indeed estates are not uncommon on which the ordinary tenants are regularly shifted. Legally, his rent can only be enhanced by formal agreement through the Civil Court, and his refusal to accept an enhancement only enables the landlord to eject on payment of compensation equal to seven times the amount of enhancement claimed. In reality his rent has in the past been enhanced pretty much according to the landlord's greed or necessity. At the Settlement of 1863, non-occupancy tenants were left in the position of tenants-at-will, and subsequent legislation in the tenants' interests has been unable to counteract the ideas which sprung from this policy. The law is, however, clearly explained in the course of the new Settlements now in progress, and it is probable that in future the position of the ordinary tenant will be more in accordance with the intention of the law and less with the wishes of his landlord.

44. There remains the class of "village service" tenants who hold their land rent free or at a reduced rent on condition of rendering customary service. The principal village servant is the watchman (*kotwal*), but in some districts village accountants (*patwaris*) hold large areas of service land. Village artizans and servants generally derive most of their remuneration from fees, but in so far as they hold patches of service land they fall into this class.

* In three districts (Nimar, Chanda and Sambalpur) collateral succession is allowed.

45. The proportions in which village lands in the khalsa are distributed between the various classes of subordinate holders are shown for each Division below :—

Division.	Percentage of area held by					
	Malik-makbuza.	Absolute occupancy tenants.	Occupancy tenants.	Ordinary tenants.	Service tenants.	Total.
Jubbulpore ...	3	12	25	40	2	82
Nerbudda ...	5	18	33	25	1	82
Nagpur ...	8	15	37	22	1	83
Chhattisgarh ...	1	9	37	29	2	78
Provinces as a whole.	4	13	33	29	1	80

The balance of area,—ranging from 18 to 22 per cent.,—consists of the village proprietors' demesne lands and of lands let rent free to their dependants. The demesne lands are classed as either *sir* or *khudkasht*, the former being so termed in virtue of a declaration by a Settlement Officer, and the latter representing land other than *sir* in the proprietor's actual cultivating possession. Twelve years' cultivating possession by the proprietor entitles him to have land declared to be *sir* at Settlement, unless its declaration would raise the area of the village *sir* to over 25 per cent. of the total cultivated area. Land once declared to be *sir* is excluded from the acquisition of tenant right, and can be leased out on such terms as the landlord pleases; but *khudkhast* land of course only remains so while it is in the proprietor's own cultivating possession.

5.—*System of Survey and Settlement.*

46. The Settlement of 1863 and following years included the making of a field map for every *khalsa* village, and in some districts for *zamindari* villages as well; but the measurements were generally rough and inaccurate, and as the maps had not been kept up to date they had in a great measure become obsolete when the time for re-settlement came round. A survey of village lands by professional agency was effected almost *pari passu* with the Settlement survey, but the two operations were conducted quite independently, and the measurements plotted on different scales, one being used merely as a check upon the other. A complete re-survey was necessary for the proper conduct of the new Settlements now in progress, and it has been effected on a system which presents some points of novelty. As at the previous Settlement, the village lands have been surveyed professionally as well as by local agency, but with the important difference that the professional survey furnishes the basis of the local field survey instead of being conducted independently and being merely of use as a check. The work of the professional surveyors is confined to the determination of convenient points on the village boundary and within the village area by means of the theodolite and chain—that is to say, it is confined to traversing, and does not extend to field survey. A traverse is run round each village with stations about 30 chains apart, and, if the village is a good-sized one, this is

supplemented by one or more sub-traverses running across the village lands. These operations result in the construction of a skeleton map of each village, showing the position of a series of theodolite stations lying round the village boundary and within it.

47. The local agency employed to fill in interior details on these traverse plots has been that of the village accountants (or patwaris), used not as a general district staff, but each man for the survey of his own villages. This system may have increased the difficulty of supervision, but offers very great advantages in utilizing to the full the local knowledge of the patwari, and in fixing responsibility for bad work, as the patwari is always at hand to answer for errors at whatever time they may be discovered. The traverse maps are made over to the patwari, who by chaining from one station to another and across from line to line, plots in the details of the actual village and field boundaries. The method of survey is precisely that of the professional cadastral survey adopted a few years ago in the North-Western Provinces, but instead of the whole of the work—plotting as well as traversing—being performed by professional agency, it is divided into two operations, one of which—that performed with the theodolite and chain, and requiring accurate angulation—is carried out by professional surveyors; while the other—the field plotting,—which is comparatively simple, is effected by the patwaris. It is claimed for this system that it is exceedingly economical, and that it is at the same time very accurate. As the work of the patwaris is confined within the traverse lines laid down by the professional surveyor, errors affecting the village total area are almost impossible, and as the effect of the sub-traverses is to sub-divide the village off into sections, an error—should one occur—is localized and does not affect the whole of the subsequent plotting. The method in which the important process of area calculation is effected is that followed in professional cadastral survey, *i. e.*, areas are calculated mechanically from the maps by the planimeter and acre comb, instead of by the more clumsy fashion of mensuration, as has been the practice in previous surveys. It should be added that under this system the patwaris, in keeping up their maps up to date after the conclusion of Settlement operations, have the advantage of dealing with maps which they have themselves made, and with the details of which they are practically acquainted.

48. The completion of the field map is followed by the preparation of a set of records giving full detail of the ownership, tenancy, rent and method of cultivation of every field in the village. From this paper a village rent-roll (jamabandi) is drawn up. The work of the patwari is of course closely supervised and checked, there being an Inspector to every ten patwaris, the Inspectors being controlled by Superintendents, and the Superintendents by an Assistant Settlement Officer.

Experience has shown that reliable field maps (with the usual records) on the scale of 16″ to the mile can be made on this system at a cost of from 1¼ to 2 annas per acre, or Rs. 50 to Rs. 80 per square mile (including cost of traverse), according to the intricacy of the survey.

49. The new survey was first undertaken for the *malguzari* villages of the Provinces, including villages in the *zamindari* estates of the Bhandara and Balaghat districts, where zamindaris are held under ordinary Hindu Law, and

not by custom of primogeniture. The area to be covered was 47,600 square miles. Subsequently it was determined to extend the survey to well-established villages in the zamindaris of the Chanda, Raipur, Bilaspur and Sambalpur Districts, which contribute about 5,000 square miles to the area for survey. Of the total (say, 53,000 square miles) 45,200 square miles have been surveyed up to date. Much of the area is jungle, and affords but little detail to complicate measurement. On the other hand the fields in some localities are extremely small, running sometimes 50 to the acre. To give some idea of the complexity of the survey, it may be mentioned that the area surveyed during the last five years—38,300 square miles—includes 14½ millions separately surveyed fields, giving an average of 1·7 field to the acre.

50. In considering the system on which the land revenue is assessed, it will be convenient to omit first of all ryotwari villages from account. Malguzari, zamindari and muafi villages are assessed by the determination of a lump sum for each village or separately partitioned portion of a village (*mahal*), for the payment of which the proprietors of such village or mahal are jointly and severally responsible. The assessment is then by villages (mauzahs) or mahals and not by plots, whether arbitrarily determined or representing actual fields, save in the case of malik-makbuza holdings, each of which bears a separate assessment, calculated independently of the assessment of the village in which it is situated. The sum which is fixed as the revenue payable by each village or mahal is calculated by reference to the *assets* of such village or mahal. The "assets" include—

(1) the rent actually payable by ryots ;

(2) the fair rental value of the demesne (*sir* and *khudkasht*) lands, and of lands held by service tenants or dependants of the landlord ;

(3) the income derived from the village waste and such miscellaneous sources as tanks or fisheries (this head of assets is known as *siwai*).

So far as the most important head of income is concerned—the cash rental—the term "assets" as now used includes merely the landlord's actual rent receipts, and does not mean (as was formerly the case) a fair rental value of the land held by ryots, irrespective of the rental actually payable, in cases where the rental actually payable fell short of a fair rental value by reason of the ryot holding at less than a fair rent. In other words if the rental of a village is too low the assessing officer must raise it to a proper figure by enhancement in detail before he can take such proper figure as the "rental assets" for the purpose of his assessment. The payments of malik-makbuzas and of absolute occupancy tenants have remained practically unchanged since the former Settlement, and the large rise in prices which has since taken place has justified the imposition on them of a very substantial enhancement. The rents of occupancy tenants have, speaking generally, risen by much less than the full amount justifiable, and their rental also may fairly be raised. These three classes occupy 63 per cent. of the total area held by ryots, and the question of rent enhancement is therefore one of very great importance.

51. In determining what is a fair rent for land of certain quality in a given village two sets of considerations are brought into play; some arrived at inductively, being based on a careful examination of the rents paid by different classes of tenants over a large tract of country, and others obtained by deductive

reasoning, as for instance by contrasting the enhancement in rent-rate justified by the rise in prices with the rise which has actually occurred, as shown by the average incidence of rent per acre at the former Settlement and at present. So far as the arguments are inductive they obviously rest on comparison. The extent to which a given rent can be raised is inferred by comparing it with a number of other rents, and the argument is safe only when the comparison is a true one. The ordinary method of contrasting the pressure of different rents is by comparing the rate per acre at which they fall on the land, but this is obviously only trustworthy when the different parcels of land are of precisely similar value. It very rarely happens that this is the case, and hence acreage rates are seldom of use except where they concern considerable tracts of country over which differences in individual holdings would cancel out. The superficial extent of land is only one of the numerous qualities which produce its value: the depth and quality of its soil and its situation are also matters for primary consideration, and any comparison which neglects them must be fallacious. The instrument which is used to bring into account depth, quality and situation of soil as well as area is the "soil unit," a term combining all the qualities on which the productiveness of land depends. It would be possible to define a soil unit as a given quality of soil of a certain quality or as an area yielding a certain amount of net produce, as for instance 100 lbs. of wheat. But as the soil unit is only used to express a relation it is needless to attach to it any absolute value of its own. It suffices to assume that an acre of a given class of soil contains a certain arbitrary number of soil units, and then to state the relative value of other classes in terms of the number of soil units they contain per acre when compared with the class adopted as the standard or starting point. Thus if the productive value of an acre of each of three soils A, B and C is as 3 : 2 : 1, and B is taken as the starting point, the precise number of soil units assumed to exist in an acre of B may be stated at any figure so long as the number of units in A is put at 50 per cent. more, and those in C at 50 per cent. less. If, for instance, the number of soil units in an acre of soil B is taken as 32, the number in an acre of soil A will be 48, and that in an acre of soil C will be 16.

The first step in working this system is to ascertain the various classes of land occurring in the districts. Land is classed (1) according to its agricultural capacity (*e. g.*, rice land, wheat land, &c.), (2) according to its natural soil, and (3) according to qualities in position, lie of surface, irrigability and so forth, which affect it advantageously or the reverse. Very great care is taken to ensure that the land classing is effected as accurately as possible, the record being checked several times by independent agency. The next step is to determine the relative value of each class expressed in the number of soil units per acre. This is no doubt a task of great complexity and difficulty. Much may be learnt from the people, who, however unwilling to give information regarding the absolute value of their land, have no such hesitation in stating the value of a given plot in relation to that of another plot, as for instance that one is $1\frac{1}{2}$ times as much as the other. The result of enquiries is carefully checked by numerous crop experiments effected to throw light on the net produce of the various land classes. Rents are paid in lump sums for holdings which are usually very heterogeneous, and include a number of different soils. Rent analysis and comparison therefore can give but little assistance. A scale of factors having been framed showing the number of soil units per acre of each

land class when compared with other classes, the number of soil-units in each holding or village is calculated by multiplying the area of each soil class by the factor of the class. Thus, for instance, if 100 acres of land fall into three soil classes, the factors for which are 32 for A, 16 for B, and 4 for C, the areas being respectively 50, 75 and 25 acres, the number of soil-units will be—

A. $50 \times 32 = 1,600$
B. $75 \times 16 = 1,200$
C. $25 \times 4 = 100$

2,900

If the existing rental payment was Rs. 272 its incidence per soil-unit would be $\frac{272}{2,900} = 1{\cdot}5$ anna. Were the soil classes differently distributed and the number of soil-units less, what would seem *primâ facie* to be a lower rent might in reality press much more heavily. If, for instance, the rent was only Rs. 225 instead of Rs. 275, and the classification was—

A. $25 \times 32 = 800$
B. $50 \times 16 = 800$
C. $75 \times 4 = 300$

1,900

the incidence per soil-unit would be Rs. $\frac{200}{1,900} = 2$ annas per acre, and the rent would be much the heavier of the two.

A chain of unit incidences worked out in this way for a number of villages would show that some were paying much heavier than others. Amongst the causes which have produced these inequalities are inequality in previous revenue assessment, differences in the status of ryots affecting their liability to rent enhancement at the malguzar's pleasure, and —what is perhaps the most important of all—differences in the treatment of the tenants by the malguzar arising from the character of their personal relations. If careful enquiry shows that there are no substantial reasons for the inequalities thus discovered in rental pressure, there would be good ground for the enhancement of the lower payments.

Coming now to the second class of arguments used in rent enhancement, those obtained deductively from considerations based on the rise in prices, let it be supposed that prices would justify an enhancement of 33 per cent. on rents paid at the former Settlement, whereas a comparison of the rental paid then and now, effected by contrasting* the rate per acre in cultivation at both periods, shows that rents, considered in the aggregate, have risen by 10 per cent. only, a further enhancement of 23 per cent. on the original rental or of 20 per cent. on the rental as it stands enhanced at present is justified. The "soil-unit" system offers a means of distributing this enhancement equitably, and with due reference to inequalities of pressure. The average incidence is calculated for all villages taken together, and amounts to, say, 1·5 anna. A 20 per cent. enhancement raises this to 1·8 anna, and this figure is taken as a guide in fixing the unit-rates adopted for calculating the revised rental of the different villages.

* After of course making any needful corrections to provide for the lowering of the average quality of the land by the inclusion of inferior soils with the extension of cultivation.

In the hands of inductive reasoning the system is then an instrument for arriving at the amount of an enhancement; it serves also as a means for fairly distributing an enhancement arrived at by deductive reasoning, as it reduces every ryot's holding to, so to speak, a common denominator. This distribution can be easily effected by the multiplication of the sanctioned unit-rate into the number of units which each holding contains. The same result will be obtained by the use of a scale of acreage rates framed by multiplying the factors by the sanctioned unit-rates.

A very important feature in the system is that each village is considered separately and is rated, not as falling into a group or class, but with reference to its particular circumstances. In other words, the rates are *village* rates and not *group* or *pargana* rates, the rate framed for the group being used as a general guide and nothing more. The assessing officer is able to take into practical account the differences in the value of land which are so often found to exist between adjacent villages, and can moreover so shape his rate as to avoid the imposition of an unduly heavy *per saltum* enhancement, however well justified by other circumstances. As a general rule a single rate is adopted for all the lands in a village, whether cultivated by ryots or by the landlord, but in cases where to avoid a very large enhancement of rents a lower rate is adopted than would otherwise be warranted, a separate rate may be used for the valuation of the landlord's demesne lands.

The village rate is used for the calculation of a revised rent for each holding in detail, but the rent so obtained is not adopted without further examination. Remissions are allowed on improvements raising the class of land which have been made since the last preceding Settlement, and on land under resting fallow. The existing rental is further taken into careful account, and a remission granted where the exaction of the full revised rent would impose an undesirably large enhancement. The officer giving out the revised rents has also discretionary power to modify their amounts on good cause shown, subject to the condition that the total revised rental of the village stands as sanctioned. It may safely be assumed that a total, arrived at by the detailed calculations and under the safeguards used, is fair for the village as a whole, and that any errors in its distribution should cancel one another. As a matter of fact, however, changes are very rarely called for at the time of announcement.

The addition of the average *siwai* income to the result of these rental calculations produces the total village assets on which the Government revenue assessment is based. The share of these assets taken as revenue may range between 50 and 65 per cent. according to the circumstances of the case, so wide a margin being necessitated by the extraordinary unevenness of the assessment of 1863, which absorbed over 75 per cent. of the assets in some districts, and less than 47 per cent. in others. As a general rule the share of assets now taken lies between 50 and 57 per cent.

52. Malik-makbuza lands are assessed on the basis of their rental value, a substantial drawback being allowed to this privileged class of ryots. Their assessment is added to that worked out as above for the rest of the village lands, and the result is the full assessment (*kamil jama*) of the village or mahal. In the case of ordinary malguzari villages this is the revenue annually payable by the proprietary body. Villages held by revenue assignees (muafidars) pay

of course only so much as is not covered by the terms of the assignment. Where zamindari estates are held on less than full revenue, the total of the village assessments gives the total assessment of the estate (on which the Government cesses are calculated), but the actual payment of the zamindar (termed *takoli*) is often fixed at a very much lower figure with reference to the circumstances of the estate and of its tenures and to its revenue payments in the past. It may be mentioned here that large tracts of forest included in zamindari estates (and which for this reason escaped reservation by Government at the Settlement of 1863) are constituted separate "forest mahals," and are assessed separately from village lands on the basis of the average income yielded by them to the zamindars. Such forest Settlements generally run for terms of three years only.

53. The period now adopted for Land Revenue Settlements is 20 years, but in order to bring the new Settlements to expiration according to a proper roster they are being made for different terms ranging from 12 to 23 years, in different districts.

In ryotwari villages, the whole of the ryot's payment is taken as the Government revenue, subject to a small drawback or commission allowed the managing headman (*patel*) for the trouble of collection. Each ryot is settled with direct, and the headman has no responsibility for making good defaults of his ryots. The payments of ryots have in the past been calculated partly by the use of fixed scales of acreage rates, and partly on the soil-unit system The latter is the procedure now generally followed.

It remains to detail the cesses taken by Government over and above the land revenue. They are calculated on the land revenue at the following rates :—

Additional rate	2	per cent.	
Local rates for Roads, School and Post Office ...	5½	do.	
Patwari cess ... from 3½ to	6	do.	according to district requirements.

The first is an Imperial rate imposed by Act X of 1878. The proceeds of the Road, School and Post Office cesses are used within the Provinces in supplement to the grants for these branches of expenditure made from Imperial Revenues. The patwari cess provides the pay of the village land record staff, that is to say, of the patwaris and their supervising officers, and the rate at which it is levied in each district is so cast as to provide but a moderate working balance after defraying the expenditure incurred in that district.

6.—*Civil Divisions of British Territory.*

54. The Central Provinces are divided for administrative purposes into four Divisions, each controlled by a Commissioner ; and subordinate to Commissioners are 18 Deputy Commissioners, each holding executive charge of a district. In every district there are two or more sub-divisions (*tahsils*), the direct management of each being entrusted to a native Sub-Collector called a Tahsildar.

There are 50 such sub-divisions (or *tahsils*) in the 18 Districts of the Central Provinces, distributed as follows :—

Division.	Districts.	Tahsils.	Division.	Districts.	Tahsils.
Nagpur...	Nagpur ...	Ramtek.	Nerbudda	Betul. ...	Betul.
		Katol.			Multai.
		Nagpur.		Chhindwara...	Chhindwara.
		Umrer.			Sausar.
	Bhandara ...	Bhandara.		Hoshangabad.	Sohagpur.
		Sakoli.			Hoshangabad.
		Tirora.			(Seoni.)
	Chanda ...	Warora.			Harda.
		Brahmapuri.		Narsinghpur...	Narsinghpur.
		Mul.			Gadarwara.
		Sironcha.		Nimar ...	Khandwa.
	Wardha ...	Arvi.			Burhanpur.
		Wardha.	Chhattisgarh...	Raipur ...	Simga.
		Hinganghat.			Raipur.
	Balaghat ...	Burha.			Drug.
		Behir.			Dhamtari.
Jubbulpore ...	Jubbulpore ...	Murwara.		Sambalpur ...	Sambalpur.
		Sihora.			Bargarh.
		Jubbulpore.		Bilaspur ...	Mungeli.
	Saugor ...	Banda.			Bilaspur.
		Kurai.			Seorinarain.
		Saugor.			
		Rehli.			
	Damoh ...	Hatta.			
		Damoh.			
	Seoni ...	Lakhnadon.			
		Seoni.			
	Mandla ...	Ramgarh.			
		Mandla.			

Incorporated with the districts are 118 zamindaris or minor chieftainships. The Provinces also include 15 Feudatory States. These are attached to districts, some being under the direct administration of their own chiefs, while others are under Government management.

7.—*Details of the last Census—Tribes and Languages.*

55. The fourth General Census of the Central Provinces was taken on the night of the 26th February 1891.

The gross results at each successive Census have been as follows :—

Area and population.

Census of	Total area in square miles.	Total population both sexes.	Number of persons per square mile.
1866	114,718	9,104,511	79·3
1872	113,797	9,251,229	81·3
1881	113,279	11,548,511	101·9
1891	115,936	12,944,805	111·6

Variation in area.

56. The variations in area result partly from transfer and partly from detected error. Between the 1st and 2nd Census, a portion of the Nimar district was transferred to His Highness the Maharaja Holkar. In 1874, after the 2nd Census, 866 square miles of what was formerly the Upper Godavari district was transferred to the Madras Presidency. On the other hand, the area returned in 1881 includes an addition of 368 square miles on account of detected short return in 1872 of the areas of certain districts.

The area recorded during the present Census has been taken from the corrected area statement published by the Revenue Department. There has been no change in the limits of the Provinces since 1881.

Increase in the population.

57. The statement given below shows that the population has increased enormously during the last 19 years.

Census of		Population.
1872	...	9,223,534
1881	...	11,548,511
1891	...	12,944,805

An increase of 40·3 per cent. on the population of 1872 and of 12·1 per cent. on that of 1881.

The Provincial Superintendent has shown that variations in the population may arise from a combination of any of the following causes:—

(1) Greater accuracy of enumeration on the one occasion than on the other.

(2) Migration in or out of the tract during the interval.

(3) Natural increase or decrease in the population as shown by the births and deaths among the resident population.

The Provincial Superintendent has discussed these causes at length, but has not come to any conclusion as to the proportion of the increase which may be attributed to each. That the enumeration on the present occasion was more complete, he is convinced both from the results recorded in the more remote and jungle tracts and also from a consideration of the proportions between the sexes recorded. As regards natural increment he has considered the Registration returns in British districts for the last ten years, and notes that the number of females in most districts is increasing at a faster rate than the number of males, in which respect the Registration returns bear out the Census results: but his conclusion is that the vital statistics returns cannot be relied on in every case, inasmuch as they hardly bear out the general idea of the salubrity or insalubrity of different parts of the Province, those districts reckoned as comparatively healthy showing a larger death-rate than those in reputedly unhealthy ones.

Moreover it is found that, according to the Registration tables, a comparatively high birth-rate exists in certain districts in which the Census returns show few young children to exist; while where the Census figures show a very great number of children to exist the Registration returns present a low birth-rate.

Area and population of different districts.

58. The following table exhibits Census statistics for the Civil divisions of the Provinces with the included Zamindaris and attached Feudatory States:—

Districts.	Attached Feudatories.	Tahsils.	Zamindaris.	Area.	Population.
Nagpur	...	4	...	3,843	757,862
Bhandara	...	3	27	3,968	742,850
Chanda	...	4	20	10,749	697,610
Wardha	...	3	...	2,428	400,854
Balaghat	...	2	9	3,139	383,331
Total Nagpur Division ...	...	16	56	24,127	2,982,507
Jubbulpore	...	3	...	3,948	748,146
Saugor	...	4	...	4,007	591,743
Damoh	...	2	...	2,831	325,613
Seoni	...	2	...	3,198	370,767
Mandla	...	2	...	5,056	339,373
Total Jubbulpore Division ...	...	13	...	19,040	2,375,642
Hoshangabad	1	4	3	4,749	548,494
Narsinghpur	...	2	...	1,916	367,026
Chhindwara	...	2	9	4,630	407,494
Betul	...	2	...	3,824	323,196
Nimar	...	2	...	3,357	253,486
Total Nerbudda Division ...	1	12	12	18,476	1,899,696
Raipur	5	4	17	28,171	2,379,028
Bilaspur	2	3	13	9,277	1,281,345
Sambalpur	7	2	20	16,845	2,026,587
Total Chhattisgarh Division ...	14	9	50	54,293	5,686,960
GRAND TOTAL, CENTRAL PROVINCES ...	15	50	118	115,936	12,944,805

Of the four Divisions, the Chhattisgarh Division is the largest, comprising 46·8 per cent. of the area, and 43·9 per cent. of the total population.

Chanda and the three districts of the Chhattisgarh Division are the largest both in area and population. The following details are given :—

	Excluding Feudatories.		Feudatory States.		Grand Total.
	Area.	Population.	Area.	Population.	Population.
	Square miles.		Square miles.		
Raipur	11,724	1,584,427	16,447	794,601	2,379,028
Bilaspur	8,341	1,164,158	936	117,187	1,281,345
Sambalpur	4,948	796,413	11,897	1,230,174	2,026,587
Chanda	10,749	697,610	...	...	697,610

Other districts containing over half a million inhabitants are Nagpur (757,862), Jubbulpore (748,146), Bhandara (742,850), Chanda (697,610), Saugor (591,743) and Hoshangabad (548,494).

The average area of a district, including Feudatory States, is 6,440 square miles, and excluding Feudatory States, 4,806.

The smallest district is Narsinghpur, with an area of 1,916 square miles, and the district with the smallest population is Nimar (253,486). Of the 15 Feudatory States, 14 are attached to the Chhattisgarh Division, and one (Makrai) to the Hoshangabad district.

Feudatory States.

59. The total area of the Feudatories is 29,435 square miles, and the total population, 2,160,511. The following are the most important Feudatory States:—

	Population.	Area Square miles.
Bastar	310,884	13,062
Patna	332,197	2,399
Kalahandi	326,295	3,745
Sonpur	195,245	906
Nandgaon	183,866	871
Khairagarh ...	181,184	931
Raigarh	168,525	1,486

Zamindaris.

60. The 118 zamindaris comprise a total area of 21,398 square miles with a total population of 1,613,614.

The density of population in the zamindaris varies from 157·4 in the zamindaris of the Bhandara district and 136·4 in those of the Sambalpur district to 27·0 in the Hoshangabad district.

Density of population.

61. The average population of the Provinces per square mile results as—

73·4 in Feudatory States.
124·7 in British districts.
111·7 in the Central Provinces as a whole.

The average density of the population of the four Divisions varies as follows:—

Division.	Excluding Feudatory States.	In Feudatory States.	Inclusive of Feudatory States.
Nagpur	123·6	...	...
Jubbulpore	124·7	...	...
Nerbudda	102·6	119·6	102·8
Chhattisgarh	141·7	73·1	104·7

Chhattisgarh is thus first in respect of average density as well as of population.

In the case of the following Feudatory States and districts, the density exceeds 150 per square mile, *viz.*:—

Districts.	Average.	Feudatory.	Average.
Jubbulpore ...	189·5	Nandgaon	211·
Narsinghpur ...	191·6	Khairagarh	194·6
Nagpur ...	197·2	Chhuikhadan	235·6
Wardha ...	165·1	Sakti	183·9
Bhandara ...	187·2	Sarangarh	154·1
Sambalpur ...	161·	Sonpur	215·5

The tracts in which the average density is less than 75 per square mile are:—

Districts.	Average.	Feudatory.	Average.
Mandla ...	67·1	Bastar	23·8
Chanda ...	64·9	Kanker	57·6
		Bamra	52·5
		Rairakhol	24·4

Urban and rural population.

62. Of the total population, 778,248, or 6 per cent. only, are urban, that is, inhabit towns of more than 5,000 inhabitants; the remainder of the population,

94 per cent., inhabit villages. More than two-thirds of the people living in Feudatory States are shown as living in villages of less than 500 inhabitants as compared with half the population so returned in British districts. The number of villages has decreased since 1881 by 261 in British districts and 837 in Feudatory States, the decrease having been wholly in villages of the smallest size. The variation in the number of villages since last Census is shown in the table below:—

Variation in the number of villages since last Census.

Villages.	British Districts.			Feudatory States.			Central Provinces.		
	1881.	1891.	Increase or Decrease.	1881.	1891.	Increase or Decrease.	1881.	1891.	Increase or Decrease.
With less than 200 inhabitants.	19,076	17,179	—1,897	8,540	6,810	—1,730	27,616	23,989	—3,627
With 200 and less than 500 inhabitants.	11,231	11,946	+715	2,257	2,812	+555	13,488	14,758	+1,270
With 500 and less than 1,000 inhabitants.	3,379	4,073	+694	385	649	+264	3,764	4,722	+958
With 1,000 and less than 2,000 inhabitants.	694	901	+207	42	106	+64	736	1,007	+271
With 2,000 and less than 3,000 inhabitants.	121	134	+13	9	15	+6	130	149	+19
With 3,000 and less than 5,000 inhabitants.	63	63	...	5	9	+4	68	72	+4
With 5,000 and less than 10,000 inhabitants.	...	7	+7	...	...	...	...	7	+7
Total Villages ...	34,564	34,303	—261	11,238	10,401	—837	45,802	44,704	—1,098

Villages of the lowest class are most common in those districts which contain a large extent of forest or waste. Such are Mandla, where 65·4 per cent. of the villages contain less than 200 inhabitants, and Chanda 64·5 per cent. The percentage of the smallest villages in the whole Provinces is 53·7 per cent. of the total number of villages. Villages of the next class, *i. e.*, between 200 and 500 inhabitants, are most numerous in Chhattisgarh, where they are nearly as common as ones of the smallest size which predominate in other parts of the Province.

Ten per cent. of the total number of villages fall in the next class, *viz.*, 500—1,000; while only 2·2 per cent. of the villages contain 1,000—2,000 inhabitants, the largest percentage being 7 per cent. in Bhandara. Only 3·7 of the villages in the Nagpur Division are of this size.

Of villages above 2,000, there is a percentage of ·5 only in the Provinces, the largest individual percentages in districts being Wardha and Makrai, 1·8 per cent., Nagpur, 1·7, the smallest—Bastar and Mandla—each with ·1.

Sex.

63. The total number of males as compared with females is shown below:—

	British Districts.	Feudatories.	Total for Provinces.
Males ...	5,397,304 ...	1,089,011 ...	6,486,315
Females ...	5,386,990 ...	1,071,500 ...	6,458,490

The number of females per 1,000 males by districts are shown below :—

Females more than males.

		1891.	1881.
Raipur	... ...	1,042	1,018
Bilaspur	... ...	1,031	1,018
Bhandara	... ...	1,026	1,006
Chhindwara	... ...	1,016	1,003

Saugor	... ...	936	916
Nimar	... ...	932	912
Uria States	... ...	979	963

After an examination of the proportion between the sexes in the different religions and as affected by migration, the Provincial Superintendent goes on to review the sex averages at each age. The conclusions which he draws from the above are that it is superfluous to assume that the concealment of females has had any effect on the sex returns of the present Census, as in almost every case the low proportion of females in the districts in which these results are found can be otherwise accounted for.

(*a*) Among the aboriginal tribes females generally exceed males, except in the southern parts of the Provinces; the excess is most marked in the earlier periods of life, fewer women surviving to old age than amongst other classes of the community. In Bastar and Kalahandi the excess of males appears to be due to the greater mortality among females in after life, which is specially noticeable among the aborigines of the southern hills.

(*b*) The Vindhyan and Nerbudda Valley districts—with the exception of Narsinghpur—and the districts of Wardha and Nagpur, have attracted a great deal of immigration from distant parts of India. Among the immigrants the male sex largely predominates, so that the balance of the sexes in all these districts has been sensibly affected by the influx of settlers to their midst. In Narsinghpur, where there has been comparatively no immigration, the sexes are much more nearly equal.

(*c*) It is probable that almost everywhere more males are born than females: this is specially the case in Saugor, Damoh, Jubbulpore and Narsinghpur. The first five years of life are more fatal to male children than to female, but between the ages of 10 and 14 there is excessive mortality among the female sex.

(*d*) The districts and States of Chhattisgarh are remarkable for the longevity of the female sex, due probably to late marriages and to the active life which females in those parts lead.

Age.

64. The age statistics afforded by the recent Census are as unreliable as ever. The most extraordinary feature in the returns is that presented by the age statistics for young children. It is reasonable to suppose that the ages of persons in the first few years of life would be more accurately returned as there is not the same chance of mistake. This is, however, by no means borne out by the Census results. Assuming the birth-rate to be constant it is natural to suppose that the number of children in the second year of life will be less than those in the first year, as there must have been more deaths among those who have been in existence two years than among those who have only been one. Similarly there should be fewer in the third year than in the second, and in the fourth than the third. But the result given by the Census shows that in the second year of life, the number of children is very much lower than in the first, but in the third the number rises, and there are more children in existence than in the first year. Similarly in the fourth and third years. Similarly in the period 5—9, there are more children alive than in the period 0—5. Something of the same kind was observable in several of the Indian Provinces at the last Census, so the irregular record of children's ages is not altogether fortuitous. The average age in the Provinces was 24 years, being 23·83 in the case of males and 24·18 in the case of females. According to the Census of 1881, the average age of the total population was 24·07—of males 23·89 years, and of females 24·25 years. The mean age of the female sex is thus slightly in excess of that of males, but in both cases it is no doubt pitched too low owing to understatement in the latter years of life.

The table below shows the age distribution of 10,000 persons of each sex, and compares the Census in this respect with the statistics for 1881 and with those of two European countries:—

Age-distribution of 10,000 *persons of each sex.*

Age Period.	British Districts.				Central Provinces, 1891.		England and Wales.		France.	
	1881.		1891.							
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.
1	2	3	4	5	6	7	8	9	10	11

10—14 ...	1,102	906	1,203	1,001	1,209	1,006	1,109	1,048	890	871
15—19 ...	703	686	691	656	699	669	1,003	959	848	841
Total under 20 ...	4,845	4,683	4,921	4,766	4,978	4,836	4,744	4,513	3,569	3,513
20—24 ...	759	913	707	833	707	836	880	912	922	968
25—29 ...	898	966	840	911	839	908	776	800	732	696
30—39 ...	1,476	1,370	1,449	1,402	1,447	1,392	1,254	1,276	1,365	1,341
40—49 ...	981	886	1,034	910	1,018	888	966	998	1,222	1,206
50—59 ...	554	558	560	546	539	526	687	721	1,005	1,020
60 and over ...	487	624	489	632	472	614	693	780	1,185	1,256

From this table the following general facts are observable :

(1) The falling off in children of 0—4 years of age as compared with 1881, and the rise in the number of children aged 5—9. Now the years 1886—90 were bad years throughout the Province; food was scarce, and the general health was low: in the first half of the decade, on the other hand, were prosperous seasons, and to this is to be ascribed the rise in the number of children between the ages of 5 and 9.

(2) The large number of young children under 5 and under 10 years of age in this country as compared with Europe, and more especially with France, where the number of children is particularly low.

(3) In old age the European countries gain on India, the number of persons who in Europe attain the age of 50 and over forming a larger portion of the total population than in the East.

(4) Both in this country and in Europe, the number of old women is considerably larger than the number of old men.

Considered with respect to the various religions, among Jains the number of young people is small. The Mahomedan community also displays a far lower proportion of children than the average of the general population. The figures for the aboriginal population are most noteworthy. They are set forth below :—

Age-distribution of 10,000 *persons.*

Age.		Males.	Females.
0—4	... ...	1,511	1,639
5—9	... ...	1,685	1,629
	Total under 10 ...	3,196	3,268
10—14	... ...	1,211	1,014
15—19	... ...	654	667
	Total under 20 ...	5,061	4,949
	20 and over ...	4,939	5,051

A very large number of children are brought into the world only to die off, most of them during the early years of life. Among a community so improvident as are most of the hill tribes, the population will naturally go on untrammelled by any consideration as to the future well-being of the offspring they produce. Some allowance, however, should be made for the greater mortality which must necessarily exist among people who lead so hard a life, and which will thus reduce the number of old among the aboriginal races, at the same time heightening the proportion the young must bear to a population so reduced. But everything considered, the number of children among these tribes must appear exceedingly great.

Marital condition.

65. At the recent Census, the instructions issued were that each person should be asked whether he or she was married or not, and that the answer should be put down without further enquiry. In most cases this was supplemented by local instructions to the effect that the forms of marriage known as *pat* and *churi pahindna* should be recognized, and persons united by such ties should be recorded as married. The necessity for this arose from the very free manner in which such unions can be contracted and dissolved, especially in the Chhattisgarh country.

The appended statement contrasts the civil condition of the people in the Central Provinces with the results of the Census of 1881, and with those of some other Provinces :—

Distribution of 10,000 *persons of the population of each Province or Country by Civil condition.*

Province or Country.	Males.			Females.		
	Single.	Married.	Widowed.	Single.	Married.	Widowed.
Central Provinces British Districts, 1881	4,631	4,939	430	3,439	5,080	1,481
Central Provinces British Districts, 1891	4,668	4,890	442	3,560	4,960	1,480
Central Provinces Total ...	**4,748**	**4,833**	**419**	**3,685**	**4,891**	**1,424**
Berar	3,838	5,588	574	2,635	5,769	1,596
Bombay	4,712	4,812	476	3,238	5,152	1,610
Madras	5,378	4,279	343	3,785	4,363	1,852
N.-W.-P. and Oudh ...	4,503	4,864	633	3,071	5,253	1,676
England and Wales	6,193	3,463	344	5,928	3,314	758
France	5,513	3,954	533	5,041	3,934	1,025

One of the most noticeable features in the proportions which have been given is the fall that is apparent in the number of married people since the last enumeration. Moreover as the number of married has decreased the number of unmarried has gone up. The explanation is to be found in the fact that there are now a much larger number of persons alive in the early years of life than was the case in 1881. As the unmarried state predominates among persons under 15 years of age, the increased proportion of the latter must necessarily be followed by a corresponding rise in the number of unmarried.

The statement appended shows the average number of persons among 10,000 of the followers of each religion who are single, married or widowed :—

Distribution of 10,000 *persons of each religion by Civil condition.*

Religion.	Males.			Females.		
	Single.	Married.	Widowed.	Single.	Married.	Widowed.
All religions	**4,748**	**4,833**	**419**	**3,685**	**4,891**	**1,424**
Hindu	4,643	4,935	422	3,562	4,992	1,446
Jain	4,751	4,615	634	2,675	4,642	2,683
Animistic	5,254	4,360	386	4,334	4,440	1,226
Mussalman	4,847	4,662	491	3,529	4,620	1,851
Christian	6,955	2,789	256	5,116	3,841	1,043

Among Hindus, the married state is more common than amongst the general population, the average for which is reduced by the low proportion of married among aboriginal tribes. The number of widows amongst the aborigines is naturally small, owing to the prevalence of widow re-marriage.

In 1881 no detail of age was kept under the age of 10 years. In the accompanying abstract, the figures for two intermediate periods which have been shown in the tables at the present Census are given, as well as the result of the present Census with regard to children under 10, compared with similar results in 1881:—

Percentage of females between the ages of 0—9 who are married.

(*a*) DISTRICTS.

Districts.	1891.			1881.
	0—4	5—9	0—9	0—9
Saugor	0·5	5·2	2·9	3·6
Jubbulpore	1·1	12·1	6·8	7·0
Mandla	1·4	8·5	4·9	4·0
Narsinghpur	0·7	10·2	5·4	6·4
Wardha	1·6	22·7	12·0	15·1
Nagpur	1·3	18·9	10·1	10·7
Chanda	2·4	16·8	9·4	11·3
Bhandara	1·2	12·7	6·8	8·4
Raipur	1·4	12·1	6·6	8·0
Sambalpur	0·4	4·7	2·6	3·0
British Districts	1·2	11·2	6·2	6·9

(*b*) RELIGIONS.

Hindus	1·3	13·0	7·1	8·1
Mussalmans	0·5	4·6	2·6	2·6
Jains	0·5	8·7	4·7	6·4
Animistic	0·6	3·2	1·9	2·1

The districts of the Nagpur plain are those where the practice of girl marriage most obtains. In Wardha, of girls under the age of 10, 12 per cent. are married, in Nagpur 10·1 per cent., and in Chanda 9·4, and it is to its prevalence among the Hindu castes of this part of the country that the provincial average for Hindus is brought so high. Jains marry 4·7 of their daughters at this age, and Mahomedans 2·6. Marriage under the age of 5 years takes place among several of the castes in the Mahratta districts, but is not very common elsewhere except in the districts of Jubbulpore and Mandla.

Omitting the detail of age it is found that in general there are more wives than husbands among Hindus and aborigines, and more husbands than wives among Jains and Mahomedans. Polygamy is most common among the forest tribes, where between three and four men in every hundred have a second wife. In the districts in which there has been little or no immigration from a distance, such as Seoni, Chhindwara, Balaghat, Bhandara and Raipur, wives nearly equal, and sometimes out-number, husbands among Mahomedans. There are fewer wives than husbands in the four districts which form the northern border of the Province—Saugor, Damoh, Hoshangabad and Nimar—due presumably to immigration from other parts of India of married men unaccompanied by their wives.

Comparing by age we find that between the ages of 15 and 40, the number of spinsters is very small compared with the number of bachelors—to every 10 of the latter there are on an average about 2·2 of the former. Married women are in excess of men up to middle age, after which husbands are more numerous, the balance being turned by the excess of widows. The practice of widow re-marriage obtains among all the aborigines and all the common Hindu castes. Among Jains under 15 years of age there are 11 widows to 1 widower, and 5 widows to 1 widower between the ages of 15 and 40.

Religion.

66. The following statement shows the number of persons returned as of each religion, and the proportion which followers of each bear to the total population. The religions have been grouped for analysis according to what may in some degree be considered the order of development. The *Animistic*, or the religion of the forest or hill tribes, has been taken as the earliest; then follows the Brahminic or orthodox Hinduism, and below it the specially Indian offshoots of Sikhism, Jainism, Brahmoism, and the new creed returned as Aryanism; next Buddhism and Zoroastrianism; and lastly the three historic creeds—Judaism, Islam and Christianity.

Statement showing the number of persons of each Religion in 1881 *and* 1891.

Note.—In 1881 twelve persons were shown as "Religion unspecified."

Persons professing the religion recorded as Animistic form nearly one-sixth of the total population.

Hindus form the great mass of the inhabitants of the Central Provinces. Both in British districts and in Feudatory States, they number about four-fifths of the whole population. At the Census of 1881 separate statistics were given for the two great dissenting sects—the Kabirpanthis and the Satnamis. On the present occasion all have been amalgamated with Hindus, but the numbers have been separately taken out and are referred to later on. Under the term Hindu have been included the members of the depressed castes, and all the semi-Hinduized aborigines who cared to return themselves as such. Much difficulty was experienced in recording the religion of the forest tribes, partly owing to the difficulties which must have frequently beset the Hindu enumerator as to whether these outcastes were to be admitted as his co-religionists or not, and partly owing to the very vague ideas entertained by many of the depressed castes as to what their religious beliefs were. In the case, however, of the more civilized of the aboriginal races, the adoption by them of Hindu customs and beliefs has now been so far recognized that their claims to be admitted as Hindus can no longer be denied.

Statistics of sects were worked out in the case of the two great bodies of Kabirpanthis and Satnamis as below :—

Kabirpanthi and Satnami Sects.

District or State.	Kabirpanthi.			Satnami.		
	Number.		Increase or Decrease.	Number.		Increase or Decrease.
	1881.	1891.		1881.	1891.

It will be observed that there is an enormous variation in the figures for the Kabirpanthi sect, its members being nearly double what they were 10 years ago. Though it is certain that the simplicity and easy profession of the faith have made it popular among certain classes of the community, still it can hardly be imagined that its members have increased to the extent which the figures show. It appears that in the returns of 1881 many persons had been recorded as Kabirpanthis, but as they were disciples of Kabir in name only, while conforming to all the rites and ceremonies of Hindus, the entries were corrected in the books at district head-quarters. For this reason any comparison of the returns of the two enumerations affords but an imperfect idea of the progress which the sect is making.

Castes and Tribes.

67. The principal castes and tribes in the Central Provinces, with the number of persons returned under each, are shown below with the variation in their numbers since the last Census:—

(a) Principal Hindu Castes.

Castes.	Number returning.		Net increase.	Increase per cent.	Proportion of females per 1,000 males.	Percentage of total population.
	1891.	1881.				
Kolta ...	110,200	92,827	17,373	18·7	997	·8
Kawar, Kaonra...	142,814	121,436	21,378	17·6	1,022	1·1

Teli	734,935	636,244	98,691	15·7	1,015	5·7
Ahir, Rawat, Gahra ... Gaoli, etc.	588,919	509,526	79,393	15·6	995	4·6
Chamar	876,060	760,101	115,959	15·3	1,003	6·8
Kumhar	102,682	89,201	13,481	15·1	981	·8
Gaur	245,034	214,936	30,098	14·0	997	1·9
Dhobi	136,541	119,936	16,605	13·8	1,032	1·1
Mali, Marar	357,988	316,721	41,267	13·0	1,006	2·8
Dhimar	218,007	194,453	23,554	12·1	1,007	1·7
Lohar, Khati	149,169	133,476	15,693	11·8	1,006	1·2
Rajput	379,731	347,133	32,598	9·4	961	2·9
Gowari	120,247	110,363	9,884	9·0	1,012	·9
Kunbi, Kurmi	801,766	740,528	61,238	8·3	989	6·2
Lodhi	287,241	265,147	22,094	8·3	988	2·2
Nai, Mhali	140,143	131,614	8,529	6·5	992	1·1
Brahmin	382,938	359,886	23,052	6·4	898	3·0
Koshti	137,891	129,559	8,332	6·4	982	1·1
Bania	129,270	122,358	6,912	5·6	937	1·0
Kachhi	122,646	116,677	5,969	5·1	965	·9
Kalar, Gaundla... ...	162,027	156,308	5,719	3·7	1,001	1·3

(b) Principal Aboriginal Tribes.

Khond	196,400	149,758	46,642	31·1	951	1·5
Bhil	22,424	17,583	4,841	27·5	989	·2
Sawara	156,921	130,719	26,202	20·0	1,014	1·2
Baiga, Binjhwar ...	120,314	102,942	17,372	16·9	996	·9
Gond, Halba	2,345,372	2,040,153	305,219	15·0	1,022	18·1
Kol	87,516	76,148	11,368	14·0	1,002	·7
Korku	95,634	84,909	10,725	12·6	989	·7

The castes containing the greatest percentage of the whole population are the Chamars, Kunbis (or Kurmis), Telis and Mahars, who form 6·8, 6·2, 5·7 and 5·2, respectively of the total population. Of these the Chamars are found in force in the northern districts of the Provinces and throughout the Chhattisgarh plain. The Kunbis are met with to the greatest extent in the districts of Chanda and Nagpur.

Though the manufacture and sale of oil is the traditional occupation of the Teli caste, the oil-pressers returns in the Occupation Table number only about a one-seventh part of the persons for whom this caste name has been recorded. In every part of the Provinces the Telis are an important agricultural class, and this more especially the case in Chhattisgarh. The caste is also largely engaged in shop-keeping. The caste includes 18 chief sub-divisions. The Mahars of the Mahratta country and the Mehras of the Hindi districts are the principal of the castes on which the duties of the village Kotwar devolve. The Mahars predominate in Nagpur, Bhandara and Chanda, numbering 16·3 and 17·3 per cent. of the population of the two former districts. The Mehras are numerous in Mandla, Narsinghpur, Betul, Chhindwara, Seoni and Balaghat, being most numerous in Betul. Of aboriginal tribes the Gonds are by far the most important. They number with their allied tribes 2,258,824, forming 16·7 per cent. of the total population in British districts and 21·3 per cent. in the Feudatory States. The Raj Gonds are the highest class among the Gonds and are found all over the Provinces. The Maria Gonds are confined to Bastar and the south of Chanda. The Halbas, who number 97,913, are found in Bhandara, Chanda Raipur, Nandgaon, Kanker and Bastar. In Raipur they are looked on and consider themselves of Gond descent, but have now universally adopted the religion and belief of the Hindus.

The Sawaras, Sabars or Sams are found in two localities, the first in the Vindhyan Hills north of the Nerbudda in the districts of Saugor and Damoh. The second in the east of Chhattisgarh and the Uria country. They have almost everywhere adopted the religious customs of the Hindus. The Khonds, 196,400 in number, are found all over the Uria country. They—like the Gonds—have returned a very large number of sub-divisions. The Kutias, the largest section recorded of the tribe, are the hill Khonds of the Kalahandi State, from which have also been returned Jharias, Kachharias and Paikarias.

Mother-tongue.

68. Statistics regarding mother-tongue have been classed by the Provincial Superintendent as under :—

A.—Indian languages—

(1) vernaculars of the Central Provinces,

(2) vernaculars of other Provinces.

B.—Other Asiatic languages.

C.—European languages.

Under the vernaculars of the Central Provinces the number of persons returning Hindi are 7,277,344, forming about three-fifths of the total population. Hindi is the leading vernacular in 13 out of the 18 districts, and in one form or another of 9 out of the 15 Feudatory States.

Marathi is spoken by 2,127,908 persons and is the language of the districts of Wardha, Nagpur, Bhandara and Chanda. It is also strongly represented in the parts of Nimar, Betul, Chhindwara and Balaghat, which form the southern outskirts of the Satpura range.

Next in importance is Uria, spoken by 1,602,732 persons—the language of the Sambalpur district and of the States of Bamra, Rairakhol, Patna, Kalahandi and Sonpur and of parts of Raigarh and Sarangarh. There are also a few Uria speakers on the eastern border of the Bastar State.

Of the total number of Gonds in the Provinces—2,258,824—only 1,228,076, or 54·4 per cent., have been returned as speaking Gondi. The distribution by districts is shown by the accompanying table :—

District.	Number speaking Gondi.		Difference.	Total Gonds.	Proportion speaking Gondi.
	1881.	1891.			
Saugor	3,747	2,338	—1,409	30,327	7·7
Damoh	3	1,191	+1,188	31,404	3·8

Nimar	3,217	2,166	—1,051	1,590	136·2
Betul	87,968	93,999	+6,031	96,101	97·8
Chhindwara ...	131,755	135,194	+3,439	152,096	88·9
Wardha	41,412	42,079	+667	44,790	93·9
Nagpur	43,060	44,319	+1,259	47,526	93·3
Chanda	132,348	132,598	+250	168,623	78·6
Bhandara	84,126	87,347	+3,221	93,638	93·3
Balaghat	74,156	76,262	+2,106	93,453	81·6
Raipur	...	27,822	...	250,595	11·1
Bilaspur	...	8,459	...	1,59,502	5·3
Sambalpur	...	763	...	64,455	1·2
Feudatory States ...	...	222,763	...	459,293	48·5
TOTAL CENTRAL PROVINCES ...	...	1,228,076	...	2,258,824	54·4

NOTE.—Owing to inclusion of other aboriginal dialects, the figures of 1881 for the Chhattisgarh districts cannot be ascertained. In Nimar, Gondi has been returned as the mother-tongue of tribes other than Gonds. In Bastar many of the tribes who have been reckoned as allied to Gonds use the Halbi language; this has conduced in great part to the low proportion of Gondi-speakers in the Feudatory States.

Of the dialects included in Gondi, Bharia is found only in the Chhindwara district; Ojhi in Seoni, Betul, Chhindwara, Chanda and Balaghat; Kolami in Wardha, and Deogarhi in Bilaspur. The remainder belong almost exclusively to Chanda and to the Bastar State. The total number of persons returning Indian vernaculars are 12,937,403.

Of the vernaculars of other Provinces the most numerously returned is Telugu, which is returned by 117,132 persons. They are found in almost every district in the Province, but the most important colonies are found in the towns of Kamptee and Nagpur. In the southern parts of Chanda and Bastar Telugu is the ancient vernacular. The number of persons speaking other Asiatic languages is quite insignificant, being 138 only. Of a total of 7,261 persons returning European languages 7,109 have returned English. Of the English-speaking only 41 per cent. give their birth-place as the United Kingdom, the Colonies or America, the remainder being Eurasians and Indian-born Europeans.

Birth-place.

69. The accompanying statement shows the general distribution by birth-place of the persons enumerated in the Central Provinces :—

Birth-place.	Number.	Proportion per 10,000 of total population.
A.—India.		
I.—Within the Province	12,412,439	9,589
II.—Elsewhere in India	528,407	408
Total A—India ...	12,940,846	9,997
B.—Other Asiatic Countries	888	1
C.—Europe.		
I.—United Kingdom	2,861	2
II.—Other Countries	119	...
Total C. ...	2,980	2
D.—Elsewhere	91	...
TOTAL ...	12,944,805	10,000

Thus 95·9 per cent. of the population have been born within the limits of the Provinces and 4·1 per cent. are immigrants from beyond. In 1881 the percentage of the indigenous to the total population was 95·2, immigration supplying the remaining 4·8. An examination of the returns shows that it is in immigrants from other parts of India that the decrease has taken place.

	Immigration from other parts of India.	Immigrants from beyond India.
1881	546,644	3,272
1891	528,407	3,959

The districts whose population includes the largest number of immigrants from other parts of the Province are Balaghat, Seoni and Wardha. In Balaghat 1,503 per 10,000 of the population come from other districts, chiefly from Bhandara; in Seoni 1,339, of whom 546 come from Balaghat, and in Wardha 1,273, including 814 from Nagpur. The districts including the largest number of immigrants from outside the Province are Nimar and Jubbulpore, where foreign immigrants amount to 1,219 and 1,203 respectively of the district population. The part of India from which the Central Provinces draws most of its immigrants is the Central India States, by which it is surrounded on the north-west and north-east. The districts of Saugor, Damoh, Jubbulpore and Hoshangabad are largely peopled by natives of these States. In Jubbulpore and Damoh they form about one-fourteenth of the population. In all the Feudatory States the birth-place return may be accepted as correct for all places outside the districts and States of Chhattisgarh. In Khairagarh, Chhuikhadan, Kanker, Kawardha and Sakti the place of birth of persons born in the States has almost invariably been recorded as Raipur or Bilaspur. In the other States the return may be

taken as reliable as regards the migrations between the several States and the districts in which they were formerly included. The accompanying abstract exhibits the main features of the immigration into the States whose figures it is possible to accept :—

Immigration into the Feudatory States.

State.	Total Population.	Immigrants from							
		District to which formerly attached.		Other Districts.		Other Feudatories.		Beyond the Province.	
		Number.	Percentage on column 2	Number.	Percentage on column 2	Number.	Percentage on column 2	Number.	Percentage on column 2.

Occupation.

70. In 1881 statistics were taken of the number of people actually exercising particular occupations. At the present Census, however, a record of the number of persons living by any particular occupation was obtained. Where a person has two occupations the chief one is given, except when one is connected with land. The classification of occupations was carried out in accordance with a scheme laid down by the Census Commissioner for India, and consisted in the first place of the division of the aggregate of the various means of livelihood into the following main classes :—

A.—Government.

B.—Pasture and agriculture.

C.—Personal service.

D.—The preparation and supply of material substances.

E.—Commerce and transport of persons, goods and messages and the storage of goods.

F.—Professions—learned, artistic and minor.

G.—Indefinite occupations and means of subsistence independent of occupation.

Subordinate to these seven classes were 24 orders, which again were subdivided into 77 sub-orders.

The accompanying table shows the distribution by occupation of the population of the Provinces :—

Class.	Order.	Sub-order.	No. in British Districts.	Feudatory States.	Total.
A.—Government.	I.—Administration...	1. Service of the Imperial and Provincial Governments	49,652	13,012	62,664
		2. Service of Local and Municipal Bodies ...	5,729	177	5,906
		3. Village service	140,697	26,741	167,438
	II.—Defence ...	4. Army.	12,827	39	12,866
		5. Navy and Marine	6	...	6
	III.—Foreign and Feudatory State service	6. Administrative service	467	...	467
		7. Military and other service	42	1	43
B.—Pasture and Agriculture.	IV.—Provision and care of cattle.	8. Stock breeding and dealing (*a*) Horses and horned cattle ...	248,704	54,991	303,695

Under Class B—Pasture and Agriculture—are included 7,173,480 persons in British districts, and 1,584,636 persons in Feudatory States—total of 8,758,116, or two-thirds of the total population. The distribution of this class in British districts was as under :—

Sex.	Number.	Distribution per 10,000.	Adult females per 100 males.
Males	3,623,092	6,713	100
Females	3,550,388	6,591	100

Those again who come under the head "Interest in land, as owners or occupants or tenants", are classed as follows :—

Agricultural occupation.	Number of persons for whom occupation in Column 1 is recorded by itself.	Number of persons combining the same with non-agricultural occupations.	Total of columns 2 and 3.	Percentage of Column 4 on total population.
1	2	3	4	5
Owners or occupants ...	275,616	13,276	288,892	2·7
Tenants ..	4,633,579	199,078	4,832,657	44·8
Total ...	4,909,195	212,354	5,121,549	47·5

Education. 71. The following statistics under this head are shown for the Provinces :—

	Total.	Total educated.	Proportion per 10,000.		
			Learning.	Literate.	Illiterate.
	Males.				
British districts ...	5,397,304	306,898	141	427	9,432
Feudatory States ...	1,089,011	23,701	46	172	9,782
TOTAL CENTRAL PROVINCES.	6,486,315	330,599	125	385	9,490
	Females.				
British Districts ..	5,386,990	10,883	7	13	9,980
Feudatory States ...	1,071,500	798	2	6	9,992
TOTAL CENTRAL PROVINCES.	6,458,490	11,681	6	12	9,982

Compared with the Census returns of 1881, the Education statistics in British districts are :—

Year.	Education Department.	Census.		
	Number of persons under instruction.	Under instruction.	Literate.	Total educated.
1881 ...	79,551	80,020	161,210	241,230
1891 ...	105,009	80,207	237,574	317,781

The most striking features in this abstract are, first, the remarkable variation in the number of persons under instruction as shown by the returns of the Education Department; secondly, the great difference between the latter and the Census results ; and thirdly, the enormous increase in the number of educated persons. The Provincial Census Superintendent is of opinion, however, as regards the first two that the inaccuracy lies in the Census returns, owing to faulty enumeration. He is of opinion that in very many cases persons who should have been recorded as learners were entered as literates.

The population by age and religion in British districts as regards instruction is shown in the following comparative table :—

Comparative Table of Instruction by Age and Religion : British Districts.

(*a*) *Percentage of Males and Females of each age-period who are learning or literate.*

Age-period.	Education.	Total population.		Hindus.		Mahomedans.		Christians.		Jains.		Parsis.		Animistic.

(*b*) *Number of Persons in each Religion among whom one person is able to read and write.*

18	495	17	732	6	92	1	2	2	61	1	2	216	8,677

From the last line in this statement it will be seen that the best educated community are the Parsis, amongst whom 80 per cent. of the men and 56 per cent. of the women can read and write. About 80 per cent. of their boys between 5 and 14 are shown to be either learning or literate. The proportion of young men between 15 and 24 who are still under instruction in the higher branches is about 27 per cent., an average which is nearly four times higher than that of Christians.

The average number of Mahomedans who are learning and literate is high as compared with the Hindus. The reason of this is, the Provincial Superintendent thinks, because Mahomedans are mostly found in towns, where the standard of education is high.

The districts which head the lists in respect to education are those in which there is either a large town population or in which there are large numbers of the cultivating castes. Nimar takes the first place, with 1 man or boy in every 9 able to read and write. Next to Nimar come Nagpur, Hoshangabad and Jubbulpore, where 1 male in 11 has been or is being taught to read and write. Chhindwara, Bilaspur and Mandla come at the bottom, with 1 male only in 28, 34 and 36 able to read and write; in all these districts there are immense tracts of jungle where schools are unknown. In point of female education, Nagpur is well to the front, followed by Jubbulpore and Saugor. The Chhattisgarh districts show a considerable proportion of females able to read and write as compared with the number of educated males.

Among the Feudatory States, 1 man in every 13 in Makrai is educated. Sarangarh comes next, with 1 in 19; here, as in Makrai, the proportion of children at school is high. In Bamra, the number of literates has been abnormally increased by the large number of railway employés, contractors and skilled workmen who happened to be in the State at the time of the Census. In many of the remaining States education is exceedingly backward. In Kanker only 1 man in 72 and in Bastar 1 in 98 can read and write.

Infirmities.

72. Statistics were taken within British districts and also Feudatory States. The totals result as follows :—

Infirmity.	Number.	Number of persons among whom 1 is afflicted.
Unsound mind	2,034	6,364
Deaf and mute	6,440	2,010
Blind	20,470	632
Lepers	6,614	1,957

Insanity is mostly to be found among the better castes, such as Brahmins, the writing classes, Banias and Sonars.

Blindness—only that of both eyes was recorded—appears to be more of a local than a racial infirmity. A high average of afflicted are found in Raipur and Jubbulpore. Lepers—those afflicted with the true or corrosive disease—are more numerous in the tracts south of the Satpuras, the disease being most firmly established in Nagpur and Wardha.

8.—*Changes in the Administration.*

73. Mr. (now Sir) A. P. MacDonnell, C. S. I., held charge of the office of Chief Commissioner throughout the year. Chief Commissioner.

9.—*Relations with Feudatory States.*

74. Of the 15 Feudatory States, 8, *viz.*, Makrai, Bastar, Kanker, Patna, Kalahandi, Raigarh, Sarangarh and Kawardha, are managed by Government, and 7, *viz.*, Sonpur, Bamra, Rairakhol, Khairagarh, Nandgaon, Chhuikhadan and Sakti are administered by their own Chiefs; but all the Chiefs, except Bamra, are assisted by Diwans appointed by the Government; and in the three States of Rairakhol, Chhuikhadan and Sakti, the Chiefs are expected to follow more or less closely the advice of the Diwan in the more important administrative and judicial matters. During 1892 the sanction of the Government of India was obtained to the Kanker State being taken under the management of Government until the mental condition of the Maharaja has sufficiently improved to enable him to resume the conduct of the administration. On the other hand, the administration of the Sakti State was made over to Rup Narain Sing, son of the deposed Chief.

75. Of the 8 States managed by Government, 5—Bastar, Patna, Kalahandi, Sarangarh and Kawardha—are so managed on account of the minority of their Chiefs. The Raigarh and Makrai Chiefs were set aside for mismanagement, under the orders of the Government of India. The former is dead, and the propriety of placing his son on the *gadi* is about to be submitted for the orders of the Government of India. The latter, if he continues to be of as good behaviour as hitherto, will merit restoration on the expiry of his term of deposition, at the end of the current year. The reason for assuming control of the Kanker State has been already explained.

76. Of the States administered by their own Chiefs, the only one which gave trouble during the year was Chhuikhadan, where an empty treasury, unpaid public servants and general financial disorder were not sufficient to open the eyes of its ruler to the expediency of carrying out the reforms pressed upon him by the Commissioner and the Political Agent. It was necessary to deal firmly with him, and he ultimately abandoned his obstructive attitude, gave his Diwan the executive and judicial powers which he had hitherto withheld, and allowed the necessary reforms to be initiated. The most progressive States are Nandgaon and Bamra, and the most backward are Sonpur, Chhuikhadan and Rairakhol. The Chief of Nandgaon received the title of Raja Bahadur on the 1st of January, in recognition of his liberality and public spirit in the matter of the Raipur Water-works and the water-works at Raj-Nandgaon. The Nandgaon Spinning and Weaving Mills will, it is hoped, be ready to commence work next year.

77. The people in the Feudatory States are reported to be, in general, contented. The marked rise in agricultural prices which the railway and the development of trade have brought about has added to the means of the cultivating classes and raised the standard of comfort. The Political Agent reports that there were no complaints against the administration of any of the Feudatory States, except Bamra and Sarangarh. The Commissioner of the Division, on the other Crops and trade.

Police.

hand, states that complaints were received from all States; and adds that this is "a healthy sign," for it shows that the people know how to make their grievances known. As the control of these States is carried on by the Political Agent in close communication with the Commissioner, it is strange that complaints should be rife, and yet the Political Agent should know nothing about them. The fact seems to be that though there were complaints—many have come before the Chief Commissioner—yet the organization for dealing with them in most of the States is such that no general dissatisfaction was made manifest.

There are large tracts of fertile land still uncultivated; but as yet it is only in the neighbourhood of the railway and of the main trade routes that a demand for land is springing up. In the greater part of Bastar and in the hills of Kalahandi the people are still exceedingly poor and backward; and the absence of the intelligent immigrants, to whose advent the Political Agent looks forward, is not wholly to be regretted. The history of Kalahandi illustrates the dangers which attend on the ingress of foreign settlers among an ignorant people before the country has been thoroughly opened up and the administration made strong and efficient. It was the attempt of the Raja to effect the very change which the Political Agent now advocates—the substitution of the more expert for the ruder aboriginal cultivator—which led to the rising in Kalahandi. We must not forget the lesson which history—and very recent history—has taught us in this matter, nor ignore the fact that these rude aborigines have a stronger claim on our consideration than even the Raja's treasury.

The year 1892 was not a healthy one in Chhattisgarh. Cholera prevailed with some severity in the States of Khairagarh, Nandgaon, Sarangarh, Sonpur and Patna, and to a less extent in Sakti, Kanker and Raigarh. Trade suffered a little in consequence; nevertheless, the development of traffic was very marked in several States—and especially in Raigarh, all parts of which are in easy reach of the railway. The rainfall was abundant and well distributed in all States except Nandgaon. The rice-crop was generally above the average. Until March, when storms of rain did damage, the prospects of the spring crops were all that could be desired.

Survey and Settlement.

78. Settlement work was in progress during the year in 12 out of the 15 Feudatory States. Bamra, Kalahandi and Rairakhol were the only States in which no settlement operations were going on. The summary settlement of Kanker was completed and sanctioned. In Kawardha and Sakti settlement operations are nearly concluded. A beginning was made during the year with the summary settlement of Bastar. In Patna, Raigarh, Sarangarh, Nandgaon, Chhuikhadan and Makrai good progress was made with survey prior to settlement.

79. With regard to general administration, it is to be observed that the Police arrangements in all States were put on a proper basis by the issue of rules, based upon the provisions of the Police Act, defining the duties of Police officers and the powers of control exercised by the Chief Executive Officer of the State. In Bastar and Kalahandi the Military Police force was reduced, and the Civil Police considerably strengthened. New station-houses and outposts were opened in both States. Incompetent Chiefs of Police were replaced by qualified men drawn from the Provincial Police force. A scale of armament for the Police of each State has been determined. Suitable jail accommodation has now been provided in all States except Sakti—where one is being constructed. Jails were

completed at Sonpur and Sirali (in Makrai) during the year, and one at Kanker has been finished since the year's end. The rules of the Provincial Jail Manual were brought into force during the year in the only two jails (those of Khairagarh and Chhuikhadan) which had hitherto omitted to adopt them.

Sanitary.

80. There are dispensaries at the head-quarters of all States except Chhuikhadan; and these institutions show a steady growth in popularity. Vaccination made good progress in all States except Sonpur and Bastar.

Education.

81. Education continues to make some progress, 19 new schools having been opened during the year. The attention of all administrators of States has been drawn to the importance of opening more primary schools.

Excise.

82. The *Khalsa* system of Excise management is now everywhere in force except in parts of Bamra, Patna, Kalahandi, Kanker and Bastar. The Political Agent considers that the *Khalsa* system of leasing circles to professional *Kallars* is unsuited to the special circumstances of wild hill-tribes, and the Officiating Chief Commissioner is not prepared to dispute the general proposition. But he is not convinced of the expediency of adopting the alternative plan which the Political Agent reports having introduced experimentally in Patna—whereby *each family* receives a license to distil (at a fixed place or places). One essential consideration must be kept in view, namely, the enforcement of limitations or restrictions on the facilities of procuring intoxicating liquor.

Taxation.

83. Pandhri has in all States replaced the petty taxes formerly in force. *Nazarana* is said to be no longer levied in any State, but the Officiating Chief Commissioner has his doubts as to the full correctness of the information on the point.

CHAPTER II.—ADMINISTRATION OF THE LAND.

1.—*Survey and Settlement.*

During the year the assessments which had been sanctioned for the whole of the Damoh and parts of the Saugor, Jubbulpore, Wardha and Nagpur districts, were brought into practical effect by being formally announced to the people. The results of the announcement have been satisfactory and go to strengthen the confidence of the Administration in the system of settlement followed and in the way in which it has been worked in the past. The number of persons affected by the assessments is very large, the rents payable by ryots having been fixed in detail as well as the revenue payable on each proprietary estate, and the enhancements in rents as well as in revenue have in many cases been very considerable. Such being the case it has been reassuring to find that appeals are few in number, and that the new assessments are accepted by the people as generally fair and equitable.

2. Assessment work was in progress in seven districts—Saugor, Jubbulpore, Narsinghpur, Hoshangabad, Chhindwara, Wardha and Nagpur. Details are given below of the progress made in each district during the year ending the 30th September 1893:—

District.	Approximate area re-assessed.	Number of estates.	Approximate gain in land revenue.
	Sq. miles.		Rs.
Saugor	521	384	55,200
Jubbulpore	1,304	739	57,791
Narsinghpur	591	441	84,700
Hoshangabad	1,085	521	1,46,900
Chhindwara...	489	287	22,400
Wardha	1,200	688	85,700
Nagpur	917	622	55,500

According to the programme of settlement operations the Jubbulpore, Narsinghpur and Wardha settlements should be completed by the 31st March 1894, and there is reason to anticipate that they will be practically out of hand by that date.

3. An important matter which is being dealt with in the course of settlement is the improvement of the position of the village watchmen. The principle has been accepted that these watchmen are to remain village servants remunerated by fees locally collected, and that no radical change is to be made in their status or emoluments. But the opportunity of re-settlement is being taken to add to or decrease the number of watchmen where changes are required in the interests of efficiency; to raise their annual remuneration above the pittance it now is in some places, to a reasonable minimum, and to substitute cash fees for the various perquisites which now constitute their income.

Their remuneration being local, the rate at which their cash fees are payable varies with the size and population of their villages. But in no case is the rate allowed to exceed one anna in the rupee of rent or rental value.

4. Excluding the gradual re-survey of Zamindari villages in the Chhattisgarh Division, cadastral survey preparatory to settlement was in progress in five districts only—Mandla, Betul, Chanda, Bhandara and Balaghat. The outturns and cost rates per square mile were as follows:—

District.	Outturn of field Survey.	Cost rate per square mile.
	Sq. miles.	Rs.
Mandla	682	37
Betul	731	25
Chanda	811	40
Bhandara	1,055	19
Balaghat	452	43

The survey of Betul has now been completed, and but small areas remain in the three districts following it. By the end of the current year the cadastral survey of the whole of the *malguzari* area of the Provinces will have been completed, save of a portion of the Mandla District.

5. The gradual survey of the more open and well-established villages of Zamindari estates in the Raipur, Bilaspur and Sambalpur Districts was undertaken after the completion of the recent settlements of these districts, in the course of which these estates were re-settled in summary fashion only. The area surveyed in each district during the year and the cost rate are as follows:—

District.	Area surveyed.	Cost rate per square mile.
	Sq. miles.	Rs.
Raipur	213	28
Bilaspur	190	30
Sambalpur	252	26

Similar operations are now to be started in the Zamindari estates of the Chanda District.

2.—*Waste Lands.*

6. The ryotwari settlement of waste lands in the Charwa tract of the Hoshangabad district continues to give satisfactory results. Since the lands were surveyed and thrown open in June 1890 over a hundred square miles of land have been allotted, bearing an annual revenue assessment of Rs. 45,310-6-0. The area now remaining for allotment in this locality is comparatively small.

Similar operations have been undertaken in two blocks of waste land in the adjacent district of Nimar. Of a total number of 1,513 survey numbers covering an area of 43,070 acres which were thrown open to settlers in March 1892, 1,113 numbers have been allotted up to date, carrying a revenue of Rs. 21,732.

7. There is no marked progress to report in the excision from forest limits of culturable waste. The subject is one which still remains to be dealt with in the case of the three districts of Betul, Chhindwara and Chanda, but is only of real importance in the last named. Information has been collected in both the Forest and the Settlement Departments as to the waste lands which are suitable for colonization in the Chanda district, where the Forest Revenues are extremely large and include a considerable area of culturable land, and it is expected that a complete project for their excision will shortly be submitted for the Chief Commissioner's orders.

3.—*Wards Estates.*

8. At the close of 1890-91 there were 146 estates under management. In the case of 19 of these, management was relinquished during the year under review, while four new estates were brought under the Court of Wards. The number of estates under management during the whole year was 127, and 131 were under management at its close.

The causes which led to the assumption of management by the Court of Wards are specified below:—

68 on account of the minority of the owners;

3 in consequence of the owners' unsoundness of mind or incapacity to manage their affairs as adjudged by the Civil Court;

13 owing to the disqualifications specified in sub-clauses (i), (ii) and (iii) of Section 7 (1) (*c*), Court of Wards Act;

43 on the owners' application, Section 7 (*c*), sub-clause (iv).

The aggregate income of these estates exceeded 16½ lakhs of rupees.

9. A list of the estates released from management during the year is given in the margin. Their combined area amounted to 497 square miles, and their rent-roll exceeded Rs. 76,000.

1. Madhopur	...	Mandla District.	11. Kirnapur	...	Balaghat District.
2. Bohania	...	Narsinghpur District.	12. Bhadra	...	
3. Bichia	...		13. Sorekha	...	
4. Sankal	...		14. Barbaspur	...	Raipur District.
5. Bordha	...	Hoshangabad District.	15. Raitum	...	
6. Koda Dongri	...	Chhindwara District.	16. Bharsareli	...	
7. Chandankhera	...	Chanda District.	17. Deopuri	...	
8. Gangajhiri	...	Bhandara District.	18. Bheran.	...	Sambalpur District.
9. Mao	...	Balaghat District.	19. Tabla	...	
10. Manegaon	...				

Of these, seven were released on the proprietor attaining majority, and eight on the debt due by the estate having been liquidated. In the case of two proprietors, management was given up on account of undue interference by them with Court of Wards administration; while another estate had to be relinquished owing to a dispute among the proprietors as to mutation of names. Finally, in the case of Bordha, the proprietor himself deposited the balance of the debts due to his creditors, and his estate was restored to him.

10. Only four estates* were brought under management during the year. The total area of these estates was 73 square miles, and their total estimated income was Rs. 13,930. Of these, Hatri alone in the Damoh District, with an income of Rs. 11,000, can be considered as of any importance. In all these cases management was assumed in consequence of indebtedness and on the proprietors being declared on their own application to be incapable of managing their own property (Section 7 *c* (iv) of the Act).

*1. Hatri in the Damoh District.
2. Khursipar of Lotanjin the Seoni District.
3. Ubaria in the Betul District.
4. Tarponji in the Raipur District.

11. The receipts of Wards estates for the last year under the main heads of income were Rs. 16,52,455, as compared with Rs. 17,15,492 in the preceding year. In criticising these figures it must be remembered that no strict comparison is possible, the number of estates to which they relate being different in each year. A reference to the District Reports shows, however, that there has been a real decrease in rental collections and sir realizations, owing mainly to the bad harvest in the Nagpur Division; while improved management and the opening of the railway in the Chhattisgarh Districts have brought about a considerable increase in the receipts from forests in the estates of that Division.

12. The following table gives the main items of expenditure for the last three years:—

Head of Expenditure.	1889-90.	1890-91.	1891-92.	+ or —
	Rs.	Rs.	Rs.	
Government revenue and cesses	4,80,624	5,27,627	5,29,083	+1,456
Village servants	39,323	35,481	32,043	—3,438
Management	1,34,929	1,39,873	1,33,885	—5,988
Interest on debt	70,742	64,787	75,443	+10,656
Personal expenses	2,61,308	3,35,771	3,39,385	+3,614
Education	41,056	47,386	54,393	+7,007
Miscellaneous	1,76,944	2,07,881	2,25,199	+17,318
Total ...	12,04,926	13,58,806	13,89,431	+30,625

For the reasons given when dealing with receipts, any detailed criticism of these figures would be of little value. The increase under the heads "Personal expenditure" and "Education" is chiefly due to the figures for the Bhonsla Estate. Tours made by the Raja in Northern and Western India cost a good deal, and there was considerable expenditure on marriages and other ceremonies in the Bhonsla family and on the purchase of a large bungalow at Nagpur.

13. The total cost of management is still below 8 per cent. of the gross income. This is no doubt a very moderate percentage, but from facts which have recently come before him, the Chief Commissioner is inclined to think that there has in some cases been a tendency to too great economy in fixing the salaries of the managing staff.

14. The methods of investment of surplus funds in those estates which had balances to their credit are shown below :—

Method of investment.	1889-90.	1890-91.	1891-92.	+ or —
	Rs.	Rs.	Rs.	
In Government Securities or Railway shares ...	75,971	51,279	11,165	—40,114
In other loans or Takavi	1,47,899	1,58,933	1,20,600	—38,333
In purchase of Lands or Houses	14,972	11,436	35,692	+24,256
In Estate improvements	74,937	58,450	75,635	+17,185

The decrease in the amount devoted to Takavi or other loans is more than accounted for by the figures for the Bhonsla Estate, where only Rs. 68,819 were so applied, as compared with Rs. 1,10,931 in 1890-91.

Rupees 75,635 were spent on estate improvements, as compared with only Rs. 58,540 in the previous year. But the total still forms a very small fraction (5 per cent.) of the total expenditure of the year, and a reference to district details shows that in numerous wealthy estates the work of estate improvement was entirely neglected.

15. Under recent orders the submission to the Chief Commissioner of a consolidated Divisional Budget of Court of Wards Estates has been prescribed, and it has been more recently laid down that, in forwarding these budgets, Commissioners are to note in the case of each estate the grounds on which the several works budgetted for have been selected, and to state what measures have been adopted for their execution and supervision. The object of these orders is to secure a thorough scrutiny by Commissioners of the proposals for each estate.

In the case of the large Zamindari Estates of the Chhattisgarh Division the recent appointment of a special Executive Engineer who will be in charge of all works to be carried out there, as well as in the Feudatory Estates under management, should leave no excuse for neglect in this important matter.

In no other part of the Province is there reason to think that more professional advice or help is needed than is already available.

16. The total rental demand and collections of the year were :—

	Demand.	Collections.
	Rs.	Rs.
On Current Account	10,49,650	9,74,282
On Arrear „	1,00,263	44,220
Total ...	11,49,913	10,18,502

Of the current demand 7 per cent. and of the arrears 56 per cent. remained uncollected at the close of the year.

17. The efficiency of collection in each Division for the last two years is compared in the following table :—

Division.	1890-91.				1891-92.			
	Total demand.	Current demand.	Percentage uncollected.		Total demand.	Current demand.	Percentage uncollected.	
			Of total demand.	Of current demand.			Of total demand.	Of current demand.
	Rs.	Rs.			Rs.	Rs.		
Jubbulpore ..	2,51,492	2,10,750	15·	7·6	2,35,131	1,98,994	11·	5·8
Nerbudda ...	3,08,919	2,57,858	14·	7·1	3,38,969	3,01,539	15·	8·2
Nagpur ...	4,61,318	4,21,711	7·2	4·	4,03,287	3,77,318	13·	10·
Chhattisgarh ...	1,73,173	1,70,736	·5	·4	1,72,526	1,71,799	·5	·4
Total ...	11,94,902	10,61,055	9·33	4·9	11,49,913	10,49,650	11·	7·

Though the percentage of uncollected demand in the Jubbulpore Division has improved as compared with 1890-91, it is unsatisfactory to note that the proportion of arrears has increased both in the Nagpur and Nerbudda Divisions. In the Nagpur Division this result is reported to have been chiefly due to bad harvests, which made it difficult for cultivators to pay their rents. In the Nerbudda Division it appears to have been partly due to the like cause, but the Chief Commissioner much fears that rents are still excessive in many cases, and that full effect has not yet been given to the very clear and emphatic orders of the Administration regarding the reduction of all rents both of ryoti and sir in Court of Wards villages to a fair and equitable level.

18. The amount of tenancy litigation was even less than it has been in previous years. There were only 283 suits for arrears of rent as compared with 353 in 1890-91, while only two notices of enhancement, which had been served in the previous year, were disposed of in the year under report.

The following table gives the figures under this head for the last five years. Additional columns have now been added for showing the progress made in converting grain rents into cash rents and indicating the extent to which tenants have parted with or acquired occupancy rights during the year :—

Year.	Notices under section 56 of enhancement.				Suits for arrears of rent.			Number of tenures that have lapsed during the year.		Number of occupancy rights purchased under Section 62 of Tenancy Act.	Number of tenants with aggregate area of their holdings whose grain rents have been commuted into money rents.	Number of tenants with aggregate area of their holdings who remained under grain rent system.
	Number served.	Number contested.		Quashed by Civil Courts.	Number successful.	Number partially successful.	Number unsuccessful.	Absolute occupancy.	Occupancy.			
		Upheld by Civil Courts.										
		Ending in enhancement.	Ending in ejectment.									
1887-88.	66	57	7	--	653	18	12	--	--	--	--	--
1888-89.	54	37	4	1	652	22	15	--	--	--	--	--
1889-90.	45	9	2	7	612	5	1	--	--	--	--	--
1890-91.	9	2	2	--	351	2	--	--	--	--	--	--
1891-92.	--	--	1	1	249	9	25	112	14	--	--	233 tenants, 6,377·60 area.

Insufficient attention seems to have been paid to the instructions given regarding the conversion of grain rents into cash rents, and it is by no means certain that the statistics now given are correct. It seems probable from the report from the Jubbulpore District, that there are still many more tenants paying grain rents than have been shown in the returns.

19. No occupancy rights were acquired by purchase during the year, a result which was probably due, in great measure, to the failure of Court of Wards Managers to explain to tenants the provisions of the law on this point.

20. Fair progress was made during the year in the repayment of debt due by Court of Wards Estates. Rs. 1,94,267 were paid off in 90 encumbered estates, and the unliquidated balance at its close amounted to Rs. 12,04,910. But there are several estates in which little or no progress is being made in the repayment of debt and in which other arrangements will have to be made if the proprietors are to be freed from encumbrances within a reasonable limit of time.

CHAPTER III.—PROTECTION.

1.—*Legislative Authority.*

1. The Legislative authority for the Central Provinces is the Council of the Governor-General of India for the purpose of making Laws and Regulations.

2.—*Course of Legislation.*

2. The Acts of the Imperial Legislature passed during the year 1892 which affect the Central Provinces are as follows:— Acts passed.

(*a*) Acts specially applicable to the Central Provinces:—

Nil.

(*b*) Acts applicable to the Central Provinces in common with other parts or the whole of British India:—

Act I of 1892.—An Act to amend the Indian Tariff Act, 1882.

Act II of 1892.—An Act to validate certain marriages solemnized under Part VI of the Indian Christian Marriage Act, 1872.

Act VI of 1892.—An Act to amend the Indian Limitation Act, 1877, and the Code of Civil Procedure.

Act X of 1892.—The Government Management of Private Estate Act, 1892.

3.—*Police.*

3. Excluding public and local nuisances, the number of offences reported in 1892 was 21,933, as compared with 20,857 in the preceding year. The increase is distributed over all the six classes into which crime is divided, except the last; but is considerable only in Class V (Minor offences against property) and Class III (Serious offences against the person and property). These two classes contribute an increase of 1,027 cases out of the total of 1,076 by which the sum of last year's offences is exceeded. Amount of crime.

An examination of the figures for six years past shows that the total number of offences in Class III in 1892 is lower than in any other year of the period examined except 1891; and that offences in Class V, though more numerous than in 1890 and 1891, are far below the totals of 1887—1889.

	1887.	1888.	1889.	1890.	1891.	1892.
Offences of Class III ...	7,321	5,899	6,433	5,704	5,305	5,657
„ „ V ...	16,305	14,631	14,508	12,366	12,204	12,879

The total number of offences in Classes I, II and IV exhibits very small variations from year to year.

Offences against property (Classes III and V) had been declining in number for two years past, and a continuance of the decrease for a third year in succession was hardly to be looked for. As a matter of fact, however, the decrease was continued in three districts of the Jubbulpore Division, in Balaghat and in Narsinghpur. The districts which are mainly responsible for the rise of reported crime in these two classes are Nagpur, Bilaspur, Chhindwara, Raipur and Wardha, as the following figures indicate :—

	Increase in 1892 in offences in		
	Class III.	Class V.	Total.
Nagpur	+ 218	+ 217	+ 435
Bilaspur	+ 53	+ 328	+ 381
Chhindwara	+ 101	+ 217	+ 318
Raipur	— 5	+ 201	+ 196
Wardha	+ 14	+ 153	+ 167
		Total ...	+ 1,497

The following table exhibits the number of offences reported under each class during the past five years :—

	1888.	1889.	1890.	1891.	1892.
Class I.—Offences against the State, public tranquillity, &c. ...	281	256	280	253	319
Class II.—Serious offences against the person ...	1,169	1,242	1,322	1,273	1,338
Class III.—Serious offences against the person and property or against property only ...	5,899	6,433	5,704	5,305	5,657
Class IV.—Minor offences against the person ...	119	135	113	117	120
Class V.—Minor offences against property.	14,631	14,508	12,366	12,204	12,879
Class VI.—Other offences (excluding public and local nuisances) ...	1,732	1,560	1,639	1,705	1,620
Total ...	23,831	24,134	21,424	20,857	21,933
Also Class VI.—Public and local nuisances.	1,287	1,715	1,860	2,453	2,349
GRAND TOTAL ...	25,118	25,849	23,284	23,310	24,282

The numbers of the more serious offences against the person for the past four years are shown in the following table:—

	1889.	1890.	1891.	1892.	Increase.	Decrease.
Murders ... By thugs ...	...	...	...	...	...	...
Murders ... „ dacoits ...	3	3	3	...	...	3
Murders ... „ robbers ...	18	28	22	26	4	...
Murders ... „ poison ...	10	8	4	17	13	...
Other murders	98	93	94	101	7	...
Total ...	129	132	123	144	21	...
Attempt at murder ...	24	18	19	29	10	...
Culpable homicide ...	22	18	22	20	...	2
Rape ...	71	78	44	58	14	...
Administering stupefying drugs ...	13	9	11	10	...	1
GRAND TOTAL ...	259	255	219	261	42 (Net increase).	...

4. The 26 cases of murder by robbers are distributed over 13 of the 18 districts and were most numerous in Jubbulpore, Narsinghpur and Chhindwara. In nine of the cases the victims were young children, the motive for the deed in each case being to obtain possession of the ornaments worn by them.

In the Bhandara District four persons were the victims of murder by poisoning in one single case, which arose out of a belief in witchcraft. It is satisfactory to find that during the past two or three years murders induced by a belief in witchcraft have considerably decreased. In the year 1888 cases were reported from Balaghat and Sambalpur, and in 1889 there were no less than seven such murders in the Sambalpur District alone. It is usually during a cholera epidemic that cases of this description occur, the victims, who are nearly always women, being supposed to have brought the disease into a village.

The cases of culpable homicide that occurred during the year were as usual the outcome of sudden outbursts of uncontrollable passion. One case reported from Wardha was different in character. Some Rohillas, apparently money-lenders, were in the act of violently dragging away one of their debtors with the object of forcing him to settle his account. Meeting a malguzar and his party on the way the victim of the Rohillas' violence appealed to them for succour; upon which the malguzar interposed and directed that the man should be released. On this a quarrel ensued, in which one of the Rohillas was struck over the head with a lathi and knocked down insensible. He was brought into Wardha for treatment and died in hospital on the following day.

5. Dacoities rose in number, slightly, having been 27 in 1892 against 25 in 1891. The capture and execution of the notorious Khub Singh is an epoch in the annals of the year's administration, and since the close of the year the not less notorious Himmut Singh and his band of followers have been accounted for in a brilliant hand-to-hand encounter in which the Police were led by Mr. Naylor in person. Another gang, headed by the well-known Patia Nai, which threatened our borders continually, has also been broken up, and Patia and his brothers as well as some of his followers have been taken. The bands of the two Maharaj Singhs, now apparently to the north-west of Saugor on the frontiers of the Lullutpur District of the North-Western Provinces, have still to be accounted for. The results on the whole have been decidedly creditable and satisfactory. Dacoities.

The District of Damoh was included in the measures inaugurated against dacoit gangs, and so vigilant have the Police of this district been that not a single case of dacoity has been committed in it during the past year.

6. Under the head of Robberies there was an increase of 54 cases reported, and under the head of Burglaries, an increase of 280 cases. In thefts also there was a considerable rise. These results are attributed partly to high prices and partly to the prevalence of cholera in the Chhattisgarh Division.

Police action.

7. The following table compares the results of Police action during the past two years:—

	1891.	1892.
Cognizable Crime.		
Total offences in columns 4 and 6 of Statement II. D. 1. ...	23,595	24,613
Total investigated (including expunged cases) ...	18,442	19,165
Percentage of cases investigated to reported ...	78·16	77·86
Do. do. convicted to investigated ...	58·58	56·93
Do. do. do. to tried ..	84·00	82·35
Number of persons arrested by Police (column 21 of Statement II. D. 1.) ...	17,916	19,196
Do. do. by order of Magistrate (column 22 of Statement II. D. 1.) ...	2,126	2,249
Total number arrested ...	20,042	21,445
Percentage of persons discharged without trial to persons arrested by Police ...	2·50	2·54
Do. do. put on trial to arrested ...	99·74	98·78
Do. do. convicted to arrested by Police ...	77·87	75·29
Do. do. do. to total arrested (column 23 of Statement II. D. 1.) ...	71·87	69·42
Do. do. do. to tried ...	73·73	71·25
Do. do. acquitted to tried ...	23·76	25·65
Non-cognizable cases.		
Total cases in which Police were employed ...	217	258
Property stolen and recovered.	Rs.	Rs.
Stolen in cognizable cases	4,79,244	5,59,897
Recovered	1,61,620	1,83,163
Percentage recovered	34·	33·

The figures denote that the Police had more work to do in 1892 than in the preceding year, the total number of both offences reported and cases investigated having risen considerably. The percentages are not quite up to last year's standard, but they represent satisfactory work, on the whole.

Strength of force.

8. The strength of the District Police force at the close of 1892 was:—

1 Inspector-General.
18 District Superintendents.
2 Assistant District Superintendents, 1st grade.
2 Do. do. do. 2nd grade, A Division.
2 Do. do. do. 2nd grade, B Division.

36	Inspectors.
154	Sub-Inspectors.
5	European Sergeants.
1,156	Head Constables.
6,590	Constables.
102	Mounted Constables.

Five appointments in the grade of Inspector are kept vacant pending the reduction of the 5 appointments of Assistant Superintendents, B Division.

From the 1st September 1892, the Police management of certain zamindaris in the Chhattisgarh Division was assumed, under the orders of the Government of India, by the District authorities; and the strength of the Provincial Police force was, with a view to this step, increased by 2 Sub-Inspectors, 34 Head-constables and 154 constables.

The strength of the Police employed on the several Railways is noted below:—

Great Indian Peninsula Railway (including Warora Branch).

3	Inspectors.
5	Sergeants.
12	Head-constables.
165	Constables.

Bengal-Nagpur Railway.

1	Inspector.
3	Sergeants.
13	Head-constables.
137	Constables.
32	Chowkidars.

The pay of the chowkidars still forms part of the cost of police, which is divided between the Company and Government in the proportion respectively of 7-10ths and 3-10ths. A project for the organization of a special railway police on the Bengal-Nagpur line including the Kutni branch, under the sole control of a selected officer working under the Inspector-General of Police of these Provinces, is under consideration. The police management of the Bhopal State Railway was transferred to the North-Western Provinces Government, with effect from the 21st March 1892.

Distribution of the force.

9. The special Armed Reserves in the six districts of Nagpur, Jubbulpore, Saugor, Nimar, Raipur and Sambalpur have during the year made considerable progress in drill and discipline. They are now composed of picked men who have been advanced to the highest grades of constables, are of good physique and well set up, and they are armed with the artillery rifle carbine. Their utility has been demonstrated in connection with dacoity operations, and the facility with which they can be mobilized renders them reliable for all emergencies.

The Mounted Police have become a valuable adjunct to the Foot Police by their employment in road patrolling in the interior of the district, and they are not now the mere mounted messengers that they formerly were. Most of the main traffic routes are at present regularly patrolled by this body, and chains of communication from district to district have been established.

Punishments.

10. A decrease is shown to have occurred in the number of magisterial punishments, which is a satisfactory feature. Departmental punishments also show a marked falling off in the aggregate, the decrease being influenced mainly by the reduction in the number of fines inflicted.

The Bertillon system of identifying criminals by means of anthropometry has been recently introduced since the close of the year under review. A report on the working of the system will be made next year.

4.—*Criminal Justice.*

Number of cases reported.

11. The following figures show the total number of cases reported and the total number returned as true for each of the last three years :—

	Reported cases.	Cases rejected under Section 203, Criminal Procedure Code.	Cases declared false.	True cases.	Percentage of true to reported cases.
1890 ...	28,484	2,588	424	25,472	89·4
1891 ...	28,941	2,300	314	26,327	90·9
1892 ...	30,145	2,839	339	26,967	89·5

By reported cases is meant cases which come before a Magistrate—not cases reported to the Police.

Number of offences brought to trial.

12. The total number of offences brought to trial shows an increase of 2 per cent. only over last year's figures. Offences against the human body have again decreased, while there is a rise in offences against property from 9,438 to 9,899, mainly the outcome of a rise in petty thefts and house-breaking.

Strength of Magistracy.

13. The number of Stipendiary Magistrates was less by one than in 1891: the strength of the second class decreased by six, and that of the third increased by five.

There were eight Honorary Magistrates more than in 1891, all of the third class. One of the Nagpur benches was strengthened by the addition of four more Honorary Magistrates. In the Wardha District numerous changes in the constitution of the Benches occurred. Two Honorary Magistrates were removed for misconduct.

Work of Magistracy.

14. The total number of persons disposed of by the Magistrates was 43,000, against 41,540 in the preceding year. The percentages of distribution amongst the various classes of Magistrates for the past three years are compared below :—

	1890.	1891.	1892.
District Magistrates ...	5·0	4·8	4·0
Assistant Commissioners, Extra-Assistant Commissioners at head-quarters, and Cantonment Magistrates ...	31·0	31·4	30·7
Other Stipendiary Magistrates ...	33·0	33·9	34·4
Honorary Magistrates ...	31·0	29·9	30·9

The need for European 1st Class Magistrates is still severely felt.

Many cases of Honorary Magistrates have been sent for and inspected by the Officiating Judicial Commissioner during the year, and he is of opinion that the quality of work that they show is, on the whole, satisfactory. Strict accuracy of procedure is not always observed, and the standard of punishments is not

always in accordance with the views of the Officiating Judicial Commissioner; but endeavours are made by constantly repeated instructions to gradually mend what is found amiss.

There have been indications that Honorary Magistrates are not popular with the people whose cases go before them, firstly in complaints being so framed as to remove them from the jurisdiction of such Magistrates, and secondly in the number of applications for transfer of cases from the Courts of Honorary Magistrates to stipendiaries. Part of this is due to the Pleaders, who wish to have cases tried in the Courts in which they ordinarily carry on their civil and criminal practice and therefore frame petitions so as to bring them before First Class Magistrates and instigate their clients to apply for transfers. Barring one case, which led to the resignation of the Honorary Magistrate concerned, there were none in which any serious allegations were made, and the number of applications rejected shows that they were made without good reason.

During the year, 44,726 persons were brought before the Magistrates for enquiry or on trial; of these, 24,274 were convicted or committed, while 18,608 were acquitted or discharged, the percentage of convictions being 54·3.

The percentage of convictions in cases of murder and culpable homicide has decreased considerably, and in cases of offences relating to coin, rape, theft, criminal misappropriation, receiving stolen property, cheating, mischief, criminal trespass, hurt, assault and criminal intimidation, it has decreased slightly. The percentage has risen considerably in cases of robbery and slightly in cases of dacoity. The percentage of convictions for murder is abnormally low.

The number of persons disposed of by the eight Courts of Session and Additional Sessions Judges was the same as last year, *viz.*, 239, and the convictions per cent. fell from 77 to 65.

Sanction was obtained to the appointment, from the 1st of January 1892, of two Additional Sessions Judges to relieve Commissioners of part of their Criminal work. The two officers appointed each took over from the Commissioners the whole of the Civil Judicial work of two Divisions and the Sessions work of a certain number of districts. The Additional Sessions Judge of the Nagpur and Chhattisgarh Divisions took the sessions in the districts of Nagpur, Bhandara, Wardha, Raipur and Bilaspur, leaving to the Commissioner of Nagpur those in the districts of Chanda and Balaghat, and to the Commissioner of the Chhattisgarh Division those in the Sambalpur District. Similarly the Additional Sessions Judge of the Jubbulpore and Nerbudda Divisions relieved the Commissioners of the sessions in the Jubbulpore, Saugor, Hoshangabad and Narsinghpur Districts; while the Commissioner of Jubbulpore tried the sessions in the districts of Damoh and Mandla, and the Commissioner of Nerbudda disposed of those in the Nimar, Chhindwara and Betul Districts.

The Additional Sessions Judges had also to dispose of all Criminal appeals and cases referred for confirmation of sentence. The work has been found to be too heavy for two Additional Sessions Judges to cope with, and the necessity for affording them relief has already been represented by the Administration to the Government of India.

15. The number of persons punished has increased by eight only. There is a considerable increase in the number of persons punished with whipping only, a smaller decrease in the number of those punished with imprisonment Punishments.

only, and a still smaller decrease in the number of those punished with fine only.

The increase in the percentage of punishments of whipping only is natural, for the Officiating Judicial Commissioner steadily discourages the tendency, which is still much too prevalent, to award fine only or short terms of imprisonment where whipping would be more appropriate.

Solitary confinement might be awarded more freely with advantage, especially in the case of habitual offenders.

The average duration in Police cases was 5·8, as against 5·4 in 1891; and in complaint cases 24·2, as against 28·4. Increased pressure of work is assigned as the cause of delay in disposing of cases.

Appeals.

16. The following figures show the number of appeals disposed of by the several classes of Appellate Courts in 1892, as compared with the disposals of the two preceding years:—

		1890.	1891.	1892.
To District Magistrates	...	1,487	1,298	1,467
,, Courts of Session	...	1,166	1,184	1,248
,, Judicial Commissioner	...	164	212	182

The percentages of appeals rejected, and sentences confirmed to appeals disposed of, were as follows in each of the last three years:—

		1890.	1891.	1892.
In the Court of the Judicial Commissioner	...	76	81	80
In Sessions Courts ...	...	73	78	76
In District Magistrates' Courts ...	...	83	69	63

The number of persons involved in cases taken up and disposed of by the Judicial Commissioner on revision was 803, as against 942 in 1891. During the year 31 sentences of death were referred to him for confirmation.

5.—*Prisons.*

Admissions.

17. The number of admissions of the year are compared below with those of the two previous years:—

		1890.	1891.	1892.
Convicts ...	...	8,646	8,498	8,051
Under-trials	...	5,195	5,739	6,115
Civil ...	...	160	149	164

There was thus a decrease in the number of convicts admittted compared with 1891, and a slight increase in the number of civil prisoners. The number of under-trials has again considerably increased.

The discharges from all causes were greater than in 1891. The number remaining at the close of the year was less than in either of the two preceding years. The average daily population was higher than in previous years, being 4,747, as against 4,674 in 1891 and 4,450 in 1890.

Sentences.

18. The following statement furnishes particulars for the past three years in regard to the terms of sentences of those admitted into jail :—

Sentences.	1890.	1891.	1892.
Not exceeding one month	1,656	1,331	1,158
Above 1 month, but not exceeding 3 months ...	1,955	2,115	1,698
Above 3 months do. 6 months ...	1,939	2,010	2,062
Above 6 months do. 1 year ...	789	808	852
Above 1 year do. 2 years ...	539	512	503
Above 2 years do. 5 years ...	300	289	294
Above 5 years do. 10 years ...	113	107	109
Above 10 years	4	3	6
Transported for life	43	54	48
Transported for a term	78	48	...
Sentenced to death	37	39	30
Total ...	7,453	7,316	6,760

This demonstrates very clearly that there has in the past few years been a steady and satisfactory decline in the number of sentences to terms not exceeding one month, and it is also satisfactory to find a decrease in the number of sentences above one and not exceeding three months' duration; but these gratifying features do not pervade the figures for most of those jails in which there has been an increase in the total number of admissions during the year, as may be seen below :—

Jails.	Not exceeding one month.		Above one and not exceeding three months.	
	1891.	1892.	1891.	1892.
Chhindwara	38	49	99	69
Betul	48	55	50	69
Hoshangabad	91	58	122	145
Sambalpur	70	141	126	129

Chhindwara shows that sentences not exceeding one month have risen, and this despite the fact that whippings have been freely resorted to. The increase under both heads of the above statement shown against the Betul Jail has not been explained at all. Prices at which food-grains were sold rose, however, in that district during the year, and as the prevailing scarcity is the reason assigned for the increased admissions of the year, it may be that the thefts committed were of a very petty nature, not requiring heavy sentences of imprisonment, and it may also be that the explanation given by the Jail Superintendent at Chhindwara, that a number of the prisoners sentenced to short terms of imprisonment were in too weakly a condition to be flogged, is equally applicable to Betul.

For the increase in sentences not exceeding three months at Hoshangabad no explanation is forthcoming. The Superintendent of the Sambalpur Jail writes that there is still a tendency on the part of Subordinate Magistrates to pass short sentences of imprisonment, and that this fact has been brought to the notice of the District Magistrate.

The figures relating to the other terms of sentences do not appear to call for remark, beyond saying that the number of sentences not exceeding six

months appears to be somewhat large; but this can only be the result of the decrease in the shorter terms of imprisonment above commented upon.

The sentences of the convicts remaining in jail at the close of the year are described below:—

Sentences.	1890.	1891.	1892.
Not exceeding one month	186	103	91
Above 1 month and not exceeding 3 months ...	451	449	236
Above 3 months do. 6 months ...	784	825	854
Above 6 months do. 1 year ...	694	720	690
Above 1 year do. 2 years ..	726	743	743
Above 2 years do. 5 years ...	648	765	674
Above 5 years do. 10 years ...	370	399	465
Above 10 years	139	118	91
Transported for life	249	237	246
Transported for a term	179	192	127
Sentenced to death	6	2	3
Total ...	4,432	4,553	4,220

This table indicates, as a natural consequence of what has been shown in the preceding table of sentences, that there has been a decrease in the terms of sentence for the shorter periods. A considerable decrease is also shown in the number sentenced to transportation for a term. As such prisoners are not now deported to the Andamans, but undergo their sentences in one or other of the Central Jails, it was predicted that Courts would probably cease passing such sentences, and would award instead sentences of imprisonment. This prediction has been verified, for it will be seen from the table giving the sentences of prisoners admitted during the year, that in no single instance was "transportation for a term" awarded. This circumstance may probably account for the large number of prisoners shown as remaining in jail with sentences ranging from 5 to 10 years.

Punishments.

19. The following table gives for the past three years the total number of prisoners in the several jails, the total number of punishments inflicted, and the proportions which the latter bear to the former:—

Jails.	Total number of prisoners.			Total punishments.			Ratio of punishments per cent. to total number of prisoners.		
	1890.	1891.	1892.	1890.	1891.	1892.	1890.	1891.	1892.
Nagpur	1,920	1,813	1,856	754	1,372	3,069	39·27	75·67	165·35
Jubbulpore	2,459	2,435	2,345	884	695	474	35·95	28·54	20·21
Raipur	1,784	1,627	1,636	500	506	638	28·02	31·22	38·99
Saugor	1,090	1,017	860	172	97	71	15·78	9·53	8·26
Bhandara	473	439	456	84	129	89	17·75	29·38	19·51
Chanda	305	297	374	175	75	66	57·37	25·25	17·65
Wardha	261	257	255	208	90	129	79·69	38·91	50·59
Balaghat	232	298	225	58	103	63	25·00	34·56	28·00
Sironcha	24	64	36	...	...	...	...	...	...
Damoh	407	359	344	67	81	56	16·46	22·56	16·28
Seoni	331	409	387	19	20	27	5·74	4·89	6·98
Mandla	242	308	271	51	75	66	21·07	24·35	24·35
Chhindwara	301	323	374	99	109	50	32·89	33·74	13·37
Betul	219	273	282	122	115	108	55·70	42·12	38·29
Hoshangabad	593	596	656	103	131	105	17·37	21·98	16·01
Narsinghpur	715	869	568	37	88	83	5·17	10·12	14·61
Nimar	326	349	289	62	60	91	19·02	17·64	31·48
Sambalpur	714	653	748	94	80	52	13·16	12·25	6·95
Bilaspur	656	553	642	26	41	39	3·96	7·41	6·07
TOTAL ...	13,052	12,930	12,604	3,515	3,867	5,276	26·93	29·91	41·86

From this it will be seen that punishments have increased very considerably, and that it is the Nagpur Jail which is again this year mainly responsible for the increase.

The figures for the other jails do not appear to call for remark.

Expenditure.

20. The following table shows that the total cost of guarding and maintaining the prisoners rose from Rs. 2,71,657 in 1891 to Rs. 2,92,268 in 1892, the cost per head of average strength having increased in proportion from Rs. 58-1-9 to Rs. 61-9-0, which is even higher than the figure for the year 1890, when it was Rs. 59-13-3. The year under report thus accounts for increased expenditure to the extent of Rs. 20,611 in the aggregate and Rs. 3-7-4 on the average :—

Heads of Expenditure.	Total cost.			Cost of each prisoner.		
	1890.	1891.	1892.	1890.	1891.	1892.
	Rs.	Rs.	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Rations ...	1,15,359	1,16,883	1,33,918	25 15 11	25 0 10	28 4 6
Establishment ...	90,454	98,300	1,03,036	20 5 2	21 0 5	21 11 3
Police Guard ...	9,374	...	...	2 1 8	...	...
Hospital charges ...	7,207	6,627	6,994	1 9 11	1 6 8	1 7 7
Clothing ...	21,890	25,512	21,846	5 2 4	5 11 8	4 14 0
Contingencies ...	21,977	24,335	26,474	4 15 0	5 3 3	5 9 3
Total ...	2,66,261	2,71,657	2,92,268	59 13 3	58 1 9	61 9 0

The increase in expenditure is thus shown to affect all heads except "Clothing," and the reasons for the variations will be detailed below.

Rations.—There was a rise in prices in jowari, wheat and rice, which are the staple articles of prison diet. This rise was due to partial failure of the crops and greater facilities for export of grain offered by the extension of the line of railway into Chhattisgarh.

Establishment.—The salaries of the controlling establishment being on a progressive scale, an increase must be expected year by year under this head until all salaries have attained the maximum. The Central Jail at Raipur shows a higher cost, owing to a special Superintendent having been appointed at the close of 1891. Extra temporary warders were also employed, owing to the extended utilization of prison labour outside jails on jail buildings.

Hospitals.—The rise may very probably be ascribed to a corresponding rise in the price of European medicines. Moreover, the three jails in the Chhattisgarh Division were infested with cholera during the year.

Contingencies.—The increase is due partly to the increased cost of transfer of prisoners from jail to jail who travel by rail.

Manufactures.

21. In the following table the net cash earnings of prisoners, *i. e.*, the excess of payments into, over the drawings from, the treasury for the past two years are compared :—

	1891. Rs.		1892. Rs.
Nagpur	31,437		60,315
Jubbulpore	25,934	Loss	98,620
Raipur	17,260	„	3,543
Saugor	2,074		2,611
Bhandara	1,465		690
Chanda	Loss 80		1,892
Wardha	1,464		952
Balaghat	920		970
Sironcha	...		...
Damoh	702		389
Seoni	2,728		4,390
Mandla	1,134		287
Chhindwara	2,492		3,197
Betul	542		945
Hoshangabad	877		1,358
Narsinghpur	300		363
Nimar	1,397		1,338
Sambalpur	3,355		3,964
Bilaspur	2,247		478
Total ...	96,248		18,024

It will thus be seen that the Jubbulpore Jail, which accounted for a profit of Rs. 25,934 in 1891, shows a loss of Rs. 98,620 during the year under report; and that at Raipur the loss is Rs. 3,543, compared with a profit of Rs. 17,260 in the year previous.

In the case of the Jubbulpore Central Jail the result is due partly to the change of procedure in the matter of adjustment of inter-departmental transactions.

Another reason for the loss at Jubbulpore is that credit had not been obtained before the 31st December 1892 for the value of the *suttrunjis* supplied to the Bombay Commissariat Department, for which the jail had received the contract during the year, the amount thus outstanding being nearly Rs. 45,000.

At the Raipur Central Jail, the castor-oil industry has failed completely. Manufactured articles also appear not to have been very readily sold, so that the stock in hand at the close of 1892 was very large.

Vital Statistics.

22. Although the daily average strength was about equal in both years, there was a large increase in 1892 in the number admitted into hospital, and an increase, though not in the same degree, in the daily average number of sick and in the number of deaths. The general unhealthiness of the seasons and the condition in which the prisoners were consequently received into jail are the main reasons for the increased admissions into hospital. The same causes no doubt influenced the higher sick rate. With regard to the deaths, which rose in number from 137 to 203, a large increase is shown to have occurred in the Central Jails of Jubbulpore and Raipur, and in the District Jails of Sambalpur and Bilaspur. In three of these jails, namely, those of Raipur, Sambalpur and Bilaspur, cholera was present during the year; but, even after leaving out

of account the deaths resulting from this cause, the numbers exhibit an increase which cannot but be regarded as a matter for regret, the more so that during 1891 the death-rate was higher than during the preceding year.

In accordance with the suggestions made in Home Department letter No. 8 Jails—464, dated the 8th August 1892, experiments were made in one or two jails as to the effect upon the health of weakly prisoners of putting them to suitable labour. The accounts given of these experiments show that the prisoners, as a rule, gained in weight.

Guarding.

23. The scheme for the employment of native pensioners of the Military Department in the reserve warder-guards of our jails did not make much progress during the past year. Sanction to the payment to these men of their travelling expenses on first joining appointments in the Jail Department having been accorded during the year, it was anticipated that there would be no difficulty in finding suitable men for the vacancies that existed, particularly at the Nagpur Jail, with the appearance of the reserve warder-guard of which the Chief Commissioner was dissatisfied. Contrary to expectations, however, it was found altogether impossible to induce military pensioners from up-country to join the jail service of these Provinces, notwithstanding that the assistance of the Secretary to the Government of India in the Military Department was sought in the matter. The Superintendent of the Nagpur Central Jail was therefore permitted, at his own request, to recruit men from up-country through an old military pensioner employed in his jail who was proceeding on leave of absence, and this official has now returned and brought back with him several men of good physique and well set up. The reserve warder-guard, constituted as at present, is now quite capable of dealing with any emergency that may arise, without extraneous aid. The temporary Police guard which has of late been employed at the jail has accordingly been removed.

6.—*Civil Justice.*

Number of Courts.

24. The number of Courts open at the close of 1892 was 203, being nominally four more than at the beginning of the year. Sanction was given at the close of 1891 to the appointment of two Judicial Assistants to Commissioners, one for the Jubbulpore and Nerbudda Divisions, the other for the Divisions of Nagpur and Chhattisgarh. The appointments were made with effect from the 1st January 1892, and the officers selected to fill them took over charge of their duties on the 2nd and 28th idem, respectively. One of these officers had 22 years' service and the other 21 years'. They were not made subject to the control of or subordinate to the Commissioners for reasons of administrative convenience, as they were intended to practically relieve those officers of all Civil Judicial work. They accordingly took over all the Civil work of the Commissioners. The Civil Judicial business disposed of by the latter officers during the year consisted only of seven appeals tried—six by the Commissioner, Nagpur Division, and one by the Commissioner, Chhattisgarh Division. Thus

		1891.	1892.
Court of the	Judicial Commissioner ...	1	1
Do.	Commissioner ...	4	4
Do.	Judicial Assistant to Commissioner ...	...	4
Do.	Deputy Commissioner ...	18	18
Do.	Civil Judge ...	12	13
Do.	Assistant Commissioner ...	39	39
Do.	Tahsildar ...	52	52
Do.	Munsiff ...	22	22
Do.	Naib-Tahsildar ...	45	43
Do.	Small Cause Court Judges and Registrars ...	6	7
	Total ...	199	203

the Commissioners' Courts were virtually closed during the year, and the number of Courts in work was practically the same as in 1891, while the number of Judges was practically diminished by two, as each of the Judicial Assistants had charge of two Divisional Courts.

The number of Courts of Civil Judges has increased by one, who has been posted to the district of Bhandara. At the close of the year Jubbulpore had only one Civil Judge, while Narsinghpur had two, as against two and one at Jubbulpore and Narsinghpur, respectively, at the beginning of the year.

At the close of the year Saugor had two and Raipur one Court of an Assistant Commissioner more than at the close of 1891; Nagpur, Wardha and Narsinghpur had each one less. The number of Courts of Assistant Commissioners, Tahsildars and Munsiffs remained constant, but the number of Courts of Naib-Tahsildars was reduced by two, that is, one at Hoshangabad and one at Seoni. The Small Cause Court, Saugor, which had been closed in 1891, was opened again in 1892, and thus brought up the number of Courts of Small Cause Court Judges and Registrars to seven.

There were three Honorary Judges whose Courts were open during the year—Raja Raghu Keshori Deo of Raipur, Honorary Assistant Commissioner, appointed during the year; Rao Sahib Balwant Rao Bhuskutte of Burhanpur, and Rao Bahadur Yado Rao of Bhandara, Honorary Extra-Assistant Commissioners. The Court of the Honorary Munsiff at Bilaspur was closed on account of the installation of Lal (now Raja) Rup.Narain Singh, the presiding Judge, on his ancestral *gadi* of Sakti.

Number of Suits.

25. The year 1891 was an exceptional one in respect to the small number of suits instituted, the total having fallen to 95,249, after exceeding 100,000 for a period of seven successive years. In 1892, the latter figure was once more exceeded, institutions having risen to 101,498. The revival occurred mainly in the three districts of Nagpur, Bhandara and Nimar, which between them account for 3,638 out of a total increase of 6,249. In five districts (Hoshangabad, Betul, Mandla, Bilaspur and Sambalpur) there was a decrease. The increase in the number of suits as compared with last year was common to all values and distributed evenly, except that the increase in suits between Rs. 500 and Rs. 1,000 in value and in those between Rs. 5,000 and Rs. 10,000 was considerably above the average increase.

Although litigation increased in amount in every Division of the Provinces, the Nagpur and Nerbudda Divisions are accountable for the bulk of the increase. The Deputy Commissioner, Bhandara, gave as an explanation of the large increase in his district the present excellent harvest which, following upon two bad seasons, might well, he considered, have encouraged creditors to come forward with claims which they had hitherto found it hopeless to attempt to press. He explained that suits in respect of standing crops, which are amongst those showing the largest increase, are of course intimately connected with the character of the season.

On the other hand, the Judicial Assistant to the Commissioners of the Jubbulpore and Nerbudda Divisions quoted with approval the conjecture of the Deputy Commissioner of Chhindwara that the increase in suits of low value in his district was the result of an exceptionally poor *jowari* harvest, which induced creditors to come into Court in order to obtain decrees on grain debts at favour-

able rates. In the case of an old-standing debt it is almost impossible to ascertain with accuracy what was the price at the date fixed for delivery, and the creditors hope that, even if their claim is cut down, it will lose less in a year of high prices than in another.

The above explanations, showing the diametrically opposite causes that may on *a priori* reasoning be suggested for an increase in the number of suits of low value,—a good harvest, because grain and money are plentiful and the suit is likely to be successful; and a bad harvest, because high prices at the time of obtaining the decree will be likely, in spite of the Judicial Commissioner's repeated instructions to the Lower Courts, to result in a better rate of conversion of grain debts into money debts,—illustrate the difficulties that attend inquiry into the causes of fluctuations in litigation. The fact is that the main factors that enter into consideration are not few, and their respective strength under any set of circumstances is rarely ascertainable with accuracy.

Value of suits.

26. The total value as computed under the Court Fees Act of suits instituted rose from Rs. 85,39,040 in 1891 to Rs. 1,07,93,661 in the year under notice. The increase is distributed over all grades, but is chiefly in the two lowest grades.

Suits between landlord and tenant.

27. The percentage (to total suits) of suits between landlord and tenant rose from 11·6 to 11·9, the total number of suits being 12,133. The suits under this head were confined prinicipally to suits for arrears of rent.

The distribution of suits was much the same as last year.

The percentage of cases tried by Courts of Assistant Commissioners (including Civil Judges) is constant at the figure for 1889 and 1890, the figure for 1891 having been unusually high.

The percentage of cases tried by Courts of Small Causes and Munsiffs' Courts has increased, and that of cases by Naib-Tahsildars had decreased. This is satisfactory; but the increased percentage and also the increased actual number of cases tried by Tahsildars is to be regretted, as the executive duties of these officers often clash with their judicial work.

Their percentage had been falling from 1888, but the fall has been checked and followed by a slight rise, the explanation given in the districts where a rise has occurred being almost invariably that for a certain period of the year some newly-posted Munsiffs had less extensive powers than their predecessors had exercised, and that consequently cases had to be transferred to the Tahsildars until the required powers were accorded.

Duration of suits.

28. The following figures show the Provincial average durations and number of hearings for the last three years:—

		1890.	1891.	1892.
Duration of suits ...	Contested	59·6	66·5	65·7
	Uncontested	36·2	37·9	38·2
Average number of hearings ...	Contested	3·0	3·3	3·5
	Uncontested	1·9	1·8	1·8

The fact that the work has increased considerably while the strength of the staff has remained unchanged, explains the fact that the duration of uncontested cases has again risen slightly; while that of contested cases has fallen only

slightly below the high average of 1891, when Census operations were a great hindrance to the disposal of Civil work. The number of hearings in contested cases has also risen still further. The reason for this, as for the increased durations, is to be explained partly by press of work, partly by the delays caused by the very frequent transfers among the staff—the natural result of its weakness—and partly by the practice of allowing insufficient time for the service of process. This last is a fault that the Deputy Commissioners have been called on to check.

Appeals.

29. The number of appeals disposed of was 7,782, as against 7,271 in the previous year. The percentage of first appeals has slightly increased.

Duration of Appeals.

30. The average duration of appeals has increased in the Judicial Commissioner's Court from 122·4 to 175·9 days. In the Judicial Assistants to Commissioners' Courts it has remained constant, except in the Court of the Judicial Assistant to the Commissioner, Nerbudda Division, in whose Court it has increased from 94 to 118·2 days.

In the District Courts, too, the average duration of appeals has risen from 56·5 to 63·2, the increase being caused chiefly by the duration of cases at Nagpur, Wardha, Saugor and Bhandara. The Deputy Commissioner, Nagpur, gave as an explanation the weak state of his staff coupled with the increase in the number of appeals. The Deputy Commissioner, Wardha, stated that the causes of arrears of work and long durations were the slow rate of work, and subsequently the ill-health of the then Civil Judge. The Deputy Commissioner, Bhandara, alleged the Civil Judge's heavy magisterial work and ill-health as the reason.

Civil Appellate work in the Courts of the Judicial Assistants to Commissioners has had to be subordinated to their heavy Sessions work, and the average durations of regular and miscellaneous appeals in their Courts have increased from 119 and 62·3 to 134·5 and 94·9 days respectively.

Work of Judicial Commissioner.

31. The Judicial Commissioner disposed of 731 appeals, as against 669 in the previous year. There were 152 applications for revision disposed of, as against 169 in 1891.

Execution of decrees.

32. The number of applications for execution of decrees presented during the year was 90,930, of which 10,941 were left pending at the end of the year. The figures for 1891 were 86,399 and 10,292; thus there was an increase of over 5 per cent. in the applications and of almost 4 per cent. in the disposals. The increase in applications is most noticeable in Nagpur, Bhandara and Nimar.

The number of decrees in which satisfaction was obtained in whole or in part were 17,496 and 15,989, as against 17,152 and 15,456 respectively. There were 43,469 infructuous applications, as against 40,979 in 1891. Of the infructuous applications, 19,686 were dismissed for default or withdrawn, and 23,783 were otherwise infructuous.

It must be explained, however, that the figure 23,783 must be considerably above the mark, as in some districts the new classification has been shown only for the latter quarters of the year, and for Chanda it has not been shown at all. The amount realized after issue of process has remained constant,

and the district figures have varied little. The amount realized without the issue of process, however, fluctuates violently, the figures in rupees for 1890, 1891 and 1892 being 15,878, 45,977 and 34,228, respectively. The variation in the figures for most of the districts is very considerable, some showing an increase, others a decrease. It is impossible in these circumstances to attempt to draw any general conclusions with respect to the totals.

The number of judgment-debtors imprisoned has decreased from 110 to 96, as also has the number of those arrested but released without imprisonment, the latter figures for the past three years being respectively 712, 632 and 603.

33. The fees levied for the service and execution of processes amounted to Rs. 2,33,164 and the charges incurred in their execution to Rs. 87,069, thus leaving a profit of Rs. 1,46,093. The totals of fees levied and of charges incurred in 1891 were Rs. 2,14,491 and Rs. 87,563, respectively. Miscellaneous.

The improvement of the condition of the process-serving establishment has engaged the attention of the Chief Commissioner and of the Officiating Judicial Commissioner. The Chief Commissioner has approved of the Officiating Judicial Commissioner's proposal that ten per cent. of the staff should consist of peons of the first grade on a salary of Rs. 10 a month, while the remaining grades should represent respectively 25, 45 and 20 per cent. of the total strength, drawing Rs. 9, Rs. 8, and Rs. 7 respectively.

7.—*Registration.*

34. The number of Registration Offices was 86 as compared with 84 in the previous year, the increase being due to the opening of new offices at Arang and Rajim in the Raipur district. At these places the work was entrusted to Honorary Magistrates, who are assisted in copying-work by the Judicial moharirs attached to their respective Courts. The new offices were open for rather more than 8 months in the year, and have registered during that period 15 and 4 documents, respectively. This result is not encouraging, but it is too soon to pass any remarks about the advisability or otherwise of keeping them open. Since the close of the year proposals have been submitted and sanctioned by the Chief Commissioner for the opening of a new Sub-office at Narkher in the Nagpur district, and another at Waraseoni in the Balaghat district. Registration Office Staff.

The *ex-officio* Sub-Registrars of Damoh, Multai, Bilaspur, Sohagpur, Bhandara and Seoni-Malwa were replaced by special salaried men; and since the close of the year, the schoolmaster Sub-Registrar at Deoli, in the Wardha district, has been replaced by a salaried Sub-Registrar. The last-mentioned change accompanied the transfer of a number of villages from the Wardha to the Deoli sub-district.

35. The general results of the year's operations as compared with those of the *previous* year, may be summarized as follows:— General results.

(1) The total number of documents registered rose from 29,790 to 31,103, showing an increase of 1,313 or 4·4 per cent. The increase extended both to compulsory and optional registrations.

(2) The gross receipts of the Department rose from Rs. 1,10,986-11-6 to Rs. 1,12,129-1-9, an increase of only one per cent.

(3) The expenditure rose from Rs. 42,842-3-7 to Rs. 48,412-13-10.

(4) The percentage of expenditure to income rose from 38·6 to 43·1.

(5) The net income fell from Rs. 68,144 to Rs. 63,717, or from 61·4 per cent. to 56·8 per cent. of the gross receipts.

The number of registrations effected in the year under review is the highest yet reached, but owing to a small proportionate increase in receipts and a large increase in expenditure, the net income fell considerably. The first cause follows on a general decline in the value of property transferred by documents of all except three classes; while expenditure has increased owing, chiefly, to the employment of an additional Inspector and six new special salaried Sub-Registrars.

The value of the property affected by registered documents fell from Rs. 1,30,73,092-0-5 to Rs. 1,18,36,553-2-5, or by Rs. 12,36,538-14-0. The most noticeable feature in the statistics is the falling off of almost 14 lakhs of rupees under the head "All other deeds" in the Narsinghpur district, where, in 1891-92, four documents affecting property valued at more than 13 lakhs were registered in the course of litigation between Narbada Parshad and Chadamilal of Gadawara, the leading members of a wealthy joint family of Sahukars. All the heads show a decrease in value excepting mortgages of immoveable property and sales of moveables, which show increases of Rs. 4,85,500 and Rs. 68,527 respectively, following naturally on a larger number of registrations under each head.

Expenditure.

36. The increase in expenditure was mainly due to the appointment of a second Inspector of Registration Offices and of six more salaried Sub-Registrars.

8.—*Municipal Administration.*

Number and constitution of Municipalities.

37. The number of Municipalities existing at the close of the year was 56 (against 57 in the preceding year), the number in each Division being—

Nagpur	...	...	...	20
Jubbulpore	...	...	...	12
Nerbudda	...	...	...	20
Chhattisgarh	...	...	...	4
			Total ...	56

The question was raised last year as to whether the Municipality of Kareliganj should not be withdrawn from the operation of the Municipal Act and brought under that of the Village Sanitation Act. Enquiry showed that the income enjoyed by this Municipality had fallen to about Rs. 500 per annum, and there was no hope that the trade of the place, which has been affected by the opening of the Indian Midland Railway, would revive. It was accordingly decided that this Municipality should be abolished, and effect has been given to the decision. Mandhata is included in the returns, as it remained under the operation of the Act during the early portion of the year to which these remarks relate.

The number of members on the Municipal Committees has risen from 629 to 640. The committees were composed of 5 *ex-officio*, 190 nominated, and 445 elected members. An increase of one in the number of *ex-officio* members is due to the appointment of the Deputy Commissioner of Nimar to be *ex-officio* President of the Khandwa Municipality; the mismanagement of the octroi business of the town rendered this appointment necessary.

Income.

38. Including the head Debt, the total income of Municipalities was Rs. 17,15,765, compared with Rs. 12,89,491 in the previous year, being an increase of Rs. 4,26,274. Under the head Debt are included two items of Rs. 1,00,000 and Rs. 1,05,000, which were lent by Government to the Municipalities of Nagpur and Burhanpur, respectively, for the improvement of water-supply arrangements of those towns. Exclusive of that head, the income of the year under report amounted to Rs. 14,41,521, against Rs. 11,34,382 in the preceding year.

Octroi.

39. Octroi yielded Rs. 8,02,161, against Rs. 7,47,886 in the previous year, or an increase of Rs. 54,275. The increase is distributed over the Municipalities of all four Divisions, but is most marked in the Chhattisgarh Division. Refunds increased from Rs. 1,82,235 to Rs. 2,08,655. The Octroi tax was in force in 28 Municipalities, the same number as last year.

Expenditure.

40. The total expenditure of Municipalities during the year was Rs. 13,87,710, compared with Rs. 12,52,595 in the preceding year. Excluding Debt and Interest on loans, the figures for the two years were Rs. 12,46,344 and Rs. 11,42,220 respectively, showing an increased expenditure during the year under report of Rs. 1,04,124.

The capital outlay on Water-supply amounted to Rs. 2,14,182, being an increase of Rs. 73,000 (in round numbers) on the expenditure under the same head in 1890-91. Expenditure under the head of Public Instruction has also increased, and this is due to the fact that during the year under report a considerable number of schools within municipal limits have been handed over to municipal management. Again there has been a large increase of expenditure on Conservancy during the year under report.

Water-supply.

41. As regards Water-supply, progress has been made with several important schemes. In Nagpur the supply of water from the Ambajhari Reservoir has been extended to various parts of the town where the want of public water-standards had been much felt previously, and the Municipality took a loan from the Administration of one lakh in order to lay a second main from that reservoir and to acquire a portion of its catchment area, in view to its more effective protection from pollution. In Raipur, the Balramdass Water-works were pushed on rapidly; they have been since completed and were formally opened by the Chief Commissioner in December last. A sum of Rs. 1,05,000 has been spent in improving the water-supply arrangements of Burhanpur; and the Harda Municipality has been accumulating funds for a project which the Commissioner hopes they will soon be in a position to undertake. The Jubbulpore Municipality will soon be in a position to raise a loan with the object of extending the water-supply system of that town and of improving its sanitary condition in other respects.

General working of Committee.

42. The Officiating Commissioner of Nagpur, commenting on the work of the smaller outlying Municipalities of his Division, observed that, judged by the attendance at meetings, the interest shown by members is not very keen; a few

members do their duty, but a good many do not. Of the Nagpur Municipality, however, he said: "The work of this Committee, so far as it has come under my notice, has impressed me favourably. They appear to manage their affairs in a business-like way, and the leading members are gentlemen of enlightened views whose good work and public spirit it is a pleasure to notice." In this commendation the Chief Commissioner entirely concurs. He regards the Nagpur Municipality as a good and encouraging product of the policy of Local Self-Government.

The Commissioner of Jubbulpore wrote—

> "The proceedings of the Municipal Committees are on the whole well recorded and reach me with fair punctuality. The weak point in all committees is the amount of time they devote to discussion, and this weakness is the more irritating in connection with proposals or projects which are sent to committees for adoption or action. When 15 or more members of a committee assemble to discuss a proposal more or less unfamiliar to them, it is difficult to control discussion and talk within reasonable bounds, and even more difficult to frame a resolution which will meet with general acceptance. The tendency of most committees is to discuss and re-discuss a matter till all are talked into acquiescence, and not to be satisfied because a bare majority carries a resolution."

In the Nerbudda Division the Harda Municipal Committee continu es to be well spoken of.

Last year the attention of all Commissioners and Deputy Commissioners was called to the necessity of closely examining the working of the Octroi Refund system in the Municipalities under their control. In Bhandara, in the Nagpur Division, great laxity of administration, which opened the way to fraud on the part of the subordinate establishment, was discovered. This has now been corrected. Similarly in Raipur several defects in practice were found to exist and have now been remedied.

9.—*Local Boards.*

Constitution of District Councils.

43. There has been no change in the number and general constitution of the Local Bodies of the Central Provinces. There are 18 districts in the Province, and the Local Self-Government Act, I of 1883, is in force in all (or portions of all) of them, except Mandla. There are, accordingly, 17 District Councils, and the number of Local Boards subordinate to the Councils is 48. The distant Sironcha Tahsil of the Chanda district is exempted from the operation of the Act. The Chanda Zamindaris are also exempted at present, but the Act was, during the year under review, extended to the Chhattisgarh Zamindaris.

Of the total number (1,132) of members belonging to the Local Bodies, 891, or 78 per cent., were elected, the remainder being nominated; there were no *ex-officio* members. The number of officials (109) and of Europeans or Eurasians (17) who held seats was very limited. These bodies, then, consist for the most part of Native gentlemen elected by their fellow-countrymen.

Number of Meetings.

44. The total number of meetings held by District Councils and Local Boards was 516, against 482 in the preceding year.

The rule is that District Councils are to meet not less than four times, and Local Boards not less than eight times in the year. In order to form a quorum the attendance is necessary of one-fourth of the members, and of those present

one-half must be elected members. All District Councils held the requisite number of meetings, but a considerable number of the Local Boards failed to do so. The reports on the subject of attendance, especially at the meetings of Local Boards, continue to be in many cases unfavourable. The average number of members on District Councils and Local Boards was something over 17, and the average attendance was 7, or something over 40 per cent. of the strength. Having regard to the distance which many of the members who live in the interior have to travel, and the fact that most of them have private business to attend to, and have not yet been educated to the point of going very far in the direction of sacrificing their private interests to the public good, this, as a general percentage, is perhaps as much as can be expected. In practice, the work of the Local Bodies appears to be largely carried on at present by a comparatively small proportion of members who are above the average of their fellows, and patience and time are required for their good example to spread. Writing of the Local Boards of his district, the Deputy Commissioner of Damoh gave it as his opinion that:—

> "The members of the working Committees are the only ones who care to work; the others merely care for the name and dignity of being the 'member'; and they have no wish to do anything, and therefore do not attend."

Income.

45. The total income of District Councils and Local Boards from all sources excluding opening balances is contrasted below with that of the previous year:—

	1890-91. Rs.	1891-92. Rs.
Receipts other than Contributions from Provincial Revenues and Debt—Deposits and Advances ...	6,04,753	6,42,023
Contributions from Provincial Revenues ...	98,951	1,00,027
Debt—Deposits and Advances ...	76,080	72,832
	7,79,784	8,14,882

The Provincial Contribution consisted chiefly of grants in aid of education and for road construction.

Expenditure.

46. The total amount expended on Education was Rs. 2,05,450, as compared with Rs. 1,95,052 in the preceding year. This is a considerable increase.

47. The expenditure on roads, original and repairs, in the two years is contrasted below:—

Roads.			1890-91. Rs.	1891-92. Rs.
Original ...	Civil Officers	...	12,254	7,032
	Public Works Department	...	2,06,518	1,14,362
	Total	...	2,18,772	1,21,394
Repairs ...	Civil Officers	...	1,01,495	1,16,326
	Public Works Department	...	30,068	36,021
	Total	...	1,31,563	1,52,347

Under existing orders the District Council allots funds for the construction and repairs of local roads in accordance with the Road Scheme sanctioned for each district by the Chief Commissioner, original works on roads above a certain class being executed by the Public Works Department, and repairs by the Deputy Commissioner. The question of increasing the local establishments and relieving the Public Works Department of a portion of the construction work which now falls to it, is under the Chief Commissioner's consideration.

The total outlay on Civil Works was Rs. 3,33,397, as compared with Rs. 4,06,253 in 1890-91.

Sanitation.

48. The total expenditure on Water-supply improvement amounted to Rs. 72,124, against Rs. 52,008 in the preceding year, distributed by Divisions as follows:—

	Rs.
Nagpur	7,039
Jubbulpore	15,231
Nerbudda	16,988
Chhattisgarh	32,866
Total ...	72,124

The construction of new tanks was confined almost entirely to the Chhattisgarh Division, where the people prefer tank to well water. They were constructed almost without exception by private individuals. The districts in which most new wells were sunk were Betul, Seoni and Damoh. The Local Boards within whose jurisdiction the largest sums were spent on water-supply improvement were Betul, Sambalpur, Simga, Dhamtari, Drug, Mungeli, Lakhnadon, Murwara, Bilaspur, Seoni and Ramtek.

10.—*Military.*

Regular Forces.

49. The Central Provinces were garrisoned during the year as shown below:—

Nagpur District, with Headquarters at Kamptee. (Brigadier-General Gatacre, C. B., S. C.)	Kamptee	... One Battalion British Infantry (1st Loyal North Lancashire Regiment replaced by the 1st Worcestershire Regiment). One Regiment Native Infantry (12th Bombay Infantry). One Battery Royal Artillery (20th Field Battery).
	Sitabaldi	... Detachments of British and Native Infantry from Kamptee.
	Raipur	... A wing of Native Infantry (7th Bombay Infantry).
	Sambalpur	... Do. do.

Nerbudda District, with Head-quarters at Jubbulpore. (Brigadier-General W. O. Barnard.)	Jubbulpore	... One Battalion British Infantry (2nd Scottish Rifles). One Regiment Native Infantry (1st Bengal Infantry). A Detachment of Native Cavalry (1st Bengal Cavalry). One Battery Royal Artillery (44th Field Battery).
	Saugor	... A Detachment of British Infantry (2nd Battalion Scottish Rifles). A Detachment of Native Infantry (1st Bengal Infantry replaced by 8th Bengal Infantry). A Detachment of Native Cavalry (1st Bengal Cavalry). One Battery of Royal Artillery (6th Field Battery).
	Pachmarhi	... A Convalescent Depôt.
Mhow District	...Asirgarh	... A Detachment of Native Infantry (19th Bengal Infantry replaced by 9th Bombay Infantry).

Auxiliaries.

50. The Nagpur Volunteer Rifles continued under the Command of Colonel T. A. Scott, B. S. C. The Bengal-Nagpur Railway Volunteer Rifles was Commanded by Mr. Wynne, the Agent and Chief Engineer of the line, who holds the rank of Lieutenant-Colonel. Both the Corps were inspected during the year by Brigadier-General J. Gatacre, C. B., Commanding the Nagpur District, who was generally satisfied with their efficiency and discipline.

CHAPTER IV.—PRODUCTION AND DISTRIBUTION.

1.—*Agriculture.*

1. The completion of the survey of the Betul district has reduced to four* in number the districts for which during the currency of survey operations only area estimates are available, and the survey of three of these (Chanda, Bhandara and Balaghat) will be completed by the end of the current year. The large zamindari areas included in the Hoshangabad, Chhindwara, Chanda, Raipur, Bilaspur and Sambalpur districts will remain for some time to come statistical blanks. Some progress has been made in the survey of zamindaris in the three last-named districts, but the areas to be dealt with are very large, and completion cannot be expected for three or four years. The survey of the Chanda zamindaris has not as yet been commenced, but will shortly be taken up. Proposals are being elaborated for the survey of well-established villages in the zamindaris of Hoshangabad and Chhindwara.

*Mandla, Chanda, Bhandara and Balaghat.

2. Much progress has not been made in recalculating the areas of Government Forest estates, which are believed to be very inaccurate in some districts. Materials for accurate computation will not be available until the Forest Survey now in progress is completed.

3. The area statistics give the total Provincial area as 74,192,028 acres (115,925 square miles), of which 18,838,400 acres are included in Feudatory States and 41,797,321 acres in unsurveyed zamindari estates. The balance is 43,556,307 acres. The area for which detailed statistics are given is 43,536,051 acres, the difference of 19,256 acres resulting partly from discrepancies between area computation in detail from the village maps and area computation in aggregate as effected by the Survey Department, and partly from errors in the reported areas of Government Forests.

4. The progress of survey extends each year the area covered by the detailed statistics, and hence one year's totals cannot profitably be compared with another's. The statistics for the year 1892-93 may be analyzed as below:—

		Acres.
Forests	...	12,085,252
Uncultivated waste	...	3,836,057
Culturable waste	...	9,572,763
Current fallows	...	1,926,943
Under crop	...	16,110,808

As was explained last year, the area returned as *culturable* enormously overstates the area which is really fit for cultivation. It includes all lands classed as under forest, under scrub jungle and grass and covered by groves, but a small proportion of which will ever be brought under crop.

5. The principal crop headings are:—

		Acres.
Rice	...	4,425,398
Wheat	...	4,269,054
Gram	...	701,735
Juari	...	1,294,079
Other food-grains	...	2,995,859
Linseed	...	1,381,897
Til	...	502,957
Cotton	...	686,370
All others	...	1,490,097
Total	...	17,747,446

These areas include crops, covering an area of 1,636,638 acres, which were grown as after-crops, the land bearing two crops within the year. If the after-crop areas be excluded, the net cropped area is 16,110,808 acres. The after-crops mainly consist of linseed and pulses which follow rice on good rice lands.

6. The irrigated area is comparatively small, amounting to only 680,575 acres, more than five-sixths of which consist of rice lands watered from tanks. The area watered from wells is only 99,126 acres.

7. The main features in the cropping of the year may be contrasted in the case of the following 14 districts with those of the year preceding :—

District.	Year.	Total area under crop (in acres).	Area in acres under						Area double cropped (in acres).
			Current fallow.	Rice.	Wheat.	Juari.	Linseed.	Cotton.	
Saugor	1891-92	10,04,916	89,633	21,203	5,15,205	76,166	36,314	19,598	13,442
	1892-93	10,17,034	84,721	25,578	5,60,337	58,934	37,203	17,919	15,735
Damoh	1891-92	5,48,364	83,631	64,594	2,66,797	25,618	31,036	6,539	19,534
	1892-93	5,44,999	86,898	71,936	2,44,878	25,366	28,472	5,279	15,536
Jubbulpore	1891-92	11,41,921	3,10,119	1,82,977	4,50,219	17,370	45,820	18,799	97,487
	1892-93	11,71,805	2,98,109	1,97,672	4,78,424	10,653	44,965	15,997	1,01,601
Seoni	1891-92	7,23,693	1,58,182	99,811	2,87,809	12,872	26,211	7,884	21,111
	1892-93	7,60,591	1,36,456	1,01,680	3,29,466	14,342	33,617	6,240	31,008
Narsinghpur	1891-92	6,31,846	59,931	29,492	2,35,250	31,454	12,922	39,931	15,087
	1892-93	6,54,130	44,154	33,356	2,37,396	33,415	13,761	41,870	22,950
Hoshangabad	1891-92	10,34,863	77,909	18,620	6,18,241	53,178	15,986	44,565	5,093
	1892-93	10,73,261	50,113	18,286	6,35,711	36,682	26,008	19,325	10,018
Nimar	1891-92	5,05,142	26,725	10,486	31,767	1,57,578	4,338	93,677	21,305
	1892-93	5,22,368	30,872	11,751	39,836	1,69,842	4,218	88,497	26,219
Betul	1891-92	7,07,897	1,61,391	10,542	1,53,235	38,171	5,277	2,016	8,799
	1892-93	7,13,861	1,59,980	11,745	1,59,667	48,807	5,100	1,973	12,398
Chhindwara	1891-92	7,00,322	1,23,614	8,089	1,72,693	1,11,401	13,308	55,778	3,419
	1892-93	7,24,030	1,12,551	9,151	1,72,999	1,19,392	15,882	30,999	9,349
Wardha	1891-92	9,34,561	1,02,125	3,476	2,04,252	2,33,771	1,51,257	2,61,079	2,555
	1892-93	9,56,386	87,998	5,877	1,88,030	2,72,227	1,23,740	2,59,909	5,638
Nagpur	1891-92	12,34,616	86,825	33,876	3,64,683	3,17,665	1,47,001	1,45,726	6,327
	1892-93	12,85,580	59,106	31,534	4,23,684	2,95,085	1,56,608	1,41,806	9,759
Raipur	1891-92	27,63,227	2,97,734	13,03,146	1,49,925	400	5,03,037	7,471	6,21,846
	1892-93	28,09,821	2,27,213	13,03,625	2,00,025	307	4,52,246	8,108	6,02,595
Bilaspur	1891-92	15,75,821	1,39,176	8,19,577	98,266	284	2,27,651	13,620	3,10,875
	1892-93	16,12,891	1,11,982	8,20,476	1,29,321	107	2,24,358	8,216	3,18,420
Sambalpur	1891-92	5,01,472	91,045	3,86,473	77	...	193	17,275	2,674
	1892-93	4,87,394	1,09,493	3,86,020	100	...	127	8,381	2,544

There is a very general decrease in the area shown as under current fallows owing to the fact that in the preceding year an abnormally large area was left unsown with the usual *rabi* crops owing to the unfavourable character of the rainfall. Wheat cultivation for the same reason extended over a considerably larger area than in the preceding year, the excess being particularly large in the Seoni, Nagpur, Raipur and Bilaspur districts. In the Wardha district, wheat seemingly gave place to juari, the cultivation of which has been on the decline for some years past, until it has become necessary for the Nagpur country to import considerable quantities of juari from the Berars if the home crop is not a good one.

2.—*Weather and Crops.*

Rainfall.

8. The following table shows the rainfall of the year, and compares it with the previous year, and with the average of the past 26 years:—

The rainfall was again above the normal, the excess being 12 inches or over in Nimar, Chanda, Bhandara and Bilaspur, while in Balaghat only was the rainfall below the normal.

9. The monsoon crop promised at first to be an excellent one. The rains commenced in good time, and the first falls were followed by a break which enabled the cotton and millet seedlings to make strong growth before the ground became saturated. The rainfall of August and September was, however, exceedingly heavy and continuous, and conditions, though favourable for rice, were decidedly against the cotton, millet and til crops, which require a light rainfall with intervals for weeding. Abnormally heavy rain again occurred in October in all but the most northerly districts, which, falling when the cotton bolls were opening, discoloured or rotted much of the lint. It was of great benefit to the *rabi* sowings, though some of the early sown wheat crop was ruined by swamping, and required re-sowing. Good rain fell in January, and harvest prospects were at one time excellent. But wet weather in February and again in March brought on a widespread attack of rust, which in a few days changed the promise of a bumper crop into an outturn considerably below the average. The damage was most severe in the southern districts, the wheat lands of the Nerbudda valley suffering comparatively little.

The rice crop was a good one, and the autumn millets yielded fairly. Cotton gave an outturn slightly in excess of the normal, and the til crop, though disappointing, was fair. Linseed gave a satisfactory outturn. The wheat crop of the Provinces as a whole was about 10 per cent. below the average.

10. The following table contrasts the prices of the four chief food-staples—wheat, gram, juar and rice—in each district at various periods during the past two years.

In June the prices of all four grains ranged considerably higher than in the corresponding month of 1892. The rise in the Chhattisgarh country was the greatest, wheat selling in Raipur at 14 seers and in Sambalpur at 11 seers as compared with 22 seers and 18 seers in June 1892. This rise in price of wheat in the Chhattisgarh country was, however, balanced by a corresponding

fall at the close of the year. Juar at the close of the year commanded much about the same prices as in the corresponding period of the previous year. The price of gram rose in the beginning of the year and maintained a high level throughout.

PRICE CURRENT, 1892-93.

3.—*Horticulture.*

District Gardens.

11. The number of gardens at District head-quarter stations rose from 15 to 16 owing to the transfer of the management of a garden at Raipur, hitherto in charge of the Municipality, to the District authorities.

The total expenditure and receipts of these gardens are compared in the following table:—

Year.	Receipts.	Expenditure.	Net cost.
	Rs a. p.	Rs. a. p.	Rs. a. p.
1888-89 ..	5,710 13 4	8,851 14 0	3,141 0 8
1889-90. ...	5,877 9 1	8,274 0 5	2,396 7 4
1890-91 ..	5,198 6 5	8,822 10 4	3,624 3 11
1891-92 ..	5,246 12 6	9,924 13 6	4,678 1 0
1892-93 ..	5,797 14 11	10,911 1 11	5,113 3 0

Though the receipts of the year are larger than they have been for the last five years, the increase in expenditure has been more than proportional to this, and the net cost of maintenance is higher than it has hitherto been. This is partly due to the larger number of gardens which are now maintained from Provincial Funds, but it is also a result of larger District expenditure, especially in Seoni (+ Rs. 341), Chanda (+ Rs. 226), Raipur (+ Rs. 180), Damoh (+ Rs. 150) and Betul (+ Rs. 150).

A reference to the District Reports shows, however, that nearly all this extra expenditure was devoted to improvements of a more or less permanent nature, or to the purchase of new fruit trees which are expected eventually to increase the garden income.

As regards financial results, Sambalpur takes the first place with an expenditure of Rs. 643-7-5 and an income of Rs. 524-8-2. Bhandara comes next with a receipt percentage of 73 per cent., while in seven other gardens the income equalled or exceeded fifty per cent. of the expenditure.

The gardens which show the worst financial results were Betul, Chanda, Mandla and Hoshangabad. In Mandla the bad results are put down to heavy and continuous rainfall and consequent floods, which affected the garden both by diminishing the outturn and by so materially damaging several of the buildings as to make a considerable expenditure necessary for their repair. The Betul garden is still, comparatively speaking, a new one, and money was spent in completing the stock of fruit trees and in laying out new roads.

There was a very marked falling off in the number of plants distributed to the public, the total (excluding the figures for the Maharaj Bagh) having fallen from 9,574 to 2,260. The decrease was, to a large extent, due to the Raipur figures, and is ascribed in the District Report to so large a number of plants having been distributed in previous years which made a further supply less necessary; to the discouragement of gratis distribution, and to the opening of railway communication, which enabled people in want of plants to obtain them from the excellent gardens in Upper India.

Exceedingly little seems to have been done in the way of experimental cultivation, and all that is reported is that hill potatoes were grown in Mandla, Damoh and Chhindwara. In Mandla they have been very successful, and a

further extension of the experiment seems desirable. In Damoh the degree of success was less marked, while in Chhindwara, not only was the outturn poor, but it was found impossible to sell the crop at a reasonable profit.

The Maharaj garden at Nagpur seems to have been well managed during the year. The average number of visitors each day was about 1,000 and on holidays twice that number. Owing to the poor crops of oranges and mangoes, the receipts from these sources fell off, but a larger area was allotted to the growth of vegetables, and the sale proceeds were Rs. 168 as compared with Rs. 24-11-5 in 1891-92.

The Menagerie continued to prosper. Several additions to it were made both by private liberality and by purchase. There were also some losses, principally among the nilghai. Eight sambhar and five nilghai were born in the Menagerie during the year.

The number of trees and plants distributed was 1,423 as compared with 1,626 in the previous year; 240 of these were distributed gratis.

The net cost of maintenance of the garden—Rs. 1,666-13-11, differed but slightly from that of the preceding year.

The Pachmarhi gardens include the vegetable and fruit garden attached to the Residency, and the Mulberry, Pine and Cypress plantations, as well as the public gardens proper.

The expenditure increased from Rs. 1,929 to Rs. 2,006-12-7. This was due to the employment of a temporary establishment to look after the Cypress plantation, and also in a measure to expenditure on repairs to the well and on the laying down of iron piping. The Cypress pines are now reported to be doing well, and to have already almost established themselves. Several fruit trees were obtained during the year from the Saharanpur gardens for experimental cultivation.

Nagpur Experimental Farm.

12. During the past three years a very important change has been made in the system on which experiments are conducted. A certain number of the Farm fields have all along been appropriated to permanent experiments, running year after year on definite and continuous lines. But the greater number of the experiments made each year have been specially devised for that year,—often without much reference to the teachings of previous years, to the fitness of the land selected for the experiment, or to the inadequacy of a single year's results to throw light on the question at issue. This has now been changed. By far the greater number of the experiments are now settled on a continuous basis, and will be conducted year after year on plots specially selected for the purpose.

So far as the experiments were affected by the seasons, the most striking feature of the year was the extraordinarily destructive attack of rust which followed the wet weather of February. Very heavy rain had fallen at sowing time, and early in the season an outbreak of fungoid disease was apprehended in case of continued cold weather rain. The worst anticipations were realized. In the course of a single night the wheat fields assumed an unhealthy brownish tinge, and the grain, which had at the time just set, rapidly shrivelled in the ears. Early sown crops were seemingly sufficiently advanced in growth to resist the disease and suffered comparatively little. But with late sown wheat the thicker the crop the greater was the injury, and, in some cases, the grain yielded by most promising fields was so light as to hardly stand winnowing. Spraying the crops with either sulphate of copper or sulphate of iron proved absolutely

useless. The result with some experiments has been to positively reverse the outturns, the plots which promised best and would actually have yielded heaviest, giving in grain the lightest return. The only indication of the true result of the experiment is in these cases to be gathered from the weight of the straw.

The longest established experiments on the Farm are two which have now for nine years tested the effect of applying manure of different kinds to wheat continuously year after year. In the first experiment no irrigation was used. The averages for the preceding eight years show that cattle-dung adds about Rs. 5 to the produce per acre and barely covers its cost. Saltpetre adds Rs. 12, but gives a loss in net profit. Bone-dust and green soiling are of very little effect. These results account for the very small use which is made of manure in tracts (such as the Nerbudda Valley) where wheat is grown year after year without rotation. In such places the people counteract the exhaustion of the soil by sowing gram with their wheat, but rarely apply manure to their wheat lands. The use of irrigation, however, produces very different results. In the second experiment the plots have been irrigated during the last three years, and the results are very instructive. The gain given by saltpetre is raised from Rs. 12 to Rs. 28, and under these circumstances it might well pay the ryot to use it as manure. The effect of cattle-dung is also doubled. But no increase is gained on the unmanured plot. The season under report was peculiarly unfavourable for irrigation, as the cold weather rains were so copious as to render it, to all appearances, quite unnecessary, and it was only used in order to preserve the conduct of the experiment unbroken. It was found accordingly that it only added to the outturn in the case of the plots manured with saltpetre, and the close correspondence between the yields of straw shows that the general failure of irrigation to give an increase was not the result of greater loss from rust on the irrigated plots. Though irrigation generally gave no profit, it did not aggravate fungoid disease as one would have been inclined to anticipate. And cold weather rains of this character are of course very rarely experienced.

Turning now to experiments with a shorter term to their credit, the first which calls for notice is that to test the effect of deep-ploughing. The outturns of three years go to show that deep-ploughing is always injurious to a wheat crop immediately following, but that if not repeated it adds to the outturn in the succeeding two years. A point which may be taken as satisfactorily settled by three years' experiments is that the most profitable rate for sowing wheat is 90 lbs. per acre, and that the suggestions often made that the amount of seed can be reduced with advantage, are not borne out by practice. In another experiment the admixture of gram with wheat is shown to add to the productiveness of the wheat seed sown, and though, during the year under report, it resulted in a small loss, this is probably due to the fact that the gram was used in too large a proportion. In previous years it gave a small increase in profit. Another experiment confirms the practice common in the Chhattisgarh country, of using kodon (*Paspalum scrobiculatum*) as a rotation crop with wheat. It apparently adds considerably to the outturn, though owing to its low market value it can only be grown profitably when used for home consumption. Experiments with green soiling by growing and ploughing in a crop of *san*-hemp (*Crotalaria juncea*) every other year, show a gain in annual produce of from Rs. 3 to Rs. 5 per acre, whether wheat be alternated with bare fallow or with cotton. If the green manure used be weeds cut elsewhere and carted on to the land, the gain is much more considerable, amounting annually

to about Rs. 11 per acre. But this does not pay for the cost of cutting and carriage. Two experiments, one with wheat and the other with cotton, demonstrated the superior value of cattle-dung collected in masonry stalls so as to conserve the urine.

Two interesting experiments with different varieties of cotton show that in spite of the relatively low price commanded by short-stapled cotton (locally known as *jari*) in the market, its cultivation was this year more profitable than that of higher class cottons. This result (which is borne out by the experience of 1890) is moreover shown on the assumption that a ryot who grows long-stapled cotton secures the full difference between its price and that of short-stapled cotton, which owing to the action of the middlemen, is very rarely the case. In 1891 the better class cottons were more profitable and though the question cannot as yet be accepted as definitely settled either way, there is enough to weaken the common assertion that the extending cultivation of short-stapled cotton is as injurious to the interests of the ryot as it is to the interests of the export trade to Europe, and that Government would do well to interfere to promote the growth of long-stapled varieties.

Some interesting observations were made in regard to the damage caused to wheat crops by trees growing near them. This damage is often ascribed to the influence of shade, but facts opposed to this view are that crops suffer as much on the south as on the north side of trees, that the damage often extends far beyond the reach of the shade, and that the area of damage varies very greatly from year to year, being largest when there is least cold weather rain. Bamboo clumps and mango trees on the margins of some of the Farm fields have hitherto rendered a very large area unfit for wheat cultivation—in one case the area damaged extending to a distance of over 100 feet. This year the plan was tried of cutting off the surface roots by digging trenches to a depth of 3 feet at distances varying according to the size of the tree from 3 to 12 feet from the tree trunk. The trenches were dug at the end of August and kept open during the cold weather. Where protected by these trenches the wheat crop suffered no injury whatever. This may have been partly due to the abundance of the cold weather rainfall, and it would be unsafe to draw certain conclusions till there are the results of another season's experiments to go upon. But it is a fact that unprotected crops did suffer in places in spite of the good rainfall. The trenches can, of course, be filled up before the rains if the land is required for kharif crops, which, as a rule, suffer but little from trees in their proximity.

The state of the Agricultural Class attached to the Farm is generally satisfactory, but the fact must not be disguised that students join simply as a means of obtaining Government employ, and that if their class certificates fail them in this direction, their numbers will rapidly decline. Enquiries which have recently been made from Settlement Officers seem to show that the course of instruction is really useful as a preparation for the post of Revenue Inspector. But the vacancies in this branch of service are not unlimited, and unless Deputy Commissioners and Forest Officers can utilize this special education by accepting passed students for appointments on the Court of Wards and Forest establishments, it is to be feared that the class will come to an end. The experience of its sister-class in Engineering has shown that people in the northern districts are much more ready than those of the Nagpur country to take advantage of technical education, and had it been possible to start the Agricultural Class at Jubbulpore, its chances of success would probably have been much more assured.

4.—*Forests.*

13. Under the instructions contained in Government of India Circular No. 16-F, dated the 7th June 1892, the Forest year has been defined as the period beginning with the 1st July and ending with the 30th June. The last Forest Report for the Central Provinces related to the financial year 1891-92, so that the Reports now under review cover a period of 15 months, *i. e.*, from the 1st April 1892 to the 30th June 1893.

14. The total area administered by the Department during the year (10,124 square miles in the Northern Circle and 9,889 square miles in the Southern Circle) differs but little from the totals of the previous year. Such changes as have occurred are due in part to small additions to and exclusions from reserved forest made on administrative grounds, or for providing larger *nistar* areas for villages; and in part to the correction of the areas as previously recorded on the bases of the more accurate figures furnished by the Survey Department.

The following table shows the classification of these forests at the close of the year under review as compared with that of the previous year :—

Circles.	31st March 1892.				30th June 1893.			
	A. Forests under strict conservation.	B-1. Areas available for cultivation.	B-2. Undistributed area.	Total.	A.	B-1.	B-2.	Total.
Northern Circle ...	3,945	656	5,478	10,079	3,968	657	5,478	10,103
Southern Circle ...	5,244	9	4,348	9,601	5,118	330	4,071	9,519

15. As regards the excision of forest areas for purposes of cultivation little more remains to be done in the Northern Circle. Good progress has been made in Mandla, and it is reported that 769 miles of forest have been selected as suitable for excision, and 195 miles have been chosen by the Forest Officer, Betul, for the same purpose.

16. At the end of last year the work of boundary demarcation had been practically completed, except in the districts of Chanda and Mandla; 441 miles still remain to be dealt with in the Southern Circle, and it is to be regretted that no progress was made in this work in the year under review. The 213 miles recorded as having been demarcated were not really new boundaries, but merely existing boundaries which had not previously been properly defined. It has now been proposed that the work of demarcation in Chanda should be taken up in connection with the Zamindari Settlement Survey, and some such arrangement will, if possible, be made, so as to prevent further delay. In the Northern Circle, it would appear that the work cannot be completed until it has been finally decided what land is to be excised for agricultural purposes in the Mandla District. In other Divisions no more work remains to done.

As regards the preparation of Boundary Registers fairly good progress seems to have been made in the Northern Circle; and in Saugor and Nimar, where the work had previously been neglected, it has now been completed.

17. Forest survey operations were in progress during the year in Raipur, Bhandara, Balaghat, Jubbulpore and Narsinghpur; while the Survey of India carried on work in Nimar. In Bhandara and Jubbulpore survey work has been completed, and fair progress is being made in other districts.

18. Although a Working-plans officer has been employed in the Southern Circle during the year under review, no Working-plan has yet been sanctioned in either circle. In the Southern Circle a Working-plan for the East Pench Range has been taken in hand and will shortly be submitted for sanction; while in the Northern Circle Working-plans were submitted to the Conservator by the Forest Divisional Officers of Mandla, Jubbulpore, Saugor, Narsinghpur and Nimar. All these plans are reported, however, to be defective in several points and will probably not be ready for final sanction for some time to come. One of the chief difficulties in the way of the prompt preparation of Working-plans has been the absence of officers who can be employed especially on this duty. The Chief Commissioner has recently sanctioned a proposal made by the Conservator, Northern Circle, under which a junior officer is to be appointed in each Forest Division as special Working-plans officer. This is a work which junior officers, if aided by proper advice, are perfectly competent to do, and it seems to be a much more hopeful plan to have separate officers for the limited area of a division than to appoint a single officer for a whole circle.

A Provisional Working Scheme was proposed to the Chief Commissioner and accepted by him, which, briefly stated, consisted in the carving up of forest areas into working circles; the division of the latter into blocks; the sub-division of blocks into working compartments and the restriction of fellings to those compartments, each of which was to be worked out in the course of a year. The particular attention of Commissioners of Division was drawn to the necessity of securing the opening of sufficient working compartments.

As a result two hundred and forty-eight village supply Coppice-working circles have now been opened in the Northern Circle; their boundaries defined, and coupes for the forward fellings of 1893-94 marked off, standards for reserves selected and marked, and a considerable amount of valuation fellings done departmentally with a view to gaining more accurate knowledge of the average outturn per acre of forest.

The scheme for these areas further provided for sowing and planting in blanks, fire protection, protection from grazing, climber-cutting, communications and buildings.

In the Southern Circle very much less has been done. In Balaghat, Seoni and Chhindwara nothing has yet been sanctioned by the Conservator, while in the remaining districts, with the exception of Nagpur, Wardha and Chanda, nothing more than a rough and provisional classification of areas appears to have been completed.

The Chief Commissioner has great hopes of the future working of this scheme, not only as a step—and an important step—towards the preparation

of systematic Working-plans, but also as a means of providing the rural population without inconvenience with such forest produce as they ordinarily require, and thus making the Government system of forest administration less unpopular among them than it now is. It has recently been pointed out that with definite and sufficiently numerous and accessible compartments and with a more accurate acreage valuation it may ultimately be possible to allow villagers to buy up in bulk their annual forest requirements, and thus practically to reintroduce commutation in a form which, while welcome to the people, will be entirely free from objection from a forest point of view. The Chief Commissioner has no doubt but that commutation is more in harmony with the feelings and habits of the people than any other method of levying forest revenue, and, provided that it can be rendered free from objection from a sylvicultural point of view, he would regard its extension with much satisfaction.

19. The following Statement gives the details of the Forest officials reported during the year under review and in the previous year, and also shows the mode in which they were disposed of:—

		1891-92.	1892-93.
Northern Circle	Reported and detected	3,338	2,831
	Prosecuted	79	162
	Per cent. convicted	75	78
	Cases compounded under Section 67 ...	2,963	2,614
Southern Circle	Reported and detected	5,201	5,715
	Prosecuted	154	173
	Per cent. convicted	70	73
	Cases compounded under Section 67 ...	4,886	5,067

Any detailed comparison of the figures is impossible owing to the fact that those for 1892-93 relate to 15 months, while those for the previous year are for 12 months only. It is, however, gratifying that even for the longer period the total number of cases reported in the Northern Circle is less than in the previous year; while in the Southern Circle, where the total number is larger, an analysis of the figures for the 12 months ending the 30th June 1893 shows that it is smaller by 10 per cent. than the total for the financial year 1891-92.

A noticeable feature in the figures for the Northern Circles is the marked decrease (922 offences as against 1,570 in the previous year) which has taken place in offences connected with grazing.

20. The total number of offences reported in Saugor (1,135), though somewhat less than last year, is still higher than that for any Forest Division in the Province. The total in Damoh (402) is also high for so small a district, and from facts which came to his notice in his recent tour in these districts the Chief Commissioner inclines to think that both in the matter of village boundaries

and in the practical working of the forest system there is much room for improvement. The matter has been commended to the careful attention of the Deputy Commissioners and of the Forest Department during the current year.

21. As regards the number of cases compounded during the year the figures again indicate that forest administration is more harshly worked in the Southern than in the Northern Circle. The total number of cases in the former Circle (5,607) was nearly double that in the latter (2,614), while as regards the number of persons involved (15,093 as compared with 6,790) the difference was even more striking. These figures, in the Chief Commissioner's opinion, show clearly that in the Southern Circle due discretion has not been shown in the treatment of forest offences, and that many perfectly innocent acts on the part of the people have been wrongly regarded as offences against the law. The Conservator has been requested to issue instructions which will tend to diminish the very large number of so-called forest offences in this Circle.

The total number of cases prosecuted (335) is still small, and it is satisfactory to notice that the percentage of convictions has risen in both Circles as compared with that of the previous year.

22. The areas under special fire protection have increased from 3,870 square miles to 5,634.

These figures show considerable improvement over those of 1891-92. The area protected was larger, and the percentage of this area, which was successfully protected, was 99 as compared with 95 in the preceding year. The incidence of cost per square mile (Rs. 5-14-5 in the Northern and Rs. 14-0-3 in the Southern Circle) has also decreased; but the decrease is far more striking in the Northern Circle, where it is little more than half what it was in 1891-92.

23. The following table shows the number of animals grazed in the period under review and in the preceding year, and the receipts from this source :—

Circles.	Animals.			Grazing receipts.		
	1891-92.	1892-93.	Difference.	1891-92.	1892-93.	Difference.
				Rs.	Rs.	Rs.
Northern Circle ...	1,362,499	1,355,995	−6,504	2,68,617	2,67,349	−1,268
Southern Circle ..	1,577,357	1,685,926	+1,08,569	2,42,786	2,48,817	+6,031
Total ...	2,939,856	3,041,921	+1,02,065	5,11,403	5,16,166	+4,763

The considerable increase in the Southern Circle, both in the number of animals grazed and in the amount realized, would seem to show that insufficient attention has been paid to the recent orders of the Administration regarding Provincial licenses and cattle in transit.

24. But little seems to have been done for the improvement of forest growth during the year.

Improvement fellings were carried out within certain limited areas in the Southern Circle, and some progress was made in both Circles in the cutting out of destructive climbers.

25. The expenditure on communications and buildings again increased from Rs. 15,616 to Rs. 17,681, but only a comparatively small portion of this total was spent on roads, while only 68 miles of new roads were made.

26. In the following table the financial results of the 15 months ending with the 30th June 1893, are compared with those of the financial year 1891-92 :—

	1891-92.	1892-93.
RECEIPTS.	Rs.	Rs.
Northern Circle	6,69,720	7,07,037
Southern Circle	6,90,179	7,41,471
Total ...	13,59,890	14,48,508
EXPENDITURE.		
Northern Circle	4,34,937	4,80,991
Southern Circle	3,68,979	4,98,599
Total ...	8,03,916	9,79,590
SURPLUS.		
Northern Circle	2,34,783	2,26,046
Southern Circle	3,21,200	2,42,872
Total ...	5,55,983	4,68,918

As the periods in the two successive years are of different length no real comparison is possible.

The following figures show the receipts of the two Circles for the financial years 1891-92 and 1892-93 :—

	1891-92.	1892-93.
	Rs.	Rs.
Northern Circle ...	6,69,720	6,19,873
Southern Circle ...	6,90,179	6,10,981

In both Circles receipts have diminished. In the Northern Circle this is ascribed to the effect of the new grazing rules and to the fact that no timber was removed or sold by departmental agency; while in the Southern Circle the reasons given are the general belief on the part of the public that there would be a further lowering of forest rates—a belief which led intending purchasers to hold back. Further frequent and excessive rain made many of the forest roads impassable and hindered the removal of forest produce; while finally the prevalence of cholera in the Chhattisgarh districts held back purchasers there.

Apart from these reasons it is possible that difficulties connected with the starting of the Provisional Working Scheme may have somewhat retarded the growth of forest income, but the Chief Commissioner confidently anticipates that the facilities for obtaining and removing produce which that scheme will ultimately give, will do more to improve the income from our forests than any administrative step that has been taken in recent years.

The figures under expenditure do not call for any detailed comment.

The system of levying forest revenue by the means of stamps has not worked altogether satisfactorily. It is possible that further experience may remove several of the difficulties which have arisen in connection with it, but the Chief Commissioner anticipates that, with the further elaboration of the Provisional Working Scheme, it may be possible to arrange more generally for the disposal of forest produce in bulk and thus, by the introduction of an improved system of *quasi*-commutation, to make the use of separate licenses much less necessary than it now is.

5.—*Mines and Quarries.*

27. The total output from the Warora Colliery during the year was 117,918 tons, as compared with 123,669 tons in the previous year, thus showing a decrease of 5,751 tons, or 4·65 per cent. This decrease is entirely due to the falling off in demands of the Great Indian Peninsula Railway Locomotive Department.

The total earnings during the year amounted to Rs. 5,51,787, and the expenditure to Rs. 5,06,502, or a return of 2·89 per cent. on a capital outlay of Rs. 15,64,344. This is a smaller return than in the previous year, and as explained above is attributable to the falling off in demands of the Great Indian Peninsula Railway Locomotive Department, and to an increase under expenses due chiefly to increase in Sinking Fund charges, and the cost for maintaining the shafts and workings, which is due to the large number of props used in broken workings as well as to the extensive masonry work done in connection with ventilation under ground.

The exploration of the field has been pushed on during the year, and coal struck at Bore-hole K^2, showing a depth of about 600 feet to the bottom of the seam at that place. Coal was struck at Bore-hole M^2, showing a depth of 250 feet to the bottom of the seam. Two other Bore-holes, L^2 and N^2, have been put down 155 and 442 feet respectively, both proving the absence of coal at the points in question.

A trial has been made with the Stanley heading-machine, proving that it could cut this coal with ease; but it being one of the older pattern to which reversing gear was not fitted, it has been decided not to retain it, but to procure a new one with the latest improvements.

During the year 2,545 tons of fire-clay had been raised for the manufacture of fire-bricks, roofing and flooring tiles.

28. The total output of the Umaria Colliery during the year was 94,846 tons, of which 72,579 tons were large coal and 22,267 tons small coal. The output of the year exceeded the demand; the balance of large coal in stock at the end of the year amounted to 8,354 tons. The increase in output is partly due to increase in labour, and partly to the commencing of the broken workings.

The connection between Nos. 3 and 4 pits was made in the month of May 1892, and the Colliery was then enabled to do away with some of the pumping at No. 3 Pit, allowing the water to run to No. 4 Pit, where it was pumped to the surface.

During the year an attempt was made to *put* through the *fault* which extends along the south-east side of the main dip, but though the drift was taken about 80 yards, no proper seam has been proved, though coal varying from 2 feet to 6 inches was found nearly all the way. The drift has been temporarily stopped until a boring can be put down; the whole ground is very much *faulted*, the *leaders* being constantly thrown up and down.

The chief event at No. 3 Pit was the starting of the "broken" (that is taking out the pillars). The operation has so far been successfully carried out, and has done much to increase the output and attract more labour, as the coal is easier to work than in the "whole" mine. At first naturally the men were very nervous, and it was a little difficult to get them to work in these "places," but now they have got accustomed to it and find the work easier; the difficulty is to get them into the "whole" places. It is satisfactory to find that so far the Colliery has been entirely free from accidents in the "broken" which has given the men confidence in following this more dangerous work.

29. The accidents during the year have been as follows:—

Fatal	1
Severe	15
Slight	14

From the reports received none of these were due to lax supervision, but in the majority of cases due to the carelessness of the men themselves.

6.—*Manufactures.*

30. The following statistics illustrate the working of the Cotton Mills established in the Provinces:—

Province.	Place of working.	Date of establishment.	Proprietor. Limited Company or Private.	Nominal Capital.	Nominal horse-power of Engines.	Number of looms.	Number of spindles.	Amount of cotton worked up during the year.	Description of goods.	Average daily number of hands employed in each Mill. Men.	Women.	Young persons.	Children.	Total.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
				Rs.				Cwt.						
Central Provinces,	Nagpur (The Empress Mills).	1st January 1877.	Joint Stock Company.	30,00,000	320	700	42,232	72,418	Twist and piece-goods.	1,982	381	* 397	,,,	2,740
	Nagpur (Swadeshi Mills)	1st January 1892.	Do.	10,00,000	800	,,,	16,508	15,623	Yarn.	454	267	65	,,,	786
	Hinganghat (Wardha District).	1st February 1881	Do.	3,50,000	40	,,,	18,248	19,705	Yarn.	491	149	,,,	158	798

	Jubbulpore (The Gokuldass Ballabhdas Mills).	1885	Do.	8,00,000	85	† 176	10,956	9,203	Yarn and coarse cloth.	354	103	,,,	92	549
			Total	56,50,000	1,245	876	87,944	5,847 Tons 11 Cwts.	,,,	3,756	900	442	250	5,348

* Boys and girls above 9 and below 14 years of age.
† Working 153 only.

The Pulgaon Mills commenced working in August last year, and no details of outturn are available. The number of looms is the same as last year, but the number of spindles, as well as the outturn, is slightly less. The average daily number of hands employed has risen from 5,069 to 5,348 : in the latter figure is, however, included 475 men employed at the Pulgaon Mills.

Cotton Presses in the Wardha District turned out only 18,980 bales, whereas the yield in the two previous years exceeded 50,000 bales. In the Nimar District the number of Ginning Factories at work during the year increased from 9 to 11, which are said to have cleaned 132,594 maunds of cotton against 76,972 maunds in the year previous.

7.—*Trade.*

Total traffic.

31. The total traffic of the year is compared below with that of the two years preceding :—

Description of trade.	Weight in Maunds.			Value in Rupees.		
	1890-91.	1891-92.	1892-93.	1890-91.	1891-92.	1892-93.
Imports ...	54,25,574	69,39,879	77,51,069	3,36,19,569	4,14,24,543	4,06,67,274
Exports ...	1,58,00,002	2,04,32,724	1,70,04,573	4,69,48,033	6,32,84,102	6,08,94,592
Total ...	2,12,25,576	2,73,72,603	2,47,55,642	8,05,67,602	10,47,08,645	10,15,61,866

During the three years imports have increased by 43 per cent. in weight, but by only 21 per cent. in value, while exports on the other hand have risen by 29 per cent. in value, though by only 8 per cent. in weight. This shows very clearly the profit which the people have made by the rise in the prices of raw produce which has of recent years accompanied the fall in exchange.

The following statistics exhibit the course of Provincial trade since registration was first started in 1883-84 :—

Period.	Imports.		Exports.	
	Maunds.	Rupees.	Maunds.	Rupees.
Average of five years, 1883-84 to 1887-88 -	*4,735,515*	*3,54,32,617*	*1,67,19,454*	*4,16,27,507*
1888-89 -	4,356,389	2,81,94,414	1,68,27,230	4,87,09,953
1889-90 -	4,276,838	2,72,10,981	1,23,08,997	3,99,70,868
1890-91 -	5,425,574	3,36,19,569	1,58,00,002	4,69,48,033
1891-92 -	6,939,879	4,14,24,543	2,04,32,724	6,32,84,102
1892-93 -	7,751,069	4,06,67,274	1,70,04,573	6,08,94,592
Average of five years, 1888-89 to 1892-93 -	*5,749,950*	*3,42,33,356*	*1,64,74,705*	*5,19,61,509*

The steady increase in imports is very striking. Exports on the other hand have shown nothing like the same expansion. Consisting as they do mainly of raw produce they have varied very greatly with fluctuations of season, and although they rose during 1891-92 to a figure exceeding by 30 per cent. the average for the five years, 1883-84 to 1887-88, the increase during the year under report amounted to only 8 per cent., and this increase is largely due, not to general development, but to the exploitation of a particular tract,—the Chhattisgarh country,—by railways. Up to the end of 1890-91 the annual exports of this tract amounted to about 20 lakhs maunds. The Bengal-Nagpur

Import traffic.

Railway was completed in that year, and during the two years following exports have risen to 54 and 41 lakhs maunds, respectively. That is to say, the increased facilities offered by this line have added about 20 lakhs maunds to the Provincial exports, and, if allowance be made for this, the export traffic shows but very little general expansion. Owing, however, to the continuous rise in agricultural prices, the value of the export trade has increased very largely: in other words, the Provinces have been able to pay for their imports by the sale of a steadily diminishing amount of their produce.

32. Comparative details are given below of the last three years' trade under each of the most important import headings :—

Commodities.	Quantity in Maunds.			Value in Rupees.		
	1890-91.	1891-92.	1892-93.	1890-91.	1891-92.	1892-93.
Coal and Coke	13,55,584	18,43,468	23,48,971	5,12,861	8,85,428	9,07,379
Cotton twist and yarn. European	28,813	66,209	45,675	17,24,785	35,42,508	24,21,554
Cotton twist and yarn. Indian	36,766	46,198	37,156	11,95,381	14,16,424	11,67,299
Cotton piece-goods. European	1,00,865	1,25,831	1,15,124	45,24,726	57,28,526	51,49,858
Cotton piece-goods. Indian	29,308	25,000	23,784	12,22,985	9,98,749	8,74,377
Metals. Iron	1,82,257	2,96,985	3,77,722	8,48,058	13,12,910	18,68,136
Metals. Other kinds	44,513	45,889	42,940	12,34,067	12,97,299	12,06,753
Kerosine oil	1,42,815	1,84,360	2,41,616	5,84,280	7,66,502	9,59,886
Provisions	1,86,805	2,70,318	2,38,325	28,31,778	36,80,312	33,58,275
Salt	13,37,935	15,05,386	14,82,643	45,78,409	51,35,806	51,54,766
Sugar. Refined	1,57,701	1,59,424	84,089	14,56,209	14,67,744	9,06,141
Sugar. Unrefined	4,65,062	4,68,469	5,60,727	23,77,634	23,15,539	22,12,459
Spices	61,890	1,01,942	94,229	8,61,785	11,78,750	10,84,576
Tobacco	1,08,902	69,363	1,10,345	11,02,546	7,44,161	11,68,690

The great expansion in the *Coal* traffic is due partly to increased demand on the Chhattisgarh section of the Bengal-Nagpur Railway, which was chiefly supplied from Bengal, and partly to a large increase in the exports northward from the Umaria Colliery, which for traffic registration purposes is treated as if in Foreign territory. The consignments from Umaria to stations in these Provinces were larger by 5 lakhs maunds than in the year preceding.

Cotton goods.—Imports fell off, but still remained considerably larger than in 1890-91.

There are now four cotton mills working in these Provinces—one at Jubbulpore, one at Hinganghat and two at Nagpur—and a mill will shortly be opened at Raj-Nandgaon. The import of Indian-made goods from Bombay may be expected to decline, but as yet it shows no signs of declining. On the other hand, European goods are more than holding their own. The effect of the Bengal-Nagpur Railway in extending consumption in Chhattisgarh is very striking.

Metals.—The import of iron, which had doubled during the past three years, has still further increased during the year under report, and this furnishes a satisfactory indication of advancing prosperity. Under "Other metals"—the principal of which are brass and copper—there was a small decline due to a fall in the demand of the Nagpur Division.

The large increase in the import of iron into the Jubbulpore, Nagpur and Chhattisgarh Divisions may be taken, in part, as an indication of the growth of manufacturing industry, further evidenced by the cotton mills which have been opened or are under construction.

Kerosine oil.—The growing trade in this article suffered no check, and the Provinces spent on its purchase 2 lakhs of rupees more than in the preceding year. There was a curious change in the direction of the traffic. Imports from Bombay declined from 90,778 to 55,199 maunds, while Bengal sent 1,74,875 maunds against 32,094 maunds in the year preceding.

Provisions.—The most important of the articles covered by this heading are dried fruits and nuts, in the purchase of which the Provinces could afford to spend 25 lakhs of rupees. Cocoanuts form the bulk of the traffic. The trade of the past ten years is analyzed below :—

Block into which imported.	Imports of dried fruits and nuts in Maunds.						
	Average of five years, 1883-84 to 1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	Average of five years, 1888-89 to 1892-93.
Jubbulpore	*30,516*	24,835	29,879	27,323	56,779	38,762	*35,516*
Nerbudda	*53,046*	61,825	41,758	40,287	57,550	46,595	*49,603*
Nimar	*17,426*	20,321	18,463	18,191	22,941	21,008	*20,185*
Nagpur	*38,638*	49,065	55,234	54,813	59,047	45,094	*52,651*
Chhattisgarh	*2,532*	2,892	5,209	4,594	15,651	24,541	*10,577*
Total	*1,42,158*	1,58,938	1,50,543	1,45,208	2,11,968	1,76,000	*1,68,532*

Import fell off during the year under report, but was still far in excess of the first five years' average.

Salt.—If the Chhattisgarh traffic be excluded, the import of salt has remained remarkably constant during the past ten years.

For the purpose of comparison the Jubbulpore and Nerbudda Divisions must be considered together as, until the opening of the Indian-Midland Railway to Saugor in 1890, Saugor received its salt *viâ* the Kareli station in the Nerbudda Division. Taking both these Divisions together there is only a difference of ½ per cent. between the averages of the two quinquennial periods. The imports into the Nagpur Division also show a small increase. The salt traffic of Chhattisgarh has expanded enormously, but the increased import by rail has to a great extent merely taken the place of salt which formerly reached the tract by road from the Madras Presidency. It is to be observed that the average price of salt has been higher by 4 annas a maund during the second than during the first five years' period, and that the rise in price has not been incompatible with a small increase in consumption. The increase has not, however, kept pace with the increase of population, which may be assumed to have been at the rate of about 1 per cent. per annum.

Sugar.—The import of refined sugar, that is to say, of sugar crystals drained of molasses, shows a remarkable decrease, resulting in the main from a decline in the consignments to the Nerbudda Division. But the import of unrefined or undrained sugar (principally *gurh*) increased in a more than corresponding proportion.

The imports of refined sugar fell short of the average of the five years 1883-84 to 1887-88 by 31,552 mauuds, while unrefined sugar was imported in excess of the average by 2,25,980 maunds. There was a great decline in the consignments of Mauritius sugar from Bombay, which fell from 1,23,991 maunds to 38,059 maunds. The consumption of imported *gurh* has increased by 50 per cent. in the Jubbulpore and Nerbudda Divisions (taken together) and

has more than trebled in Nagpur. The Chhattisgarh Division, which formerly received very little from the outside, imported 27,855 maunds. The local production of sugar is steadily declining before the competition of cheaper produce from the North-Western Provinces and Bihar. But the increase in import is much more than can be accounted for by this reason, and indicates in part wider consumption amongst the poorer classes.

The imports of *Spices* (chiefly betelnuts consigned from Bombay) declined, but still remained much in excess of their amount in 1890-91. The *Tobacco* trade recovered from the check it exhibited in 1891-92, and the imports reached the highest limit on record, representing a value of over 11½ lakhs of rupees.

Export traffic.

33. The following table gives comparative details of the amount and value of the leading exports during the last three years :—

Commodities.	Weight in Maunds.			Value in Rupees.		
	1890-91.	1891-92.	1892-93.	1890-91.	1891-92.	1892-93.
Coal and Coke	21,39,566	19,62,927	17,73,057	5,34,891	4,90,732	4,43,264
Cotton, Raw	2,76,703	1,41,539	2,58,758	41,50,545	19,28,469	45,28,265
Wheat	61,40,135	86,92,771	56,61,433	1,38,15,304	2,39,05,120	1,69,84,299
Rice, husked	9,53,929	27,47,352	30,45,759	30,97,019	92,72,313	1,06,60,156
Gram and Pulse	11,44,158	15,84,909	12,97,059	22,88,316	35,66,045	30,56,765
Juar and Bajra	2,79,676	2,05,367	2,75,174	5,24,392	4,36,404	5,84,745
Linseed	14,52,021	20,83,814	14,58,548	50,82,073	79,14,302	67,45,784
Til-seed	9,94,984	5,11,486	6,43,168	38,55,563	20,45,944	31,35,444
Myrobalans	2,44,938	4,09,939	3,62,711	7,04,197	11,27,352	9,97,455
Stick lac	38,954	81,178	23,520	7,01,172	13,80,026	3,64,560
Ghi	21,899	26,842	24,111	5,96,749	7,28,089	8,19,774
Hides	40,326	31,078	64,774	9,21,257	7,46,609	14,03,984

The year under report was characterized by a large falling off in the exports of wheat and linseed, which were, however, but little below those of 1890-91. The cotton trade was satisfactory, and the growing export of rice more than maintained itself.

Cotton.—The first point for notice with regard to the cotton trade is that, contrary to common opinion, the export of cotton from these Provinces has been growing largely. The average for the period 1888-89 to 1892-93 is nearly double that for the period 1883-84 to 1887-88, the increase representing a value of about 16 lakhs of rupees. Export from the Jubbulpore Division has fallen off, and that from the Nerbudda Division has increased but little. Both tracts are unsuited by heaviness of rainfall for successful cotton-growing. The exports from the Nimar District and from the Nagpur country (which include the main cotton-growing tracts in the Provinces) have more than doubled, and though it is a fact that the harvests have been better during the second than during the first five years' period, the statistics disprove the idea that the extended growth of short-stapled cotton is lessening the demand for Central Provinces produce.

The exports of the year under report were larger by 82 per cent. than those of the year preceding, when the crop was an abnormally bad one.

Wheat.—The fluctuations to which the wheat traffic is liable are shown very clearly by the following figures:—

Period.	Exports of wheat in maunds from—					
	Jubbulpore block.	Nerbudda block	Nimar block.	Nagpur block.	Chhattisgarh block.	Total.
Average of five years, 1883-84 to 1887-88	*10,43,091*	*47,95,720*	*1,57,904*	*11,54,688*	*8,38,010*	*79,89,413*
1888-89	17,48,782	54,96,921	1,50,104	16,69,845	9,50,685	1,00,16,337
1889-90	9,15,071	22,88,455	68,479	9,05,243	4,35,744	46,12,992
1890-91	12,44,106	30,86,328	88,937	7,13,781	10,06,983	61,40,135
1891-92	24,72,913	35,56,562	65,220	10,29,920	15,68,156	86,92,771
1892-93	21,03,297	25,06,968	2,00,766	3,83,597	4,66,805	56,61,433
Average of five years, 1888-89 to 1892-93	*16,96,834*	*33,87,047*	*1,14,701*	*9,40,477*	*8,85,675*	*7,024,734*

The surplus available for export during the year under report depended upon the harvest of the year 1891. The crop of 1891 was an unfortunate one. There had been a deficiency of rain at sowing time, the winter rains held off, and the hot-weather-set in extraordinarily early. The outturn was estimated at only four-fifths of the normal. Export consequently declined very greatly and fell behind that of the year preceding by over 30 lakhs maunds. But trade in the preceding years had been larger than usual, and if the average be taken as the standard of comparison the deficiency is very much less than this. Taking the Provinces as a whole, the traffic was rather larger than harvest prospects would have led one to anticipate. But certain portions of them lost very heavily. The failure of the cold weather rain was felt most severely in the Nagpur aud Chhattisgarh Districts. The exports from the Nagpur country amounted to barely a third of the average, and those from Chhattisgarh barely reached a half.

The extension of the Bengal-Nagpur Railway to Calcutta has not as yet diverted any part of the Chhattisgarh trade from Bombay, although the Chhattisgarh Districts lie well on the Calcutta side of the midway point. Calcutta received altogether only 1,05,229 maunds, most of which were consigned from Jubbulpore. From Chhattisgarh it received only 3,138 maunds out of a total of 4,66,805 maunds exported.

Rice.—Previously to the opening of the Bengal-Nagpur Railway in 1890, the export of rice was not a feature of much importance inthe Provincial traffic. It is now second only to the wheat trade, and during the year under report represented a value of over a crore of rupees. The facilities offered by railway communication have enabled the two Chhattisgarh districts of Raipur and Bilaspur to increase their exports by some 20 lakhs maunds, that is to say, to add some 70 lakhs of rupees to their former income. This increase must in the main have been gained by improvement in cultivation. There has been no such extension of area as would account for it, and, as pointed out in last year's report, with so large an area as those districts contain and a rather slovenly style of farming, a small addition to the labour or care of cultivation can add very largely to the gross produce.

Half of the rice exported was consigned to Bombay. Calcutta received about a sixth. The remaining third was pretty evenly divided between the Berars, places in the Bombay Presidency, Bengal and the North-Western Provinces. The amount exported by the Bilaspur-Katni line to Northern India amounted to less than 2 lakhs of maunds, and the effect of this branch on the traffic has been less than was at one time anticipated.

Gram and Pulse.—Export, though less than that of the year preceding, was well up to the average, and amounted in value to 30½ lakhs of rupees. Two-thirds of the trade was engrossed by Bombay. The export of *millets* (chiefly juari) is comparatively unimportant and is indeed generally out-balanced by import from the Berars into the Nagpur country. This was the case during the year under report when nearly 6 lakhs maunds were imported against 2¾ lakhs maunds exported.

Linseed.—The exports of linseed, like those of wheat, fell much below the level of the year preceding, but were not so far short of the average.

The export from the important linseed-growing tracts in the Nagpur country was much below normal. Owing to the failure of the rain in the late autumn a large area of land was left unsown. The export from Chhattisgarh, though up to average, was much less than was expected. Here also the season was unfortunate. With linseed, as with wheat, Bombay absorbed almost the whole of the exports, receiving 11¾ lakhs maunds out of the 14½ lakhs maunds exported.

Til-seed.—The export of til was well up to average and suffered less than was at one time feared from the peculiarities of the 1892 monsoon season.

The trade exhibits substantial growth in the Nerbudda and Chhattisgarh Divisions; in the former owing in great part to increase in til cultivation on the lands lately thrown open to settlement in the Charwa tract, and in the latter owing to facilities for transport which have benefited an important til-growing area at the western extremity of the Sambalpur District. Of the total amount of til exported 96 per cent. was consigned to Bombay.

Internal trade.—The *internal trade* of the year, that is to say, the trade which ran between the different Provincial "blocks" or divisions amounted in value to over a crore of rupees, and was considerably in excess of that of the year preceding. The most important items are cotton goods of local manufacture and grain, the value of which was respectively 22¾ and 33 lakhs rupees. The salient feature in the cotton goods trade is the export of Nagpur Mill made goods to Chhattisgarh, which accounts for 18¾ lakhs rupees. In the preceding year the value was only 16¾ lakhs rupees, and this is another indication of the advance which the railway is bringing about in the prosperity of the Chhattisgarh Districts. The traffic in grain mainly consisted in the export of rice from Chhattisgarh, which reached the high value of 19¾ lakhs rupees and more than covered the purchases of cotton goods. The Nagpur Division was the largest customer, but nearly 2½ lakhs maunds were consigned to the Northern districts over the Bilaspur-Katni Branch line. This amount, though considerable, was less than the consignments of the preceding year.

General.—The trade of the year was marked by no very striking features. Imports continued to increase, and the rise in agricultural prices has enabled the Provinces to pay for their increasing imports without adding materially to the amount of raw material exported, and still retain a balance of over two crores of rupees to their credit. Five years ago the balance was on an average considerably less than one crore, and although the valuation of the traffic is not sufficiently precise to render possible an exact statement of the amount received by the people in silver as payment for their produce, the statistics may safely be taken to show that this amount has doubled within recent years.

8.—*Public Works.*

34. The total expenditure incurred on public works by the Public Works Department during the year is as follows :—

Branch of Service.	Expenditure.		Remarks.
	1892-93.	1891-92.	
	Rs.	Rs.	
Imperial Military, Ordinary ...	3,873	3,337	
Do. Civil Buildings ...	21,100	42,805	
Provincial	17,46,205	19,91,985	
Incorporated Local Funds ...	1,29,256	1,53,467	
Contributions	4,78,041	2,39,047	
Warora Colliery (Capital) ...	*—60,665*	*—27,271*	
Do. do. (Revenue) ...	5,06,742	4,31,489	
Umaria Colliery (Capital) ...	28,070	84,000	
Do. do. (Revenue) ..	3,31,794	2,58,000	
Guaranteed Railways (Land) ...	728	2	
Total ...	31,85,144	31,76,861	

The small excess of outlay over that in the previous year calls for no special remarks.

The Telegraph Office at Jharsuguda on the Bengal-Nagpur Railway, which was commenced last year, was completed at a cost of Rs. 14,128.

The total expenditure on Original Works, Civil Buildings, was Rs. 5,51,535, against Rs. 4,93,076 in the previous year.

The following were the chief works in progress or completed during the year :

Administration.—The only work of any magnitude carried out during the year under this head was additions and alterations to the Rehli Tahsili, Saugor District, in the Jubbulpore Division.

Law and Justice.—The new Law Courts were commenced in May 1892 and by the end of the year two-thirds of the work had been finished. The building will accommodate the Judicial Commissioner's Court, the Commissioner's and Sessions Judge's Courts, and the offices of the Commissioner of Settlements and Agriculture, the Conservator of Forests, Southern Circle, and the Divisional Inspector of Education.

It was planned and designed originally by Mr. H. Irwin, C. I. E. Under instructions he allowed only 25 per cent. of the whole area to be double-storied; on subsequent consideration the Chief Commissioner decided that the whole building should be two-storied; the designs were modified locally.

In connection with the District Court considerable work was done.

The necessary designs for improving the accommodation having been approved of, work was started in November, and the Court-house was re-occupied in the month of May following.

The other works of any importance under this head were the completion of the Circuit-houses at Raipur and Bhandara, and the additions and alterations to the Seoni, Khandwa, Hoshangabad, Raipur and Bilaspur District Courts.

Forest Department.—The Forest office at Bhandara was completed during the year.

Central Jails.—Following the policy of past years the Administration spent large sums of money on the Nagpur Central Jail, with the intention of rendering it better fitted for the incarceration of prisoners and increasing the accommodation, thus removing the pressure long felt in District Jails. In connection with the latter was the completion of a commodious double-storied hospital with appurtenances, and the conversion of the old hospital into a male ward; also the commencement of a new female ward containing under-trial convicts and hospital barracks. The class of accommodation provided in the Jail has been much improved by the substitution of Allahabad pattern tiling for the old and imperfect wheel-tiled roofs.

Electrical communication between prisoners in solitary confinement and warders was introduced; a banquette was constructed over the inner gateway for musketry fire in case of outbreak. The drainage and water supply of the jail were also attended to. Ambajheri water is laid on for drinking purposes, and well water is used for bathing purposes.

In the Jubbulpore Central Jail the construction of the hospital was the important work of the year, and good progress was made. An estimate for constructing a workshed and walling the lower octagon was sanctioned. The workshed was completed and the walling had been built up to the level of the plinth, when orders were received to put in iron railings instead of a wall, to allow of free ventilation. This was also completed. The subsoil drainage of the jail site was taken in hand by the Superintendent of the Jail, and the work was about three-fourths completed.

One block of warders' quarters was entirely completed, and the superstructure of another block was finished.

District Jails.—In the Wardha and Chanda Jails some minor works of improvement were carried out during the year. The work remaining to be done in additions and alterations in the jail gateway at Mandla was completed and good progress made on the construction of warders' quarters. In the Saugor Jail, owing to the ground around the jail being higher than the interior, the jail was damp and unhealthy during the rains. This has been rectified by

a catch-water drain being constructed round the elevated sides of the jail enclosure wall to carry off the drainage water. Quarters for warders in the Damoh Jail were completed during the year, and a subsoil drain was constructed in front of the jail to keep the building free from damp. Certain minor additions and alterations were taken in hand and completed in connection with the Betul, Hoshangabad and Khandwa Jails.

There is a project under consideration for additions and alterations to the Narsinghpur Jail.

Police.—Progress was made with the important work of providing better accommodation for the police force attached to station-houses or in reserve at head-quarter lines in the various districts, and stationed in the large city of Nagpur.

The re-roofing of police lines at Wardha was put in hand and an estimate prepared for the Chanda lines. The construction of quarters at the Wardha and Nachangaon station-houses was also taken in hand. Ambajheri water was laid on to the Nagpur lines. Rupees 10,000 were spent on quarters for the Nagpur City Police out of a sanctioned estimate of Rs. 29,296. The station-house at Brahmapuri in the Chanda District was completed.

A second class police station-house at Kesli in the Saugor District was completed, and the quarter-guard in the police lines at Jubbulpore remodelled. The construction of quarters for police at Barodia in the Saugor District and Patan in the Jubbulpore District were taken in hand during the year by the District Superintendent of Police, funds being provided by the Public Works Department. Considerable progress was made on constructing quarters for the City Police at Jubbulpore.

Constructing quarters for the police at Sohagpur and Seoni-Malwa in the Hoshangabad District, under the supervision of the District Superintendent of Police, were well in hand.

In the Narsinghpur District the police station-houses at Chichli and Tendukhera were completed.

The old station-house at Burhanpur was remodelled, and quarters for police at Chegaon and Shahpur in the Nimar District and Burman in the Narsinghpur District were completed. At Sambalpur quarters for a Hospital Assistant were put in hand and completed.

Repairs—Civil Buildings.—The outlay during the year on this head amounted to Rs. 69,872, that of the four preceding years having averaged Rs. 55,616.

Original Works—Communications.—The outlay during the year was Rs. 3,16,797 against Rs. 5,71,791 in the preceding year. Under this head the principal feature is the establishing of the Plateau Roads Division, having its head-quarters at Chhindwara. It was formed in November 1892 for the purpose of carrying out extensions and improvements in the system of roads, generally running east and west, connecting the sudder stations of Betul, Chhindwara, Seoni, Balaghat and Mandla. For some time past the connection of the stations of Betul and Chhindwara by a good road has been under

consideration. The nearest existing route is by Umret and Bordai—a district class III-A road. The line, besides being indirect, is not susceptible of improvement except at great expense, other lines more or less in the same direction were reconnoitered and roughly estimated. But it was considered better to follow a line further south, which, whilst utilizing the existing class II road from Betul to Multai, 25 miles, would afford a more direct communication with the Berars *viâ* the Bikhat Ghat from Multai, which had already been projected; and the Chief Commissioner and Chief Engineer, Central Provinces, having in February last travelled across from Multai to Chhindwara, a nearly direct line between these two places was finally decided upon. The ground, though undulating, is not unfavorable at either end, but in the middle a forest tract, some 18 miles in width, occupied by the valley of the Kanhan river, is broken and hilly, comprising two difficult ghats some 400 feet in height. The length of the line will be about 51 miles. The survey is now in progress and will be completed this season. The project will include a submerged bridge or a causeway for the Kanhan river. The existing class II road from Seoni to Chhindwara, length 43 miles, constructed in 1888, lies mostly in black cotton soil, and although moorummed, this is often of so bad a quality that traffic is hardly possible during the rains. It crosses moreover two considerable rivers—the Waingunga and the Pench. The former of these is crossed by a causeway with vents, and is generally passable. The latter, some 300 feet wide, with banks 50 feet deep and subject to floods, which occasionally overtop them, is a serious obstacle, being often impassable by ferry. This road is to be raised to class I, which entails metalling throughout, the bridging of the two abovenamed rivers and a few minor bridges and culverts. An estimate for collection of metal was sanctioned last year, and during the year ten miles were laid and consolidated.

The survey of the Seoni-Balaghat Road as a class III-B road was completed early in the year, but as it has been decided to raise this to a class I road the survey has to be gone over again to ease gradients for the higher class, determine water-way for bridges and to re-align some places where the bridges now to be constructed, and other considerations arising out of the different class now adopted, require it. The ground generally is easy, but there are three miles of hilly broken country between the 27th and 38th miles. Estimates for the 1st section have been sanctioned, and work is in progress.

In the Nagpur Division the construction of a bridge on the Southern Road, class I, over the Bhandak nalla in the Chanda District, which is one of the chief obstructions to monsoon traffic between Chanda and the railway terminus at Warora, was sanctioned and fair progress made.

The Chanda-Mul road, class II, length 28 miles. The first section of this road, 13 miles, is metalled, and, for the present, sufficiently bridged. The second section, 14 miles, was completed in respect of earthwork and moorum soiling; dry stone drains were taken in hand, and the section will be eventually bridged, for which estimates have been received. When the work on this important road has been completed it will be fitted for the large traffic it carries. It was connected in the year under report with the Mul-Umrer line by means of a short branch through the town of Mul.

The high-level bridge over the Suktawa river in the Hoshangabad Division was finally completed and opened for traffic before the rains.

The important work of a submerged bridge over the Machna river at Shahpur, on the Itarsi-Badnur section of the North-West Road, was started during the year.

The Arang-Khariar road, which forms part of the through route from Raipur to Bhowanipatna, the capital of the Feudatory State of Kalahandi, the opening out of which State it is designed to help, was practically completed.

During the year estimates for new roads aggregating 148 miles in length were sanctioned.

35. The table below gives the number of miles of road maintained in 1891-92 and 1892-93 :—

Class.	Mileage in 1891-92.	Mileage in 1892-93.	Average cost of maintenance per mile.
			Rs.
Metalled roads	1,208½	1,220½	275
Unmetalled do.	6,386¾	6,434	44
Total ...	7,595¼	7,654½	...

The expenditure on maintenance and repairs of roads amounted to Rs. 4,06,016 as compared with Rs. 4,11,350 in the previous year.

36. The Balramdass Water-Works were practically completed, and they were opened by the Chief Commissioner on the 10th December 1892.

37. An estimate amounting to Rs. 1,29,365 was sanctioned late in the year for the construction of a water-supply scheme for the town of Raj-Nandgaon. The ceremony of laying the foundation stone was performed by the Chief Commissioner on the 7th December 1892.

The scheme is a pumping one and provides a supply of eight gallons per head for a prospective population of 12,000 people.

The population of the town according to the last Census of 1891 is 8,844 souls.

The supply of 96,000 gallons a day is to be pumped from infiltration galleries constructed under the north bank of the Seonath river, 2½ miles from Raj-Nandgaon, into a service reservoir constructed near the town, from which it is to be distributed by cast-iron pipes and water fountains.

38. The water-works of Nagpur, Jubbulpore and Hinganghat were efficiently maintained by the Public Works Department during the year.

9.—*Industries.*

39. The first report under the Factories Act was submitted in July 1893. It showed that the total number of factories which were at work in the Central Provinces during the year 1892 was sixteen. Five of these were cotton mills, eight were cotton-cleaning factories, one was a cotton press and two were railway workshops. Since the report was written, a flour mill and pottery works and the Umaria Colliery workshop in the Jubbulpore District have been brought on the register of factories, and notices were issued to the occupiers of certain factories in the Nagpur District to show cause why their factories should not also be brought on the register. Under the arrangements made with the Government of Bombay, the Inspector of Factories for that Presidency inspected four out of the five cotton mills, and copies of his inspection notes were submitted for the Chief Commissioner's information. In addition to this all Civil Surgeons have been appointed Inspectors of Factories for their several districts. The inspection reports show that the provisions of the Factories Act and the rules framed by the Chief Commissioner thereunder were in the main duly observed by occupiers of factories. Employment in the large mills is said to be eagerly sought after, and District Officers have recorded that operatives employed in factories earn better wages than they can command outside.

40. Of 56 accidents reported, only 1 was fatal and 11 were serious. There was one prosecution, under Section 15 (7) (1) of the Act, of an occupier of a cotton-cleaning factory in the Nimar District, for failing to report an accident, and a fine of Rs. 10 was imposed.

10.—*State Railways.*

41. There are no State Railways under the control of the Administration since the transfer of the Wardha Coal State Railway to the Great Indian Peninsula Company in 1891.

CHAPTER V.—REVENUE AND FINANCE.

Accounts.

1. The following is an abstract of the accounts of the Administration of the Central Provinces for the year 1892-93 :—

Heads.	Receipts.	Expenditure.
	Rs.	Rs.
Cash Balance on 1st April 1892	73,45,489	...
Revenue and Service Heads.		
Imperial Revenue and Expenditure	69,43,755	9,60,467
Provincial Revenue and Expenditure	77,24,998	61,61,464
Local Revenue and Expenditure	10,85,854	10,38,868
Debt and Remittance Heads.		
Excluded Local Funds, Revenue and Expenditure ...	1,94,692	1,97,430
Civil Deposits	37,31,694	39,91,595
Municipal Funds	13,14,184	14,99,243
Miscellaneous Debt Accounts	38,57,767	38,88,963
Accounts with Native States	12,000	...
Departmental Accounts	1,029	1,630
Provincial Advance and Loan Account... ...	1,58,476	3,09,806
Cash Remittances and Adjustments	75,80,702	75,75,920
Remittances by Bills—Local and Foreign ...	58,29,464	56,99,297
Foreign Remittances	45,16,000	78,23,140
Bills and Miscellaneous Accounts with other Governments...	15,77,461	57,07,319
Post Office Department	48,91,449	4,39,597
Telegraph Department	28,558	1,25,682
Accounts Current between Civil and Marine ...	...	...
Military Department	1,18,121	29,46,804
Public Works Department (including State Railways) ..	49,05,077	73,96,922
Remittance Account between England and India ...	522	...
Cash Balance on 31st March 1893 ...	...	60,53,145
Total ...	6,18,17,292	6,18,17,292

The cash balance of the Province has fallen from Rs. 73,45,489 to Rs. 60,53,145, chiefly owing to larger amounts drawn in the way of Supply Bills by the Accountants-General, Bengal and Bombay. The drawings increased from Rs. 25,99,851 in 1891-92 to Rs. 46,72,485 in 1892-93.

The expenditure of Rs. 3,09,806 under Provincial Advance and Loan Account was made up of a loan of Rs. 1,00,000 to the Raipur Municipality for the completion of the Balramdass Water-works at Raipur; of Rs. 26,656 advanced under the Land Improvement Act, and of Rs. 1,83,150 advanced under the Agriculturists' Loans Act. The amount originally sanctioned by the Government of India for expenditure under this head was Rs. 3,05,000, which was subsequently supplemented by additional grants aggregating Rs. 50,000.

There was a net decrease of about Rs. 4,50,000 under "Foreign Remittances." As already explained, the figures under this head do not for the most part represent actual remittances, but are on account of transfers temporarily made from and to the local treasury balances, to and from currency chests, in response to opposite payments at Calcutta and Bombay.

Total Revenue and Expenditure.

2. The total revenue of the year amounted to Rs. 1,58,00,703, and the total expenditure to Rs. 1,00,36,260.

These figures show a surplus of revenue of Rs. 57,64,443, or about 2¼ lakhs less than that for 1891-92. The distribution of the revenue and expenditure under the three heads of Imperial, Provincial and Local (including the Provincial receipts and expenditure of the Public Works Department) is as follows:—

	Revenue. Rs.	Expenditure. Rs.
Imperial ...	69,43,755	9,60,467
Provincial ...	77,71,094	79,07,669
Local ...	10,85,854	11,68,124
Total ...	1,58,00,703	1,00,36,260

Provincial Contract.

3. The new Provincial Contract came into force at the commencement of this year, and is fixed for five years (1st April 1892 to the 31st March 1897).

4. The following statement exhibits the actual figures of the Provincial revenue and expenditure of this Administration for the two years 1891-92 and 1892-93 :—

Revenue and Receipts.	Actuals.		Expenditure.	Actuals.	
	1891-92.	1892-93.		1891-92.	1892-93.
	Rs.	Rs.		Rs.	Rs.
CIVIL HEADS.					
I.—Land Revenue(¼ Provincial for 1892-93 only) ...	70,15,073	17,37,594	1.—Refunds, Land Revenue (wholly Provincial for 1891-92) ...	6,591	...
IV.—Stamps (¾ Provincial) ...	12,71,269	12,67,731	Refunds, Land Revenue (wholly Provincial for 1891-92) Divided Heads ...	10,774	15,243
V.—Excise (¼ Provincial)	6,93,547	6,89,021	2.—Assignments ...	3,013	4,485
VI.—Provincial Rates ...	2,12,437	2,23,077	3.—Land Revenue (whole Provincial) ...	11,77,702	12,02,427
VIII.—Assessed Taxes (½ Provincial) ...	2,21,869	2,45,307	6.—Stamps (¾ Provincial) ...	30,083	45,873

CONTRIBUTIONS.			Total Expenditure ...	79,44,014	79,07,669
From Local Revenue ...	31,646	56,409	CONTRIBUTIONS.		
			To Local Revenue ...	1,00,027	1,42,166
GRAND TOTAL ...	82,19,437	78,27,503	GRAND TOTAL ...	80,44,041	80,49,835

Contract deductions from Land Revenue.

5. Under the terms of the last Provincial Contract, the Land Revenue was wholly Provincial, and a contribution to Imperial revenues, fixed for each year of the contract, was deducted from the gross amount of Land Revenue, and credited in the accounts as the Imperial share of Land Revenue. Under the new contract, on the other hand, only one-fourth of the Land Revenue is Provincial, and a lump assignment of Rs. 22,05,000 is made from the Imperial to the credit of the Provincial Revenues. The inter-Provincial adjustments which used to be made through the Land Revenue head under the last Provincial Contract are (except in very special circumstances) discontinued under the new contract; and the lump assignment of Rs. 22,05,000 includes a sum of Rs. 19,000, representing the probable net loss to Provincial revenues resulting from the discontinuance of these adjustments.

6. It will be seen from the statement given above that the Provincial revenue for 1892-93 including the one-fourth share of Land Revenue and the assignment of Rs. 22,05,000 from the Imperial Revenues (but excluding the contributions from Local) amounts to Rs. 77,71,094; while the total Provincial expenditure (excluding contributions to Local) is Rs. 79,07,669.

7. On comparing the actuals for the two years 1891-92 and 1892-93, it will be seen that after adding the lump assignment of Rs. 22,05,000 to Land Revenue and including the contributions to and from Local revenues, the actual Provincial revenue and expenditure of the year 1892-93 amounted to Rs. 78,27,503 and Rs. 80,49,835 respectively, as against Rs. 82,19,437 and Rs. 80,44,041 for the year 1891-92. The decrease in revenue occurs chiefly under the heads "I—Land Revenue," "IX—Forest," "XVI B—Law and Justice—Jails," "XIX—Education" and "XXIII—Stationery and Printing;" while there has been an increase under "VI—Provincial Rates," "VIII—Assessed Taxes" and "XXV—Miscellaneous." On the other hand the expenditure has decreased chiefly under "16 B—Law and Justice—Jails," "22—Education" and "Civil Works in charge of Public Works Officers;" while it has increased under "3—Land Revenue," "6—Stamps," "11—Forest," "18—General Administration," "19 A—Law and Justice—Courts of Law," "20—Police," "24—Medical," "25—Political" and "29—Superannuation." The final outcome of the year's transactions is that the Provincial balance has decreased from Rs. 20,54,339 on the 1st April 1892 to Rs. 18,32,006 on the 31st March 1893. The Provincial balance on the 31st March 1893 was therefore upwards of ten lakhs in excess of the minimum fixed by the Government of India.

A detailed review of the Provincial revenue and expenditure of the past year is given in the following paragraphs.

8. It has been shown that the total revenue of the year excluding contributions from Local Funds, amounted to Rs. 1,58,00,703. The distribution

under the several Major heads of the Government accounts is shown in the following table:—

Major heads of Revenue.	Imperial Revenue.	Provincial Revenue.	Incorporated Local Fund Revenue.	Total.
	Rs.	Rs.	Rs.	Rs.
I.—Land Revenue ...	30,07,783	39,42,594	...	69,50,377
II.—Opium	2,27,979	...	...	2,27,979
III.—Salt	...	...	...	...
IV.—Stamps	4,22,577	12,67,731	...	16,90,308
V.—Excise	20,67,063	6,89,021	...	27,56,084
VI.—Provincial Rates ...	...	2,23,077	7,71,895	9,94,972
VIII.—Assessed Taxes	2,45,307	2,45,307	...	4,90,614
IX.—Forest	6,15,428	6,15,427	...	12,30,855
X.—Registration	56,170	56,169	...	1,12,339
XI.—Tributes	2,61,400	...	...	2,61,400
XII.—Interest	36	42,317	323	42,676
XIII.—Post Office	...	8,289	...	8,289
XVI A.—Law and Justice—Courts of Law.	...	1,40,361	...	1,40,361
XVI B.—Law and Justice—Jails ...	...	2,66,069	...	2,66,069
XVII.—Police	...	32,734	1,74,974	2,07,708
XIX.—Education	....	69,137	10,450	79,587
XX.—Medical	...	2,925	7,215	10,140
XXI.—Scientific and other Minor Departments	...	10,861	6,396	17,257
XXII.—Receipts in aid of Superannuation, &c.	38,164	12,055	8	50,227
XXIII.—Stationery and Printing ...	407	29,658	...	30,065
XXV.—Miscellaneous ...	1,441	58,826	35,916	96,183
XXXII.—Civil Works ...	...	12,440	78,677	91,117
Total Civil ..	69,43,755	77,24,998	10,85,854	1,57,54,607
Public Works Department—Revenue—Buildings and Roads ...	...	46,096	...	46,096
GRAND TOTAL ...	69,43,755	77,71,094	10,85,854	1,58,00,703

I.—Land Revenue.

9. The total Land Revenue collected during the year 1892-93 amounted to Rs. 69,50,377 as compared with Rs. 70,15,073 realized in 1891-92. The decrease was due to fluctuations in the collection of ordinary revenue; also to the fact that there were special credits in 1891-92 on account of the capitalized value of remission for land acquired for the Indian Midland Railway paid by transfer credit to this head in the Saugor district, and on account of fines realized from the Makrai State in the Hoshangabad district.

The division between Imperial and Provincial is given below :—

		1891-92. Rs.	1892-93. Rs.
Imperial share	...	27,70,984	30,07,783
Provincial share	...	42,44,089	39,42,594
Total	...	70,15,073	69,50,377

II.—Opium.

10. As already explained the revenue under this head represents the cost price of opium sold at the Treasuries for the Excise Department. The amount credited in 1892-93 was Rs. 2,27,979 as compared with Rs. 2,34,914 in 1891-92. The decrease in sales occurred chiefly in the Nagpur and Wardha districts, and is attributed to the raising of the retail price, owing to there being a smaller number of contractors, and consequently less competition. There was also a smaller quantity of opium purchased by the Pandaria and Patna States.

IV.—Stamps.

11. The total revenue under this head amounted to Rs. 16,90,308 in 1892-93 as compared with Rs. 16,95,025 in 1891-92. The details are given below :—

		1891-92. Rs.	1892-93. Rs.
Sale of General Stamps	...	4,67,421	4,91,593
Do. Court-fee Stamps	...	12,06,789	11,81,948
Do. Plain paper	...	12,086	11,829
Duty on impressing documents	...	1,863	941
Fines and Penalties	...	6,783	3,854
Miscellaneous	...	83	143
Total	...	16,95,025	16,90,308

12. The sales of Court-fee Stamps declined from Rs. 12,06,789 to Rs. 11,81,948. The income under this head during 1891-92 was, owing to the Courts having been open throughout the year, unusually large, and the decline in 1892-93, which still leaves the total considerably larger than in 1890-91 or in either of the three preceding years, was precisely what might have been anticipated.

In 1891-92 there were unusually large receipts in the Raipur district under the heads "Duty on impressing documents" and "Fines and Penalties." This accounts for the decline of receipts under these heads in 1892-93.

V.—Excise.

13. The total Excise Revenue in 1892-93 was Rs. 27,56,084 as against Rs. 27,74,189 in 1891-92, showing a decrease of Rs. 18,105. The details are given below :—

		1891-92. Rs.	1892-93. Rs.
License and distillery fees and duties for the sale of liquors and drugs	...	22,98,792	21,65,424
Duty on Ganja	...	...	1,25,099
Gain on sale-proceeds of Excise opium	...	4,59,793	4,44,577
Fines, confiscations and miscellaneous	...	15,604	20,984
Total	...	27,74,189	27,56,084

The head "Duty on ganja" is now a separate minor head, whereas it was a detailed head under "License and distillery fees, &c.," in 1891-92. Taking therefore the total of the receipts under the heads "License and distillery fees, &c.," and "Duty on ganja" together, and comparing the total with the amount credited under "License and distillery fees" in 1891-92, the receipts show a decrease which is attributable to the sums paid in advance in 1891-92 being larger than in 1892-93 in the districts of Wardha, Bhandara, Mandla, Seoni, Betul and Raipur. The causes of the decrease under "Gain on sale-proceeds of Excise opium" have been explained under "II—Opium." Receipts under the head "Fees, fines and forfeitures" fluctuate considerably. The increase is chiefly in the Nagpur and Balaghat districts.

VI.—Provincial Rates.

14. The following is a statement of the revenue credited under this head for the two years 1891-92 and 1892-93 :—

			1891-92. Rs.	1892-93. Rs.
Provincial—				
Rates levied for management of Wards' Estates		...	25,566	33,571
Additional Rates on Land	...	...	1,46,439	1,48,147
Education cess	...	...	2,748	3,511
District Post cess	...	...	37,684	37,848
	Total Provincial	...	2,12,437	2,23,077
Local—				
Road cess (District Fund)	...	...	1,67,444	1,67,403
Education cess (do.)	...	...	1,47,991	1,47,315
Patwari Fund receipts	...	...	4,72,126	4,57,177
	Total Local	...	7,87,561	7,71,895
	GRAND TOTAL	...	9,99,998	9,94,972

Provincial rates show a slight increase on the whole, while under "Local" there is a decrease. But the difference under each detailed head is in most cases too insignificant to call for explanation. Patwari Fund receipts show a decrease of nearly Rs. 15,000, which occurred in the Chhattisgarh Division.

VII.—Assessed Taxes.

15. The total receipts under this head for the two years 1891-92 and 1892-93 were as follows :—

	1891-92. Rs.	1892-93. Rs.
Income Tax ...	3,63,827	4,04,077
License Tax (Pandhri) ...	79,912	86,537
Total ...	4,43,739	4,90,614

There has been an increase, as will be observed, both under Income Tax and License Tax (Pandhri), which was due to the triennial revision of assessments.

IX.—Forest.

16. The revenue under this head shows a decrease of Rs. 1,29,045 in comparison with that of the previous year. The details are given below :—

	1891-92. Rs.	1892-93. Rs.
Timber and other produce removed from the forests by Government agency ...	76,501	57,732
Timber and other produce removed from the forests by consumers and purchasers ...	12,35,687	11,29,563
Confiscated drift and waif wood ...	4,256	3,563
Revenue from forests not managed by Government ...	687	...
Miscellaneous	42,769	39,997
Total ...	13,59,900	12,30,855

The decrease occurs principally under the heads "Timber and other produce removed from the forests by Government agency" and "Timber and other produce removed from the forests by consumers and purchasers," and was apparently due chiefly to unseasonable weather during the carting season, which prevented people from resorting to the forests.

X.—Registration.

17. The following are the figures under this head for the two years :—

	1891-92. Rs.	1892-93. Rs.
Fees for registering documents ...	67,370	68,085
Fees for copies of registered documents ...	28,348	29,753
Miscellaneous ...	15,441	14,501
Total ...	1,11,159	1,12,339

The revenue shows a slight increase of Rs. 1,180.

XI.—Tributes from Native States.

18. The following are the figures under this head for the two years :—

	1891-92. Rs.	1892-93. Rs.
Tributes from various petty States ...	2,25,478	2,43,900
Fees on succession to Native States	5,000	17,500
Total ...	2,30,478	2,61,400

The increase in 1892-93 is due to advance collections; also to increase in the tribute payable by the Sakti and Bastar States. The total annual demand at present is Rs. 2,51,000.

XII.—Interest.

19. The details of the amounts credited under this head for the two years are as follows :—

	1891-92. Rs.	1892-93. Rs.
Imperial—		
Miscellaneous	....	36
Provincial—		
Interest on loans to Municipalities, &c.	16,142	19,634
Interest on loans to landholders and other notabilities ...	2,577	2,183
Interest on Advances to Cultivators—		
Under the Land Improvement Act ...	6,025	6,692
Under the Agriculturists' Loans Act....	9,919	9,391
Interest on Government Securities	3,642	4,407
Miscellaneous ...	5	10
Local—		
Interest on Government Securities	387	323
Total ...	38,697	42,676

The increase in revenue is Rs. 3,979 and occurs chiefly under the head "Interest on Loans to Municipalities, &c." owing to the recovery of interest for a half year on the loan of Rs. 1,00,000 granted to the Nagpur Municipality in the closing month of the year 1891-92, and for a full year on the balance of the loan of Rs. 1,05,000 to the Burhanpur Municipality.

XIII.—Post Office.

20. The figures for the two years are as follows :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
District Post collections—		
Contributions from Feudatory States on account of pay of District Post Establishment	8,536	7,595
Contributions from Feudatory States for pensions of District Post Establishment. ...	709	635
Miscellaneous	200	59
Total ...	9,445	8,289

The receipts show a decrease of Rs. 1,156 owing chiefly to the discontinuance of contributions by most of the non-Feudatory States for postal lines running through those States.

XVI-A.—Law and Justice—(Courts of Law).

21. The details of the amounts credited under this head for the two years are as follows:—

		1891-92. Rs.	1892-93. Rs.
Provincial—			
Sale proceeds of unclaimed and escheated property	...	15,626	17,178
Court-fees realised in cash	...	12,592	12,359
General fees, fines and forfeitures	...	1,00,901	1,05,652
Pleadership examination fees	...	656	60
Miscellaneous fees and fines	...	2,814	2,343
Miscellaneous	...	3,721	2,769
	Total ...	1,36,310	1,40,361

The revenue under this head is a fluctuating one. The increase of Rs. 4,051 occurs chiefly under the head "General Fees and Fines."

XVI-B.—Law and Justice—(Jails).

22. The figures for the two years are as follows:—

		1891-92. Rs.	1892-93. Rs.
Provincial—			
Jail Manufactures	...	1,77,767	1,77,218
School of Industry	...	1,05,220	82,511
Miscellaneous	...	3,981	6,340
	Total ...	2,86,968	2,66,069

The revenue in 1892-93 shows a decrease of Rs. 20,899 in comparison with that of 1891-92. The decrease is mainly due to the abolition of the School of Industry with effect from the 1st January 1893.

The following table contrasts the receipts and expenditure on account of Jail manufactures for the past five years:—

Head.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
Jail Manufactures—	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts ...	2,02,470	2,48,399	2,13,273	1,77,767	1,77,218
Expenditure ...	1,86,865	2,24,775	2,15,736	2,41,881	2,20,174
Total ...	+15,605	+23,624	—2,463	—64,114	—42,956
School of Industry Manufactures—					
Receipts ...	99,481	97,461	94,317	1,05,220	82,511
Expenditure ...	78,442	82,420	68,036	38,307	26,938
Total ...	+21,039	+15,041	+26,281	+66,913	+55,573

XVII.—Police.

23. The following statement shows the revenue credited under this head in the two years :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Police supplied to Municipal, Cantonment and Town Funds ...	6,435	6,345
Police supplied to Public Departments, private persons, &c. ...	13,446	18,531
Superannuation receipts ...	3,837	3,041
Miscellaneous ...	5,131	4,817
Local (District Funds)—		
Cattle trespass fines ...	1,39,057	1,42,446
Sale proceeds of unclaimed cattle ...	31,122	32,164
Miscellaneous ...	211	364
Total ...	1,99,239	2,07,708

The increase in the Provincial revenue in 1892-93 is due to the special contributions for Police supplied to certain zamindaries in the Bilaspur and Sambalpur districts. These police will form part of the regular police in future, and the contributions will be realized as part of the takolis paid by the zamindars.

The increase under "Local" is presumably due to the impounding of more cattle.

XIX.—Education.

24. The following statement gives the details of the Educational receipts for the two years :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Fees, Government Colleges—General ...	2,653	2,671
Do. do. do. —Professional ...	1,351	2,744
Do. do. Schools—General ...	30,672	16,081
Contributions	58,763	18,709
Government Book Depôt receipts ...	34,172	22,432
Miscellaneous	6,401	5,500
Local—		
School fees	918	853
Contributions	5,001	7,991
Miscellaneous	667	1,606
Total ...	1,40,598	79,587

The decrease under the heads "Fees, Government Schools—General" and "Contributions" is caused by the transfer of a number of schools situated within municipal limits to the control of the Municipal Committees, and the decrease

under "Government Book Depôt receipts" by the discontinuance of the sale of books at the Nagpur Government Book Depôt, owing to its transfer to private agency in 1893-94.

XX.—Medical.

25. The following are the details of receipts under this head for the two years:—

	1891-92.	1892-93.
	Rs.	Rs.
Provincial—		
Lunatic Asylum receipts	3,367	1,716
Contributions	673	1,098
Miscellaneous	222	111
Local (District Funds)—		
Contributions	9,155	6,866
Miscellaneous	774	349
Total ...	14,191	10,140

The decline under "Lunatic Asylum Receipts" is attributable chiefly to the closing of the Farm attached to the Nagpur Asylum. There is also a falling off in the contributions (Local) by private individuals towards the cost of the Dispensaries.

XXI.—Scientific and other Minor Departments.

26. The following is a statement of the figures under this head for the two years:—

	1891-92.	1892-93.
	Rs.	Rs.
Provincial—		
Botanical and other public garden receipts.	8,361	8,142
Receipts on account of experimental cultivation ...	2,005	2,123
Veterinary receipts.	51	151
Miscellaneous	1,981	445
Local—		
Botanical and other public garden receipts.	2,134	2,374
Receipts on account of Public Exhibitions and Fairs	4,309	4,010
Miscellaneous.	343	12
Total ...	19,184	17,257

The actuals of 1892-93 show a decrease of Rs. 1,927 in comparison with those of 1891-92, owing chiefly to the fact that there was a special credit of Rs. 1,498 in the latter year under the head "Miscellaneous" (Provincial) on account of an advance drawn some years ago for the purpose of facilitating the preparation of improved agricultural implements.

XXII.—Receipts in aid of Superannuation.

27. The following are the figures under this head for the two years :—

	1891-92. Rs.	1892-93. Rs.
Imperial—		
Subscriptions under the Indian Civil Service Family Pension Regulations ...	6,047	8,920
Subscriptions to the Bengal Civil Fund ...	14,426	17,332
Do. to the Bombay Civil Fund ...	215	1,320
Contributions for pensions and gratuities ...	13,448	10,592
Provincial—		
Contributions for pensions and gratuities ...	9,043	12,048
Miscellaneous ...	43	7
Local—		
Contributions for pensions and gratuities ...	...	8
Total ...	43,222	50,227

The increase under the head "Subscriptions under the Indian Civil Service Family Pension Regulations" is due to the increase in the number of junior Covenanted civilians, and that under "Subscriptions to the Bengal Civil Fund" to a greater number of senior officers having been on duty. The decrease under "Contributions for Pensions and Gratuities" (Imperial) is caused by the diminishing number of Public Works officers employed on the Bengal-Nagpur Railway; and the increase under the same head on the Provincial side, by the larger number of officers on foreign service.

XXIII.—Stationery and Printing.

28. The receipts under this head compare as follows :—

	1891-92. Rs.	1892-93. Rs.
Imperial—		
Stationery receipts	152	67
Sale of Gazettes and other publications ...	...	...
Other Press receipts	277	340
Provincial—		
Stationery receipts	38	...
Sale of Gazettes and other publications ...	1,289	2,203
Other Press receipts	38,218	27,455
Total ...	39,974	30,065

There is a decrease in revenue for the year to the extent of Rs. 9,909, which is due to the large amount of printing work executed during 1891-92 for the Forest Department by the Nagpur Central Jail Press.

XXV.—Miscellaneous.

29. The following is a statement of the revenue under this head :—

	1891-92. Rs.	1892-93. Rs.
Imperial—		
Premium	744	513
Other items (unclaimed bills, &c.) ...	264	928
Provincial—		
Unclaimed deposits	10,895	22,348
Sale of lands and houses ...	7,375	2,563
Contributions	...	7,410
Rents (Dâk Bungalow fees) ...	7,845	6,932
Miscellaneous	17,828	19,575
Local (District Funds)—		
Contributions	2,292	2,127
Rents	35,747	22,340
Rates and Taxes	11,073	10,894
Other items (sale of old stores, &c.) ...	701	555
Total ...	94,764	96,183

The increase under "Unclaimed Deposits" is due to the lapse to Government of certain Civil Courts deposits aggregating Rs. 16,846. The sum of Rs. 7,410 shown against the head "Contributions" (Provincial) represents contributions towards the cost of the office of the Political Agent, Chhattisgarh Feudatories, which has lately been provincialized. The increase under "Miscellaneous" (Provincial) is due to the larger realizations from Municipalities owing to the introduction of the new scheme of local audit. The decrease under "Rents" (Local) is due to the credit to Municipal Funds, with effect from the 1st April 1892, of four-fifths of the rents of Nazul lands situated within municipal limits.

XXXII.—Civil Works.

30. The following are the figures for the two years :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Works in charge of Civil Officers ...	13,780	12,440
Local—		
Works in charge of Civil Officers ...	82,699	78,677
Total ...	96,479	91,117

The decrease in the Provincial revenue is due to a smaller amount of Ferry receipts in the Narsinghpur district. The decrease under "Local" is due to the Ferries having been sold for about Rs. 2,000 less than in the year 1891-92, and also to the fact that there were special credits in that year on account of the construction of a Town Hall at Wardha.

Public Works Department Revenue.

31. The amount of revenue credited in the Public Works Department as communicated to the Comptroller by the Examiner of Public Works

Accounts, Central Provinces, was Rs. 46,096 as compared with Rs. 52,142 in 1891-92. The falling off in the receipts was due to the abolition of Tolls on the Kanhan River bridge, with effect from the 1st April 1892.

B.—EXPENDITURE.

32. The following statement shows the distribution of the expenditure of the year under the several Major heads in the Government accounts:—

Major heads of Expenditure.	Imperial expenditure.	Provincial expenditure.	Incorporated Local Funds expenditure.	Total.
	Rs.	Rs.	Rs.	Rs.
1. Refunds and Drawbacks ...	9,293	15,243	449	24,985
2. Assignments and Compensations ...	57,516	4,485	...	62,001
3. Land Revenue	...	12,02,427	4,34,054	16,36,481
6. Stamps	15,291	45,873	...	61,164
7. Excise	31,730	10,576	...	42,306
10. Assessed Taxes	259	260	...	519
11. Forest	4,25,506	4,25,507	...	8,51,013
12. Registration	19,943	19,943	...	39,886
13. Interest on ordinary debt	...	34,517	...	34,517
14. Interest on other obligations	959	...	...	959
15. Post Office	...	62,240	...	62,240
18. General Administration	73,551	4,17,666	27,835	5,19,052
19-A. Law and Justice—Courts of Law ...	...	8,12,912	...	8,12,912
19-B. Law and Justice—Jails	...	5,44,724	...	5,44,724
20. Police	...	13,90,446	58,621	14,49,067
22. Education	...	3,34,717	2,47,839	5,82,556
23. Ecclesiastical	48,479	...	...	48,479
24. Medical	...	2,96,863	60,606	3,57,469
25. Political	...	28,460	...	28,460
26. Scientific and other Minor Departments ...	11,743	49,659	8,341	69,743
27. Territorial and Political Pensions ...	2,62,167	...	...	2,62,167
29. Superannuation	...	2,42,827	1,400	2,44,227
30. Stationery and Printing	...	1,80,252	2,148	1,82,400
32. Miscellaneous	4,030	39,255	6,542	49,827
33. Famine Relief	...	...	416	416
45. Civil Works	...	2,612	1,90,617	1,93,229
Total ...	9,60,467	61,61,464	10,38,868	81,60,799
Public Works Department—Buildings and Roads ...	...	17,46,205	1,29,256	18,75,461
GRAND TOTAL ...	9,60,467	79,07,669	11,68,124	1,00,36,260

33. Expenditure under the following heads continues to be wholly Imperial:—

14.—Interest on other obligations.

23.—Ecclesiastical.

27.—Territorial and Political Pensions.

Details of the expenditure under these heads are not given in the following review of the Provincial expenditure of the year.

1.—*Refunds and Drawbacks.*

34. The following are the details of the charges under this head for the two years :—

Heads.	1891-92.				1892-93.			
	Imperial.	Provincial.	Local.	Total.	Imperial.	Provincial.	Local.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Land Revenue ...	...	6,591	...	6,591	2,025	675	...	2,700
Stamps ...	2,802	8,407	...	11,209	3,877	11,632	...	15,509
Excise ...	2,741	913	...	3,654	722	240	...	962
Provincial Rates ...	...	92	72	164	...	26	449	475
Assessed Taxes ...	947	947	...	1,894	2,362	2,362	...	4,724
Forest ...	392	391	...	783	232	232	...	464
Registration ...	24	24	...	48	75	76	...	151
Total ...	6,906	17,365	72	24,343	9,293	15,243	449	24,985

Refunds of Land Revenue were debited wholly to Provincial in 1891-92. They are now, under the new Provincial Contract, debited in the proportion of three-fourths to Imperial and one-fourth to Provincial.

The actuals of the two years in the aggregate are nearly the same. In 1891-92 there were special debits of Rs. 4,564 and Rs. 3,150 under Refunds of Land Revenue and of Excise respectively, and the increase under Refunds of Stamps in 1892-93 is covered by the decrease under the heads mentioned above.

2.—*Assignments and Compensations.*

35. The following are the figures for the two years :—

	1891-92.	1892-93.
	Rs.	Rs.
Imperial—		
Pensions in lieu of resumed lands ...	5,737	5,524
Compensations	23,693	23,783
Miscellaneous	29,633	28,209
Provincial—		
Malikana allowances to excluded proprietors	3,013	4,485
Total ...	62,076	62,001

The actuals of the two years closely approximate with each other; the decrease under "Miscellaneous" (Imperial) being due to some of the pensioners not having drawn the full amount of their pensions during the year, and the increase under "Malikana allowances to excluded proprietors" to the increased rates of allowances sanctioned to some of the proprietors.

3.—*Land Revenue.*

36. The details of the expenditure under this head for the two years are given below :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Charges of District Administration—		
Deputy Commissioners, &c., and their establishments	6,78,019	6,85,398
Do. do. Contingencies ...	57,262	58,905
Management of Government Estates ...	231	4,580
Charges on account of Land Revenue collections	2,153	706
Land Settlement ...	3,95,143	4,07,514
Land Records and Agriculture ...	44,894	45,324
Local—		
Charges of District Administration—		
Patwari Fund	4,12,757	4,34,054
Total ...	15,90,459	16,36,481

The increase under "Deputy Commissioners and their Establishments" is due to the reorganization of the Central Provinces Commission, which was in force throughout the year 1892-93, whereas it had effect only from the latter part of the year 1891-92.

The head "Management of Government Estates" also shows an increase owing to the expenditure for repairing bunds and tanks in the ryotwari villages of the Chanda district, to the commission paid to Patels for the collection of land revenue in the Charwa ryotwari villages, to the expenditure on account of settlement of those villages, and also to the payment of railway fare and subsistence allowance to the 25 families of the North-Western Provinces cultivators who emigrated to colonize the Charwa tract.

Under "Land Settlement" the expenditure varies year by year according to the requirements of the Settlement Department.

The increase of expenditure under "Patwari Fund" (Local) is caused by debits to Patwari Fund of the cost of supervision and control in the Raipur, Bilaspur and Sambalpur districts.

The following details are given of the expenditure under the head "Charges of District Administration" :—

	1891-92. Rs.	1892-93. Rs.
Commissioner on special duty	...	...
Deputy Commissioners	1,56,775	1,62,332
Assistant do.	33,361	28,109
Statutory Civilians	5,358	1,832
Extra-Assistant Commissioners	89,557	1,02,058
Personal allowances	638	1,164
Establishment (including Tahsildars) ...	3,92,330	3,89,903
Total ...	6,78,019	6,85,398

6.—*Stamps.*

37. The details of the expenditure under this head for the two years are as follows:—

	1891-92.	1892-93.
	Rs.	Rs.
Discount on sales	14,914	16,087
Miscellaneous charges	3,540	3,485
Value of stamp paper supplied from the Central Stores.	21,661	41,592
Total ...	40,115	61,164

The increase is chiefly in the value of stamp paper supplied from the Central Stores, and is partly due to the cost of plain paper supplied for use with Court-fee stamps having been debited to this head in 1892-93, under the new Provincial Contract, instead of to "30—Stationery and Printing," as in 1891-92.

7.—*Excise.*

38. The expenditure under this head is shown in the following statement:—

	1891-92.	1892-93.
	Rs.	Rs.
Central Office Establishment ...	12,322	...
District Establishment ...	23,442	25,157
Construction and repairs ...	2,339	3,268
Conveyance of opium ...	580	538
Rewards	7,221	8,357
Miscellaneous	6,825	4,986
Total ...	52,729	42,306

There is a total decrease of Rs. 10,423 in the expenditure for 1892-93. This is chiefly due to the transfer of *two-thirds* of the charges of the combined offices of Superintendent of Stamps, Commissioner of Excise and Inspector-General of Registration to the Major head "18—General Administration," under the new Provincial Contract.

10.—*Assessed Taxes.*

39. The total amount expended was only Rs. 519 as compared with Rs. 632 in the previous year. As already explained the expenditure represents the payment made to the Bengal-Nagpur Railway Company on account of commission at 3 per cent. on the gross amount of collections of Income Tax made by the Company from its employés.

11.—*Forest.*

40. The expenditure under this head amounted to Rs. 8,51,013 (approximately) in 1892-93 as compared with Rs. 8,03,133 in 1891-92. It is not possible at present to give the exact figures for the year under review as the Comptroller-General has not yet communicated the Forest Survey charges for the year to the Comptroller, Central Provinces.

The expenditure is classified as follows:—

	1891-92. Rs.	1892-93. Rs.
Conservancy and Works	3,76,896	3,94,853
Establishment	4,26,237	1,56,160
Total ...	8,03,133	8,51,013

12.—*Registration.*

41. The expenditure for the two years is classified as follows:—

	1891-92. Rs.	1892-93. Rs.
Superintendence	12,057	7,247
District charges	30,926	32,640
Total ...	42,983	39,887

The decrease under "Superintendence" is due to the transfer of *one-third* of the charges of the combined offices of Superintendent of Stamps, Commissioner of Excise and Inspector-General of Registration (excluding purely Registration expenditure) to the Major head "18—General Administration" from the 1st April 1892, under the new Provincial Contract. The increase under "District charges" is due to the appointment of six more salaried Sub-Registrars.

13.—*Interest.*

42. The figures for the two years are exhibited in the following statement:—

	1891-92. Rs.	1892-93. Rs.
Imperial—		
Interest on Government of India Stock Notes ...	28	...
Commission on Stock Notes	...	...
Provincial—		
Interest on Provincial Advance and Loan account...	28,205	34,517
Total ...	28,233	34,517

The interest on Provincial Advance and Loan Account is (under Government of India, Finance Department, No. 13, dated the 1st January 1889) calculated at the rate of 4 per cent. per annum on the mean between the opening and closing outstanding balances of the loans made to municipalities, agriculturists, &c., and the amount is credited to Imperial. The increase in the debit under this head in 1892-93 is due to the advances made to municipalities and agriculturists exceeding the recoveries on account of previous loans.

15.—*Post Office.*

43. The expenditure under this head is on account of the District Post Establishment, and is wholly Provincial. The particulars for the two years are given below:—

	1891-92. Rs.	1892-93. Rs.
District Post Establishment and Contingencies...	60,116	62,240
Refunds	428	...
Total ...	60,544	62,240

The increase in 1892-93 was due to the payment of a subsidy to the Tonga contractors from the 19th February to the 4th November 1892, at Rs. 221-8-0 per mensem, for the Mail Establishment between Piparia and Pachmarhi, and also to an increase in the number of runners.

18.—*General Administration.*

44. This head includes Imperial, Provincial and Local expenditure; the total charges and their distribution are as follows for the two years:—

	1891-92. Rs.	1892-93. Rs.
Imperial—		
Legislative Council	...	...
Civil Office of Account and Audit	60,592	73,551
Currency Department	51	...
	60,643	73,551
Provincial—		
Salary of Chief Commissioner ...	54,000	54,000
Tour expenses of do. ...	11,613	15,129
Civil Secretariat	97,675	1,16,694
Commissioners	1,92,464	1,99,137
Civil Office of Account and Audit ...	12,898	7,719
Inspector-General of Stamps, Registration & Excise	...	24,987
	3,68,650	4,17,666
Local—		
General Establishment of Local Funds ...	27,554	27,835
Total ...	4,56,847	5,19,052

The increase under "Civil Office of Account and Audit" (Imperial) is due to the entire expenditure of the Comptroller's Office, Central Provinces, having been debited to Imperial from the 1st April 1892 under the new Provincial Contract, whereas a portion of it was debited to Provincial in 1891-92.

The excess expenditure under "Tour expenses" is due to the purchase of tents and to increase in travelling allowances.

The increase under "Civil Secretariat" is due to the appointment of a Revenue Secretary and to the consequent entertainment of establishment. In 1891-92 the expenditure on this account was incurred only for a portion of the year, the office of the Revenue Secretary having been created in the latter part of the year. The increase under "Commissioners" is due to the privilege leave allowances of one of the Commissioners and also to purchase of tents.

The sum of Rs. 7,719 under "Civil Office of Account and Audit" (Provincial) represents the expenditure on Local Audit which was brought into effect from May 1892. The amount shown against the same head for 1891-92 is the portion of the expenditure of the Comptroller's Office, Central Provinces, debited to Provincial under the old Provincial Contract.

The amount of Rs. 24,987 under the head "Inspector-General of Stamps, Registration and Excise" represents the entire expenditure of the combined offices of Superintendent of Stamps, Commissioner of Excise, Inspector-

General of Registration (except purely Registration expenditure) debited to this head under the new Provincial Contract. Under the old Provincial Contract this expenditure was debited in the proportion of two-thirds to Excise and one-third to Registration.

The following are the details of the expenditure under the heads "Chief Commissioner," "Civil Secretariat" and "Commissioners":—

	1891-92. Rs.	1892-93. Rs.
Details under Chief Commissioner—		
Salary of Chief Commissioner	48,000	48,000
Sumptuary allowance	6,000	6,000
Total ...	54,000	54,000
Secretariat—		
Salary of Secretary	26,976	24,161
Do. of Under Secretary	9,433	8,615
Do. of Assistant Secretary	9,848	9,237
Do. of Revenue Secretary	3,958	15,360
Establishment	36,560	42,932
Contingencies	10,900	16,389
Total ...	97,675	1,16,694
Commissioners—		
Salaries of Commissioners	1,19,575	1,22,810
Travelling allowance of officers	12,218	12,064
Establishment	52,336	52,564
Contingencies	8,335	11,699
Total ...	1,92,464	1,99,137

19-*A.*—*Law and Justice—Courts of Law.*

45. The expenditure under this head is wholly Provincial. The details for the two years are as follows:—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Law Officers	3,655	3,000
Judicial Commissioners	65,001	59,205
Civil and Sessions Courts	39,236	89,637
Courts of Small Causes	34,097	32,222
Criminal Courts	6,01,375	6,12,590
Pleadership Examination charges	28	4
Refunds	10,760	16,254
Total ...	7,54,152	8,12,912

The decrease in 1892-93 under the head "Judicial Commissioner" is due to the permanent Judicial Commissioner having drawn privilege leave allowances in 1891-92.

The increase under "Civil and Sessions Courts" is due to expenditure for the whole year on account of two Additional Sessions Judges and Judicial

Assistants and of their establishments and Contingencies. These appointments were created in the latter part of the year 1891-92, and consequently only a portion of the expenditure was incurred in that year. The increase is also due to the privilege leave allowances drawn by Mr. Goodridge, one of the Judicial Assistants for three months, and to the creation of an additional appointment of Munsiff for the Seoni District.

The decrease under "Small Cause Courts" is due to the salaries of the Officiating Judges having been less than the pay of the appointments.

The increase under "Criminal Courts" was chiefly caused by the reorganization of the Central Provinces Commission having been in force throughout the year 1892-93, whereas it had effect only from the latter part of the year 1891-92.

The expenditure under "Refunds" fluctuates considerably.

19-*B.—Law and Justice—Jails.*

46. The following statement shows the expenditure on Jails and Jail manufactures for the two years:—

	1891-92. Rs.	1892-93. Rs.
Central Jails	1,53,991	1,67,461
District Jails	1,00,410	1,00,884
Lock-ups	7,886	8,173
School of Industry	19,628	16,414
Reformatory School	1,695	4,680
Manufactory charges in Jails	2,41,881	2,20,174
Do. do. in School of Industry ...	38,307	26,938
Total ...	5,63,798	5,44,724

The increase under "Central Jails" is due to the appointment of a separate Superintendent for the Central Jail at Jubbulpore during the latter part of the year; to the pay drawn by the Superintendent, Central Jail, Raipur, for the whole year; to the privilege leave allowances of the Superintendent of the Central Jail, Nagpur; to the increase in the average cost of dieting prisoners (especially at Nagpur) owing to the rise in the prices of food-grains, and also to the increase in expenditure on clothing.

The decrease under "School of Industry" is caused by the abolition of that institution in January 1893.

The Reformatory School was established about the middle of the year 1891-92, and consequently the expenditure in that year was less than that in 1892-93.

20.—*Police.*

47. The expenditure on Police including the District Fund charges for the maintenance of Cattle Pounds was Rs. 14,49,067 in 1892-93 against Rs. 13,60,222 in 1891-92.

The total is distributed as follows for the two years :—

	1891-92. Rs.	1892-93. Rs.
Imperial—		
Superintendence	2,074	...
Railway Police	815	...
Total Imperial ...	2,889	...
Provincial—		
Superintendence	40,023	52,026
District Executive Force	12,39,764	13,15,076
Special Police	...	2,821
Railway Police	18,123	20,421
Cattle Pounds	81	86
Refunds	9	16
Total Provincial ...	12,98,000	13,90,446
Local—		
Cattle Pounds	58,724	58,204
Refunds	609	417
Total Local ...	59,333	58,621
TOTAL POLICE ...	13,60,222	14,49,067

Under the new Provincial Contract which had effect from the 1st April 1892 the portion of the expenditure of the Special Branch of the office of the Inspector-General of Police and three-tenths charges of the Bhopal Railway Police were debited to Provincial in 1892-93. Hence there was no expenditure under Imperial in that year.

The increase under "Superintendence" (Provincial) is due to the transfer of the portion of the expenditure of the Special Branch of the Inspector-General's Office from Imperial to Provincial, and also to the privilege leave allowances drawn by Mr. L. K. Laurie, the permanent Inspector-General, for three months.

The large increase in expenditure under "District Executive Force" is caused by the reorganization of the Police Force having been brought into effect from the 1st May 1892.

The increase under "Railway Police" is due to the adjustment of the pay of certain chowkidars of the Bengal-Nagpur Railway Police for 1891-92 having been made in 1892-93.

Further details of the expenditure under the head "District Executive Force" are given in the subjoined statement :—

	1891-92. Rs.	1892-93. Rs.
District Superintendents and Assistants ...	1,62,999	1,62,825
Inspectors, Sub-Inspectors and Chief Constables	1,88,401	1,65,236
Head Constables and Constables ...	6,48,388	7,50,543
Serjeants	2,785	2,811
Mounted Head Constables and Constables ...	26,200	25,141
Drill Instructors	3,199	1,571
Carried over ...	10,31,972	11,08,127

	1891-92. Rs.	1892-93. Rs.
Brought forward ...	10,31,972	11,08,127
Excise Police	...	...
Arms and Accoutrements	11,608	17,662
Clothing	51,238	46,566
Petty Construction	23,958	19,857
Petty Repairs	16,322	16,242
Travelling allowance of Officers	18,238	17,177
Do. do. of Establishment ...	12,391	13,090
Other charges	74,037	76,355
Total ...	12,39,764	13,15,076

22.—*Education.*

48. The following statement shows the distribution between Provincial Services and District Funds of the expenditure on Education for the two years :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Direction	27,405	26,800
Inspection	80,416	72,950
Government Colleges—General	20,461	18,134
Do. do. —Professional ...	...	...
Do. Schools—General	1,42,151	93,642
Do. do. —Special	40,245	37,285
Grants-in-aid	48,806	52,043
Payments by result	17,614	5,799
Scholarships	19,418	16,387
Government Book Depôt	34,673	7,977
Other heads including building grants and miscellaneous	4,185	3,700
Total Provincial ...	4,35,374	3,34,717
Local—		
Inspection	60	186
Government Schools	1,78,959	1,91,674
Grants-in-aid	13,519	45,196
Scholarships	11,036	10,783
Miscellaneous	228	...
Total Local ...	2,03,802	2,47,839
TOTAL EDUCATION ...	6,39,176	5,82,556

The decrease under "Direction" is on account of travelling allowance less drawn by the Inspector-General.

The decrease under "Inspection" is attributable to Mr. G. Thompson, the Senior Inspector of Schools, having been on furlough, and to the salary of the Officiating Inspector being less than the pay of the appointment.

The decrease under "Government Schools—General" is due to the transfer of a number of schools situated within municipal limits to the control of the Municipalities, and the decrease under "Government Colleges—General" to the retirement from the service of the Principal drawing the maximum pay of the

appointment and to the salary of the Officiating Principal being less than the pay drawn by the Principal in 1891-92. The decrease under "Government Schools—Special" is caused by the abolition of the appointments of Carpenter Master attached to certain schools, and the increase under "Grants-in-aid" by certain grants for buildings, and by the grant towards the purchase of furniture for the Hislop College, Nagpur.

The decrease in expenditure under "Payments by results" is due to the combined system of schools (specially in the Raipur district) having been transferred to the control of the District Councils, and that under "Scholarships" to the payment of scholarships in the Agricultural Normal School from District Funds.

The lower expenditure under Government Book Depôt is due to a smaller purchase of books during the year 1892-93, owing to the expected abolition of the Depôt in 1893-94.

The increase under "Government Schools" (Local) was chiefly caused by the construction and repairs of certain Upper and Lower Primary Schools by District Councils, and that under "Grants-in-aid" (Local) to the additional expenditure of Rs. 25,000 sanctioned for Primary education, for which contribution is made from Provincial revenues, and to the payments made on account of the combined system of schools from District Funds instead of from Provincial revenues as in 1891-92.

24.—*Medical.*

49. The following statement shows the distribution between Provincial Services and District Funds of the expenditure under this head for the two years :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Medical Establishment	1,82,728	1,76,864
Hospitals and Dispensaries	57,069	57,495
Sanitation and Vaccination	9,433	45,967
Lunatic Asylums	16,001	16,498
Other heads	123	39
Total Provincial ...	2,65,354	2,96,863
Local—		
Medical Establishment	1,015	1,083
Sanitation and Vaccination	35,701	36,616
Hospitals and Dispensaries	11,700	19,489
Grants for medical purposes	1,734	3,392
Other heads	...	26
Total Local ...	50,150	60,606
TOTAL MEDICAL ...	3,15,504	3,57,469

The decrease under "Medical Establishment" (Provincial) was caused by the salary of the Officiating Deputy-Surgeon-General being less than the pay of the appointment and to the lower average rank of District Medical Officers actually on duty during the year.

The large increase in expenditure under "Sanitation and Vaccination" (Provincial) is due to the expenditure incurred in connection with the scheme for

village sanitation set forth in the Chief Commissioner's Resolution No. 7421-670, dated the 23rd October 1891. Under the scheme the expenditure in 1892-93 was to be met by a grant of Rs. 20,000 from Provincial revenues in addition to the payment of salaries and travelling allowances of Sanitary Inspectors, the District Councils contributing Rs. 30,000. The total expenditure on this account amounted to Rs. 36,785, and the contributions made by District Councils to Rs. 25,700.

The Local expenditure on Hospitals and Dispensaries shows an increase chiefly owing to the construction of certain Dispensaries in the Raipur and Bilaspur districts.

25.—*Political.*

50. The expenditure under this head is entirely Provincial. The charges for 1892-93 amounted to Rs. 28,460 against Rs. 15,327 in 1891-92.

The Political Agent for the Chhattisgarh Feudatories was for a part of the year a Deputy Commissioner of the second class instead of the third class. The establishment of the Political Agent has been made a Provincial charge, and a corresponding contribution is recovered from the States and credited to Provincial revenues under "XXV—Miscellaneous." Hence the increase under this head.

26.—*Scientific and other Minor Departments.*

51. The following are the charges under this head for the two years:—

	1891-92. Rs.	1892-93. Rs.
Imperial—		
Census	75,715	9,822
Veterinary charges	...	1,921
Total Imperial ...	75,715	11,743
Provincial—		
Agricultural experiments	1,326	1,782
Experimental cultivation	11,460	9,048
Botanical and other Public Gardens ...	20,427	20,950
Provincial Museums	1,556	1,547
Provincial statistics	9,899	11,192
Public Exhibitions and Fairs	...	...
Veterinary charges	3,668	4,343
Other heads	752	797
Total Provincial ...	49,088	49,659
Local—		
Botanical and other Public Gardens ...	696	842
Public Exhibitions and Fairs	4,969	6,947
Other heads	484	551
Total Local ...	6,149	8,340
TOTAL ...	1,30,952	69,742

The decrease under "Census" is due to the completion of the Census work. The sum of Rs. 1,921 against the head "Veterinary charges" (Imperial) represents a moiety of the salary drawn by the Civil Veterinary Superintendent of

the Central Provinces and Berars. A moiety of this expenditure is debited to the Berars agreeably to Government of India, Department of Finance and Commerce, letter No. G-3962, dated the 28th September 1892, to the address of the Comptroller, Central Provinces.

The increase under "Provincial Statistics" is due to the additional expenditure sanctioned for the compilation of statistics for the report on the moral and material condition of the people, and that under "Veterinary charges" (Provincial) to the moiety of the expenditure of establishment, contingencies and travelling allowances of the Civil Veterinary Superintendent of the Central Provinces and Berars.

The increase under "Public Exhibitions and Fairs" (Local) is chiefly caused by wire-fencing for cattle enclosures in the Nimar district.

29.—*Superannuation Allowances and Pensions.*

52. The following are the figures for the two years :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Superannuation and retired allowances ...	2,17,963	2,34,891
Compassionate allowances	8,059	6,703
Gratuities	2,116	1,171
Refunds	142	62
Total Provincial ...	2,28,280	2,42,827
Local—		
Superannuation and retired allowances ...	850	1,350
Compassionate allowances	...	41
Gratuities	...	9
Total Local ...	850	1,400
TOTAL ...	2,29,130	2,44,227

30.—*Stationery and Printing.*

53. The following are the figures for the two years under this head :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Stationery purchased in the country ...	17,598	7,446
Do. supplied from the Central Stores ...	78,135	86,759
Government Presses	60,153	70,566
Printing at Private Presses	22,369	15,480
Other heads	...	1
Total Provincial ...	1,78,255	1,80,252
Local—		
Stationery purchased in the country	268	...
Do. supplied from the Central Stores ...	932	1,233
Government Presses	1,020	915
Printing at Private Presses and other heads ...	16	...
Total Local ...	2,236	2,148
TOTAL ...	1,80,491	1,82,400

The total expenditure in 1892-93 amounted to Rs. 1,82,400 against Rs. 1,80,491 in 1891-92. The increase under "Government Presses" is due to the earnings of the compositors in the Secretariat Press having exceeded those of the previous year, owing probably to the increase of printing work done, and also to the large expenditure incurred for the carriage of stationery at the Central Jail Press at Nagpur.

In 1891-92 large expenditure was incurred by the Settlement Department in getting Rent-rate Reports printed at Bombay. Hence the decrease under "Printing at Private Presses" in 1892-93.

32.—*Miscellaneous.*

54. The distribution of the expenditure under this head is as follows:—

	1891-92. Rs.	1892-93. Rs.
Imperial	4,142	4,030
Provincial	41,930	39,255
Local	7,798	6,542
Total ...	53,870	49,827

The following are the details:—

Imperial—		
Charges for the remittance of treasure ...	4,142	4,030
Miscellaneous Refunds	...	...
Total Imperial ...	4,142	4,030
Provincial—		
Donations for charitable purposes ...	2,264	1,350
Rewards for destruction of wild animals ...	19,168	18,128
Petty Establishments—		
Staging Bungalows	10,456	10,424
Miscellaneous Establishment ...	6,869	6,041
Miscellaneous unforeseen charges and other heads	3,173	3,312
Total Provincial ...	41,930	39,255
Local—		
Rewards for destruction of wild animals ...	69	73
Petty Establishments—		
Serai Establishment	2,718	2,611
Market do.	608	492
Conservancy do.	1,344	1,478
Miscellaneous do.	104	109
Tonga Establishment	...	1,051
Petty Construction	...	...
Nazul Establishment	785	409
Miscellaneous and unforeseen charges ...	213	14
Miscellaneous refunds	1,957	305
Total Local ...	7,798	6,542
TOTAL MISCELLANEOUS ...	53,870	49,827

The fluctuating nature of the expenditure under this head accounts for the variations. The figures under "Rewards for destruction of wild animals" in 1892-93 are nearly equal to the average expenditure of the last four years.

33.—*Famine Relief.*

55. The sum of Rs. 416 is the local expenditure incurred in the Betul district.

45.—*Civil Works.*

56. The expenditure under this head is classified as follows :—

	1891-92. Rs.	1892-93. Rs.
Provincial—		
Works in charge of Civil Officers ...	350	2,612
Local—		
Works in charge of Civil Officers ...	1,81,579	1,90,617
Total ...	1,81,929	1,93,229

The increase in Provincial expenditure is due to a grant-in-aid of Rs. 1,500 to the Mandla Municipality for making good the loss suffered by the Municipality on account of the destruction and injury caused by the floods, and also to the compensation paid for land taken up for the Civil Station at Sambalpur.

The increase under local expenditure is due to repairs to roads and to the construction and repairs of ferries.

Public Works Expenditure.

57. The amount of Provincial and Local expenditure incurred in the Public Works Department as communicated to the Comptroller by the Examiner Public Works Accounts, was as follows :—

	1891-92. Rs.	1892-93. Rs.
Ordinary Branches—		
Provincial	19,91,985	17,46,205
Local	1,53,467	1,29,256
Total ...	21,45,452	18,75,461

C.—Local Funds.

58. These funds are of three kinds, namely, Incorporated Local Funds, Municipal Funds, and Excluded Local Funds. The Incorporated Local Funds are those of which the income and expenditure are incorporated in the Government accounts under the appropriate Revenue and Service heads as Local public revenue and expenditure. There are only two Incorporated Local Funds in these Provinces, namely, the District Fund and the Patwari Fund.

The transactions of Municipal and Excluded Local Funds are not incorporated in the public accounts, but, as a rule, all these funds bank with the Treasury.

Incorporated Local Funds.

59. The following is an abstract of the balanced accounts of the Incorporated Local Funds for the year 1892-93:—

Receipts.	Amount.	Expenditure.	Amount.
Revenue Heads.	Rs.	*Service Heads.*	Rs.
VI.—Provincial rates—		1.—Refunds	96

CHAPTER VI.—VITAL STATISTICS AND MEDICAL SERVICES.

1.—*Census.*

1. The results of the Census of 1891 are recorded above in Chapter I, Political.

2.—*Births and Deaths.*

2. The number of births registered in 1892 was 364,745—or 15,173 less than in 1891. The decrease occurred in 15 registration districts. The fall in the birth-rate was largest in the Balaghat, Nimar, Mandla, Raipur and Bilaspur districts. There has not been so low a birth-rate (38·39 per 1,000) recorded since 1886, and the number of births is less than the total of 1882. The excess of male over female births in the Province generally is returned at 6·95 per cent.; but this can hardly be accepted as correct, in view of the fact that one registration district (Burhanpur) has recorded an excess of 16·27 per cent.—a figure which, as the Sanitary Commissioner remarks, gives rise to doubts. There was an excess of births over deaths in 17 of the 20 registration districts, the ratio for the Province being 4·36 *per mille*. In the districts of the Chhattisgarh Division, owing to the mortality from cholera, there was an excess of deaths over births, which rose as high as 10·80 *per mille* in the Raipur District.

3. The number of deaths registered in 1892 was 324,348, or 10,984 in excess of the previous year. The excess is entirely due to the severe prevalence of cholera. The increase in deaths was confined to the seven districts of Raipur, Bilaspur, Sambalpur, Saugor, Mandla, Seoni and Balaghat, in all of which, excepting Mandla, the mortality from cholera was large. The highest death-rate—46·66 per thousand of population—was reached in the Raipur District, in which the deaths from cholera were 16,949, as compared with 1,840 in the previous year. The mortality in the Province was high from March to September—April, May, June, July and August being the most unhealthy months.

Cholera.

4. With reference to the climatic causes which favoured the diffusion of cholera, it is worthy of notice that the conditions of excessive heat and drought, followed by heavy rain-fall within a limited period, are very similar to those which characterised the year 1889, when cholera was more destructive than in the year under review. In 1889, as in 1892, the number of deaths from cholera in the Chhattisgah Division exceeded 25,000. The highest rate of mortality per thousand of the population was reached in 1889 by Chanda (13·71) and Bilaspur (11·38), and in 1892 by Raipur (13·50). In both years, the outbreak of cholera commenced in the height of the dry season and began to diminish in August, after a month or six weeks of heavy rain. It seems to be clearly established that the preference of the people of Chhattisgarh for tank water—said to be due to the fact that it contains less carbonate of lime than well water, and is therefore better suited for cooking vegetables—renders them peculiarly liable to an epidemic of cholera in years when, through excessive heat and failure of the winter rain-fall, the water in the tanks becomes low and foul. As it is impossible to change suddenly the practice of ages and the tastes of the people, the

lines of sanitary improvement should take the direction of encouraging the people to use percolation wells within the influence of the tanks, in preference to the tanks themselves. The recommendations of the Sanitary Board have been based on this principle.

Apart from climatic causes, pilgrimages and fairs contributed to the development of the disease. The Central Provinces are the highway between the famous holy places to the north and to the south of India; and the sacred places on the Nerbudda are visited by pilgrims from all parts. The great cattle fair at Garhakota had to be broken up, the pilgrimage to the Mahadeo shrine near Pachmarhi was stopped, and in infected localities weekly bazars had to be prohibited. It is not possible to stop the procession of pilgrims from beyond the borders of the Province, which fills the dispensary wards with sick stragglers and carries the germs of disease from point to point. The sanitation of local fairs is, however, within the reach of local control; and in a recent Resolution on the sanitation of the Garhakota Fair, the Chief Commissioner has shown how much can be achieved in this direction by judicious arrangements and careful supervision by the adoption of suitable sanitary arrangements at that fair—at which an outbreak of cholera had become almost an annual occurrence—complete immunity not only from cholera, but from all sickness, was secured. The experience of the town of Jubbulpore, where cholera failed to establish itself, despite successive importations of the disease by travellers, is a powerful illustration of the advantages of a pure water-supply, and indicates the only method in which protection can be obtained from the dangers of the pilgrim traffic.

Small-pox.

5. The number of deaths from small-pox during the year was 995—or 247 more than in 1891. The years 1891 and 1892 show a smaller ratio (0·08 and 0·10) *per mille* of deaths from small-pox than any of the past 10 years. In three registration districts there was absolutely no mortality from small-pox; and in a fourth (Nimar) only a single death is reported. The Chhattisgarh Division and Saugor suffered a little from the disease, but elsewhere the mortality caused by it, in 1892, was trifling.

Fever.

6. The number of deaths from fevers registered during the year was 188,017—or 2,533 less than in 1891. The Provincial ratio of deaths from fever per thousand of the population is 19·79, against 20·05 in 1891. The death-rate decreased in 13 districts and increased in 7.

Dysentery and Diarrhœa.

7. The total deaths registered in 1892 under the heads Dysentery and Diarrhœa (16,021) were fewer by 4,868 than in the preceding year. It is probable, however, that during the prevalence of cholera deaths due to dysentery and diarrhœa are apt to be reported as resulting from the first-named disease.

8. The Raipur Water-works were opened by the Chief Commissioner on the 30th December 1892. The water-works of the town of Burhanpur (constructed under Native rule) have been put into efficient order, the masonry conduits being replaced by iron pipes. The supply drawn from the Nagpur reservoir has been increased by the laying down of a second main. An estimate for supplying the town of Rajnandgaon with water on the Raipur system was sanctioned during the year, and the work is in progress. Drainage surveys have been carried out for the towns of Jubbulpore, Nagpur, Saugor, Bilaspur and Sambalpur.

The expenditure in all districts on works sanctioned by the Sanitary Board was approximately Rs. 76,249. A substantial beginning has been made in every district of the Province, an expenditure on village sanitation falling not far short of a lakh of rupees having been usefully and profitably incurred.

At the close of the year 1892, not much progress had been made in extending the Village Sanitation Act; but by the 1st April 1893, that Act was in force in 55 villages—as compared with 40 in July 1892. In all cases the Chief Commissioner has been careful to see that the funds raised by assessment under the Act are devoted primarily to the improvement of the water-supply. This is a more essential reform than any other; and the cleansing of the village site by means of a staff of paid sweepers can only be regarded as secondary and subsidiary thereto.

3.—*Medical Relief.*

Number of Dispensaries.

9. The number of Dispensaries open at the close of the year 1892 was 110. Their classification is shown in the subjoined Table, in which the figures for three years are compared:—

	1890.	1891.	1892.
I.—State ...	6	6	6
II.—Local Fund ...	78	78	77
III.—Private ...	23	27	27
Total ...	107	111	110

The Local Fund Dispensary at Bisrampur, in the Raipur District, was closed in June 1892. Since the commencement of the year 1893 another Dispensary has been opened in its place at Simga in the same district.

During 1890 and 1891, seven new Dispensaries were opened: one in the Khalsa (Betul Branch Dispensary), two in the Feudatory States of Kanker and Makrai, and four in Zamindaris of the Chhattisgarh Division.

Attendance.

10. The total number of patients treated during the three years 1890—1892 is given below:—

	In-door.	Out-door.	Total.
1890 ...	7,885	867,219	875,104
1891 ...	8,222	904,654	912,876
1892 ...	8,523	963,904	972,427

The increase in the number of patients is chiefly in the out-door class; but in-door patients have risen in number from 7,885 in 1890 to 8,523 in 1892.

The percentage of the population treated at the Dispensaries has risen from 9·92 in 1890 to 10·49 in 1892.

Diseases treated.

11. The number of beds available for in-door patients in 1892 was 785, as compared with 899 in 1890 and 894 in 1891. This decrease is only nominal, being due to errors in the Nimar and Nagpur returns in previous years. Of the 785 beds available, 389 were, on an average, occupied daily. The percentage of beds occupied by in-door patients has risen from 38 (in 1890) to 50.

In 1892, the Government of India commented on the fact that only half of the whole number of beds for male patients in the Dispensaries of the Province appeared to have been occupied, and expressed the hope that efforts would be made to induce more sick persons to avail themselves of the beds provided for them. The Chief Commissioner fears that so long as the Dispensaries con-

tinue to be used as lazar-houses for sick paupers, it is hopeless to expect that respectable residents will look on them in the light in which public hospitals are regarded by educated Europeans. Even among uneducated Europeans there is a traditional aversion to hospitals, which probably has its origin in the less careful arrangements for the segregation of infectious or disagreeable cases which prevailed in by-gone times.

The number of out-patients in 1892 was 963,904, as compared with 904,654 in the preceding year. This increase of 59,250 was distributed between 14 districts. In four districts—Raipur, Saugor, Bilaspur and Betul—there was a decrease,—considerable only in the two first-named. The explanation for Raipur is the closing of the Bisrampur Dispensary in the middle of the year. The decrease at Saugor occurred chiefly in connection with the Sadar and City Branch Dispensaries: and is not satisfactorily explained.

12. The excessive heat of the hot season of 1892 and the heavy rain-fall in certain months produced an increase in malarial fevers. Cases of disease of the skin and ulcers were also more numerous.

Operations performed.

There has been a satisfactory increase in operations, notwithstanding the disinclination of natives of these Provinces to undergo surgical treatment. One of the causes why the number of unoccupied beds at Dispensaries is so large is this prejudice against surgery.

Receipts.

13. The total income of the Dispensaries was Rs. 1,48,363, against Rs. 1,50,075 in the year previous; the subscriptions from natives fell from Rs. 23,914 to Rs. 22,113. Local Funds contributed Rs. 4,000 more and Municipalities Rs. 7,345 less than in 1891.

Expenditure.

14. The total expenditure, excluding investments, amounted to Rs. 36,108-9-9, or Rs. 2,009-7-6 less than in 1891. The expenditure under heads Establishment, Medicine, Diet, are greater compared with 1891. The increase under head Establishment is due to the promotion of medical subordinates to higher grades. The increase under that of European medicines is due to the full adjustment of the charges of Europe medicines purchased during the year. The increase under Diet is partly due to the admissions of more in-patients and partly to the dearness of grain. There was a decrease of Rs. 9,932-1-6 under the head "Building and Repairs."

4.—*Treatment of the Insane.*

15. There are two Lunatic Asylums in the Central Provinces, one at Nagpur and the other at Jubbulpore.

The statistics of admissions, discharges and deaths in the two asylums during the year 1892 are given in the following table :—

		Nagpur.	Jubbulpore.
Remained on the 1st January	... ...	131	130
Admitted and re-admitted	... ...	27	35
	Total population ...	158	165
Discharged as cured or improved	... ...	15	14
Discharged otherwise	... ...	2	2
Died	... ...	3	8
Remaining on the 31st December	{ Males 104 / Females 34 }	138	{ 111 / 30 } 141

16. In both asylums, the daily average strength was slightly higher than in the previous year. At Nagpur it was 130·76, exceeding that of 1891 by 3·55; and at Jubbulpore 139·86—an increase of 6·09. Admissions to Asylums.

Four criminal lunatics were admitted to each asylum during the year; and there were two re-admissions of criminal lunatics.

17. The year was a fairly healthy one in both asylums. There were no cases of cholera, but the epidemic of influenza caused 16 admissions to hospital at Nagpur and 9 admissions and one death at Jubbulpore. The daily average number sick was 6·73 at Nagpur (or 6·24 less than in the preceding year) and 6·09 at Jubbulpore (as against 5·30 in the previous year). The chief cause of sickness was, as usual, malarious fever, which caused 53 admissions at Nagpur and 27 at Jubbulpore. The small number of admissions from bowel-complaints (3 at Nagpur and 7 at Jubbulpore) indicates that the food and the water-supply are good at both institutions. The percentage of deaths to daily average strength was only 2·29 at Nagpur and 5·72 at Jubbulpore. Four of the eight deaths at Jubbulpore were of very old and weakly persons. Health of lunatics.

There was no overcrowding at either institution.

18. The statistics relating to criminal lunatics are abstracted in the following table:— Civil lunatics.

		Nagpur.	Jubbulpore.
Remaining on the 1st January	... ...	47	31
Admitted and re-admitted	... ...	5	5
	Total ...	52	36
Discharged, &c.	... ...	7	4
Died	... ...	1	2
Remaining on the 31st December	Males 40, Females 4	44 (Males 26, Females 4)	30
Daily average strength	...	45·29	30·27

19. The large majority of the patients admitted during the year were suffering from mania and dementia. The causes of insanity cannot be satisfactorily given in all cases. At Nagpur, out of a total of 158 patients treated, 103 are returned under the heading "Causes unknown"; and at Jubbulpore 68 out of a total of 165 are so returned. At Jubbulpore 31 and at Nagpur 18 cases are attributed to the habitual use of Indian hemp as a narcotic. The abuse of opium is considered to have originated four cases, and alcohol is believed to have been conducive to insanity in a like number of instances. Of the patients remaining in the Jubbulpore Asylum, 19 are recorded as cases of idiocy. Type of insanity.

20. The average annual cost of each patient was Rs. 72-1-10 at Nagpur, as compared with Rs. 71-14-2 in the preceding year, or Re. 0-3-8 in excess. At Jubbulpore it was Rs. 68-12-11 against Rs. 71-0-6, or Rs. 2-3-7 less than in 1891. The total net cost per inmate, after deducting the receipts from paying patients and the net profits of industry, was Rs. 67-3-0 in the Nagpur and Rs. 54-1-11 in the Jubbulpore institution. Receipts and expenditure.

At Nagpur the asylum premises have been enclosed with a wall and railings. Water is now raised by lunatic labour from a well and stored in a cistern from which it is distributed by pipes for all purposes. A new garden for vegetables has been laid out.

At Jubbulpore new latrine accommodation has been provided.

5.—*Vaccination.*

Establishment.

21. There was very little change in the strength of the Vaccination staff during the year. An extra vaccinator was employed in British districts, while the number of vaccinators working in Feudatory States was reduced by two.

Amount of work.

22. The total number of vaccine operations performed by vaccinators during the year 1892-93, both in Khalsa and Feudatory States, was 435,410 compared with 445,720 in the previous year, or 10,310 less than that of 1891-92, thus—

Primary	...	...	...	—4,760
Re-vaccinations	...	...	...	—5,550
			Total ...	—10,310

The percentage of successful primary operations was 96·68, or 0·28 greater when compared with the success of 1891-92; and that of successful re-vaccinations 84·27, against 79·57 in the previous year. This high ratio of success in re-vaccination leads one to doubt its correctness in the case of primary operations.

The total number of vaccine operations performed by Khalsa vaccinators in the year under review was less by 5,430 than the number shown in the previous year, and the decrease was mainly in re-vaccinations, which is not unsatisfactory, for there was an increase in primary operations amounting to 1,536.

Of the successful primary operations there was an increase of 1,810 compared with 1891-92.

At Makrai, Khairagrah, Chhuikhadan, Kankar, Sarangarh, Raigarh, Patna and Bamra the total operations performed was more and in the other States it was less than in 1891-92. The decrease was marked in Sonepur, Kalahandi and Nandgaon. At Sonepur only four vaccinators were employed, instead of seven in the previous year; while at Kalahandi one vaccinator more was employed, and still the work was less than in the year 1891-92.

Expenditure.

23. The total cost of the Vaccine establishment in the Khalsa during 1892-93 was Rs. 49,719, or Rs. 1,039 more than in the previous year. In 1890-91 the cost was Rs. 45,747. The expenditure has thus gone on increasing, while the number of persons vaccinated has declined. A portion of the increase in cost is due to expenses connected with the cultivation of animal lymph at Pachmarhi. The experience gained in the use of this lymph seems to show that, while very effective when fresh, it rapidly deteriorates; and it would be necessary to incur a further outlay in the purchase of glass tubes for the carriage and preservation of the lymph, if the system were to be maintained. On the other hand, the plan of taking lymph from buffalo calves obtained locally and vaccinated for the purpose is being gradually introduced into all districts; and it will probably be possible in the cold season of 1894 to dispense with lanoline lymph and depend wholly on the supplies obtained from calves.

24. The Vaccination Act was extended during the year to the Municipalities of Nagpur, Narsinghpur, Harda, Sambalpur, Damoh and Hatta, and other towns are following the example set by these.

CHAPTER VII.—INSTRUCTION.

1.—*General System of Public Instruction.*

Schools in these Provinces may be classified as—

(1) schools for general education;
(2) schools for special education, *i. e.*, instruction in a special branch of technical or professional education.

(1) Schools for General Education.

2. Schools for general education may be classified—
   (1) according to the standard of instruction;
   (2) according to the agency by which they are managed;
   (3) according to the languages studied, *i. e.*, Anglo-Vernacular or Vernacular.

3. The classification according to the standard of instruction is as follows:—

College Department or Colleges.

10th class	...	...	Senior B. A. Class.
9th „	...	...	Junior „ „
8th „	...	...	Senior F. A. „
7th „	...	...	Junior „ „

High School Department or High School.

6th Class	...	...	Matriculation Class.
5th „	...	...	Preparatory „

Middle School Department or Middle School.

Anglo-Vernacular.			Vernacular.
4th class	...	...	VI Class.
3rd „	...	...	V „
2nd „	...	...	
1st „	...	...	

Primary Schools.

IV class	...	...	Upper Primary Department.
III „	...	...	Lower „ „
II „	...	...	
I „	...	...	

A College may contain High, Middle and Primary departments, and a High School, Middle and Primary departments. The course of study in a College or High School is regulated by the requirements of the University. In the Middle and Primary departments, it is regulated by the Education Department.

The Middle School course is for four years. Promotion from the Middle to the High School department is determined by the Middle School examination.

The course of Vernacular study in the 1st Anglo-Vernacular class corresponds with that of the 4th Vernacular or Upper Primary class; in the 2nd and 3rd Anglo-Vernacular classes, it corresponds with that of the 5th Vernacular class; and in the 4th Anglo-Vernacular class with that of the 6th Vernacular class.

A 2nd grade Anglo-Vernacular Middle School contains three classes, *viz.*, the 1st, 2nd and 3rd; and a 1st grade Anglo-Vernacular Middle School, four classes, *viz.*, the 1st, 2nd, 3rd and 4th. A 2nd grade Vernacular Middle School contains one class, *viz.*, the 5th; and a 1st grade Vernacular Middle School, two classes, *viz.*, the 5th and the 6th.

The Primary course, which is purely Vernacular, extends over four years.

Promotion from the 1st to the 2nd, and from the 2nd to the 3rd class is made by the masters themselves; and from the 3rd to the 4th, *i. e.*, from the Lower Primary to the Upper Primary department, by Inspecting Officers, or by the masters themselves, on the results of the Lower Primary examination. Promotion from the 4th Vernacular to the 1st Anglo-Vernacular class is made on the results of the Upper Primary examination.

4. The classification according to the agency by which schools are managed is :—

(*a*) Public schools* under public management, *i. e.*, under the management of Government or of Boards exercising statutory powers. These are known as Government or Board Schools.

(*b*) Public schools under private management, *i. e.*, under the management of missionary or other societies, *i. e.*, Aided Schools.

5. The following are Government institutions :—

The Jubbulpore College, with High School department.
„ Saugor High School, with Middle do.
„ Hoshangabad do. do. do.
„ Raipur do. do. do.
„ Sambalpur do. do. do.
„ Kamptee Middle School, with Primary do.
„ Sironcha do. do. do.

The Jubbulpore College is affiliated in Arts and Law to the Allahabad University.

6. The following are Aided institutions :—

The Hislop College, with High and Middle departments.
„ Morris College.
„ Neill City High School, Nagpur, with Middle department.
„ Church Mission High School, Jubbulpore, with Middle department.
„ Hitkarni Sabha High School, with Middle department.
„ Anjuman Islamia do. do. do.
„ Jubbulpore Sadar Bazar Church Mission Middle School.
„ Seoni-Chapara Mission School.
„ Sitabaldi Grant-in-aid School, Nagpur.
„ Native Institution, Nagpur.
„ Anjuman Hami-e-Islam, Nagpur.
„ Andhra Sabha School, Nagpur.

7. As regards Middle and Primary Schools, the policy of the Administration has been to stimulate local interest in education by transferring these institutions from the control of the Education Department to the control of local bodies. To this end, all schools situated within Municipal limits have been transferred to the management of Municipalities, and all schools situated in rural tracts, except in one district, have been transferred to the management of District

* *N. B.*—A public school means a school which conforms with the course of study prescribed by a University or by the Department, and which presents pupils for the public examinations held by the Department or by a University.
A private school means a school which does not come under the above definition.

Councils. The entire management and control of the transferred schools is vested, subject to certain conditions, in the local bodies above referred to, the Education Department confining itself to—

(1) ascertaining that the funds set aside for educational purposes are spent on Middle and Primary education and to the best advantage;

(2) inspecting and reporting on the schools;

(3) ascertaining that the principles, &c., of school management and the fee rules are observed;

(4) supplying certificated teachers;

(5) seeing that school buildings are kept in repair and that the furniture and appliances thereof are adequate;

(6) arranging for the supply of school books, maps, apparatus, &c., on payment;

(7) assisting local bodies with advice and suggestions in educational matters.

There are 255 Middle Schools, of which 65 are Anglo-Vernacular and 190 Vernacular; 174 are Board Schools, *viz.*, schools under the management of local bodies, and 62 are Aided institutions.

There are, at present, in existence, 1,918 Primary Schools, of which—

40	are	Government Schools.
760	„	Board „
862	„	Aided „
133	„	Unaided „
123	„	Feudatory „

(2) SCHOOLS FOR SPECIAL EDUCATION.

8. The schools for special education are the following:—

Normal School.	(1) The Training Institution, Nagpur.
	(2) Normal School, Jubbulpore.
	(3) Do. Raipur.
	(4) Female Normal School, Jubbulpore.
	(5) The Agricultural Class, Nagpur.
	(6) The Engineering Class, Jubbulpore.
	(7) The Law Classes.

The Normal School students are instructed in the principles and art of teaching, with the view of their becoming teachers after their course of training is over. The Training Institution contains two departments, *viz.*, a Secondary and a Primary. In the Secondary department, students who have passed one of the University examinations are prepared for employment as teachers in Colleges and High and Middle Schools. In the Primary department, students are trained for employment in Primary Schools. The other Normal Schools contain Primary departments only.

9. In addition to the Normal Schools, classes for the training of teachers have been opened in certain Vernacular Middle Schools in each district. Bonuses are awarded to the teachers of those schools who succeed in passing students by the Teachers' Certificate Examination.

10. In the Agricultural Class, students are prepared for employment in the Revenue and Settlement Departments and under the Court of Wards. The course of instruction extends over two years, and embraces the following curriculum:—

Agriculture (theory and practice).
Surveying (do.).
Chemistry (theoretical and practical).
Botany.
Geology.
Physiology and the elements of Veterinary Surgery (practice and science).
Drawing.

The instruction is strictly practical. Each student has his own plot of ground allotted him, in which he grows his own crop. All the agricultural operations, from preparing the ground to sowing the seed, are done by the students themselves without assistance.

Attached to the Agricultural Class is a class for the training of schoolmasters in the proper method of teaching the Agricultural Primer in use in the schools of the Central Provinces.

11. In the Engineering Class, candidates are prepared for Upper Subordinate posts in the Public Works Department. The course of study is for two years, and embraces the following curriculum:—

I.—Mathematics.

1. Arithmetic.
2. Trigonometry.
3. Mensuration.

II.—Engineering.

4. Levelling (including contouring), chain surveying, plane-tabling.
5. Drawing.
6. Road-making.
7. Brick and tile-making, manufacture of lime, mortar, cement, concrete, hydraulic mortars, white and colour wash.
8. Varieties of stone and wood as used for construction.
9. Elements of simple construction.
10. Carpentry.

12. Law classes are attached to the Jubbulpore and Morris Colleges. The course of study is for three years, at the end of which time students may appear either for the B. L. or LL. B. Examinations of the Calcutta and Allahabad Universities, or for the Law Certificate Examination of these Provinces.

Drawing.

13. There is no special institution for teaching drawing, but the subject receives much encouragement, and is taught in almost every school as a branch of general education. Students from these Provinces appear for the examination of the Bombay School of Art, which is conducted annually at different centres in the Provinces. Rewards are offered to masters who succeed in passing

a certain number of pupils by this examination, and certain prizes are given to pupils who excel in the different subjects prescribed. Prizes are also awarded on the results of the Middle School and the Upper Primary Examinations to students in Middle and Primary Schools, for excellence in drawing.

Seventy-three students passed the examination of the Bombay School of Art in the current year, and 78 in the previous year.

Rajkumar School.

14. There is a special school for the sons of Feudatory Chiefs and Zamindars. It is managed by the Principal of the Jubbulpore College. At the close of the official year 1892-93 there were eight pupils on the rolls. They are under the instruction of a special staff of masters, and much attention is paid to their physical training. The pupils play cricket and lawn-tennis and are taught to ride. The fees paid by each student are Rs. 25 to Rs. 50 a month, according to their income.

Most of the Rajkumar students are from the Chhattisgarh Division, and it has been proposed to remove the school from Jubbulpore to Raipur, a measure which, it is expected, will increase its popularity.

European Schools.

15. The European schools in the Central Provinces are regulated by the provisions of the Bengal Code for European Schools. They are all aided institutions, and are examined quadrennially for a result grant.

The following are the European schools now in existence :—

(1) St. Francis deSales' School, Nagpur.
(2) Bishop's School, Nagpur.
(3) St. Aloysius' School, Jubbulpore.
(4) Christ Church Boys' School, Jubbulpore.
(5) Do. Girls' do. do.
(6) Convent of St. Joseph, do.
(7) Do. do. Nagpur.
(8) Do. do. Kamptee.
(9) Joint Railway School, Khandwa.
(10) St. Matthew's Railway School, Harda.
(11) Railway School, Dongargarh.
(12) Loretto Convent School, Saugor.

Female Education.

16. Although there has been a considerable increase in both the number of schools and the number of girls under instruction in the last ten years,* female education can hardly be said to have made a beginning in these Provinces, the percentage of girls of school-going age under instruction being only ·9. It is probable that much progress cannot be expected until public opinion is sufficiently advanced to appreciate its importance. In places where there are no girls' schools, girls are allowed to read in primary boys' schools. The number of such is increasing year by year. The instruction in girls' schools has been varied by the introduction of Kindergarten, action songs, and in a few places drawing, and by the encouragement

	*1883.
Schools ...	... 93
Pupils ...	... 3,985
	1893.
Schools ...	... 154
Pupils ...	... 6,374

given to needle-work and knitting. As regards home education, the excellent work done by the ladies of the Zenana Missions at Jubbulpore, Nagpur and Hoshangabad cannot be over-estimated.

The Education of Mahomedans, the Aboriginal Tribes and Low Castes.

17. The number of Mahomedan boys at school is 9,167, and the percentage of Mahomedan boys of school-going age under instruction is 38·42, as compared with 13·90 per cent. under Hindu boys.

Mahomedan boys do not, as a rule, continue their studies to a higher standard, so as to qualify for admission into the public service, in which they are at present but poorly represented. Efforts are, however, being made by the Anjuman Islamias to stimulate the higher education of Mahomedan boys, by opening High School departments in connection with their Middle Schools.

18. The aboriginal tribes are to be found chiefly in the Chhattisgarh Division, and the neglected state of education in the Feudatory States of that Division accounts, in a measure, for the poor attendance at school of these races. Now, however, that steps are being taken to improve the system of education and strengthen the inspecting agency in the Feudatory States, greater progress in the education of the aborigines is anticipated. The more favourable rates in the result grant rules, which allow grants for Gonds and other aboriginal tribes at 50 per cent. higher, are beginning to be appreciated by schoolmasters, and will doubtless have a stimulating effect upon the education of the aboriginal tribes.

19. Boys of low caste are to be found in some of our schools, but the degradation of their position is a bar to their progress. Efforts are therefore being made to open separate schools for low castes under low caste schoolmasters. There are schools for Dhers at Hinganghat and Kamptee. Seven schools for Dhers have been established in the Chanda District, and a school for Dhers under a Dher teacher has recently been opened in Sironcha.

System of Aid.

20. The system of grants-in-aid was revised in the year 1890. The policy of the Administration in revising the rules was stated to be "by encouraging private enterprize to enable the Local Administration and Local Bodies to withdraw gradually from the direct management of schools."

21. Schools are aided on three alternative systems:—

(1) The fixed grant system.
(2) The result grant system.
(3) The combined system, which is a combination of the fixed grant and the result grant systems.

The Aided Colleges and High and Middle Schools are all on the fixed grant system. Almost all Aided Primary Schools are on the system of payment by results or on the combined system.

SCHOOL ECONOMY AND DISCIPLINE.

The Levy of Fees.

22. The Fee Rules were revised in the year 1890. In Government Colleges and High Schools, the fee is Rs. 3 and from Rs. 1-8 to Rs. 2 respectively. In Aided Colleges and High Schools it is Rs. 2 and Re. 1-8 respectively per mensem. In Government and Board Anglo-Vernacular Middle Schools, it varies, according to the income of the parents, from Rs. 3 to annas 6. In Government and Board Vernacular Middle Schools it ranges from Rs. 2 to annas 2, and in Primary Schools, from 8 annas to 1 anna. In Aided Anglo-Vernacular Middle Schools, it is annas 8, and in Vernacular Middle Schools, annas 4. The minimum fee in the primary department of aided schools is 1 anna. In Aided Primary Schools not connected with schools of high grade, the levy of fees is left to the discretion of the Manager.

Discipline.

23. Inter-school rules were sanctioned in the year 1889. They regulate the admission of students into one school from another. By rules sanctioned in the year 1889, certain punishments were prescribed for breaches of discipline in Colleges and Schools. Much attention is paid to the moral side of Education, *viz.*, the inculcation of habits of truthfulness, obedience, courtesy and respect for authority. Physical training also receives ample encouragement. Almost every school is provided with a gymnasium. Drill is taught in all schools, and cricket and football are practised in some. The monitorial system exists in our boarding-houses. The supervision of the boarding-house is entrusted to one of the senior students, who, if he is reported to have discharged his duties satisfactorily, at the end of the year, is entitled to have his fees remitted.

Public Examinations.

24. The course of study in Colleges and High Schools is, as stated above, regulated by the requirements of the University.

25. The examinations conducted by the Department are the following :—

(i) The Lower Primary Examination.
(ii) The Upper Primary Examination.
(iii) The Middle School Examination.
(iv) Teacher's Certificate Examination.
(v) The Examination of Officers whose vernacular is not that of the people of the section of the country to which they are posted.
(vi) The Examination of Deputy Inspectors.

26. The Lower Primary Examination regulates admission into the Upper Primary class, *viz.*, the 4th Vernacular class, and is conducted by the masters themselves or by Inspecting Officers when they visit schools.

The subjects of examination are the following :—

(i) Reading.
(ii) Writing.
(iii) Arithmetic (four Simple and Compound Rules).
(iv) Geography of the Central Provinces (optional).

27. The Upper Primary Examination is conducted, at certain centres, by Boards of Examiners, of which the Deputy Inspector of the district is President. The examination papers are set by the Inspector of Schools of the Circle. The objects of the Examination are the following :—

(i) To regulate admission from an Upper Primary into a Middle School.

(ii) To test the fitness of candidates for admission into the public service for appointments below Rs. 15.

(iii) To regulate the award of Middle School Scholarships.

28. The subjects of examination are as follows :—

A.—Compulsory Subjects.

1. Reading and Elements of Grammar.
2. Hand-writing, spelling and dictation.
3. Arithmetic.

B.—Optional Subjects.

1. Common Objects.
2. Geography.
3. History.
4. Drawing.
5. Hygiene.
6. Agriculture.
7. Manual training.

29. The Middle School Examination is conducted by Examiners appointed by the Inspector-General of Education. The objects of the examination are as under :—

1. To regulate promotion into a High School.
2. To test the fitness of candidates for admission into the public service for appointments ranging between Rs. 15 and Rs. 30.
3. To determine the award of High School Scholarships.

The subjects of examination are as follows :—

Branch I.—Language.

1. Hand-writing and Spelling—(English and Vernacular).
2. Translation from Vernacular into English.
3. Translation from English into Vernacular.
4. English Grammar and Composition.
5. Vernacular Grammar and Composition.

Branch II.—Mathematics.

1. Arithmetic.
2. Euclid and Algebra.

Branch III.—Geography.

Geography of the World and Map-drawing.

Branch IV.—Physical Science.

OPTIONAL SUBJECTS.

1. History.
2. Drawing.
3. Manual Training.
4. Mensuration and Surveying.
5. Mercantile Arithmetic.

Scholarships.

30. The scholarships may be classed as:—
    1. Those payable from Public funds.
    2. Those payable from Private funds.

31. The scholarships payable from public funds are the following:—
    1. Middle School Scholarships—Ordinary.
    2. Do. do. —Special.
    3. High School Scholarships.
    4. College Scholarships, Junior.
    5. Do. Senior.
    6. Graduates' Scholarships.
    7. Girls' Special Scholarships.
    8. Normal School Scholarships.

The Middle School Scholarships are awarded on the results of the Upper Primary Examination, and are 76 in number, the value being Rs. 4 each. They are tenable for four years in an Anglo-Vernacular Middle School. Middle School Scholarships, special, are of the value of Rs. 4 each. They are attached to certain Anglo-Vernacular 2nd grade Middle Schools, and are tenable for one year in an Anglo-Vernacular School of the 1st grade.

High School Scholarships, 45 in number, are awarded on the results of the Middle School Examination, and are tenable for two years in a recognized High School. The value of these scholarships varies from Rs. 5 to Rs. 8 per mensem.

College Scholarships, junior, 28 in number, are awarded on the results of the Matriculation Examination. Twenty are reserved for certain subjects of a technical character, *viz.*, Engineering, Agriculture, Art and Medicine. The value of the scholarships varies from Rs. 7 to Rs. 10 per mensem.

College Scholarships, senior, 8 in number, are awarded on the results of the F. A. Examination. Four of these are reserved for technical subjects, *viz.*, Engineering, Agriculture, Art and Medicine.

Graduates' Scholarships, 3 in number, are awarded on the results of the B. A. Examination. One is tenable in any College of Medicine, one in any College of Engineering and one in any College of Arts by candidates who wish to take the M. A. degree in Science.

Normal School Scholarships are given to students to enable them to undergo a course of training in the Normal Schools. They are 230 in number, their value varying from Rs. 4 to Rs. 6 per mensem.

32. There is no special training school for the Uriyas of Sambalpur. Ten Stipendiary Scholarships of the value of Rs. 5 each are awarded to Uriya students intending to become teachers.

Scholarships payable from private funds.

33. Some of these Scholarships are awarded by Feudatory Chiefs, and others supported by endowments from private subscriptions.

They are the following :—

1. The Browning Scholarships.
2. Raj-nandgaon Jubilee Scholarships.
3. Khairagarh Scholarships.
4. The Mackenzie Scholarship.
5. The Armstrong Scholarship.

THE EDUCATION DEPARTMENT AND ITS OFFICERS.

34. The superior staff of the Department is composed of the following :—

1. The Inspector-General of Education.
2. The Inspector of Schools, Northern Circle.
3. The Inspector of Schools, Southern Circle.
4. The Inspector of Schools, Eastern Circle.
5. The Principal, Jubbulpore College.
6. The Professor of Mathematics, Jubbulpore College.
7. Do. do. of Sanskrit, do. do.
8. Do. do. of Physical Science, do. do.
9. Do. do. of English, do. do.
10. The Superintendent, Training Institution, Nagpur.
11. The Lady Superintendent, Female Normal School, Jubbulpore.
12. Deputy Inspectors of Schools, of whom there are at present nineteen, *viz.*, one for each district, except in the Raipur district, in which there are two.

The Inspector-General of Education.

35. The Inspector-General of Education is the head of the Department. Under the orders of the Local Government, he manages the finance of the Department, settles the curricula to be pursued, and the examinations to be passed, nominates examiners to conduct public examinations, and himself takes part in the inspection of schools. He prepares all reports and returns that are submitted to the Local Administration. He directs the movements of the Inspectors of Schools and Deputy Inspectors of Schools. The Government College at Jubbulpore, together with its High School department, and the Government High Schools, are directly controlled by the Inspector-General, and he advises the Local Administration in the matter of giving aid to schools under private management. In his relations with Board Schools, *viz.*, schools transferred to Local Bodies and Aided institutions, the function of the Inspector-General is to advise rather than to control.

Inspectors of Schools.

36. There are three Inspectors of Schools. Two of these are graded officers and one non-graded. The Provinces are divided into three circles of inspection. The Northern Circle consists of seven districts, *viz.*, Jubbulpore, Saugor, Damoh, Mandla, Narsinghpur, Hoshangabad and Nimar. Nagpur, Bhandara, Chanda, Wardha, Balaghat, Seoni, Betul and Chhindwara form the Southern Circle. The Eastern Circle comprises Raipur, Bilaspur and Sambalpur, with the Feudatory States of Chhattisgarh.

	Rs.		Rs.
3rd grade	... 750	to	1,000
4th grade	... 500	„	750
Non-graded	... 500		

The Senior Inspector of Schools is also in charge of the European Schools of the whole Province (and of the European Schools in Central India). The Inspector of Schools of the Northern Circle is required to visit once a year the schools in Sehore (Bhopal). The Inspector of Schools of the Eastern Circle visits the schools in the Chhattisgarh Feudatories, in addition to those in British Territory. Each Inspector of Schools is expected to visit all the Anglo-Vernacular Schools in his Circle at least twice a year and all the rural schools once in three years. He is required to submit, monthly, to the Inspector-General a diary containing his remarks on the schools visited by him. Orders passed by the Inspector-General on these diaries are communicated to the persons concerned. The Inspectors are required in their diaries to enter the state of school buildings, the condition of apparatus and libraries, the discipline, the method of instruction, the time tables, &c. They also test the drill and gymnastic exercises of the pupils.

Our training schools are all situated at the Head-quarters of the Inspectors of Schools, and one of the most important duties of these officers is the management of these institutions.

Deputy Inspectors of Schools.

37. In each district, except in the Raipur District, there is one Deputy Inspector who inspects all the Primary Schools in the district, at least three times a year. He also visits Vernacular Schools situated within Municipal limits. He keeps the District Council informed of the state of Education, helps them in establishing schools where required, and makes suggestions from time to time to the District Council regarding their schools. He is also Chairman of the Boards appointed to conduct the Upper Primary Examination at different centres. In the Raipur District there are two Deputy Inspectors.

		Rs.
2	1st Grade ...	200
3	2nd „ ...	150
4	3rd „ ...	125
4	4th „ ...	100
5	5th „ ...	80
1	Joint Deputy Inspector,	60

The number of schools has, of recent years, increased to such an extent that the Inspecting agency has become unequal to the work. The Government of India has sanctioned the strengthening of the staff by the appointment of seven Sub-Inspectors.

School Committees.

38. Local Bodies appoint, for each school, a School Committee, consisting of not less than five residents of the town, village or area for which the school has been established.

School Committees visit schools collectively once a month at least, and a record of their proceedings is made in a book kept for the purpose. One of the members visits the school once a week.

The School Committees take all possible measures to secure regularity of attendance, settle matters of discipline and arrange, in accordance with the rules for the time being in force, what rates of fees scholars shall pay and what boys shall be free scholars.

They also bring irregularities connected with the management of the school, the want of suitable accommodation or furniture and the necessity for repairing the school buildings, &c., to the notice of Local Bodies.

Text-Book Committee.

39. The Text-Book Committee of these Provinces was reorganized in August 1892. The following officers and gentlemen form the General Text Book Committee:—

1. The Inspector-General of Education—*ex-officio* President.
2. The Commissioner, Nagpur Division.
3. The Inspector of Schools, Southern Circle.
4. The Principal, Hislop College, Nagpur.
5. Do. do. Morris do. do.
6. Do. do. St. Francis deSales School, Nagpur.
7. Rai Bahadur Bipin Krishna Bose, M.A., B.L.
8. Mr. Bapu Rao Dada, M.A.

There are two Sub-Committees for Hindi, Urdu and Uriya text-books.

All the books prescribed for departmental schools and books intended for prizes and school libraries are first approved by the Committee.

PROGRESS OF EDUCATION.

40. The progress of Education in the Central Provinces since its commencement in 1862 is illustrated by the following table:—

Class of Institution.	1861-62.		1872-73.		1882-83.		1892-93.

Total ...	1,187	17,827	1,778	82,930	1,565	89,506	2,210	135,225

41. It will appear from the above that, since the year 1861, *viz.*, the date on which educational operations commenced in these Provinces, schools have increased by 86 per cent., and pupils by 658 per cent.

In the last ten years, *viz.*, from the year 1882, there has been an increase of 645, or 41 per cent., in schools, and 45,719, or 51 per cent., in pupils. In the past year, special efforts were made to extend and improve Primary education. A grant of Rs. 50,000 was sanctioned by the Administration for this purpose. Some 300 new Aided schools were opened, with 21,068 pupils. It is noticeable that, in 1892-93, schools increased by 15 per cent. and pupils by 18 per cent.

The population of the Provinces, according to the last Census, is 12,944,805, the school-going age population, calculated at 15 per cent., being 1,941,720, and the number of children under instruction, 135,225. The percentage of children of school-going age under instruction is 7, or 13 per cent. under boys, and ·9 per cent. under girls. This shows that much remains to be done before education can be said to have reached the masses in these Provinces.

2.—*Progress of Education during the year* 1892-93.

Number of Schools and Scholars.

42. From the subjoined table, which shows the increase and decrease of schools and pupils by classes of institutions, it will be seen that schools have increased from 1,908 to 2,210, or by 15 per cent., and pupils, from 114,157 to 135,225, or by 18 per cent. The figures of 71 schools with 3,178 pupils in certain Feudatory States, which are not under regular inspection, are not included in this table. The strength of colleges shows a slight increase. High Schools remain the same in number, but exhibit a decrease of 76 in pupils. The increase of pupils in English Middle Schools, and the decrease in Upper Primary Schools, is due to a change of classification, *viz.*, the absorption into the Middle department of the Primary English class, which had, hitherto, been treated as a separate institution. Vernacular Middle Schools have increased by 19, or by 11 per cent., in schools, and by 2,686, or 14 per cent. in pupils; and Vernacular Primary Schools, by 347, or 24 per cent. in schools, and by 18,707, or nearly 23 per cent., in pupils.

The large increase in both these classes of institutions is due, partly, to the increase in existing schools, but mainly to the opening of new schools. The decrease of 10 under "Special Schools," is explained by the closure of the

Carpentry classes. Under "Vernacular Secondary Girls' Schools," there has been an increase of 1 in schools, and 38 in pupils; whilst Vernacular Primary Girls' Schools show an increase of 10 in schools, and 351 in pupils.

Class of Institution.	1891-92.			1892-93.

	Rs.	Rs	Rs.	Rs.	Rs.
Fee receipts in all schools	66,160	74,400	79,344	95,969	1,03,606
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Cost per pupil to Government ...	3 4 10	3 5 3	3 6 1	3 6 7	2 9 3

It will appear from the above that, since the year 1888-89, schools have increased by 21 per cent., pupils by 26 per cent., and the average attendance, by 13 per cent. Fee receipts show the large increase of 56 per cent. The decrease under cost to Government of educating each pupil is merely nominal, being attributable to the fact that a smaller amount was spent on the purchase of books, in the year under review.

The percentage of Hindu boys of school-going age under instruction has risen from 11·72 to 13·90, and of Mahomedan, from 35·30 to 38·42. The larger percentage of Mahomedan boys under instruction is due, partly, to the fact that Mahomedans are, as a rule, inhabitants of towns, in which education is more advanced, and partly to the activity of the Anjuman Islamia. Hindu boys contribute mainly to the general advance, their number under instruction having increased by 17,526, or by 18 per cent.; whilst Mahomedan boys exhibit an increase of 8 per cent. only. The number of Gonds and other aboriginal tribes under instruction has declined from 1,946 to 1,393; whilst under "others," *viz.*, the lower castes, there has been an increase of 82 per cent.

The number of Hindu girls in schools was 5,037 as compared with 4,680 and of Mahomedan 430, as against 410 in the previous year.

There is a decline in the number of the richer classes attending school which is attributable to the high rate of fees charged to the wealthier portion of the community. Under "middle classes," *viz.*, those whose income varies between Rs. 5,000 and Rs. 200 per annum, there has been an increase of over 5 per cent.; whilst the poorer classes attending school, *viz.*, those whose income falls below Rs. 200 per annum, have increased by 21 per cent. The middle classes furnish 14 per cent. of the total number under instruction, and the poorer classes 85 per cent. As regards occupation, it is a satisfactory feature that agriculturists, who form about 36 per cent. of the total number at school, contribute largely to the general advance in education. The increase in this class of the community under "instruction" amounts to 9,153, or 22 per cent.; while artizans, whose education is of no less importance, show an increase of as much as 29 per cent.

The total expenditure was Rs. 8,67,439, as compared with Rs. 8,63,900 in the previous year. A decrease of expenditure from Provincial Funds under "Secondary and Primary Schools" and an increase of expenditure under "Local and Municipal Boards Schools" is due to the transfer of a number of Middle and Primary Schools to local management.

A large increase of Rs. 16,581 under "Aided Schools," due to the opening of new schools on the combined system in the extension of Primary education, and on school buildings (Rs. 19,255), was counterbalanced by a decrease of Rs. 23,667 on the purchase of books, and by savings in the pay of the Principal of the Jubbulpore College and of the Inspector of Schools, Southern Circle.

The sources from which the expenditure was met are compared below:—

Sources.	1891-92.	1892-93.
	Rs.	Rs.
(1) Provincial Revenues	3,85,739	3,26,287
(2) Local rates and cesses	1,74,868	2,10,780
(3) Municipal funds	72,743	83,308
(4) Fees	95,969	1,03,351
(5) All other sources	1,34,581	1,43,713
TOTAL ...	8,63,900	8,67,439

Of the total expenditure, 37·6 per cent. was met from Provincial Funds, as against 44 per cent. in the previous year.

Local rates and cesses furnish 24·2 per cent., as compared with 20·2 per cent., and Municipal Funds 9·5 per cent., as against 8·4 per cent. The fee revenue is represented by Rs. 1,03,351, or nearly 12 per cent., of the total expenditure, as compared with Rs. 95,969 or 11·1 per cent. The receipts from other sources furnish 16·5 per cent.

Results of Examination.

43. The results of the various examinations for which students from these Provinces appeared, are compared below:—

	1891-92.	1892-93.
1. M. A. Passes	4	2
2. B. A. do.	19	17
3. F. A. do.	59	46
4. Matriculation Passes	99	227
5. Middle School do.	395	480
6. Upper Primary do.	7,378	7,235
7. Lower Primary do.	9,696	9,852
8. School of Art do.	78	73
9. L. M. and S. (Surgery) Passes	...	2
10. B. L. Passes	2	7

Two students passed the M. A. Examination as against four last year. The results of the B. A. and F. A. Examinations show a slight decline. The results of the Matriculation Examination are very encouraging, 227 students having passed as compared with 99, whilst 480 candidates passed the Middle School Examination, as against 395, in the previous year. In the Upper Primary Examination, there has been a decline of 143 in passes, whilst in the Lower Primary Examination the number of passes has increased by 156. The results of the Bombay School of Art Examination were creditable, 73 candidates passing, as against 78 last year. This may be regarded as satisfactory, considering the fact that Drawing has but recently been introduced into these Provinces. Two candidates passed the examination of Licentiate in Medicine and Surgery, and 7 the B. L. Examination of the Calcutta University, as against 2 in the previous year.

The number enrolled and the average attendance were 249 and 208, as compared with 232 and 188 respectively in the previous year. The increase is doubtless due to the policy of Sir A. Macdonnell in enforcing the previously existing rules regarding admission to the public service, which require certain academical qualifications for the higher appointments under Government. The B. A. has ceased to be a drug in the market, now that certain appointments are reserved for men possessing those qualifications. The fee receipts aggregated Rs. 5,221 as against Rs. 4,638. The total cost of educating each pupil in the Government College was Rs. 193 as against Rs. 151 in the Aided Colleges. The cost to Government of educating each pupil was Rs. 127 in the Government College, against Rs. 21 in the Aided Institutions.

The number of High Schools remains the same, but the strength has declined from 660 to 584. The falling off is, mainly, due to the smaller number of admissions into the High School department, owing to the decrease in the number of passes in the Middle School examination of the year 1892, when the standard of that examination was, for the first time, raised.

44. The Matriculation and Middle School results are compared below :—

	1891-92.		1892-93.	
	Presented.	Passed.	Presented.	Passed.
Matriculation	284	99	339	227
Middle School	930	395	960	480

The increase of passes by both examinations, especially in the Matriculation Examination, is satisfactory.

The number of Anglo-Vernacular Middle Schools is, at present 65, and of Vernacular Middle Schools, 190. Anglo-Vernacular Middle Schools show a nominal increase of 1,419 in strength, which is mainly accounted for by the absorption into the Middle department of the first English class, hitherto treated as a separate institution. Deducting, for the sake of comparison, the numbers in those classes, the figures stand as follows :—

Number on rolls { 1892 ... 4,339
1893 ... 4,328

The decline is explained, partly, by the closure of two Anglo-Vernacular Middle Schools, *viz.*, the 2nd grade Anglo-Vernacular Middle Schools at Multai and Betul, and partly by the operation of the new Fee Code, the rates for English education having been slightly raised. The decline is probably merely temporary. The decrease under Government Middle Schools, and the increase under Local Fund and Municipal institutions, is explained by the transfer of certain Government institutions to local management. The new Upper Primary Examination scheme, which renders a pass by that examination a condition of admission into the Middle department, and therefore prolongs the period of purely vernacular instruction from 3 to 4 years, will doubtless increase the efficiency of Anglo-Vernacular schools. Students will be better able to grapple with the difficulties of English at a more advanced age and after they have gained a sound knowledge of their own vernacular. All the Anglo-Vernacular Middle Schools are now provided with physical science apparatus. Instruction in the subject has improved, as, the work of the itinerant instructors in science being finished, each school has one or two masters who are competent to teach it. Drawing continues to increase in popularity. The process of supplying each school with a separate instructor, who has passed the 2nd or 3rd grade of the Bombay School of Art has been carried on, separate drawing masters having been appointed for the Wardha and Narsinghpur Middle Schools. Physical training has received as much attention as in previous years. Regard has been had to the cultivation of habits of courtesy and respect for authority in school boys, the result being a marked improvement in discipline. Vernacular Middle Schools have increased by 19 in schools and by 2,686 in pupils. The increase is due to the raising of the standard of certain Vernacular Primary Schools to the status of Middle Schools.

The number of Primary Schools on the 31st March 1893 was 1,776 with 100,560 pupils, as compared with 1,493 schools and 83,683 pupils on the corresponding date of the year 1892. Schools have increased by nearly 19 per cent., and pupils by a little over 20 per cent. It may be mentioned that the increase is greater than has been shown in any previous 20 years in the Educational history of these Provinces. The actual increase is nominally reduced by a change of classification, *viz.*, the absorption into the Middle department of the 1st English class, hitherto classed as Primary. Vernacular Primary Schools have increased by 347, or 24 per cent., in institutions, and by 18,707, or nearly 23 per cent., in pupils.

The extension of Primary education, to which Sir A. MacDonnell gave a new and special development, was started with generous support from the Provincial revenues. Rs. 25,000 were in the beginning of the year allotted to the different District Councils for the purpose of opening new Primary Schools; the allotment for the current year is Rs. 50,000, and a similar grant will be made in 1894-95. The money allotted by the Administration is expended in the form of (1) subsistence allowances to village schoolmasters and (2) result-grants earned by the same masters; the maxixum cost of each school being limited to Rs. 68 per annum. The "combined system," as it is called, renders the master, by the payment of a subsistence allowance, independent to some extent of such accidents as may cause the loss of his result-grant; while the offer of a result-grant acts as an incentive to work. One hundred and twenty-three Vernacular Primary Schools were opened on this basis in the Northern Circle, 135 in the Southern Circle and 89 in the Eastern Circle. In the Eastern Circle the plan is not a novelty, there being already a considerable number of "combined system" schools in existence there.

The provision of an adequate teaching staff was one of the first difficulties to be faced in connection with the project for extending Primary education. The difficulty has been met by attaching training classes for village schoolmasters to the principal Vernacular Middle Schools in each district, bonuses being offered to the head-masters who succeed in passing students by the Teachers' Certificate Examination. With an increase of schools and schoolmasters, an increase in the inspecting agency becomes essential, and the more so as examinations for result-grants form a larger part of the duties of the inspectorate. A proposal to appoint three Assistant Inspectors of Schools and seven Sub-Inspectors was accordingly submitted to the Government of India, but on financial grounds the latter appointments only have been sanctioned.

Female Education.

45. The comparative statement showing the progress of female education in these Provinces is summarized in the following table:—

Class of Schools.	Schools.		Pupils.	
	1891-92.	1892-93.	1891-92.	1892-93.
Secondary Schools ...	8	11	278	334
Primary Schools ...	135	143	5,712	6,040
Total ...	143	154	5,990	6,374

From this it will appear that there has been an increase of 11 in schools, and of 384, or rather over 6 per cent., in pupils. The percentage of girls of school-going age under instruction is only ·9. Female education can, indeed, hardly be said to have made a beginning in these Provinces. It is probable that much progress cannot be expected in the education of women, until public opinion is sufficiently advanced to appreciate its importance. The number of girls reading in boys' schools has considerably increased, especially in the Northern and Eastern Circles. In the Northern Circle, it has more than doubled during the year. The Mission Girls' School at Seoni is reported to have improved since its transfer to Municipal management. The Girls' School at Balaghat is reported to be in bad order, but steps are being taken to improve it. Needle-work has received increased attention, and kindergarten teaching has been continued with success.

Schools for Mahomedans and aboriginal tribes.

46. It would seem a slur on Mahomedan enterprise in the matter of education to class the Mahomedans of these Provinces with the aboriginal tribes, for, in point of the number of children under instruction, they lead the van. It is, however, to be regretted that so few of them continue their studies to a higher standard, so as to qualify for admission into the public service, in which they are, at present, but poorly represented. The Anjuman-Islamia doubtless had this object in view, when they opened a High School department in connection with their Middle School in Jubbulpore. The number of Mahomedan boys at school has increased from 8,423 to 9,167, bringing the percentage of boys of school-going age under instruction to 38·42 per cent., from 35·30 per cent.

The number of children of the aboriginal tribes at school has declined from 1,947 to 1,406. It is, however, satisfactory to note that the more favourable rates in the result-grant rules, which allow grants for Gonds and other aboriginal tribes at 50 per cent. higher, are beginning to be appreciated by schoolmasters. In fixed stipend schools, aborigines are rarely found; but in the combined system schools of the Raipur District the number of Gond students is on the increase, every schoolmaster, it is reported, trying (with an eye to the result-grant) to admit as many Gonds as he can.

Schools for Europeans and Eurasians.

47. The number of schools for Europeans and Eurasians remains the same, but the strength has increased by 87 and the average daily attendance by 15. Nine students passed the Matriculation Examination, the number of passes in that examination being *nil* in the previous year. Thirty-one candidates passed the Middle School and 35 the Upper Primary Examination, against 40 and 42 respectively last year. The Methodist Mission School at Sitabaldi was closed, and a new Railway School opened at Bilaspur. The boarding accommodation, in such schools as are provided with boarding-houses, is adequate. A new boarding-house has been erected in the St. Aloysius' School, Jubbulpore. The general standard of instruction has been maintained. Drawing continues to make progress. Kindergarten is excellently taught in the Convent Schools, Nagpur and Jubbulpore, the Christ Church Girls' School, Jubbulpore, and the Bishop's School, Nagpur.

Physical training has received attention. The musical drill of the students in the St. Francis de Sales' School, Nagpur, is specially worthy of notice. Instrumental music is taught in the St. Francis de Sales' School, Nagpur, and the St. Aloysius' School, Jubbulpore, each school having its own band of boy performers.

Technical Education.

48. The number on the rolls of the Agricultural Class, Nagpur, at the close of the year was as follows:—

Senior Class	... 11
Junior Class	... 10

The annual (1st year) and final (2nd year) examinations were held in March last. Nine students passed the annual examination, whilst all the students presented for the final examination were successful, and were awarded certificates. They will, under the rules, have a preferential claim for employment in the Revenue and Settlement Departments.

The subjects of instruction comprised the following:—

Theory and Principles of Agriculture.
Elementary Chemistry.
Botany.
Geology.
Elementary Anatomy.
Physiology and the Elements of Veterinary Surgery.
Land Surveying.
Drawing.

The discipline of the institution has improved, all the students taking kindly to practical work, in regard to which there had been some difficulty in previous years. Each student was allotted half an acre of ground, on which he grew his own crop. All the operations, from the preparation of the ground to the threshing of the crops, were carried out by the students themselves, without assistance.

The sum realized from the sale of the crops was Rs. 74-15-0, as against Rs. 66 in the previous year, each student appropriating the value of the produce of his own plot. The outturn would have been greater but for the damage done by cattle, in the absence of a fence to protect the plots. Arrangements have, however, been made to fence in a portion of the plots. The boarding-house, in which 13 students were accommodated, is reported to have been well managed during the year. Practical lessons in Veterinary Surgery were given in the Veterinary Dispensary attached to the institution.

The Normal Class for the training of schoolmasters in the proper method of teaching the Agricultural Primer was successfully managed during the year. Two batches of students from the different districts of the Provinces joined the school. The first batch, 30 in number, joined in June and left in October, after the examination in Agriculture, in which 29 passed. The second batch, 29 in number, joined in October, and left at the end of March, 28 being successful in the test examination.

The number on the rolls of the Engineering Class at the end of the year was as follows:—

Senior Section	... 7
Junior „	... 3

The final examination of the senior class was held in April 1892. Two of the three candidates passed, and were awarded certificates as Sub-Overseers. They subsequently obtained employment in the Public Works Department.

In spite of the demand that exists for men trained in Engineering, great difficulty has been experienced in obtaining suitable candidates for the class. This has been attributed, partly, to the superior attractions of the Arts course, and, partly, to the location of the class at Nagpur, "among a Maratha population with a tendency, in the present time, to sedentary habits." It was accordingly decided to remove it to Jubbulpore, and constitute it an Engineering department of the Jubbulpore College. Its association with a large institution, such as the latter, will, it is expected, tend to give it greater prestige and increase its popularity.

The number of students at the Jubbulpore Law Class rose by one, and that at the Nagpur Law Class by five. Seven students appeared for the B. L. Examination of the Calcutta University, of whom six passed.

At the Normal Schools, while the number of students increased from 195 to 212, the results obtained during the year under review were disappointing. The number of students who obtained certificates was only 99, as compared with 153 in the preceding year, and 138 in 1890-91.

3.—*Literature and the Press.*

49. The publications noted below were issued during the year 1892:—

List of Publications.

Subject.	Language.	Nature of contents.
(1) Fiction.	Marathi.	"Rupsen and Chandrakala." A novel.
	Hindi	"Prem Sunder Natak." A novel.
(2) Language	Hindi and English	"Elementary Lessons on English Composition."
(3) Law	English	"The Central Provinces Civil Courts Act (XVI of 1885)."
(4) Poetry	Marathi	"Sugriva Shatak." A miscellany on moral and intellectual subjects.
(5) Religion	Hindi	"Brahma-Mochan Brahma Bilas."
	Marathi	"Gotra-Ghatita."
(6) Science, natural and other.	Hindi	"Object Lessons, or Padarth-mala, Part II."

50. Presses exist in the following nine districts of the Central Provinces:—Nagpur, Jubbulpore, Saugor, Seoni, Hoshangabad, Narsinghpur, Nimar, Chhindwara and Raipur. There is also a press in the Nandgaon Feudatory State; the press in the Bamra Feudatory State has once more come into existence. Ten Vernacular and English newspapers are published in the Central Provinces. The Vernacular newspaper "Bhonsla" published at Nagpur has ceased to exist, and in its place a newspaper called the "Deshsewak" has been started in Nagpur.

4.—*Literary Societies.*

Libraries and Literary Societies.

51. The number of Libraries and Literary Societies is 30, as against 29 in the previous year. The most important are the following :—

1. Native General Library, Nagpur.
2. Native Library, Umrer.
3. Sitabaldi Reading Room.
4. Public Library, Bhandara.
5. Native General Library, Wardha.
6. City Library, Chhindwara.
7. Public Library, Burhanpur.
8. Hit Sabha, Saugor.
9. General Library, Damoh.
10. Mahajani Sabha, Murwara.
11. Anjuman-Islamia, Murwara.
12. Do. do. Jubbulpore.
13. Morris Memorial Library, Khandwa.
14. Church Mission School Library, Jubbulpore.

5.—*Arts and Sciences.*

52. The number of Museums in the Provinces remains the same, *viz.*, 2—the Provincial Museum at Nagpur and the local one at Raipur. The institution at Nagpur is in the charge of the Agricultural Department, and receives from Provincial revenues an annual grant of Rs. 1,552. The expenditure during the year was Rs. 1,076-5-10, of which Rs. 787-3-1 represented cost of establishment, and Rs. 289-2-9 was spent on contingencies. The balance to the credit of the Museum Fund at the close of the year was Rs. 1,956-6-2.

The objects added to the collection during the year were samples of coal, images of Krishna, stones and specimens of coins; and a number of books as usual were sent by the Inspector-General of Education under the provisions of Act XXV of 1867.

During the year the Museum was visited by 226,078 persons, of whom 101,592 were men, 79,701 women and 44,785 children.

53. The Raipur Museum is in charge of the local District Council. The year opened with a balance of Rs. 1,715-12-0, to which were added Rs. 400—the contribution from the District Funds. The contribution from the Municipality was discontinued four years ago. The total expenditure during the year under report was Rs. 937-13-11, of which Rs. 338-0-5 was spent on the usual establishment charges, and Rs. 599-13-6 on account of the purchase of exhibits from the North-Western Provinces, through the Commissioner of Settlements and Agriculture, Central Provinces, to whom, for this purpose, an advance of Rs. 400 was made during the year in addition to Rs. 300 advanced during the year before last.

Admission to the Museum is free of charge. The number of visitors during the year was 128,500, as against 137,758 in the previous year. This decrease was not due to any lack of interest on the part of the public, but was owing to defective arrangements as regards the opening and closing of the Museum.

The balance at the close of the year was Rs. 1,140-14-5.

CHAPTER VIII.—ARCHÆOLOGY.

This Department is not under Provincial management, and no operations were carried on in these Provinces during the year.

Secretariat Press, Nagpur:—16-2-94—325.

INDEX.

STATISTICAL TABLES.

I.—Statistics of Physical, Political and Fiscal Geography.

A.—Physical Geography,—including area, character of the surface and climate.
B.—Political relations with Native States.
C.—Civil Divisions of British Territory.
D.—Population,—classified as far as possible.
E.—Fiscal Statistics,—including Survey, Settlement, Landed Tenures and Land Revenue.

II.—Statistics of Protection.

A.—Legislative.
B.—Judicial—Civil and Criminal Courts.
C.—Prisons.
D.—Police.
E.—Registration.
F.—Military.
G.—Marine.

III.—Statistics of Production and Distribution.

A.—Finance.

I-B. 1.—Political Relations.

Native States.

Name of State.	In subsidiary alliance or Feudatory.	Tribute in men or money.	Population.	Supposed gross revenue.	Military force.	Transit duties or not.	Principal articles of production, including manufactures and mines.
1	2	3	4	5	6	7	8
		Rs.		Rs.			
1. Bastar* ...	Feudatory.	17,200	3,10,840	2,00,000	See foot-note (3).	None.	Rice, oilseeds, dyes, dammer, silk cocoons, lac, galls, fibres, some iron, horns, hides, wax and honey. There is a considerable traffic in teak timber, which is sent to the coast.
2. Kanker* ...	Do.	*Nil.*	82,449	60,000	Ditto.	Do.	Rice, kutki, kodo, lac, gum, &c.
3. Patna* ...	Do.	8,500	3,29,855	1,13,000	Ditto.	Do.	Rice, pulses, oilseeds, sugar-cane and cotton. No manufactures of importance. Iron-ore found in many parts, but no mines are regularly worked.
4. Kalahandi* ...	Do.	12,000	3,25,993	1,30,000	Ditto.	Do.	Rice, pulses, oilseeds, sugar-cane and cotton; wheat also grown in some parts. No important manufactures and no mines.
5. Sonpur ...	Do.	9,000	1,95,532	82,000	Ditto.	Do.	Rice, pulses, oilseeds, sugar-cane and cotton. No manufactures of importance. Iron-ore found in many parts, but no mines are regularly worked.
6. Bamra ...	Do.	1,500	1,04,393	52,000	Ditto.	Do.	Rice, pulses, oilseeds, sugar-cane and cotton; also some valuable sal forests; lac is found in considerable quantities. Iron-ore very abundant. No manufactures of importance.
7. Rairakhol ...	Do.	800	20,334	22,000	Ditto.	Do.	Rice, pulses, oilseeds, sugar-cane and cotton; also some valuable sal forests; lac is found in considerable quantities. Iron-ore very abundant. No manufactures of importance. Agriculture backward.
8. Raigarh* ...	Do.	4,000	1,67,756	1,03,500	Ditto.	Do.	Rice, pulses, oilseeds, sugar-cane, cotton, and a little wheat and gram. No manufactures of importance, and no mines worked though iron is abundant.
9. Sarangarh* ...	Do.	3,500	83,230	55,000	Ditto.	Do.	Ditto ditto.
10. Sakti ...	Do.	1,300	25,369	27,800	Ditto.	Do.	Rice, wheat, oilseeds and cotton; also some forest produce, but not much, consisting of lac, resin, gum and mohwa fruit.
11. Kawardha* ...	Do.	32,000	91,783	94,000	Ditto.	Do.	Ditto ditto.
12. Khairagarh ...	Do.	70,000	1,81,132	2,17,000	Ditto.	Do.	Cotton, rice, wheat, gram, &c. Some iron-ore.
13. Nandgaon ...	Do.	70,000	1,84,112	1,93,000	Ditto.	Do.	Rice, tur, wheat, gram, oilseeds, cotton and coarse cloth.
14. Chhuikhadan ...	Do.	15,000	36,131	65,000	Ditto.	Do.	Wheat, gram, cotton, &c.
15. Makrai* ...	Do.	*Nil.*	18,549	95,156	Ditto.	Do.	Wheat, gram, rice, &c., gum, mohwa, chironji and achar, &c. No manufactures worthy of note. Iron-ore exists, but no mines are regularly worked.

NOTE—(1) States marked thus (*) are under British management.
(2) The population shown in column 4 is given according to the census of 1891.
(3) All the Chiefs have followers or retainers of kinds, but no accurate information regarding their equipment and discipline exists. They have no Military force in the real sense of the term.

I-B. 2.—Feudatory Chiefs and principal male members of their families.

Name of State.	Name and age of Chief, and family to which he belongs.	Caste or race and religion.	How educated.	By whom the State is at present administered.	Has sanad authorising adoption or not	Family follows primogeniture or not.	Has male heirs or not.
1	2	3	4	5	6	7	8
1. Bastar ...	Raja Rudra Pratap Deo, 8	Rajput.	Being educated at Jagdalpur by a private tutor.	Government.	Has sanad.	Follows primogeniture.	Is a minor.
2. Kanker ...	Maharajadhiraj Narhar Deo, 43	Chatri, Hindu, Vaishnawa.	Knows Hindi, Urdu, Uriya and Sanskrit.	Government, on account of Chief's unsoundness of mind.	Do.	Do.	Has no direct male issue, but has a brother and a nephew.
3. Patna ...	Maharaja Ramchandra Singh Deo, 21	Chowhan Rajput.	Educated at the Rajkumar College at Jubbulpore.	Government.	Do.	Do.	Just married.
4. Kalahandi * ...	Raja Raghu Keshari Deo, 22	Kshatri Nagbansi.	Under training at Raipur.	Do.	Do.	Do.	Not married.
5. Sonpur ...	Raja Pratap Rudra Singh Deo, 38	Chowhan Mahapatra.	Knows Uriya.	The Chief, assisted by a Diwan appointed by Government.	Do.	Do.	Has five sons.
6. Bamra ...	Raja Sudhal Deo, C. I. E., 44	Gangabansi.	Knows Uriya, Bengali, Hindi and Sanskrit.	The Chief.	Do.	Do.	Has a male heir.
7. Rairakhol ...	Raja Bisbnu Chandra Jenamani, 73	Rajput.	Knows Uriya and Hindi.	The Chief, assisted by a Diwan appointed by Government.	Do.	Do.	Do.
8. Raigarh ...	Raja Bhup Deo Singh, 25	Raj Gond.	Knows Hindi, Urdu and English.	Government.	Do.	Do.	Do.
9. Sarangarh ...	Raja Jawahar Singh, 5	Raj Gond, Hindu.	A child.	Do.	Do.	Do.	Is a minor.
10. Sakti ...	Raja Rup Narain Singh, 36	Raj Gond.	Knows Hindi, Urdu and Persian.	The Chief, assisted by a Diwan appointed by Government.	Do.	Do.	Has one brother aged 27, and one son, aged a year and a half.
11. Kawardha ...	Thakur Kritpal Singh, 7	Do.	A child.	Government.	Do.	Do.	Is a minor.
12. Khairagarh ...	Lal Kawal Narain Singh, 23	Rajput, Hindu.	Knows Hindi well and a little English.	The Chief, assisted by a Diwan appointed by Government.	Do.	Do.	Has a male heir.
13. Nandgaon ...	Balram Das, †Raja Bahadur, 28	Bairagi, Hindu.	Knows Hindi and a little English.	Do.	Do.	Do.	Has no male heir.
14. Chhuikhadan ...	Mahant Sham Keshore Das, 53	Do.	Knows Hindi.	Do.	Do.	Do.	Has a male heir.
15. Makrai ...	Raja Lachushah *alias* Bharatshah, 47	Gond.	Was educated by a private tutor in Hindi.	Government.	Do.	Do.	Has two sons, aged 17 years and 8 years, respectively.

* The Raja of Kalahandi is entitled to a salute of 9 guns.
† This is a personal distinction (*vide* Foreign Department Notification No. 15-I, dated the 3rd January 1893).

I. C.—Civil Divisions of British territory.

Districts.	Number of Judicial and Revenue Sub-Divisions.	Area in square miles.	Population.	Chief towns with population.	Number of villages.	How many Civil and Revenue Judges of all sorts.	How many Magistrates of all sorts.	Maximum distance in miles of villages from nearest Court.	Average distance in miles of villages from nearest Court.	Number of Police.	Total cost of officials and Police of all kinds.	Revenue.

III-A.—Finance II.

Account of Expenditure from the Net Income of the Central Provinces for the year 1892-93.

Head of Expenditure.	Amount. Last year.	Amount. Present year.	Cause of Increase or Decrease.
	Rs.	Rs.	
IMPERIAL.			
Civil and Political Establishments ...	95,075	(a) 1,15,531	(a) The increase is due to the entire charges of the office of Civil Account and Audit having been debited to Imperial in 1892-93.
Civil Contingencies ...	82,923	(b) 18,241	(b) Includes Rs. 75,715, for the year 1891-92 and Rs. 9,822 for the year 1892-93, on account of Census Establishment and contingencies, the details for which are not maintained in this office.
Registration ...	21,491	19,943	
Interest on Ordinary Debt ...	28	...	
Interest on Other Obligations ...	2,863	959	
Police ...	2,889	...	
Miscellaneous ...	4,142	4,030	
TOTAL IMPERIAL ...	2,09,411	1,58,704	
PROVINCIAL.			
Civil and Political Establishments ...	6,65,345	(c) 7,37,272	(c) The increase is due to the charges of the office of Revenue Secretary to the Chief Commissioner having been debited in 1891-92 for only a portion of the year, and also to the charges connected with the combined office of the Inspector-General of Stamps, Registration and Excise having been transferred to this head from 1892-93.
Civil Contingencies ...	2,10,141	2,15,932	
Judicial charges—Courts, &c. ...	7,54,152	(d) 8,12,912	(d) The increase is due to the re-organization of the Central Provinces Commission, having been fully in force in 1892-93.
Registration ...	21,492	19,943	
Interest on Ordinary Debt ...	28,205	34,517

V.—C. 1. STATEMENT showing particulars of Vaccination in the Central Provinces during the year 1892-93.

No.	District.	Population of districts according to Census of 1891.	Average population per square mile.	Average number of vaccinators employed throughout the year.	Total number of persons vaccinated.			Average number of persons vaccinated by each vaccinator.	Primary vaccination.				Re-vaccination.		Percentage of successful cases.		Persons successfully vaccinated per 1,000 of population.	Average annual number of persons successfully vaccinated during previous five years.		Average annual number of deaths from small-pox during previous five years.	
									Total.	Successful.			Total.	Successful.	Primary.	Re-vaccination.		Number.	Ratio per 1,000.	Number.	Ratio per 1,000.
										Under one year.	Over one and under six years.	Total number of all ages.

Reg. No. 613, Comr., C. P.—Nov. 94.—360.

Litho, S. I. O., Calcutta.

ADMINISTRATION REPORT

OF THE

CENTRAL PROVINCES

FOR

1893-94.

PART I.

GENERAL SUMMARY.

In the second part of this Report detailed facts and figures are given for the calendar year 1893 respecting the Judicial, Jail, Police and certain other Departments, and for the official year 1893-94 respecting the remaining Departments, the period dealt with in each case depending on the dates prescribed for the submission of the various annual reports by Heads of Departments. The following General Summary deals with the same periods.

The Chief Commissionership.

2. The charge of the Provinces was held by Sir A. P. MacDonnell, K. C. S. I., from the 1st April to the 25th May 1893, and by Mr. Woodburn for the rest of the year. During the year the Chief Commissioner visited eleven out of the eighteen districts in the Provinces, travelling during part of the cold weather by the ordinary marching stages, and partly by railway or by posting. At each district head-quarters an inspection of the various offices and institutions was made; and addresses from the District Councils and Municipal Committees were received and answered. The Chief Commissioner also visited nine out of the fourteen Feudatory States in the Chhattisgarh Division, accompanied by the Commissioner and the Political Agent. As the railway at present touches very few of these States, Mr. Woodburn marched through parts of the others. He was glad to find that, on the whole, the administration of the States was satisfactorily carried on. The sanction of the Government of India was obtained during the year to the installation of the Maharaja of Patna and of the Rajas of Kalahandi and Raigarh, and the ceremony of their installation was carried out by the Chief Commissioner in public darbar at Raipur in January 1894. During the same month the water-works for the supply of Nandgaon were completed, and were formally opened by the Chief Commissioner. The restoration of the Kanker State—which was temporarily taken over owing to the illness of its Chief—has been sanctioned by the Government of India since the close of the year. The most progressive States are Bamra and Khairagarh. Trade is developing rapidly in all the States. Settlement operations, following the principles observed in British territory but on a simpler system, were carried out in all the States except Kalahandi and Rehrakole. The working of the Police was efficient and free from complaint. Medical treatment and vaccination were at once more efficient and more widely-diffused. Education made satisfactory progress.

Survey and Settlement.

3. Assessment operations were in progress in seven districts of the Provinces—Saugor, Jubbulpore, Narsinghpur, Hoshangabad, Chhindwara, Wardha and Nagpur, and detailed field inspection was completed during the year in all of them in which it was not already complete. The assessment of revenue proper was brought to a standstill in Saugor owing to the total failure of the wheat crop. Operations have been finally wound up in Wardha, Narsinghpur

and Jubbulpore. Just before the close of the year settlement operations were started in three more districts—Betul, Bhandara and Seoni. Cadastral survey prior to re-settlement was in progress in four districts—Mandla, Chanda, Bhandara and Balaghat. In the Mandla District 1,300 square miles still remain for survey, but in the other districts mentioned the survey is complete. The gradual re-survey of the better established villages in the Zamindari Estates of Chhattisgarh has progressed satisfactorily. The traverse survey of all the Chanda Zamindari Estates, except Ahiri, has now been completed. Very few appeals have been made from the assessments of the Settlement Officers, and the revision of rents and revenues has been generally moderate and judicious.

Waste Lands.

4. The allotment of waste lands in the Charwa tract of the Hoshangabad District has continued, the total allotted up to date amounting to an area of 110 square miles with an assessment of Rs. 63,722. The conduct of these arrangements has been excellent, but the area under ryotwari cultivation is now so large, and the work of supervision so considerable, that the Chief Commissioner is satisfied of the need of a special establishment for its management. Arrangements to that end are now being made. In the adjoining district of Nimar some 4,000 acres, bearing an assessment of Rs. 3,145, have been allotted during the year. In Mandla the area taken up bears a revenue of Rs. 2,700, and allotment has been started in Balaghat. The work of excision of cultivated or culturable lands, at present included in the Government Reserves, has been vigorously pushed on.

Estates under Court of Wards.

5. One hundred and thirty-one estates were under management at the close of 1892-93, and three new estates were brought under management in the course of the year. Ten estates were made over to their owners during the year, thus leaving 124 under management at its close. The aggregate income of the estates under management exceeded 17 lakhs of rupees. The combined area of the estates released from management during the year amounted to 327 square miles, and their rent-roll exceeded Rs. 31,000. The cost of management during the year came to 9 per cent. of the gross income. Considerable attention was given to the adequacy of subordinate establishments, and the introduction of a really efficient and intelligent estate supervision. A larger aggregate sum was advanced in Takavi and spent in estate improvements than in the previous year; budgets were more carefully framed, schemes of improvement drawn up, and arrangements made for securing some professional supervision, where this was not already available. The total rental demand and collections of the year were Rs. 11,44,321 and Rs. 10,27,594 respectively. Of the current rental demand 7 per cent. remained uncollected at the close of the year, an improvement on the results of 1892-93. The conversion of grain into cash-rents was proceeded with, and there are now comparatively few cases in which grain-rents are still paid. The progress made during the year in the repayment of debt was, in most estates, satisfactory. Rupees 1,92,753 were paid off in 79 encumbered estates, and the unliquidated balance at the close of the year amounted to Rs. 10,76,365. The important subject of the education of minor proprietors has received attention, and complaints of neglect of studies by the young wards are less frequent than they were in previous reports.

Police.

6. Excluding public and local nuisances, the number of offences reported in 1893 was 19,555 as compared with 21,933 in 1892. Only one class of crime showed an increase, *viz.*, "Class II—Serious offences against the person." The decrease mainly occurred under the two heads of offences against property, serious offences having fallen from 5,657 to 4,737, and minor offences from 12,879 to 11,341. This decrease was almost uniform throughout the Provinces, and is ascribed to the improved circumstances of the mass of the people owing to the low prices of food-grains. Murders increased from 144 in 1892 to 160 in 1893. Dacoities without murder were 3 only against 27 in the previous year—a remarkable diminution, which was mainly due to the vigilance of two police officers, Mr. A. C. Hankin and the late Mr. Naylor, and their untiring pursuit of every band on the borders. With a decrease in the total number of offences reported, there was an increase in the percentage of cases investigated, and the question is now under discussion whether investigation by the police in petty crime is not carried to unnecessary and even injurious lengths. The system of beat-patrols was materially lightened, to the advantage

both of the police and the people. The measure of success achieved by the police showed improvement, the percentage of cases convicted to investigated—which is the test by which police action is usually gauged—having risen slightly.

Criminal Justice.

7. The number of cases which came before the Magistrates during 1893 was 29,936 as compared with 30,145 in the previous year. Offences against the human body show little change; the number reported was 7,769 against 7,666 in 1892; while offences against property have fallen from 9,791 to 9,059—a decrease due to better harvests and consequent easier circumstances of the poorer classes. The Honorary Magistrates were fewer by nine than in 1892. During the year 43,858 persons were brought before the Magistrates for enquiry or on trial; of these, 22,918 were convicted or committed, while 19,274 were acquitted or discharged, the percentage of convictions being 52·2. The number of persons disposed of by the eight Courts of Sessions and Additional Sessions Judges was 252 as against 239 in 1892, and the convictions per cent. were the same—65.

Prisons.

8. The number of persons admitted into the jails of the Central Provinces during the year amounted to 12,687, of whom 7,261 were convicts, 5,389 under-trial and 37 debtor prisoners. There was a considerable decrease in the number of convicts received into jail as compared with 1892. The number of civil prisoners has largely decreased. The average daily population was 4,418 as against 4,747 in 1892 and 4,674 in 1891. The number of offences recorded against the prisoners was practically the same as in the previous year. The expenditure under all heads has fallen by Rs. 20,000, and, as compared with other Provinces, is moderate. The system, however, by which the grain required for rations was procured on advances made to growers for delivery at harvest was stopped, and as there is abundant store-room in every jail in the Province, the plan was prescribed of purchase at harvest time for each jail of the grain required for consumption during the ensuing year. The method of employment also came under revision. Outdoor occupation for short-term prisoners was strictly limited, and their intramural employment confined to forms of simple but genuinely hard labour. The cost per head remained about the same in both years. The daily average of sick fell from 144·53 to 123·92, and the ratio *per mille* on average strength from 32·2 to 29·5. Deaths decreased from 204 to 82. There was a general improvement in the health of the prisoners, and the death-rate in the Jubbulpore Central Jail, once noted for its exceptionally high mortality, has sunk to the low figure of 9·6 *per mille*.

Civil Justice.

9. The number of Courts open at the close of 1893 was 206. Three new Courts were created. The number of suits instituted and re-instituted rose from 101,498 in 1892 to 103,438 in the year under report. The total value, as computed under the Court Fees Act, of suits instituted in 1893 was Rs. 1,01,68,373 as compared with Rs. 1,07,93,661 in 1892. The percentage (to total suits) of suits between landlord and tenant has decreased from 11·9 in 1892 to 11·8 in 1893, the total number of suits being 12,229. The distribution of suits was much the same as last year. The average duration of both contested and uncontested cases has risen considerably, while the number of hearings is slightly less. The number of appeals disposed of was 8,403 as against 7,782 in 1892. The number of applications for execution of decrees presented during the year was 95,680, of which 11,289 were left pending at the close of the year. The fees levied for the service and execution of processes amounted to Rs. 2,42,447, and the charges incurred in their execution to Rs. 91,406, thus leaving a profit of Rs. 1,51,041. The whole of the process-serving establishment has been re-organized, and the new scale came into force with effect from the 1st April 1893.

Registration.

10. The number of Registration Offices was 88 as compared with 86 in the previous year. The total number of documents registered in Books I, III and IV rose from 31,103 to 32,941, or by 5·9 per cent. The aggregate value of property transferred rose from Rs. 1,18,36,553-2-5 to Rs. 1,28,28,929, or by 8·3 per cent. The gross receipts of the Department rose from Rs. 1,12,129-1-9 to Rs. 1,21,727-2-6, or by 8·5 per cent. The expenditure fell from Rs. 48,412-13-10 to Rs. 42,761-4-2, or by 11·6 per cent. Taking the statistics of the Province as a whole, the increase in registrations is confined to the head "Compulsory," optional registrations being very slightly below the level of 1892-93.

Municipal Administration.

11. The number of Municipalities was 55, one less than in the previous year, the Kareliganj Municipality having been abolished. The number of members was 626, of whom 5 were *ex officio*, 451 elected and 170 nominated. General elections were held in 23 Municipalities, and there were in addition 10 bye-elections. The attendance of voters was fair. Excluding the head "Debt" the total income of Municipalities was Rs. 13,07,302 as compared with Rs. 12,44,040 in the preceding year. Octroi yielded Rs. 7,89,696 as against Rs. 7,33,642 in the previous year, giving an increase of Rs. 56,054. The increase was very general, and is explained by the considerable fall in this class of income in the previous year. The year under report is also said to have been a favourable one for Hindu marriages, leading to increased consumption of dutiable articles. Other heads of income show a general increase. The total expenditure during the year was Rs. 12,76,547 as compared with Rs. 15,79,774; this latter figure, however, includes a special item of three lakhs for water-works in Raipur. The closing balance of the year is Rs. 6,35,783 as compared with Rs. 5,40,219 at the end of the previous year.

District Councils and Local Boards.

12. There was no change during the year under report in the number of District Councils and Local Boards in the Central Provinces. There are 17 of the former and 53 of the latter constituted under Act I of 1883. The total number of members was 1,197. Of these 11 were *ex officio*, 122 officials and 23 Europeans and Eurasians. The year opened with a balance of Rs. 4,20,937 and closed with one of Rs. 4,15,912. Apart from contributions and deposits, the income of the District Funds amounted to Rs. 6,57,842 against Rs. 6,28,677 in the preceding year. Local rates, which are the main source of income, rose from Rs. 3,14,718 to Rs. 3,23,273 with the increase of land revenue consequent on revision of settlements. The total expenditure was Rs. 8,88,380 as compared with Rs. 8,66,977 in the previous year. The increase occurred under both the main heads of expenditure, that for Education having risen from Rs. 2,47,839 to Rs. 2,57,181 and that for Civil Works from Rs. 3,16,136 to Rs. 3,41,423. The work of the District Councils is still lacking in method and in vigour, but for this the Councils require more full and early information as to the means at their command than they have in the past been receiving. Arrangements have been made to remedy this defect, and the Chief Commissioner trusts that with more careful help and advice from the Deputy Commissioner the work of the Councils may be much improved.

Agriculture.

13. The main features of the agriculture of the year are the increase of current fallows in the three districts of Nagpur, Wardha and Chanda, the great diminution of wheat cultivation in the Nagpur, Seoni and Bhandara Districts, and the universal increase in the areas cropped with linseed. The diminution of wheat cultivation in the districts mentioned was due to the damage by rust in the previous year, which made seed somewhat scarce and lowered the demand for wheat; and the great accession to linseed cultivation was due to high prices and good crops. Cotton continues to be grown over larger areas in the important cotton districts of Nimar, Nagpur and Wardha.

Weather and Crops.

14. The monsoon rainfall of 1893 was abundant, but its distribution in all the districts of the Provinces was very unequal. It commenced in the first week of June and practically closed in the middle of September. Up to the end of June the fall was very light. Very heavy rain fell during the months of July and August. The fall in October, which is so necessary for the preparation of the ground for the *rabi* sowings, was generally sufficient everywhere. Up to the month of January the prospects of the spring crops were excellent in every district, and the people were confidently looking forward to a bumper harvest. At this time, however, the weather suddenly became abnormal, heavy rain falling in February, March and April, with long intervals of cloudy weather and occasional hailstorms which caused much damage to the ripening plants. The rice crop was, on the whole, a very fair one. The crops of *juar*, *tur*, *tili*, *kodon*, *kutki* and other minor grains and pulses were generally distinctly better than those of the preceding year. The wheat crop promised unusually well up to January, but prospects were considerably marred by the unseasonable weather and low temperature of February and March. The heavy rainfall during these months and the subsequent continued cloudy weather induced rust in wheat, and in the districts of Saugor and Damoh the result was the complete destruction of the wheat harvest and the commencement of a scarcity for the relief of which important measures were required in the current year.

At the commencement of the year under review prices of agricultural produce ruled high; but later on, especially after the *rabi* harvest, the price of all produce fell, except in Balaghat and Sambalpur, and remained low throughout the year. Wheat was cheaper than in the previous year, despite the damage done to the *rabi* harvest by the unseasonable rains of February and March, and this fall in price is attributed to the diminished demand for export owing to the inferior quality of the grain. *Juari, kodon* and *kutki* were also generally cheaper than in the previous year.

Forests.

15. The area under the administration of the Forest Department was practically unchanged. In the Northern Circle 582 square miles were marked off for excision for cultivation as suitable settlers are found. The progress made in this direction in the Southern Circle was much smaller, and special efforts are now being made for the completion of an enquiry, which is essential to the proper adjustment of working-plans for the forest proper. The system of provisional working-plans, prescribed by Sir A. P. Macdonnell in 1893, also made excellent progress in the Northern Circle; 317 circles were formed, covering an area of 1,700,000 acres. These are of the greatest value for a more methodical working of the forests in anticipation of the more elaborate methods of the Forest Code, and in substitution of the prevailing system of unregulated fellings. But the experience of the year proved that these provisional plans could not be worked up to in consequence of the rigidity of the low but fixed rates for the sale of forest produce. The Conservators were accordingly authorized to treat these rates as maximum rates, and under those limits to regulate their prices by demand, an adjustment essential to the improvement to the forests and an important concession to the people. The receipts of the forests diminished by nearly a lakh of rupees, a result partly due to the reduction of the forest prices in 1893 to a low uniform rate, partly to the rapid restriction of unregulated fellings.

Trade.

16. The imports of the year amounted to 7,750,447 maunds in weight and Rs. 4,26,33,366 in value, and the exports to 19,371,766 maunds valued at Rs. 5,90,87,163. The imports closely approximate in bulk to those of the year preceding, which, however, they exceed in value. Exports, on the other hand, have fallen a little, both in bulk and value, as compared with those of 1891-92; as compared with the last year they have increased in bulk, but declined in value, this decline being of course due to the fall in prices of agricultural produce. The import traffic is increasing year by year, and unsatisfactory harvests have failed to check this increase to any appreciable extent. In the year under consideration the imports exceeded the average of the five years 1883 to 1888 by 64 per cent. in weight, and by 20 per cent. in value. The amount of exports, however, fluctuates considerably, as they consist for the most part of raw produce, and must of necessity vary with the demand of Europe and other Indian Provinces and the supply at home in the shape of the character of the harvests. The rise in prices of agricultural produce is shown by the fact that, while the exports have increased by 23 per cent. in weight, they have risen by 42 per cent. in value.

Public Works.

17. An important feature of the year's administration was the inauguration of a scheme for the construction of roads in the Feudatories and Zamindaris of the Chhattisgarh Division. It having come under observation that a considerable amount of money was available for expenditure on public works in certain Feudatory States and Zamindaris under Government management, it was deemed desirable to utilize this money in the construction of roads with the view of bringing them into communication with the Bengal-Nagpur Railway. Since the close of the year another important administrative change was sanctioned in the amalgamation of the Kanhan and Plateau Roads Divisions, the combined Division being termed the "Plateau Division," with head-quarters at Seoni in the Seoni District. The total expenditure incurred on public works by the Public Works Department during the year 1893-94 under the several branches of service amounted to Rs. 30,62,477. Beyond a few minor works, and the maintenance and repair of existing buildings, nothing was done under the head "Imperial Civil Works." The total outlay on Provincial Services amounted to Rs. 18,33,498 against Rs. 17,46,205 expended during the previous year. The new Law Courts at Nagpur, which were commenced in May 1892, were completed and occupied

during the year. They were formally opened by the Chief Commissioner on the 18th August 1893. A new circuit-house at Saugor was completed and furnished, and the construction of similar buildings at Hoshangabad and Betul was sanctioned during the year, and fair progress made. At Raipur a bungalow was purchased for Rs. 25,000, and converted into a court-house for the Commissioner at a further cost of Rs. 2,500. Additions and alterations to the district court-houses at Raipur, Hoshangabad and Khandwa were also sanctioned, but little progress made. The total outlay under the head of Communications amounted to Rs. 3,12,287 against Rs. 3,16,797 in the previous year. During the year estimates for new roads, aggregating 86¾ miles in length, were sanctioned. The expenditure on maintenance and repair of Provincial roads amounted to Rs. 4,89,474 against Rs. 4,06,016 in the previous year. The mileage maintained was 1,236¼ of metalled and 6,420 of unmetalled roads. The water-supply scheme for the town of Rajnandgaon, of which mention was made in last year's report, was completed during the year, and the works were formally opened by the Chief Commissioner on the 19th January 1894. Since then the scheme has worked well, and a constant supply of good water has been given to the town. Since the close of the year an estimate was sanctioned for the Jubbulpore Water-Works extension amounting to Rs. 2,44,110; and new schemes for water-supply to the towns of Khandwa and Harda are under consideration. The Water-Works at Nagpur, Jubbulpore, Raipur and Hinganghat were efficiently maintained by the Public Works Department during the year.

Industries.

18. The number of factories increased from 16 to 22. Cotton forms the staple of the Central Provinces factory industries, five mills, eight cleaning factories and four presses being engaged with this product. Of the remaining five factories, one deals with oil and flour, one with pottery, one is a colliery, and two are railway workshops. In addition to District Magistrates, all Civil Surgeons have been appointed *ex-officio* Inspectors of Factories. The provisions of the Act and of the rules framed thereunder appear to be generally observed in the registered factories. Numerous sanitary improvements were suggested by Inspecting Medical Officers, and these, as a rule, were attended to. The sanitation in the factories under native management is somewhat defective. The health of the operatives is stated to be good. Fencing is reported to be adequate. There were 69 accidents reported during the year, of which 32 were serious and 1 fatal. It is stated that the wages paid in factories are higher, and the operatives better off than in other employments of corresponding status. Employment in the factories is eagerly sought after.

Revenue.

19. The total Revenue of the year amounted to Rs 1,58,33,477 and the Expenditure to Rs. 1,05,32,935. These figures show a surplus of Revenue over Expenditure of Rs. 53,00,542, or about 4½ lakhs less than that for 1892-93. Rs. 69,23,404 of the Revenue and Rs. 10,11,349 of the Expenditure were Imperial, the balance being Provincial and Local. The arrangements with the Government of India for the administration of the Provincial Services, which were made for five years from the 1st of April 1892, remained in force during the year under review. Under the terms of the present Provincial Contract one-fourth of the land revenue is Provincial, and a lump assignment of Rs. 22,05,000 is made from Imperial to the credit of Provincial revenues. After adding the lump assignment of Rs. 22,05,000 to land revenue, and including the contributions to and from local revenues, the actual Provincial Revenue and Expenditure of the year 1893-94 amounted to Rs. 78,48,588 and Rs. 84,59,043, respectively, as against Rs. 78,28,464 and Rs. 80,46,443 for the year 1892-93. The final result of the year's transactions is that the Provincial balance has decreased from Rs. 18,36,360 on the 31st March 1893 to Rs. 12,25,905 on the 31st March 1894. The Provincial balance on the 31st March 1894 was therefore more by about 4½ lakhs than the minimum fixed by the Government of India.

Excise.

20. The net Excise revenue again showed a slight increase as compared with the previous year, while the gross receipts advanced by nearly half a lakh of rupees. This increase occurred in spite of the abolition of 147 outstills and the closing of 754 shops for the sale of liquor, opium and ganja. The most important administrative change during the year was the extension of the combined distillery and bonded-warehouse system to the Nagpur District

as a consequence of its success in Nimar. The question of the introduction of the same system into the other districts of the Province was carefully considered during the year, and it was decided to introduce it at once into the Nerbudda Valley Districts, and, with effect from the 1st April 1895, into the Bhandara District bordering on Nagpur. In Nagpur and Nimar the new system worked well, and resulted in materially increasing the retail price of liquor and diminishing consumption while not seriously affecting the revenue from this source. The detailed enquiries as to the supposed substitution of ganja for liquor and opium, which were referred to in last year's review, were completed during the year. It was found that in the two districts where, owing to the introduction of the bonded-warehouse system, the price of liquor had been materially raised, there had actually been a decrease in the amount of ganja sold, while in no case was any reliable evidence forthcoming to show that the use of ganja was supplanting that of other intoxicants. A change of some importance which was made during the year was the resumption, under the orders of the Government of India, of the excise rights of the Chhattisgarh Zamindaris, and excise arrangements in those remote tracts will now be placed on the same regular footing as in the adjoining khalsa districts.

Stamps.

21. The gross receipts from Stamp Revenue exceeded by 3½ per cent. those of the preceding year, and were the largest ever reached. The only heads under which decrease occurred were sales of receipt and hundi stamps, while there was a marked increase in the sales of other non-judicial stamps. The action taken in regard to impounding insufficiently stamped documents, which was unsatisfactory in the preceding year, improved considerably, and 648 documents were impounded as against 558 in 1892-93.

Vital Statistics.

22. The number of births registered during the year 1893 was 3,63,209 as against 3,64,745 in 1892. The total number of deaths registered during the year was 2,63,143 or 61,205 less than in 1892. The decrease is observed under all heads (excluding small-pox), and this is in great measure due to the diminished prevalence of cholera in the Province, from which cause there were only 557 deaths against 39,972 in 1892. There has not been so low a death-rate recorded since 1884. The number of deaths registered from small-pox during the year was 1,602, or 607 more than in 1892. The death-rate is the lowest but two of any recorded in the past 20 years.

Medical Relief.

23. The number of dispensaries open at the close of 1893 was 111, one more than in the preceding year. The total number of patients, both in-door and out-door, treated during the year was 1,094,054 against 972,427 in the previous year, giving an increase of 121,627. There has been an increase during the year of 463 in the number of in-door patients. There was an increase of 121,164 in the number of out-patients treated in the dispensaries of the Province, evidence, in a healthy year, of increased attention to the patients and of their increased confidence in the hospital officers. There was similarly a very satisfactory improvement over former years in the surgical work done in the Provinces, the increase over the last year's figures being not less than 30 per cent. The total income of the dispensaries was Rs. 1,50,039 as against Rs. 1,48,363 in the previous year.

Vaccination.

24. The vaccinators of both Provincial and Feudatory States performed a total of 440,656 operations. Last year the number of vaccinations performed by this staff was 435,410. The percentage of successful primary vaccination was 95·48 against 96·68 in 1892-93. The cost of the Provincial vaccine establishment of 1893-94 amounted to Rs. 49,700-8-10 against Rs. 47,918-14-6 in 1892-93. Experimental cultivation was again carried on at Pachmarhi with the view to supply a sufficient quantity of animal lymph with which to begin the operations of the working season. The Vaccination Act was extended during the year to 10 municipal towns on the application of the Committees concerned.

Lunatic Asylums.

25. The two lunatic asylums of the Province contained 304 patients at the end of the year. Both asylums were healthy and both were economically managed.

Education.

26. There is an increase of 168 schools and 14,607 pupils. In two years 470 new schools have been established and 35,675 new pupils brought on the rolls, the immediate result of the additional grant from Provincial revenues of Rs. 50,000 per annum, which Sir A. MacDonnell gave to the Department in 1893 for the extension of primary education. Broadly speaking, every rupee

of this grant has brought a new learner to the schools. An establishment of Inspectors has been entertained to ensure the thorough and systematic inspection of all schools, and particularly of those which have been newly opened. The curriculum in rural schools has been wisely simplified, and the hours of study shortened, to adapt them to children who, often helping in the fields or living at a distance, would not otherwise attend. The Hindi Readers were pedantic; they are being revised to bring them into better accord with the common language of the people. In the higher classes a very much improved collection of lesson-books has already been substituted. The supervision in the rural schools of the Local Boards and Tahsildars has been more closely defined and promoted, and, with the consent of each municipality concerned, a system has been introduced in the Anglo-Vernacular municipal schools, by which the schoolmasters will have wider openings for advancement, and the municipalities will, in consequence, secure the services of a better class of teachers. The provision of boarding houses for High and Middle Schools has made steady progress. There have been failures. The scheme of classes for training teachers in Middle Vernacular Schools was pushed forward too rapidly, and must be narrowed. Even among the High Schools there are some the management of which has not given satisfaction, but, on the whole, there is no Department of the Administration in the Province which, during the last year, has made such signal progress. The total receipts from fees rose from Rs. 1,03,351 in 1892-93 to Rs. 1,22,082 in the year under report, an increase of 18 per cent. The results of examinations indicate very varying degrees of success. In the University examinations the Provinces are shown to have done very well. Four Central Provinces students took the M. A. degree from the Presidency College, Calcutta, while the number of B. A. passes rose from 17 in the previous year to 36 (four with honours) in the year under report, and of F. A. passes from 46 to 68. In matriculation, on the other hand, occurred a remarkable failure, for the number of passes fell from 227 to 117. This failure occurred from all High Schools, and alike at the Calcutta and Allahabad examinations; it is attributed to the raising of the standard by the Universities. Both candidates and passes at the Middle School examination have largely increased.

PART II.

CHAPTER I.—PHYSICAL AND POLITICAL GEOGRAPHY, &c.

At pages 1 to 56 of the Administration Report for 1892-93 will be found an account of the following subjects drawn up for standard reference:—

1.—*Physical features of the country, area, climate, &c.*
2.—*Historical Summary.*
3.—*Form of Administration.*
4.—*Character of Land Tenures.*
5.—*System of Survey and Settlement.*
6.—*Civil divisions of British Territory.*
7.—*Details of the last Census—Tribes and Languages.*

8.—*Changes in the Administration.*

2. Sir A. P. MacDonnell, K. C. S. I., held charge of the office of Chief Commissioner from the 1st April to the 25th May, and Mr. J. Woodburn, C. S. I., for the rest of the year.

9.—*Relations with Feudatory States.*

3. Of the eight Feudatory States which were last year under Government control, the management of Makrai was made over to the Raja during the year, and that of Patna, Kalahandi and Raigarh very shortly after its close. There are now therefore only four States—Bastar, Kanker, Sarangarh and Kawardha—which are under direct management, while of the remaining eleven, nine are administered by their own Chiefs with the assistance of Government Diwans, while in two—Bamra and Raigarh—no such restriction has been placed on the Raja's authority.

4. The sanction of the Government of India to the restoration of the Raja of Makrai was obtained during the year, and the Raja was formally installed by the Commissioner.

5. The sanction of the Government of India was also obtained during the year to the installation of the Maharaja of Patna and of the Rajas of Kalahandi and Raigarh, and their installation was carried out in public darbar at Raipur in January last. Of the four States managed by Government, three—Bastar, Sarangarh and Kawardha—are managed on account of the minority of their Chiefs. Kanker was taken over because its Chief was unable by reason of mental affliction to carry on his administration. His health has, however, materially improved, and his restoration has been sanctioned by the Government of India since the close of the year.

6. The year on the whole was particularly happy and free from trouble throughout the States. With the one exception of Chhuikhadan, there is not a single State in which some good progress was not made, and in which the net result of the year's administration may not be regarded as favourable.

7. The most progressive States are Bamra and Khairagarh. In Sonpur a good deal has been done by the Raja during the year to put the administration of his State on a sounder footing.

8. Raja Rup Narain of Sakti has, so far, fully justified the confidence shown in him by Government in installing him in the place of his father. He has conducted his administration with economy and prudence. The enterprise and public-spirit of the Raja of Nandgaon were in fresh evidence during the past year. Water-works for the supply of Nandgaon were completed, and were opened by the Chief Commissioner in January last. A cotton mill was in process of

building, for which the Raja provided part of the capital, and which will open a new industry to the people of Chhattisgarh. But police work was bad; education has been neglected, and the completion of the settlement work of the State has been inordinately delayed. Moreover, nothing was done during the year for the improvement of communications, for which there is still so much scope. In Rairakhol education has been vigorously taken up with satisfactory results.

9. The conduct of the Chief of Chhuikhadan is reported to have been obstructive and obstinate. A strong remonstrance was addressed to him in regard to the delay in settlement operations.

Crops and trade.

10. The expansion of trade and the rise in prices cannot but have materially benefited the cultivating classes. The demand for land is in most parts increasing; and indeed all classes of the people appear to be fairly prosperous and contented, and there are no signs of distress.

11. In one sense complaints may be said to be far from uncommon. But complaints against the policy of a Chief, or allegations of injustice or oppression practised by him, either on his subjects generally or on any class of them, have been practically unknown. Petitions containing allegations of a general nature were generally either anonymous or were found on enquiry to be made in a fictitious name. The bulk of the petitions received were of the nature of appeals against decisions affecting individuals.

12. The rainfall was, generally speaking, abundant and seasonable, and good harvests are reported from the majority of States. The exceptions are Nandgaon, Khairagarh, Chhuikhadan, Kawardha and Rairakhol. But in not one of these can the outturn be described as a particularly bad one. Nowhere was there anything like failure of crops, or anything approaching to agricultural distress. Wheat and spring crops generally suffered from an untimely fall of rain in the early months of the year.

13. Trade is developing steadily in all the States, chiefly of course in those which have been reached by the railway. The opening of the new Spinning and Weaving Mills at Rajnandgaon, which is shortly expected, should afford a great stimulus to the production of cotton both in Nandgaon itself and in neighbouring States.

14. The public health was generally good throughout the year, and there were no serious epidemics in any of the States.

Survey and Settlement.

15. Settlement operations at one stage or another were in progress in all States, except Kalahandi and Rairakhol. Final assessments were sanctioned in Kanker, Sakti and Kawardha, the sanction in the last case not being received till after the close of the year. The progress made with the work in other States was generally satisfactory, especially so in Khairagarh.

16. The working of the Police throughout the States appears to be very fairly efficient. The States which at the present time are the least satisfactory in this respect are those of Chhuikhadan and Kawardha. Of the four States referred to last year as affording most room for improvement, the necessary steps were taken during the year by Nandgaon, Sonpur and Sarangarh; and in the two last named improvement has already been very marked. The case of Kawardha has only been taken up since the close of the year.

Sanitary.

17. The popularity and usefulness of the hospitals and dispensaries are steadily growing, and the number of patients treated during the year has again largely increased. Every State maintains at least one such institution—several of them more than one — all under competent management. Even Chhuikhadan, which was the exception last year, has now a small dispensary at head-quarters.

18. Vaccination has made good progress everywhere except in Nandgaon, Khairagarh and Sakti.

Education.

19. Education made good progress during the year. In most of the States new schools were opened, and in nearly all the numbers of pupils increased, and better figures of attendance were secured. The great need of the States, taken as a whole, is a properly organized inspecting agency; and proposals for the supply of this need are now under the consideration of the Chief Commissioner.

20. The Central Provinces system of Excise Circles is that followed in the great majority of the States. The question of whether any modifications of

existing arrangements are needed in the interests of the aboriginal tribes of Patna and Kalahandi is now one for the consideration of the young Chiefs of those States, and no interference seems to be called for at present. Excise.

21. In Bastar no alterations have hitherto been found practicable, and it seems advisable to wait for fuller experience of existing conditions. The appointment of an Excise Darogah, which is about to be made, should prove useful in this respect.

22. A Pandhri tax, analogous to that in force in the British territories of the Central Provinces, is now levied in all States except Bamra. It is apparently not indigenous to any of the States, but has been introduced, either under the administration, or through the influence, of British officers, as a substitute for various old forms of taxation which were considered objectionable. The Raja of Bamra is alone in abstaining altogether from direct forms of taxation other than that on land. He considers that such taxation is calculated to discourage traders from settling in his State. The tax known as "Pandhri" in this State is a small indirect tax of the nature of a customs duty on exports. Taxation.

CHAPTER II.—ADMINISTRATION OF THE LAND.

1.—*Survey and Settlement.*

The assessments previously sanctioned were announced during the year in the rest of the Wardha and Jubbulpore Districts, in the whole of the Narsinghpur District, and in parts of the Nagpur, Hoshangabad and Chhindwara Districts. They have been received without complaint, and appeals, whether against revenue or rents, have been few.

2. Assessment operations were in progress in seven districts—Saugor, Jubbulpore, Narsinghpur, Hoshangabad, Chhindwara, Wardha and Nagpur, and detailed field inspection was completed during the year in all of them in which it was not already complete. The assessment of revenue proper was brought to a standstill in Saugor owing to the total failure of the wheat crop, and operations have been finally wound up in Wardha, Narsinghpur and Jubbulpore.

3. Just before the close of the year settlement operations have been started in three more districts—Betul, Bhandara and Seoni. It is expected that settlement operations will be practically out of hand in the districts of Chhindwara, Nagpur and Hoshangabad by the 31st March 1895. Some delay has been caused in the case of the two latter districts by the deputation of the Settlement Officers of those districts for a few months without substitutes, and the settlement in them will probably not be wound up till a few months later. Details are given below of the progress made in each district during the year ending the 30th September 1894 :—

District.	Approximate area re-assessed.	Number of estates.	Approximate gain in land revenue.
	Sq. miles.		Rs.
Jubbulpore	334	218	12,167
Narsinghpur	1,119	652	1,27,750
Hoshangabad	187	121	28,759
Chhindwara	1,019	697	37,922
Wardha	1,003	866	57,377
Nagpur	1,144	924	68,594

4. Excluding the survey of Zamindari villages in Chhattisgarh, which will be presently noticed, cadastral survey prior to re-settlement was in progress in four districts only—Mandla, Chanda, Bhandara and Balaghat. In the Mandla District 1,300 square miles still remain for survey, but in the other districts mentioned the survey is complete. The outturns and cost rate per square mile were as follows :—

District.	Outturn of field survey.	Cost rate per square mile.
	Sq. miles.	Rs.
Mandla	724	36
Chanda	294	84
Bhandara	614	37
Balaghat	678	22

The cost in Chanda is high, owing to the fact that operations were being drawn to a close and the work was scattered and expensive to supervise; operations in this district connected with the settlement of waste lands were distinct from the regular operations, but their cost has been added. In Mandla also the expenditure includes cost of land allotment.

5. The gradual re-survey of the better established villages in the Zamindari Estates of Chhattisgarh has progressed satisfactorily, the staff employed being

small. The area surveyed in each district and the cost per square mile is shown below :—

District.	Area surveyed.	Cost rate per square mile.
	Sq. miles.	Rs.
Raipur	295	21
Bilaspur	274	24
Sambalpur	177	42

The traverse survey of these districts is now complete, and the outturns will be larger next year, when the staff will be able to work at its full strength throughout. The traverse survey of all the Chanda Zamindari Estates, except Ahiri, has now been completed, and the cadastral survey will start this season.

2.—*Waste Lands.*

6. The allotment of waste lands in the Charwa tract of the Hoshangabad District has continued, the total allotted up to date amounting to an area of 110 square miles with an assessment of Rs. 63,722. In the adjoining district of Nimar some 4,000 acres, bearing an assessment of Rs. 3,145, have been allotted during the year. In Mandla the area taken up bears a revenue of Rs. 2,700, and allotment has been started in Balaghat.

7. The work of excision of cultivated or culturable lands, at present included in the Government Reserves, has been vigorously pushed on. Proposals for the assessment of 57 villages in the Damoh District have been received, and the work of allotment will shortly commence, as numerous applications have been received. In Mandla the excision and assessment of 209 villages have been sanctioned, and further proposals for excision are under consideration. In the Balaghat District proposals have been received for 230 villages, and here also some further area has yet to be settled. In the Chanda District, besides the working out of proposals for the ryotwari settlement of 45 villages in the Sironcha Tahsil, and for a block of waste land near Chanda, excision proposals have been sanctioned for an area of about 250 square miles scattered over the Cis-Wainganga Reserves, and their demarcation and settlement is now being undertaken. In this district some 27 applications to settle rice land villages have been received, and await disposal pending the survey of the areas applied for.

3.—*Wards Estates.*

8. One hundred and thirty-one estates were under management at the close of 1892-93, and three new estates were brought under management in the course of the year. Ten estates were made over to their owners during the year, thus leaving 124 under management at its close.

The causes which led to the assumption of the management of these several estates by the Court of Wards are specified below :—

60 on account of the minority of the proprietors ;
2 in consequence of the owners' unsoundness of mind or incapacity to manage their affairs as adjudged by the Civil Court ;
10 owing to the disqualifications specified in sub-clauses i, ii and iii of Section 7 (1) (*c*) of the Court of Wards Act ;
49 on the owners' application, Section (7) (*c*), sub-clause iv, of the Court of Wards Act.

The aggregate income of these estates exceeded 17 lakhs of rupees.

9. A list of the estates released from management during the year is given in the margin. Their combined area amounted to 327 square miles, and their rent-roll exceeded Rs. 31,000.

1. Bhidari	Jubbulpore District.	
2. Imlai		
3. Dhuma		
4. Khursepar of Nathe Khan	Seoni do.	
5. Bamhni		
6. Khursipar of Lotan.	Seoni District	
7. Khamaria ...	Narsinghpur ,,	
8. Khadgaon & Bhatra.	Nagpur ,,	
9. Hari Bhao's estate.	Chanda ,,	
10. Khuji ...	Raipur District.	

Of these, eight were released on the proprietor attaining majority, and two on the debt due by the estate being liquidated.

10. With regard to the three estates brought under management during the year, two were taken over on account of indebtedness, and one in consequence of the minority of the proprietor.

11. The receipts of Wards Estates under the main heads of income for the last year were Rs. 17,00,684 as against Rs. 16,52,455 in 1892-93.

12. The following table gives the main items of expenditure for each of the last three years:—

Head of Expenditure.	1890-91.	1891-92.	1892-93.	+ or −
	Rs.	Rs.	Rs.	Rs.
Government Revenue and Cesses ...	5,27,627	5,29,063	5,18,180	−10,903
Village servants	35,481	32,043	15,049	−16,994
Management	1,39,873	1,33,885	1,63,056	+29,171
Interest on debt	64,787	75,443	67,920	−7,523
Personal expenses	3,35,771	3,39,385	3,46,216	+6,831
Education	47,386	54,393	58,195	+3,802
Miscellaneous	2,07,881	2,25,199	2,52,365	+27,166
Total ...	13,58,806	13,89,431	14,20,981	+31,550

The chief items which call for comment is the largely increased expenditure on cost of management and on personal expenses. Under the former head the increase was confined to the Chhattisgarh Division, where the rapidly growing administrative needs of the large Zamindari Estates have necessitated considerable addition to existing establishments. The larger expenditure on the personal needs of the wards and their families was due to special causes and was confined to a few estates. Thus in Pagara (Chhindwara District) Rs. 7,000 were spent on the marriage of the Jagirdar, while the re-marriage of the Onkar-Mandhata ward cost Rs. 5,000.

13. The cost of management during the year came to 9 per cent. of the gross income. Considerable attention has been given during the year to the adequacy of subordinate establishments, but the Chief Commissioner is of opinion that the present salary is perhaps not sufficient to attract really good men as managers, and he is prepared to consider proposals for increasing it.

14. As regards the methods in which the surplus funds of solvent estates were utilized, the following statement shows broadly the chief methods of investment and expenditure:—

Method of Investment.	1890-91.	1891-92.	1892-93.	+ or −
	Rs.	Rs.	Rs.	Rs.
In Government Securities or Railway shares.	51,279	11,165	2,000	−9,165
In other loans or Takavi	1,58,933	1,20,600	1,62,720	+42,120
In purchase of land or houses ...	11,436	35,692	11,833	−23,859
In estate improvements	58,450	75,635	81,232	+5,597

These figures show a larger aggregate sum advanced in Takavi and spent in estate improvements than in the previous year, but there is still room for increase, as in several estates large cash balances have not been utilized either in making useful improvements or profitable investments.

15. The total rental demand and collections of the year were:—

	Demand.	Collections.
	Rs.	Rs.
On current demand	10,40,610	9,69,940
On arrear ,, ...	1,03,711	57,654
Total ...	11,44,321	10,27,594

Of the current demand about 7 per cent. and of the arrears about 44 per cent. remained uncollected at the close of the year—a slight improvement on the results of 1892-93.

16. The efficiency of collections in each Division for the last two years is compared in the following table:—

Division.	1891-92.				1892-93.			
	Total demand.	Current demand.	Percentage uncollected.		Total demand.	Current demand.	Percentage uncollected.	
			Of total demand.	Of current demand.			Of total demand.	Of current demand.
	Rs.	Rs.			Rs.	Rs.		
Jubbulpore ...	2,35,131	1,98,994	11·	5·8	2,06,946	1,90,570	11·	8·
Nerbudda ...	3,38,969	3,01,539	15·	8·2	3,24,544	2,89,014	11·	5·
Nagpur ...	4,03,287	3,77,318	13·	10·	4,33,267	3,82,094	13·	9·
Chhattisgarh ...	1,72,526	1,71,799	·5	·4	1,79,565	1,78,932	·6	·6
TOTAL ..	11,49,913	10,49,650	11·	7·	11,44,322	10,40,610	10·	7·

The percentage of uncollected demand in the Jubbulpore, Nagpur and Chhattisgarh Divisions is practically the same as in the previous year, while in the Nerbudda Division there has been considerable improvement as compared with both of the last two years. The percentages of the demand which remain uncollected at the close of the year are still, however, too high in all Divisions, except Chhattisgarh.

17. The amount of tenancy litigation was greater than in the preceding year. There were 429 suits for arrears of rent as compared with 283 in 1892-93, and 5 notices of enhancement as against 2 in the previous year. The causes which led to the larger number of suits for arrears of rent are not given in the district reports. This feature in the returns was, however, probably due to the bad harvest of the previous year, leaving considerable arrears which fell to be realized in the year under review.

18. There were only 28 cases during the year in which occupancy rights were purchased by ordinary tenants, and all these cases occurred in the Bhonsla Estate.

19. The conversion of grain into cash-rents was proceeded with during the year, and there are now comparatively few cases in which grain-rents are still paid.

20. The progress made during the year in the repayment of debt was, in most estates, satisfactory. Rupees 1,92,753 were paid off in 79 encumbered estates, and the unliquidated balance at the close of the year amounted to Rs. 10,76,365, or a lakh and a quarter less than in 1892-93.

21. The important subject of the education of minor proprietors has received attention, and complaints of neglect of studies by the young wards are less frequent than they were in the reports of the previous year. Now that a Rajkumar College is to be opened at Raipur, it may be possible to send some of the wards of the larger estates to study there.

CHAPTER III.—PROTECTION.

1.—*Legislative Authority.*

The Legislative authority for the Central Provinces is the Council of the Governor-General of India for the purpose of making Laws and Regulations.

2.—*Course of Legislation.*

Acts passed.

2. The Acts of the Imperial Legislature passed during the year 1893, which affect the Central Provinces are as follow:—

(*a*) Acts specially applicable to the Central Provinces:—

Nil.

(*b*) Acts applicable to the Central Provinces in common with other parts or the whole of British India:—

Act I of 1893.—An Act to extend the provisions of the Banker's Books Evidence Act, 1891, to the books of the Post Office Savings Banks and Money Order Offices.

Act IV of 1893.—An Act to amend the Law relating to Partition.

Act V of 1893.—An Act to legalise in certain cases the execution within British India of capital sentences which have been passed by British Courts exercising, in or with respect to territory beyond the limits of British India, jurisdiction which the Governor-General in Council has in such territory.

Act VII of 1893.—An Act to amend the Inland Emigration Act, 1882.

Act VIII of 1893.—An Act to amend the Indian Coinage Act, 1870, and the Indian Paper Currency Act, 1882.

Act X of 1893.—An Act to amend the Excise Act, 1881.

3.—*Police.*

Amount of crime.

3. Excluding public and local nuisances, the number of offences reported in 1893 was 19,555 as compared with 21,933 in 1892. There is only one class of crime which shows an increase, *viz.*, "Class II—Serious offences against the person." The increase in this class is mainly due to the increase in the offence of hurt by dangerous weapons, the number of which rose from 262 in 1892 to 359 in 1893. These figures are to some extent due to the fact that orders were issued to the police in the districts of Narsinghpur and Bilaspur that all cases in which a *lathi* was used should be arrested by the police under Section 324, Indian Penal Code. These orders were disapproved by the Chief Commissioner. The decrease mainly occurs under the two heads of offences against property, serious offences having fallen from 5,657 to 4,737, and minor offences from 12,879 to 11,341. This decrease is almost uniform throughout the Provinces except in Chhattisgarh, and is ascribed to the improved circumstances of the mass of the people owing to the low prices of food-grains. In Chhattisgarh there were local causes at work in each of the three districts, and railway extension was a general factor in increasing crime in this Division; the total variations, however, are inconsiderable, and the causes mentioned appear to have operated to balance each other.

4. From the following table, which gives the number of offences reported under the several classes for the past five years, it will be seen that during the past year crime diminished considerably in comparison with any of the four years preceding. Comparing the figures for 1893 with those of 1892, after excluding public and local nuisances, there is a decrease in the aggregate of 2,378 cases, or 10·8 per cent. Including public and local nuisances the decrease amounts to 2,051 cases, or 8·4 per cent.

	1889.	1890.	1891.	1892.	1893.
Class I.—Offences against the State, public tranquillity, &c. ..	256	280	253	319	273
Class II.—Serious offences against the person ...	1,242	1,322	1,273	1,338	1,489
Class III.—Serious offences against the person and property or against property only ...	6,433	5,704	5,305	5,657	4,737
Class IV.—Minor offences against the person ...	135	113	117	120	119
Class V.—Minor offences against property ...	14,508	12,366	12,204	12,879	11,341
Class VI.—Other offences (excluding public and local nuisances).	1,560	1,639	1,705	1,620	1,596
Total ...	24,134	21,424	20,857	21,933	19,555
Also Class VI.—Public and local nuisances ...	1,715	1,860	2,453	2,349	2,676
GRAND TOTAL ...	25,849	23,284	23,310	24,282	22,231

5. With regard to the cases of rioting that occurred during the year two of them at least were reported by the District Superintendents to be attributable to the spirit of the Mahomedans, who were the aggressors, having been roused by the exaggerated accounts which had reached them of the occurrences at the Bombay riots. One of these cases took place at Wardha and the other at Hoshangabad. At the former some Mahomedans attempted to stop a Hindu procession on the plea that music was being played before their mosque. The Hindus, who were not prepared for a disturbance, sent intimation to the police, who promptly arrived on the scene and had no difficulty in inducing the Mahomedans to give way. Six of them were put on trial and convicted. No violence was used, but this was only due to the fact that the Hindus were unprepared and consequently unarmed. In the Hoshangabad case ill-feeling arose between Mahomedans and Hindus on the occasion of a Hindu festival, and eight Mahomedans were arrested and tried for forcibly resisting the order of the Tahsildar. There were a few other cases also in which religious feeling ran high. One of these occurred in the Jubbulpore City, the occasion being the Ram Lila festival, and would have culminated in a serious disturbance but for the tact displayed by the District Superintendent of Police. A number of sepoys of the Native Infantry stationed at Jubbulpore were present in the city and sided with the Hindus. They were called upon by a native of influence in the place to assist in bringing out the car at a time when, according to arrangements previously made, it was not to pass the Mahomedan quarter. Resistance to the order was not anticipated, everything having gone off quietly the day before, and had the police, who were considerably outnumbered, attempted to interfere they would certainly have been roughly handled. The aid of the Officer Commanding was therefore invoked, and with difficulty the sepoys were called away. The ringleader in this affair, a citizen of Jubbulpore, was prosecuted, and although four influential persons named in the District Superintendent of Police's report—two of them being Honorary Magistrates—warmly espoused the accused's cause, and the leading counsel of Jubbulpore was retained for the defence, a conviction and sentence of 2½ years' rigorous imprisonment and a fine of Rs. 200 was secured. At Damoh a riot was caused by some villagers, in the interests of the Gaorakshini Sabha, rescuing 50 head of cattle from some butchers who had purchased them for the Commissariat Department of Jubbulpore, the ostensible reason being that the cattle had trespassed on their pasture land. Eight persons were prosecuted to conviction. On the whole, however, it is gratifying to note, in view of the experience of other parts of India, that so few cases have to be reported in these Provinces where any ill-feeling arose between Hindus and Mahomedans, and that in none of these did anything like serious disturbance of the peace occur.

6. The more serious offences against the person reported during the past year and the three years preceding are contrasted in the following table :—

	1890.	1891.	1892.	1893.	Increase.	Decrease.
Murders — By thugs	...	...	...	...	...	...
Murders — „ dacoits	3	3	...	3	3	...
Murders — „ robbers	28	22	26	21	...	5
Murders — „ poison	8	4	17	17	...	...
Other murders	93	94	101	119	18	...
Total	132	123	144	160	16	...
Attempt at murder	18	19	29	17	...	12
Culpable homicide	18	22	20	21	1	...
Rape	78	44	58	63	5	...
Administering stupefying drugs	9	11	10	18	8	...
Total	255	219	261	279	18 (Net increase.)	...

Murders increased from 144 in 1892 to 160 in 1893. Of these 3 were committed by dacoits, 21 by robbers, and 17 by poison. Two of the murders by dacoits occurred in Hoshangabad. These were very serious dacoities by a large armed gang of professional criminals from Bhopal, no doubt the same in

each case. Much property was carried off, and other persons injured besides those murdered. The extradition of the persons concerned was not pressed, but in one case 14 persons were convicted in the Court of the Political Agent of Bhopal. There was one atrocious case of murder by robbers in the Seoni District, where five cartmen were drugged and killed with axes for the sake of property of inconsiderable value. The perpetrators were successfully brought to justice. Of other murders the most noticeable was a case in the Saugor District, in which a quarrel between relations led to the slaughter by two men of an entire family—men, women and children—to the number of 12, while the principal murderer killed his accomplice and then poisoned himself. In the Chanda District two constables who had reason to fear the result of a charge against them of taking bribes, ran "amuck," killed their Sub-Inspector and another constable, and, after other assaults and robberies, made their way to head-quarters with the expressed intention of killing their European officers. The kotwali police showed hesitation in dealing with them, but they were met with determination by the European officers; one was shot by the Civil Surgeon as he was rushing on the Deputy Commissioner, and the other was overpowered. The cases under the head of culpable homicide numbered 21, or one more than in 1892. They were all of the usual type—outbursts of passion leading to the use of violence resulting in death. Six cases were connected with women, in three of which outraged husbands killed either their own wives or their wives' paramours. All the other cases arose out of quarrels. The number of dacoities without murder amounted to 3 only against 27 in the previous year.

Police action.

7. The results of police action during the past two years are contrasted in the table furnished below:—

	1892.	1893.
Cognizable Crime.		
Total offences in columns 4 and 6 of Statement A	24,613	22,658
Total investigated (including expunged cases)	19,165	18,558
Percentage of cases investigated to reported	77·86	81·90
Do. do. convicted to investigated	56·93	57·62
Do. do. do. to tried	82·35	81·33
Number of persons arrested by police (column 21 of Statement A) ...	19,196	18,107
Do. do. by order of Magistrate (column 22 of Statement A) ...	2,249	2,294
Total number arrested ...	21,445	20,401
Percentage of persons discharged without trial to persons arrested by police ...	2·54	2·26
Do. do. put on trial to total arrested	96·89	96·45
Do. do. convicted to arrested by police	75·29	75·20
Do. do. do. to total arrested (column 23 of Statement A) ...	69·42	68·10
Do. do. do. to tried	71·25	69·64
Do. do. acquitted to tried	25·65	27·11
Non-cognizable cases.		
Total cases in which police were employed	258	488
Property stolen and recovered.		
Stolen in cognizable cases	5,59,897	5,27,582
Recovered	1,83,163	1,57,419
Percentage recovered	33	30

With a decrease in the total number of offences reported, there has been an increase of four in the percentage of cases investigated. The measure of success achieved by the police also shows improvement, the percentage of cases convicted to investigated—which is the test by which police action is usually gauged—having risen slightly.

Strength of force.

8. The sanctioned strength of the District Executive Force stood as follows at the close of the year 1893:—

1 Inspector-General.
18 District Superintendents.
2 Assistant District Superintendents, 1st grade.
6 Do. do. do. 2nd do.
36 Inspectors.
154 Sub-Inspectors.
5 European Sergeants.
1,157 Head Constables.
6,554 Constables.
102 Mounted Constables.

Five appointments in the grade of Inspector are kept vacant pending reduction of the five appointments of Assistant Superintendents, B. Division.

There has been no augmentation of strength in connection with Zamindaries, and the temporary police force entertained for dacoity work in the Saugor District continued to be employed throughout the year. Its retention up to the 30th September 1894 has now been sanctioned by the Chief Commissioner.

The strength of the Railway Police on the different lines stood thus during the year:—

Great Indian Peninsula Railway.

3 Inspectors.
5 Sergeants.
12 Head Constables.
171 Constables.

Bengal-Nagpur Railway.

1 Inspector.
3 Sergeants.
14 Head Constables.
150 Constables.

The establishment of chowkidars, with which the Railway authorities have everything to do, and who are in no way under the control of the District Superintendents of Police, have now been separated from the police force, although their pay will still form part of the cost of police, which is divided proportionately between the Company and the Government.

Distribution of force.

9. The Armed Reserves have become proficient in the drill in which they are instructed, as laid down in the Police Manual. They have also become fairly skilled in the use of the weapon with which they are armed, and the results of the shooting competition for prizes at the annual course are on the whole satisfactory. Much has also been done during the year to improve the training of the Mounted Police. In the districts of Saugor and Jubbulpore, at which sowars from out-stations are brought in during the rains, the services of instructors from the Bengal Cavalry were obtained and the Mounted Police put through a regular course of cavalry drill. For the Hoshangabad District a cavalryman was sent down from Saugor, and at Nagpur an ex-cavalryman has been engaged to keep the Mounted Police in training. Orders have been received for the issue of converted sniders to the police of six districts annually, the cost being met from the grant sanctioned annually for police buildings.

Punishments.

10. There is a satisfactory decrease in the number of punishments, both magisterial and departmental, the former having fallen from 94 to 79, and the latter from 617 to 578. The conduct of the force generally merited the Chief Commissioner's commendation. Their health also improved, the number of deaths having fallen from 156 to 112, and the percentage of admissions to hospital from 61 to 53.

11. The Bertillon system of anthropometry was not, for various reasons, introduced into these Provinces until the 1st January of the current year. In the first place, the instruments required for the purpose were procurable only in England, and had to be indented for. By the time the indent was complied with, and the instruments were received, it was found that an improvement on the instruments from England had been introduced in Bengal, and that the classification of subjects for anthropometric measurement had been revised. The instruments supplied to these Provinces were accordingly sent for alteration, and it was not until the close of the year that these were received back and our instructions revised on the Bengal system. Three Sub-Inspectors were deputed during the year to Calcutta to qualify in anthropometry. Assistant Superintendents were also instructed and sent round to the head-quarters of each district to instruct, and the system is now generally understood, and the record of measurements has from the 1st April of this year been made over to the police.

4.—*Criminal Justice.*

Number of cases reported.

12. The following figures show the total number of cases reported and the total number returned as true for each of the last six years:—

	Reported cases.	Cases rejected under Section 203, Criminal Procedure Code.	Cases declared false.	True cases.	Percentage of true to reported cases.
1888 ...	27,482	3,456	412	23,614	85·9
1889 ...	27,585	2,700	349	24,446	88·5
1890 ...	28,484	2,588	424	25,472	89·4
1891 ...	28,941	2,300	314	26,327	90·9
1892 ...	30,145	2,839	339	26,967	89·5
1893 ...	29,936	2,636	234	27,066	90·4

By reported cases is meant cases which come before Magistrates—not cases reported to the police. Offences against the human body show little change; the number reported was 7,769 against 7,666 in 1892; while offences against property have fallen from 9,791 to 9,059—a decrease due to better harvests and consequent easier circumstances of the poorer classes.

Strength of Magistracy.

13. The total number of Stipendiary Magistrates was the same as in 1892. There were seven more Magistrates of the 1st class, five less of the 2nd class and two less of the 3rd class. The Honorary Magistrates were fewer by nine than in 1892. The number of Honorary Magistrates of the 1st class was the same, while those of the 2nd class were increased by four, and there were 13 less of the 3rd class. The Benches at Seoni (Hoshangabad District) and Sambalpur were re-constituted during the year. The Benches at Sohagpur and Burhanpur were strengthened by the addition of more Honorary Magistrates, while the Court of the Cantonment Magistrate, Asirgarh, was abolished with effect from the 13th May 1893. One Honorary Magistrate was appointed for each of the Zamindaris of Pendra, Lafa and Korba. During the year under report proposals were submitted for the formation of a Bench of Honorary Magistrates at Deoli, for which sanction has been given since the close of the year.

Work of Magistracy.

14. The total number of persons disposed of by the Magistrates was 42,381 against 43,000 in the preceding year. The percentages of distribution amongst the various classes of Magistrates for the past three years are compared below:—

	1891.	1892.	1893.
District Magistrates	4·8	4·0	4·5
Assistant Commissioners, Extra-Assistant Commissioners at Head-Quarters, and Cantonment Magistrates	31·4	30·7	31·3
Other Stipendiary Magistrates	33·9	34·4	32·2
Honorary Magistrates	29·9	30·9	32·0

The proportion of trials by Honorary Magistrates has increased by one per cent. The Honorary Magistrates at district head-quarters and in the interior of districts disposed altogether of 32 per cent. of the total number of persons tried by Magistrates during the year under review—a state of things which must be regarded as satisfactory from an administrative point of view.

Results of trials.

15. During the year, 43,858 persons were brought before the Magistrates for enquiry or on trial; of these, 22,918 were convicted or committed, while 19,274 were acquitted or discharged, the percentage of convictions being 52·2. The percentage of convictions in hurt and assault cases for the year under report is nearly 28 as against 29 in 1892. The percentage of convictions in cases of murder has risen from 42 to 78 and in cases of culpable homicide from 58 to 76. As was remarked in the report for 1892, these figures were abnormally low for that year. In theft cases the percentage has slightly decreased. There has been a very marked decrease in the percentage of convictions in cases of robbery, criminal breach of trust, mischief, criminal trespass for the commission of more serious offences, and a slight decrease in cases of forgery. The percentage of convictions in rape cases has risen from 32 to 46; in cases of false evidence and offences against public officers from 49 to 51. Offences against public justice show a fall of 12 in the percentage of convictions. There is a decrease in cases of offences against public tranquillity, offences relating to public servants, and contempts of lawful authority.

Sessions cases.

16. The number of persons disposed of by the eight Courts of Sessions and Additional Sessions Judges was 252 as against 239 in 1892, and the convictions per cent. were the same—65. The arrangements noticed in the report for 1892 for the trial of Sessions cases still remain in force. The appointment of one Additional Judge has been sanctioned, but has not yet come into effect.

Punishments.

17. The number of persons punished has decreased by 1,228. The percentage of persons punished with fine only has increased, probably owing to the increase in the number of offences against special or local laws ordinarily punishable with fine; that of persons punished with whipping only has decreased slightly, and also that of persons punished with imprisonment only. There is a slight increase in the sentences of solitary confinement, a form of punishment which might be used still more frequently with advantage in the case of old offenders. The old tendency to award fine only or short terms of imprisonment where whipping would be more appropriate still continues to exist.

Durations.

18. The average duration in police cases was 6·7 as against 5·8 in 1892, and in complaint cases 24·7 as against 24·2. As a whole the durations cannot be considered excessive, having regard to the pressure of work.

Appeals.

19. The following figures show the number of appeals disposed of by the several classes of Appellate Courts in 1893, as compared with the disposals of the two preceding years:—

	1891.	1892.	1893.
To District Magistrates	1,298	1,467	1,377
„ Courts of Session	1,184	1,248	1,204
„ Judicial Commissioner	212	182	167

The percentages of appeals rejected and sentences confirmed to appeals disposed of were as follows in each of the last three years:—

	1891.	1892.	1893.
In the Court of the Judicial Commissioner ...	81	80	82
In Sessions Courts	78	76	81
In District Magistrates' Courts	69	63	58

The number of persons involved in cases taken up and disposed of by the Judicial Commissioner on revision was 612 as against 803 in 1892. During the year 51 sentences of death were referred to him for confirmation.

5.—*Prisons.*

Admissions.

20. The number of admissions of the year are compared below with those of the two previous years:—

	1891.	1892.	1893.
Convicts	8,498	8,051	7,261
Under trial	5,739	6,115	5,389
Civil	149	164	37

There was thus a considerable decrease in the number of convicts received into jail as compared with 1892, and in the number of under-trials. The number of civil prisoners has largely decreased. The discharges from all causes were considerably less than in 1892, and the number remaining at the close of the year slightly greater. The average daily population was 4,418 as against 4,747 in 1892 and 4,674 in 1891.

Sentences.

21. Arranged according to the terms of their sentences the figures representing the admissions of the year stand thus:—

Sentences.	1891.	1892.	1893.
Not exceeding one month	1,331	1,158	1,001
Above 1 month but not exceeding 3 months	2,115	1,698	1,359
Above 3 months do. 6 months	2,010	2,062	1,736
Above 6 months do. 1 year	808	852	841
Above 1 year do. 2 years	512	503	556
Above 2 years do. 5 years	289	294	367
Above 5 years do. 10 years	107	109	130
Above 10 years	3	6	4
Transported for life	54	48	80
Transported for a term	48	...	4
Sentenced to death	39	30	41
Total ...	7,316	6,760	6,119

There is thus a decrease in the number of all sentences not exceeding one year.

22. The following table gives the sentences of the prisoners remaining in jail at the close of the year :—

Sentences.	1891.	1892.	1893.
Not exceeding 1 month	103	91	107
Above 1 month and not exceeding 3 months	449	236	288
Above 3 months do. 6 months	825	854	732
Above 6 months do. 1 year	720	690	748
Above 1 year do. 2 years	743	743	692
Above 2 years do. 5 years	765	674	714
Above 5 years do. 10 years	399	465	561
Above 10 years	118	91	41
Transported for life	237	246	276
Transported for a term	192	127	93
Sentenced to death	2	3	...
Total ...	4,553	4,220	4,252

Punishments.

23. The usual details for the past three years relating to the total number of prisoners, the number of punishments inflicted on them and the proportions which the latter bear to the former are given in the following table :—

Jails.	Total number of prisoners.			Total punishments.			Ratio of punishments per cent. to total number of prisoners.		
	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.
Nagpur ...	1,813	1,856	1,673	1,372	3,069	875	75·67	165·35	52·30
Jubbulpore ...	2,435	2,345	2,250	695	474	531	28·54	20·21	23·60
Raipur ...	1,627	1,636	1,733	506	638	499	31·22	38·99	28·79
Saugor ...	1,017	860	607	97	71	170	9·53	8·26	28·01
Bhandara ...	439	456	281	129	89	191	29·38	19·51	67·97
Chanda ...	297	374	323	75	66	65	25·25	17·65	20·12
Wardha ...	257	255	241	90	129	136	38·91	50·59	56·43
Balaghat ...	298	225	279	103	63	28	34·56	28·00	10·03
Sironcha ...	64	36	46	...	...	...	...	...	...
Damoh ...	359	344	291	81	56	120	22·56	16·28	41·24
Seoni ...	409	387	361	20	27	38	4·89	6·98	10·52
Mandla ...	308	271	248	75	66	27	24·35	24·35	10·88
Chhindwara ...	323	374	325	109	50	75	33·74	13·37	23·08
Betul ...	273	282	277	115	108	104	42·12	38·29	37·54
Hoshangabad ...	596	656	481	131	105	79	21·98	16·01	16·42
Narsinghpur ...	869	568	422	88	83	65	10·12	14·61	15·40
Nimar ...	340	289	267	60	91	20	17·64	31·48	7·49
Sambalpur ...	653	748	804	80	52	33	12·25	6·95	4·10
Bilaspur ...	553	642	572	41	39	81	7·41	6·07	14·16
Total ...	12,930	12,604	11,481	3,867	5,276	3,137	29·91	41·89	27·32

The salient feature in this return is the reduction that has taken place in the number of offences recorded against the prisoners. These have fallen in the aggregate from 5,276 in 1892 to 3,137 in 1893, or a decrease of 2,139, which is more than made up by the falling off that occurred in the Central Jail, Nagpur, alone, where the figures decreased from 3,069 to 875.

Expenditure.

24. From the following table, which represents the cost of guarding and maintaining the prisoners during the past three years, it will be seen that the expenditure under all heads has fallen by Rs. 20,000, the decrease being from Rs. 2,92,268 in the year immediately preceding, to Rs. 2,72,113 in 1893.

The cost per head, however, remained about the same in both years, the slight increase of 4 pies that is perceptible telling against the year under report :—

Heads of Expenditure.	Total cost.			Cost of each prisoner.		
	1891.	1892.	1893.	1891.	1892.	1893.
	Rs.	Rs.	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Rations	1,16,883	1,33,918	1,17,826	25 0 10	28 4 6	26 11 8
Establishment	98,300	1,03,036	1,01,644	21 0 5	21 11 3	23 0 1
Police guard	...	...	...	...	...	...
Hospital charges	6,627	6,994	4,263	1 6 8	1 7 7	0 15 5
Clothing	25,512	21,846	21,718	5 11 8	4 14 0	5 2 11
Contingencies	24,335	26,474	26,662	5 3 3	5 9 3	6 0 6
Total ...	2,71,657	2,92,268	2,72,113	85 1 9	61 9 0	61 9 4

Manufactures.

25. The following figures represent the cash earnings of the prisoners during the past year, compared with the year previous, the calculation being made as usual on the excess of the payments into, over the drawings from, the Treasury :—

		1892.	1893.
		Rs.	Rs.
Nagpur	...	60,315	70,498
Jubbulpore	... Loss	98,620	1,03,547
Raipur	... „	3,543	Loss 2,077
Saugor	... ...	2,611	2,200
Bhandara	... ...	690	1,153
Chanda	... ...	1,892	Loss 883
Wardha	... ...	952	987
Balaghat	... ...	970	810
Sironcha	... ...	...	...
Damoh	... ...	389	Loss 194
Seoni	... ...	4,390	4,377
Mandla	... ...	287	Loss 1,378
Chhindwara	... ...	3,197	892
Betul	... ...	945	1,314
Hoshangabad	... ...	1,358	1,202
Narsinghpur	... ...	363	Loss 2,095
Nimar	... ...	1,338	1,778
Sambalpur	... ...	3,964	2,505
Bilaspur	... ...	478	2,304
Total Loss	...	18,024	1,86,940

The Jubbulpore Central Jail, at which a loss was shown to have been sustained in 1892 in consequence of large outstandings having remained unadjusted at the close of that year, has now come forward with a considerable profit. This profit would have been greater still were it not that a sum of Rs. 10,749 had not been adjusted in communication with the Comptroller before the close of the year. This amount will be credited during the current year, and will enhance the profits accordingly. The Raipur Central Jail has apparently not been able to recover itself since the failure of the castor-oil industry, and accounts for a further loss on the cash transactions during the past year. The police clothing industry was transferred from the Nagpur Central Jail to this jail during the year, but, owing to the large stocks at Nagpur being equal to all demands, the outturn of the factories only went to increase the stock in hand. The Nagpur stocks being now consumed, the stock at Raipur will be used up.

Vital Statistics.

26. The vital statistics of the year under report are very satisfactory. The daily average of sick has fallen from 144·53 to 123·92, and the ratio *per mille* on average strength from 32·2 to 29·5. Deaths decreased from 204 to 82. This is partly accounted for by the absence of cholera in Bilaspur and Sambalpur, where only 11 deaths occurred against 79 in 1892. But on the whole there is a general improvement in the health of the prisoners, and the death-rate in the Jubbulpore Central Jail, once noted for its exceptionally high mortality, has sunk to the remarkably low figure of 9·6 *per mille*. There can be little

doubt that this is mainly due to the efficient system of subsoil drainage in existence in this jail. The health of the prisoners in general throughout the year was probably favourably affected by the reduction in the number of the jail population, with consequent less over-crowding. The influenza epidemic appears to have caused a large increase — from 147 to 375 — in the admissions to hospital for respiratory diseases in Nagpur and Jubbulpore.

Guarding. 27. The employment of military pensioners of the Native Army in the warder guards of our jails has practically ceased, as men from up-country cannot be induced to come to these Provinces, even though their travelling expenses are paid to them on joining. The entertainment of Reservists is interdicted on the score that in the event of an emergency arising they will be called out and will have to join their respective regiments, so that their services would be lost to the Jail Department. Under the operation of this rule one or two good men resigned their appointments, and difficulty has been experienced in filling their places. Military pensioners who now join the warder guards are men who belonged to regiments which have been garrisoned in the Central Provinces, and who on retiring have taken up their residence in these Provinces.

6.—*Civil Justice.*

Number of Courts. 28. The number of Courts open at the close of 1893 was 206, being 3 more than at the beginning of the year. Three new Courts were created, *viz.*, at Chhindwara, Damoh and Seoni, where the staff was strengthened by the addition of a Civil Judge. The Court of the Tahsildar at Pendra, in the Bilaspur District, was abolished; and those of the Naib-Tahsildars at Umrer (Nagpur District) and Warora (Chanda District) were closed as there was not enough civil work to keep them employed. An extra Naib-Tahsildar's Court was established in the Hoshangabad District. The number of Courts of Assistant Commissioners was increased by one at Nagpur, Wardha and Narsinghpur, while there was one such Court less at Saugor. Four Honorary Judges' Courts were open during the year.

		1892.	1893.
Court of the	Judicial Commissioner ...	1	1
Do.	Commissioner ...	4	4
Do.	Judicial Assistant to Commissioner ...	4	4
Do.	Deputy Commissioner ...	18	18
Do.	Civil Judge ...	13	16
Do.	Assistant Commissioner ...	39	41
Do.	Tahsildar ...	52	51
Do.	Munsiff ...	22	22
Do.	Naib-Tahsildar ...	43	42
Do.	Small Cause Court Judges and Registrars ...	7	7
	Total ...	203	206

Number of Suits. 29. The number of suits instituted and re-instituted rose from 101,498 in 1892 to 103,438 in the year under report. There thus appears to have set in a recovery from the decline in civil litigation, which continued from 1886, when the number of institutions amounted to 112,965, to 1891, when it had fallen to 95,249.

Value of Suits. 30. The total value, as computed under the Court Fees Act, of suits instituted in 1893 was Rs. 1,01,68,373 as compared with Rs. 1,07,93,661 in 1892.

Suits between landlord and tenant. 31. The percentage (to total suits) of suits between landlord and tenant has decreased from 11·9 in 1892 to 11·8 in 1893, the total number of suits being 12,229.

Distribution of work. 32. The distribution of suits was much the same as last year. The percentage of cases tried by Courts of Assistant Commissioners (including Civil Judges) is constant. The percentage of cases tried by Tahsildars and Naib-Tahsildars has slightly increased, and that of cases by Munsiffs and Courts of Small Causes has decreased. It is to be regretted that purely Judicial officers did less work, while more was thrown on to Tahsildars and their Naibs, whose executive, revenue and criminal work, as it is, seriously suffers in many cases from the press of civil judicial work.

Duration of Suits. 33. The following figures show the Provincial average durations and number of hearings for the last three years:—

Duration of suits ...	Contested ...	66·5	65·7	69·4
	Uncontested ...	37·9	38·2	40·3
Average number of hearings ...	Contested ...	3·3	3·5	3·1
	Uncontested ...	1·8	1·8	1·6

The average duration of both contested and uncontested cases has risen considerably, while the number of hearings is slightly less.

Appeals.

34. The number of appeals disposed of was 8,403 as against 7,782 in 1892. The average duration of appeals in the Judicial Commissioner's Court has increased from 175·9 to 217·6 days. It has decreased from 172·9 to 121·8 days in the Court of the Judicial Assistant to Commissioner, Nagpur Division, and it has risen in those of the Judicial Assistant to Commissioner in the Chhattisgarh, Nerbudda and Jubbulpore Divisions, the largest difference being in the Jubbulpore Division, where the average duration rose from 98·7 in 1892 to 178·5 in the year under review. There is a slight improvement in the average duration of cases in District Appellate Courts.

Work of Judicial Commissioner.

35. The Judicial Commissioner disposed of 659 appeals as against 731 in the previous year. There were 155 applications for revision disposed of as against 152 in 1892.

Execution of Decrees.

36. The number of applications for execution of decrees presented during the year was 95,680, of which 11,289 were left pending at the close of the year. The figures for 1892 were 90,930 and 10,941; there was thus an increase of over 5 per cent. The number of decrees in which satisfaction was obtained in whole or in part was 18,423 and 17,230, as against 17,496 and 15,989 respectively. The number of infructuous applications was 45,084, as against 43,469 in 1892; of these 23,019 were dismissed for default, or withdrawn, and 22,065 were otherwise infructuous. The number of judgment-debtors actually imprisoned is one less than in 1892. The fees levied for the service and execution of processes amounted to Rs. 2,42,447, and the charges incurred in their execution to Rs. 91,406, thus leaving a profit of Rs. 1,51,041. The totals of fees levied and of charges incurred in 1892 were Rs. 2,33,164 and Rs. 87,069 respectively. Since the report for 1892 was written the whole of the process-serving establishment has been re-organized, and the new scale came into force with effect from the 1st April 1893. There are now four grades of process-servers the pay being Rs. 10, Rs. 9, Rs. 8 and Rs. 7, respectively.

7.—*Registration.*

Registration Offices and staff.

37. The number of Registration Offices was 88 as compared with 86 in the previous year, the increase being due to the carving of a new Sub-District, with its office at Narkher, out of that hitherto included under the office at Katol, and of another out of the Burha Sub-District, with its office at Waraseoni. A Special Salaried Sub-Registrar was appointed for Narkher, and he took charge on the 1st September last, between which date and the close of the year 192 registrations were effected and a net profit of Rs. 429-1-6 realized. The new office at Waraseoni was placed under the Head Master of the Middle School there; he started work on the 1st October last, and had registered 71 documents by the end of the year. The only other changes effected during the year were the transfer of a number of villages from the Wardha to the Deoli Sub-District, and the substitution of a Special Salaried Sub-Registrar for a schoolmaster in the latter: these were followed by an increase in registrations in both offices.

General Results.

38. The general results of the year's operations as compared with those of the previous year may be summarized as follows:—

(1) The total number of documents registered in Books I, III and IV rose from 31,103 to 32,941 or by 5·9 per cent.

(2) The aggregate value of property transferred rose from Rs. 1,18,36,553-2-5 to Rs. 1,28,28,929 or by 8·3 per cent.

(3) The total number of operations other than registrations in Books I, III and IV rose from 12,617 to 12,807 or by 1·5 per cent.

(4) The gross receipts of the Department rose from Rs. 1,12,129-1-9 to Rs. 1,21,727-2-6 or by 8·5 per cent.

(5) The expenditure fell from Rs. 48,412-13-10 to Rs. 42,761-4-2 or by 11·9 per cent.

(6) The percentage of expenditure to income fell from 43·1 to 35·1.

(7) The net income rose from Rs. 63,716-3-11 to Rs. 78,965-14-4, or from 56·8 to 64·8 per cent. of the gross receipts.

Taking the statistics of the Province as a whole, the increase in registrations is confined to the head "compulsory," optional registrations being very slightly below the level of 1892-93.

Expenditure.

39. The expenditure reported for 1892-93 included one-third of the following charges:—

(1) Pay and travelling allowance of the Inspector-General.

(2) Pay of the Inspector-General's English Office establishment, and pay and travelling allowance of the peons and khalasis who accompany him on tour.

(3) Contingent expenditure of the combined offices of the Commissioner of Excise, Inspector-General of Registration, &c., &c.

These charges are, since the introduction of the present Provincial Contract, debitable to the account head "18—General Administration," and they are excluded from the registration returns of the year under report; had it not been for this, the total expenditure of the Department in 1893-94 would have been Rs. 51,245-4-10, or nearly Rs. 3,000 more than in 1892-93, the increase being due partly to the reversion of a permanent Inspector from the rank of Extra-Assistant Commissioner, partly to additions made to the permanent establishment of the office of the Inspector-General of Registration and partly to an increase in the staff of Special Salaried Sub-Registrars.

8.—*Municipal Administration.*

Number and constitution of Municipalities.

40. The number of Municipalities in existence in the Central Provinces during the year under report was 55, one less than in the previous year, the Kareliganj Municipality having ceased to exist in that year. The Babai Municipality was abolished only during the year under report, and figures relating to it are therefore retained. After the close of the year sanction was received to the closing of the Municipality of Katangi, the smallest municipal town in the Provinces, with a population of under 1,500, whose administration had long been in an unsatisfactory condition. Omitting the three Municipalities last mentioned, there still remain in the Central Provinces five Municipalities with a population of less than 4,000, and three between 4,000 and 5,000. The number of towns with a municipal constitution is proportionately to the population double that in the North-Western Provinces, and the average number of the inhabitants less than one-third. Much useful work has been done by Municipal Committees during the year, and their administration has continued to progress in capacity and self-reliance.

The number of members was 626 in the year under report as compared with 629 in the previous year. Of the 626 members 5 were *ex-officio*, 451 elected and 170 nominated. The practice which prevails in some other Provinces of the District Magistrate holding the Chairmanship of the head-quarters Municipality is not followed in the Central Provinces; only at Seoni and Khandwa is the Deputy Commissioner President of the Municipality; in the small outlying Municipalities, however, it is the custom for the Tahsildar to be President. General elections were held in 23 Municipalities, and there were in addition 10 bye-elections. The attendance of voters was fair.

Income.

41. Excluding the head "Debt" the total income of Municipalities was Rs. 13,07,302 as compared with Rs. 12,44,040 in the previous year. Including "Debt" the income stood at Rs. 13,72,111 as against Rs. 13,98,379. The income under grants and contributions amounts to Rs. 87,446 as against Rs. 99,733 in 1892-93.

Octroi.

42. Octroi yielded Rs. 7,89,696 as against Rs. 7,33,642 in the previous year, giving an increase of Rs. 56,054. The increase was very general, Jubbulpore and Seoni (Seoni) being the only Municipalities that show a falling off, which in the latter is insignificant. The rise might have been expected in view of the marked and general decrease which had taken place in the previous year. The year under report is also said to have been a favourable one for Hindu marriages, leading to increased consumption of dutiable articles. There was no change in the number of towns in which octroi is levied.

Taxes.

43. The tax on houses and lands produced Rs. 31,660 as against Rs. 31,322 in the previous year, the tax on professions and trades Rs. 15,492

against Rs. 15,117, and tolls Rs. 8,414 against Rs. 7,884. Water-rates brought in Rs. 46,922 against Rs. 43,462, the increase being due to the imposition of a rate in Raipur. This is only levied in four towns. Payments for conservancy rose from Rs. 82,515 to Rs. 83,226, and market dues from Rs. 23,616 to Rs. 29,149, while cattle registration fees fell from Rs. 21,064 to Rs. 19,377. There was thus on the whole an appreciable increase of income under the different heads of taxation generally.

Other Income.

44. Income from pounds was practically stationary—Rs. 37,407 against Rs. 37,197. Of miscellaneous revenue, rents of lands gave Rs. 24,520 against Rs. 19,911, and sale of lands Rs. 13,039 against Rs. 12,314. Educational revenue rose from Rs. 19,985 to Rs. 23,195 owing to the transfer of more schools to Municipal Committees. Medical revenue fell from Rs. 11,067 to Rs. 10,395. The difference is accounted for by the transfer of this item in Nagpur to the Dispensary Fund, causing an absence from the accounts of Rs. 798 received in the previous year. The creation of Committees to administer these funds in all Municipalities is in progress. Fees and revenue from markets and slaughter-houses fell from Rs. 37,768 to Rs. 36,011. Municipal fines have increased from Rs. 5,517 to Rs. 6,068. The figures indicate very varying degrees of strictness in enforcing regulations and bye-laws. Grants from Government for educational purposes rose from Rs. 19,684 to Rs. 33,920 owing to the transfer of schools already mentioned.

Expenditure.

45. The total expenditure of Municipalities during the year was Rs. 12,76,547 as compared with Rs. 15,79,774 in the previous year. The latter figures include a special item of three lakhs for water-works in Raipur, which did not recur in the year under report. The expenses of office establishment, &c., increased from Rs. 45,620 to Rs. 50,411. The increase in Chanda from Rs. 894 to Rs. 2,914 is explained to be due to the land revenue which the Municipality pays to Government being charged to this head. It should apparently come under the head "Miscellaneous." In spite of the increase in octroi receipts, refunds fell from Rs. 1,87,357 to Rs. 1,79,419, and there seems some ground for the explanation offered in several reports that the attention which has been devoted to this matter has resulted in the elimination of abuses. Expenditure on conservancy fell from Rs. 2,51,826 to Rs. 2,45,401, and on dispensaries from Rs. 1,04,227 to Rs. 87,185. The chief reasons for the decrease under the latter head are the constitution of the Mayo Hospital Dispensary Fund in Nagpur in the year under report, and the construction of a dispensary at Chhindwara in the previous year. In some cases the larger part of the dispensary expenditure is met from subscriptions, the most striking instance being Wardha, which derives Rs. 1,068 from dispensary subscriptions, and only spends Rs. 1,515. Public Works expenditure on buildings rose from Rs. 8,690 to Rs. 21,732 owing to the undertaking of certain special constructions; but that on roads fell from Rs. 1,03,204 to Rs. 92,591. Expenditure on schools and colleges, owing to the transfer of additional schools, rose from Rs. 1,06,633 to Rs. 1,32,572.

Closing Balance.

46. The statement of the previous year showed the closing balance as Rs. 5,45,224. This is corrected in the accounts of the year under report to Rs. 5,40,219. The closing balance of this year is shown as Rs. 6,35,783.

9.—*Local Boards.*

Constitution of District Councils.

47. There was no change during the year under report in the number of District Councils and Local Boards in the Central Provinces. There are 17 of the former and 53 of the latter constituted under Act I of 1883. In Mandla the functions of the Council are discharged by a Local Fund Committee, which has not a legal status. The total number of members was 1,197, practically the same as in the previous year. The number of *ex-officio* members was 11 only, the Chhattisgarh Zamindars who were last year included under this head having been now shown as nominated. The number of officials was 122, and the number of Europeans and Eurasians 23 only, a figure which includes young Assistant Commissioners attached to the Councils to gain an insight into the work.

Meetings.

48. Four hundred and ninety meetings were held against 461 in the previous year. Of 122 officials the total average attendance was 91, but of 1,075 non-officials it was only 419, or less than 40 per cent. Several of the reports complain of the difficulty of securing satisfactory attendance even with official pressure, but this neglect is, it appears, not necessarily due to want of public spirit. Many habitual defaulters at meetings undertake willingly the supervision of institutions and public works in their own circles, and the Commissioner of Jubbulpore notices the cases of gentlemen who attend the Managing Committee and the School Board but not the meetings of the Council itself.

Income.

49. The balances at the disposal of the Councils continue to amount to a large sum, though their utilization is regularly budgetted for. The year opened with a balance of Rs. 4,20,937 and closed with one of Rs. 4,15,912. Apart from contributions and deposits, the income of the District Funds amounted to Rs. 6,57,842 against Rs. 6,28,677 in the preceding year. Local Rates rose from Rs. 3,14,718 to Rs. 3,23,273 with the increase of land revenue consequent on the revision of settlements. Receipts under the Cattle Trespass Act rose from Rs. 1,74,974 to Rs. 1,85,375, while those under Education fell from Rs, 10,450 to Rs. 9,735. Much of the contributions of private persons to schools, however, is spent without credit in the accounts, or does not take the form of cash. There have been some liberal donations during the year in the shape of school buildings, &c., which have been suitably acknowledged at the time. Medical receipts rose from Rs. 7,215 to Rs. 8,313, of which Rs. 3,526 were credited in Raipur. Receipts under the head Scientific and Minor Departments fell from Rs. 6,398 to Rs. 4,811. Under the head of Civil Works there was an increase in receipts from Ferries from Rs. 55,313 to Rs. 69,834, which is for the most part due to recovery of arrears.

Expenditure.

50. The total expenditure of the District Funds during the year under report was Rs. 8,88,380 as compared with Rs. 8,66,977 in the previous year. The increase occurred under both the main heads of expenditure, that for Education having risen from Rs. 2,47,839 to Rs. 2,57,181, and that for Civil Works from Rs. 3,16,136 to Rs. 3,41,423. The total expenditure on direct management under the head Education fell from Rs. 1,91,674 to Rs. 1,69,176, but grants-in-aid rose from Rs. 45,196 to Rs. 76,386, both variations being chiefly due to the placing of schools under the combined system of grants-in-aid. Charges for medical relief fell from Rs. 64,347 to Rs, 62,156. The creation of Dispensary Funds managed by Committees *ad hoc* is being carried into effect, and in this connection it is proposed to fix for a term of years the contribution of each local body towards the dispensaries within its jurisdiction. The amount at present allotted for the purpose might well be increased. The expenditure on works in charge of Civil Officers fell from Rs. 1,90,617 to Rs. 1,62,959, but on works in charge of Public Works Officers it rose from Rs. 1,25,519 to Rs. 1,78,464. The most important part of the Civil Officer's duty in this respect is in repairing roads, and it is to be regretted that the expendture on this account fell from Rs. 1,19,411 to Rs. 97,178.

10.—*Military.*

Regular Forces.

51. The Central Provinces were garrisoned during the year as shown below :—

Nagpur District, with Headquarters at Kamptee. (Brigadier-General J. Gatacre, C. B., S. C.)	Kamptee	... One Battalion British Infantry (1st Worcestershire Regiment).
		One Regiment Native Infantry (12th Bombay Infantry).
		One Battery Royal Artillery (26th Field Battery).
	Sitabaldi	... Detachments of British and Native Infantry from Kamptee.
	Raipur	... A Wing of Native Infantry (7th Bombay Infantry).
	Sambalpur	... Do. do. do.

Nerbudda District, with head-quarters at Jubbulpore. (Brigadier-General W. L. Dalrymple, C. B.)	Jubbulpore	... One Battalion British Infantry (2nd Scottish Rifles).
		One Regiment Native Infantry (1st Bengal Infantry).
		Native Cavalry : (a detachment of 1st Bengal Cavalry).
		One Battery of Royal Artillery (17th Field Battery).
	Saugor	... British Infantry : (a detachment of 2nd Battalion Scottish Rifles).
		Native Infantry : (a detachment of 8th Bengal Infantry).
		Native Cavalry : (a detachment of 1st Bengal Cavalry).
		One Battery of Royal Artillery (6th Field Battery).
	Pachmarhi	... A Convalescent Depôt.
Mhow District	...Asirgarh	... A Detachment of Native Infantry (3rd Bombay Light Infantry).

Auxiliaries.

52. The Nagpur Volunteer Rifles were for a part of the year under the command of Colonel T. A. Scott, and he was succeeded by Mr. F. C. Anderson, I. C. S., who held the rank of Lieutenant-Colonel. The Bengal-Nagpur Railway Volunteer Rifles continued under the command of Mr. Wynne, the Agent and Chief Engineer of the line, who holds the rank of Lieutenant-Colonel. Both the Corps were inspected during the year by Brigadier-General J. Gatacre, C. B., Commanding the Nagpur District, who was generally satisfied with their efficiency and discipline.

CHAPTER IV.—PRODUCTION AND DISTRIBUTION.

1.—*Agriculture.*

Since the last year the surveys of the Balaghat, Bhandara and Chanda districts have been practically completed, and that of the Mandla District alone remains for completion. The survey of the zamindaris has progressed in the three districts of Chhattisgarh, but statistics are not available for them or for the zamindari estates of Chanda, Chhindwara and Hoshangabad.

2. When the forest surveys are completed, accurate areas will be available for every district by adding the areas of the forests to the areas obtained from village papers, but complete areas are as yet not available for any district except Jubbulpore.

3. The total Provincial area according to present statistics is 74,169,919 acres (or 115,890 square miles). Of this area Feudatory estates account for 18,838,400 acres and 11,152,754 represent unsurveyed zamindaris. The balance left is thus 44,178,765 acres, but the area for which detailed statistics are given is 43,957,108 acres only. The difference of 221,657 represents principally errors in the areas of forests, which cannot be cleared up until their survey is completed, but is also partly due to differences between area computation in detail from the village maps, and area computation in aggregate as effected by the Survey Department.

4. An analysis of the statistics of this year and the preceding one shows the following results :—

Details	1892-93. Acres.	1893-94. Acres.
Forest	12,085,252	11,651,723
Unculturable waste ...	3,836,057	3,649,644
Culturable ,, ...	9,572,763	10,121,171
Current fallows ...	1,926,943	2,213,438
Under crop	16,110,808	16,316,904

There are no very glaring differences, but the addition to the areas surveyed is sufficient to account for changes in the figures.

5. The areas under the principal crops were :—

	Acres.
Rice	4,473,344
Wheat	3,934,555
Gram	1,085,615
Juari	1,285,707
Other food-grains	3,219,861
Linseed	1,759,285
Til	532,671
Cotton	724,164
All others	1,105,485
Total ...	18,120,687
Deduct area cropped twice ...	1,803,783
Net area cropped ...	16,316,904

The area double cropped consists mainly of the better rice lands which are cropped a second time with gram, linseed and pulses.

6. The irrigated area amounts to only 662,789 acres, or about 4 per cent. on the total area cropped, and out of this the area irrigated from wells is only 73,239 acres, the rest being rice land watered from tanks and ponds.

7. The main features of the cropping of the year are contrasted with those of the year preceding for all districts, except Mandla :—

District.	Year.	Total area under crop.	Area in acres under						Area double cropped (in acres).
			Current fallow.	Rice.	Wheat.	Juari.	Linseed.	Cotton.	
Saugor	1892-93.	1,017,034	84,721	25,578	560,337	58,934	37,203	17,919	15,735
	1893-94.	1,040,671	74,276	24,331	540,624	68,934	43,304	19,845	25,101

	1893-94.	493,663	107,064	338,389	48	...	299	5,849	2,902

* Excluding the zamindari tracts which are still only partially surveyed.

The main features of the agriculture of the year are the increase of current fallows in the three districts of Nagpur, Wardha and Chanda, the great diminution of wheat cultivation in the Nagpur, Seoni and Bhandara districts and the universal increases in the areas cropped with linseed. The diminution of wheat cultivation in the districts mentioned was due to the damage by rust in the previous year, which made seed somewhat scarce, and lowered the demand for wheat; and the great access to linseed cultivation was due to high prices and good crops. Cotton continues to be grown over larger areas in the important cotton districts of Nimar, Nagpur and Wardha.

2.—*Weather and Crops.*

Rainfall.

8. The following table shows the rainfall of the year, and compares it with the previous year, and with the average of the past 27 years:—

District.	April and May 1893.	June.	July.	August.	September.	October.	November 1893 to March 1894.	Total rainfall, 1893-94.	Total rainfall, 1892-93.	Average rainfall of past 27 years.
	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
Saugor ...	3·13	15·71	9·55	19·49	14·62	2·09	3·87	68·46	52·84	48·66

The monsoon rainfall of 1893 was abundant, but its distribution in all the districts of the Provinces was very unequal. It commenced in the first week of June and practically closed in the middle of September. Up to the end of June the fall was very light, except in the Hoshangabad District, where it retarded the *kharif* sowings. Very heavy rain fell during the months of July and August, and some damage was thus caused to the rice and *kodon* crops in some parts of the Raipur District, and to the cotton and millet crops in Nimar. The fall in October, which is so necessary for the preparation of the ground for the *rabi* sowings, was generally sufficient everywhere. In Chhindwara and Balaghat it was indeed excessive, and necessitated fresh *rabi* sowings over a large area. Up to the month of January the prospects of the spring crops were excellent in every district, and the people were confidently looking forward to a bumper harvest. At this time, however, the weather suddenly became abnormal; heavy rain falling in February, March and April, with long intervals of cloudy weather and occasional hail-storms, which caused much damage to the ripening plants. The rice crop was on the whole a very fair one, better than in the previous year, and had it not been for the early cessation of the rains the crop would have yielded a bumper harvest in the Raipur, Bilaspur and Sambalpur districts. The crops of *juar*, *tur*, *tili*, *kodon*, *kutki* and other minor grains and pulses were generally distinctly better than those of the preceding year. The wheat crop promised unusually well up to January, but prospects were considerably marred by the unseasonable weather and low temperature of February and March. The heavy rainfall during these months and the subsequent continued cloudy weather induced rust in wheat, and in several districts the grain was further shrivelled up by frost. The linseed crop was affected in less degree than wheat, except in the Jubbulpore Division, and the outturn was generally much better than in the case of that crop.

Prices of Food Staples.

9. The following table shows the price of the four chief food staples, wheat, gram, rice and *juar*, in each district at various periods during the past two years:—

PRICE CURRENT, 1893-94.

[*In seers and chittaks per rupee.*]

At the commencement of the year under review prices of agricultural produce ruled high, but later on, especially after the *rabi* harvest, the price of all produce fell, except in Balaghat and Sambalpur, and remained low throughout the year. Wheat was cheaper than in the previous year, despite the damage done to the *rabi* harvest by the unseasonable rains of February and March, and this fall in price is attributed to the diminished demand for export owing to the inferior quality of the grain. *Juari*, *kodon* and *kutki* were also generally cheaper than in the previous year. In Balaghat the price of rice was higher, while that of wheat, in spite of the bad *rabi* harvest, remained the same as in the previous year. This is again explained by the stoppage of export trade owing to the inferior quality of the grain. In Sambalpur rice continued dearer than in the previous year — a result which was probably due entirely to the great expansion of local trade which has resulted from the opening of the railway extension to Sambalpur.

3.—*Horticulture.*

District Gardens.

10. The number of gardens at District head-quarters during the year was 14. The Wardha garden was closed during the year, and the small garden at Raipur transferred to the management of the Public Works Department.

Expenditure.

11. The total expenditure and receipts of these gardens for the past five years are compared below :—

Year.	Receipts.	Expenditure.	Net cost.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
1889-90	5,877 9 1	8,274 0 5	2,396 7 4
1890-91	5,198 6 5	8,822 10 4	3,624 3 11
1891-92	5,246 12 6	9,924 13 6	4,678 1 0
1892-93	5,797 14 11	10,911 1 11	5,113 3 0
1893-94	6,040 11 10	10,067 15 0	4,027 3 2

Expenditure has fallen by more than Rs. 800 with a resulting decrease in the net cost of maintenance. The decrease in expenditure is mainly due to the closing of the Wardha garden and to the transfer of the small garden at Raipur to the control of the Public Works Department. There was also a decrease in expenditure of Rs. 196 in the case of the Saugor garden. Receipts are higher than they have been for the past five years, the principal increases occurring in Mandla (+ Rs. 251), Damoh (+ Rs. 128) and Narsinghpur (+ Rs. 142). As regards financial results Damoh easily takes the first place, the expenditure having been more than covered by the receipts. Sambalpur takes the second place with an expenditure of Rs. 675 and a revenue of Rs. 599, and in seven other gardens the income exceeded 50 per cent. of the expenditure. The Saugor garden did not show quite such good results this year, the receipt percentage having fallen to 44. It is, however, explained that Rs. 150 was due at the end of the year on account of unrealized rent of grass lands. If this sum had been included the receipt percentage would have been over 60, which is a further improvement on that of the previous year. The worst results are shown by Betul, Nimar and Hoshangabad. In Nimar the decrease in revenue is ascribed to the deterioration of the soil and the insufficiency of the water-supply, which rendered the yield of the garden so small that the subscription rates had to be lowered to half the usual amount for three months in the year. In Betul the decrease is said to be due to a falling off in subscriptions and in the sales of plants.

12. The number of plants distributed was slightly larger than in the preceding year, being 2,360 as against 2,260, including plants distributed gratis and those sold. Only, however, in Narsinghpur and Betul has any improvement been shown in the matter of distribution. In nearly every other district the number distributed has fallen off. The Deputy Commissioner of Chanda has urged that the garden there is only now beginning to recover from its former

state of neglect, and that anything like distribution of plants was on this account previously impossible. He hopes, however, to do more in that direction in the current year. The Deputy Commissioner of Chhindwara notes that though plants were ready for free distribution, there was no demand for them; but it is unlikely that there will be demand unless those who have private gardens are aware that plants are available.

13. But scanty results have been obtained in experimental cultivation, which seems to show that both in this matter and as regards the distribution of plants the gardens suffer from want of skilled supervision. An essential point in attaining success is to secure the services of some resident officer who takes a real interest in the subject, and has some knowledge of it.

14. The Maharaj Garden at Nagpur continued to be well managed. The average daily number of visitors was again about 1,000. Of the fruit-tree plantations only the oranges, guavas and plantains appear to have been successful. The vines and peaches have been a failure, and the mango crop suffered considerably from blight, in consequence of the cloudy weather in March. Receipts were well up to the estimate, and there was a saving in expenditure, the net cost of the garden to Provincial revenues being only Rs. 5,705.

The number of trees and plants distributed was 1,862 as against 1,423 in the preceding year. Of these 128 were distributed gratis.

The condition of the Menagerie continued satisfactory. Sambhar, nilgai and chital have bred in great numbers, and specimens have had to be sold in order to keep the stock down. Two bear cubs and an ant-eater were presented during the year.

15. *Pachmarhi Gardens.*—The expenditure increased slightly, but the receipts have shown a marked rise. All the fruit crops except those of the grape were good, and with regard to these the Commissioner of Settlements and Agriculture points out that the difficulty is to secure the ripening of the crop before the rains break. The clumps of ornamental trees—silver-oak, cypress and chir pine—which have been planted about the station, are doing very well, and promise to be an ornament to the plateau. The mulberry plantation is in a flourishing state, and will, it is hoped, be able to supply material next year for an experiment in silk-growing.

The Residency flower-garden has, during the year, been brought under the same management as the Public Gardens.

16. As was noticed in last year's report, the scheme of experiments has been so shaped as to give continuous results over the same plots of the same experiments over a series of years. This scheme has been carried on during the year now under report, and there are now four-years' results for the most important experiments of the regular or A. series. Nagpur Experimental Farm.

Some few experiments have a longer history. But the teachings to be derived from them are frequently vitiated by the effect of adverse seasons. In particular, attacks of rust frequently obscure the results of the most careful experiments, and the linseed is now annually almost destroyed over many plots by the disease locally known as 'talap,' caused probably by some parasitic plant which consumes the whole nourishment of the young crop, and causes it to wither away long before it has attained its full growth.

The investigation of the disease of 'talap,' which is well known to the cultivators of these Provinces, is a matter of much importance. As things are now, it will before long be useless to attempt experiments with linseed on the Farm.

17. Another fact which has to be allowed for is that the site of the Farm, although the best that could be procured at Nagpur itself, regard being paid to the possibility of effective supervision, is by no means good in itself. The Farm lands lie in an area and situation undoubtedly the worst for the successful growth of cotton and juari, while the soil is not equal to that of the best wheat and linseed tracts, and the only crop which really flourishes on it is tur. Great allowances have therefore to be made before the record of experiments is subjected to criticism.

18. Although there was no rain to speak of between the 15th November and the end of March, the heavy fall of the first half of November caused serious

damage from rust to wheat and linseed, and much detracted from the value of the experiments, but it was clear from the experience of the year that early sowing enables the plants to resist with some success the attack of this fungoid disease to which the later sown wheat succumbed.

There is, however, great risk in this early sowing of a heavy subsequent fall washing out the seed or swamping the young plants. This was the case in the year under report, and some of this early wheat had to be resown.

19. Experiments are to be made with a view to the discovery of some rust-proof variety of wheat, but it is probable that no practical success for the protection of wheat from rust will be attained until the origin of the fungoid can be discovered.

The most important experiments, and those which have been continued for the longest time (now amounting to 10 years), are those which test the effect of applying different kinds of manure to wheat continuously year after year. So far as these experiments have proceeded they show that nitrogenous manure is the one most needed by the plants. Saltpetre has added during the past nine years about 350 lbs. per acre to the produce, or something like Rs. 12, but its cost is practically prohibitive.

The gain with irrigated wheat is larger, and amounts to about 600 lbs., but in the greater number of years the soil of the Farm is sufficiently moist, and irrigation is superfluous.

Cattle dung has added about 130 lbs. per acre to unirrigated wheat, and about double that amount to irrigated wheat. The outturn of unmanured irrigated wheat is in soil of this kind frequently lower than that of the unirrigated crop, so that the additions due to these manures are much discounted when the total outturns of the irrigated and unirrigated crops are compared.

This series of experiments also shows that bone-dust adds but little to the outturn, and green soiling with 'san hemp' (*crotalaria juncea*) has not been very successful.

The comparatively small advantage to be gained by the use of bone-dust or phosphatic manure is illustrated by these experiments and those of the Ville series in which the withdrawal of calcic superphosphate or calcic sulphate causes no appreciable diminution in the outturn, while the withdrawal of nitrogenous manures reduces the outturn by a half.

20. One of the most interesting of the recent experiments is the one testing the effect of deep ploughing. Opinions differ largely as to the effect of deep tillage, but so far as can be judged from the four-years' experiments recorded, deep ploughing every third year, with simple harrowing in the intermediate years, is the most profitable tillage.

We have, however, as yet too few experiments for any decision to be formed.

21. Embankment for wheat has proved a failure, it is but little practised in the Nagpur country, although so profitable in Jubbulpore. The soil here is too moist as it is, and embankment merely makes it water-logged.

22. The experiments with rotation are of too short a period to be as yet of any value, but they will be continued systematically.

23. Among the special experiments not of the regular series were two to test the comparative merits of different varieties of cotton. The yields were poor owing to the excessive rain-fall, but such as they were, they were highest in the case of the long stapled cotton, Upland Georgian, which was priced the highest at the Empress Mills; Nimari, also a long stapled cotton, did well. As long as the growth of the short stapled local variety, 'jari,' is encouraged by the trade for purposes of adulteration, so long will the cultivators continue to grow it, for its yield is nearly always so much larger than that of the 'bani' as to compensate for its lower price.

24. Experiments undertaken to test the effect of using rusted wheat seed showed that there was no material difference between the crops grown from rusted seed and those raised from healthy seed.

The disease is evidently one which does not lie latent in the seed, as indeed might be inferred from the fact that wheat cultivation has continued in these Provinces in spite of attacks of rust in days when imported seed could not be readily obtained.

25. The experiment noticed in last year's report for preventing the damage caused to wheat crops by trees in their vicinity, was repeated this year with similar success. It seems tolerably certain that the damage is due to the surface roots of the trees, which draw away the moisture from the wheat plants within their influence. The protection of the crop by the digging of trenches to a depth of three feet, and at a distance from the tree of from three to twelve feet, according to its size, has been now so successful on the Farm as to warrant the wider extension of an experiment which any cultivator will readily try for himself. In some of the well wooded villages in every district the damage caused by the roots of the trees is often so large as to prevent the cultivation of wheat altogether, and many a cultivator finds an acre or two out of his holding useless to him on this account.

26. The Agricultural Class attached to the Farm continues to be in a satisfactory condition. The Junior Class of the year was an exceptionally good one. There is no doubt however that this standard can only be maintained as long as it is possible to provide the students with Government employment. Doctor Leather, the Agricultural Chemist to the Government of India, spent several days during the rains in the detailed inspection of the Farm and the experiments conducted on it. He has made various suggestions which will receive attention. Agricultural Class.

4.—*Forests.*

27. The total area administered by the Department during the year (10,076 square miles in the Northern Circle and 9,886 square miles in the Southern Circle), differs but little from the totals of the previous year.

The following table shows the classification of these forests at the close of the year under review as compared with that of the previous year :—

Circles.	1st July 1893.				30th June 1894.			
	A. Forest under strict conservation.	B-I. Areas available for cultivation.	B-II. Undistributed area.	Total.	A.	B-I.	B-II.	Total.
Northern Circle ...	3,966	663	5,473	10,102	3,887	2,067	4,101	10,055
Southern do. ...	5,118	331	4,071	9,520	5,510	330	3,676	9,516

28. In the Northern Circle good progress has been made in the selection of the areas available for cultivation and of those which are to be permanently retained as forests. During the year 582 square miles have been finally transferred to the Class B-I, and the work in the two districts of Nimar and Narsinghpur is said to be completed.

Proposals for the transfer of a portion of the forest of Class B-II to the permanent forests of Class A are also in preparation.

In the Southern Circle the progress has been less. The only action taken has been the transfer to Class A of 392 square miles of the area classed as B-II, and the selection of the areas available for cultivation is still incomplete.

29. Much progress has been made during the year in the demarcation of the forests, and, except in Chanda, where 320 miles have to be laid down, little remains to be done. The undemarcated boundary in Chanda includes that portion which lies along the zamindari border, where progress must necessarily be slow.

The preparation of boundary registers has also been pushed on, and the progress has been generally satisfactory.

30. Forest survey operations were in progress during the year in Narsinghpur, Nagpur, Raipur and Balaghat, and the outturn of field-work was satisfactory. Pending the issue of the usual photo-zincographic prints of maps, ferrotype prints have been supplied for parts of Jubbulpore, Chanda, Raipur and Bhandara, but the more rapid production of these maps is a matter of the greatest urgency.

The Survey of India also carried on work in Betul and Nimar, and it is expected that the surveys of these districts will be completed this season.

31. In the Northern Circle the system of Provisional Working Circles, laid down in Chief Commissioner's Resolution No. 102, dated the 5th January 1893, has received attention, and 317 circles are now in existence. They cover an area of nearly 1,700,000 acres. The number of working-plan reports completed during the year was 36; the number of working circles now provided with regular plans is 80; and the areas covered by the plans aggregate 600,000 acres or 973 square miles. This progress is satisfactory.

One result of the year's experience of compartment felling is that the provincial rates for timber of the smaller kind is too high. In the Southern Circle much of the material obtained from departmental fellings in the Balaghat, Bilaspur and Sambalpur districts remained undisposed of at the end of the year. In Chanda cutting was stopped, there being scarcely any demand in consequence of the abundant supplies obtainable from malguzari forests; and in Chhindwara the proposals for improvement fellings were found not to be practicable.

In the Northern Circle, in Jubbulpore, an area of 5,877 acres was proposed to have been worked, but it was not taken in hand because of excessive cuttings then going on in the malguzari forests which would have interfered with sales. In the Kalpi Circle only 345 acres were cut over, resulting in 442 cart-loads of fuel, of which 130 cart-loads were removed, and 312 cart-loads still remained in the forest at the end of the year.

From these results the conclusion appears to be irresistible that the people go to the private forests because they get what they want there at cheaper rates and on easier terms; and if the private forests are to be preserved, the only effectual measure to that end is to make our own rates and terms at least as easy as those of private owners. The rates for produce were carefully considered a couple of years ago; in the light of the experience, which is now on record, it seems to the Chief Commissioner to be clear that they were not sufficiently lowered. He has therefore requested that both Conservators should give their immediate attention to a reduction of the rates in these classes of forest-produce which are in common demand.

With regard to the preparation of regular working plans, in accordance with paragraph 87 of the Forest Code, it is satisfactory to note the great progress made in both Circles in spite of the few officers available for the work. The plan mentioned in paragraph 6 of Chief Commissioner's Resolution on the working of the forests for 1892-93, by which a Working-Plans Assistant would be posted to each division, has been tried with success, and in all the districts of the Province working-plans are now in course of preparation, while for several ranges they have been completed.

32. Turning now to the actual working of the Department during the year, the following statement gives the details of the forest offences reported during the year under review and in the previous year, and also shows the mode in which they were disposed of:—

		1892-93.	1893-94.
Northern Circle	Reported and detected	2,831	2,018
	Prosecuted	162	122
	Per cent. convicted	78	80
	Cases compounded under Section 67	2,614	* 1,923
Southern Circle	Reported and detected	5,715	2,373
	Prosecuted	173	79
	Per cent. convicted	73	72
	Cases compounded under Section 67	5,067	2,219

Taking all divisions together there has been a satisfactory decrease in the offences reported and detected in both Circles, but any detailed comparison of the figures is impossible, as they relate to periods of different lengths.

The decrease is general to all classes of offences, and it is especially gratifying to note the marked diminution in those connected with grazing. In the Northern Circle there were only 731 such offences as against 922 last year; while in the Southern Circle the decrease has been still more pronounced, the figures being in 1892-93, 1,678, and in 1893-94, 756.

33. As regards the figures of cases compounded during the year, it is satisfactory to note that there has now ceased to be that marked difference between the figures of the two Circles, and that those for the Southern Circle are now more in accord with the returns of the Northern Circle: and that this is ascribed to greater care and judgment exercised in compounding forest offences, as also to increased watchfulness on the part of forest subordinates over the removal of forest produce. In both Circles the average compensation recovered per person has risen, when compared with the figures of last year, but the increase is only marked in the Southern Circle, where this year Rs. 1-12-2 was levied per head against Re. 0-8-0 in 1892-93. The total number of cases prosecuted is only 152, or less than half of the number in 1892-93.

34. The areas under special fire-protection in each Circle, and the measure of success obtained, are contrasted in the following statement with the figures of the previous year:—

Circle.	Area under protection.		Area successfully protected.		Percentage of area successfully protected to area attempted.		Total cost of special protection.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.			Rs.	Rs.
Northern Circle ...	3,559	4,087	3,550	3,893	100	95	20,952	23,168
Southern do. ...	2,075	2,249	2,054	2,090	99	93	28,786	31,508
Total ...	5,634	6,336	5,604	5,983	99	94	49,738	54,676

The area protected in both Circles was larger than last year, but the operations met with less success, as the year under report was unfavourable, there having been no general rains from December 1893 to June 1894.

The incidence of cost per square mile in the Northern Circle is Rs. 5-15-3, or but little above the figures for last year.

In the Southern Circle the average cost per square mile has risen from Rs. 14-0-3 to Rs. 15-1-2.

35. The following table shows the number of animals grazed in the period under review and in the preceding year, and the receipts from this source—*vide* Annual Form No. 55:—

Circles.	Animals.			Grazing receipts.		
	1892-93.	1893-94.	Difference.	1892-93.	1893-94.	Difference.
	No.	No.	No.	Rs.	Rs.	Rs.
Northern Circle ...	1,355,995	1,245,189	—110,806	2,67,349	2,38,971	—28,378
Southern do. ...	1,685,926	1,398,773	—287,153	2,48,817	1,93,145	—55,672
Total ...	3,041,921	2,643,928	—397,959	5,16,166	4,32,116	—84,050

There has thus been a decrease in both Circles of the number of animals grazed and in the receipts. This is no doubt mainly due to the fact that the figures for 1892-93 refer to a period of 15 months, while those of the present year only include details for 12 months. Even allowing for this, there appears to have been some falling off in the number of cattle grazed, especially in the Southern Circle. This is said to be due to the prevalence of cattle disease, and to the fact that full effect has been given to the Administration's orders that a grazing license at the nomad rates is valid in all districts of the Province. The suspension of the levy of fees in the Saugor and Damoh districts, and also for three months in the Chanda district, owing to the failure of the crops, has also aided in causing the decrease.

36. The operations for the improvement of forest growth during the year consist chiefly of the cutting out of destructive climbers. More has been done

to this end than last year, but pending the introduction of regular working-plans, any attempts at the improvements of forest growth must be more or less spasmodic.

37. The expenditure on communications and buildings decreased from Rs. 23,552 to Rs. 14,380. Most of this was incurred in providing quarters for the field staff and in digging wells, but 110½ miles of new roads were built during the year, and old roads repaired.

38. In the following table the financial results are compared with those in the previous year :—

	1892-93.	1893-94.
	Rs.	Rs.
RECEIPTS.		
Northern Circle	7,07,037	5,31,581
Southern do.	7,41,471	5,61,037
Total ...	14,48,508	10,92,618
EXPENDITURE.		
Northern Circle	4,80,991	3,98,008
Southern do.	4,98,599	4,44,102
Total ...	9,79,590	8,42,110
SURPLUS.		
Northern Circle	2,26,046	1,33,573
Southern do.	2,42,872	1,16,935
Total ...	4,68,918	2,50,508

As the periods in the two successive years are of different lengths, no real comparison is possible.

The following figures show the receipts of the two Circles for the financial years 1892-93 and 1893-94 :—

	1892-93. Rs.	1893-94. Rs.
Northern Circle	6,19,783	5,34,958
Southern do.	6,10,981	5,99,516

In both Circles receipts have diminished, and the reason assigned in each instance is that the reduction in rates and the action of malguzars in selling produce from their forests in large quantities have partly led to this result. It is also suggested that the prohibition of unregulated and indiscriminate fellings may have induced would-be purchasers to go elsewhere for the produce that they required ; that the transfer of large forest areas for ryotwari settlement and the consequent free use of nistar and grazing to the ryotwari settlers may have diminished the receipts in Hoshangabad and Nimar ; and that the fact that the timber and fuel cut departmentally was unseasoned, rendered it less acceptable to the public.

39. The system of levying forest revenue by stamps is said to have worked fairly smoothly throughout the year, and the Chief Commissioner has recently had under his consideration a draft of rules for the guidance of licensed vendors, which, by relieving them of the duty of classifying the revenue and maintaining an elaborate system of account, will help to put the post of forest stamp vendor in better favour, and enable the Department to obtain the services of vendors more readily. What the system lacks at present, is the ability to maintain honest vendors at every place where a demand by agriculturists for forest-produce exists.

5.—*Mines and Quarries.*

40. The Warora Colliery was worked continuously during the year. The total output was 120,788¾ tons against 117,918¼ tons during the previous year, being an increase of 2,870½ tons which calls for no special remarks. The cost of raising coal (excluding expenditure on New Minor Works) was Rs. 4-9-4 per ton against Rs. 4-1-3 in the preceding year. The total earnings during the year amounted to Rs. 5,59,931 and the expenditure to Rs. 5,66,735, thus showing a loss of Rs. 6,804. This is mainly on account of the excessive consumption of coal used at the Colliery, due in a large measure to the use of defective and old-fashioned machinery, and to the

increased cost of repairs and renewals. Since the close of the year a special report on this matter was submitted to the Government of India. The fire-clay industry progressed satisfactorily during the year, the quantity raised being 4,548¾ tons against 2,545 during the previous year. The demand for Warora fire-bricks is increasing. Their manufacture has been much improved, and they compete profitably with the English article at Bombay. The number of accidents at this Colliery was 13, of which one was fatal and 12 serious.

At the Umaria Colliery, the total output amounted to 104,569 tons against 94,846 tons in the previous year, showing an increase of 9,723 tons. This increase was due to continued extension of the "brokens," and to a better supply of labour. The receipts during the year amounted to Rs. 4,03,138, and the expenditure to Rs. 3,38,791, showing a net gain of Rs. 64,347, equivalent to a return of 6·46 per cent. on a capital outlay of Rs. 9,95,241. Under orders of the Government of India the selling rate of large coal was reduced from Rs. 5-8-0 to Rs. 4-3-0 per ton, with effect from the 1st July 1893; and the rate for "washed nuts" was reduced in September 1893 from Rs. 3 to Rs. 2-4-0 per ton. This reduction of course greatly reduced the profit that would otherwise have accrued. Since the close of the year No. 4 pit has been completely submerged owing to an accident by which the flood water from a considerable drainage area entered the mine through the "goaf" or worked-out area where the surface had subsided, thus drowning the steam pumps and rendering special pumping arrangements necessary, which will, it is anticipated, increase the working expenses during 1894-95 by a large amount. The number of accidents was 17, of which 1 was fatal, 9 serious and 7 slight.

6.—*Manufactures.*

41. The following statistics illustrate the working of the Cotton Mills established in the Provinces:—

Provinces.	Place of working.	Date of establishment.	Proprietor. Limited Company or Private.	Nominal Capital.	Nominal horse-power of engines.	Number of looms.	Number of spindles.	Amount of cotton worked up during the year.	Description of goods.	Average daily number of hands employed in each mill. Men.	Women.	Young persons.	Children.	Total.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
				Rs.				Cwts.						
Central Provinces.	Nagpur. (The Empress Mills.) ...	1st January 1877.	Joint stock Company.	30,00,000	320	700	43,128	77,113	Twist and piece-goods.	1,937	380	(a) 356	...	2,673

			Total ...	56,50,000	1,680	853	1,03,754	8,161 Tons 4 Cwts.	...	3,539	1,052	413	393	5,417

(a) Boys and girls above 9 and below 14 years of age.

The mill at Rajnandgaon is not yet working. The number of looms is the same as last year, the increase in the other details is due to the Pulgaon Mills, details of which were not available for last year's report. The number of spindles has, with the outturn of material worked up, increased in all mills, the largest increase being in the Gokuldass Ballabdas Mill at Jubbulpore. The daily average number of hands employed has also risen everywhere except in the Empress Mills, Nagpur, where it fell from 2,740 to 2,673.

The outturn of the Cotton Presses in the Wardha District again fell from 18,980 bales to 9,308, or about one-half. Of the 11 ginning factories said to have been at work in Khandwa in the year previous 2 have been closed, but 4 new factories started work in 1893. The outturn of the year, however, fell from 132,594 maunds of cleaned cotton to 92,696 maunds.

7.—*Trade.*

Total traffic.

42. The following table shows the total traffic of the year, and also that of the two years preceding:—

Description of trade.	Weight in Maunds.			Value in Rupees.		
	1891-92.	1892-93.	1893-94.	1891-92.	1892-93.	1893-94.
Imports ...	6,939,879	7,751,069	7,750,447	4,14,24,543	4,06,67,274	4,26,33,366
Exports ...	20,432,724	17,004,573	19,371,766	6,32,84,102	6,08,94,592	5,90,87,163
TOTAL ...	27,372,603	24,755,642	27,122,213	10,47,08,645	10,15,61,866	10,17,20,529

The imports, it will be observed, closely approximate in bulk to those of the year preceding, which, however, they exceed in value, and they exceed the imports of the first of the three years by 12 per cent. in weight, and only 3 per cent. in value.

Exports, on the other hand, have fallen a little both in bulk and value, as compared with those of 1891-92; as compared with the last year they have increased in bulk, but declined in value, this decline being of course due to the fall in prices of agricultural produce.

43. But the progress of trade can best be understood by a statement of figures showing its amount year by year since 1883-84, when registration was first started:—

Period.	Imports.		Exports.	
	Mds.	Rs.	Mds.	Rs.
Average of five years, 1883-84 to 1887-88 ...	*4,735,515*	*3,54,32,617*	*15,719,454*	*4,16,27,507*
1888-89 ...	4,356,389	2,81,94,414	16,827,230	4,87,09,953
1889-90 ...	4,276,838	2,72,10,981	12,308,997	3,99,70,868
1890-91 ...	5,425,574	3,36,19,569	15,800,002	4,69,48,033
1891-92 ...	6,939,879	4,14,24,543	20,432,724	6,32,84,102
1892-93 ...	7,751,069	4,06,67,274	17,004,573	6,08,94,592
Average of five years, 1888-89 to 1892-93 ...	*5,749,950*	*3,42,23,356*	*16,474,705*	*5,19,61,509*
1893-94 ...	7,750,447	4,26,33,366	19,371,766	5,90,87,163

The figures given in the foregoing table show very clearly that the import traffic is increasing year by year, and unsatisfactory harvests have failed to check this increase to any appreciable extent. In the year under consideration the imports exceeded the average of the five years 1883 to 1888 by 64 per cent. in weight, and by 20 per cent. in value. The system of valuation in the first period, however, was different from that now adopted, and the comparison is not a fair one as to value. It will be observed that during the last few years the value of imports has generally risen—since the system of valuation has been uniform—though not always in direct ratio to the increase in bulk.

The amount of exports, however, fluctuates considerably, as they consist for the most part of raw produce, and must of necessity vary with the demand of Europe and other Indian Provinces and the supply at home in the shape of the character of the harvests. The rise in prices of agricultural produce is shown by the fact that while the exports have increased by 23 per cent. in weight, they have risen by 42 per cent. in value, the system of valuation having been uniform throughout.

Sugar.—Imports of refined sugar have recovered after their fall of the previous year, two-thirds of the total are received from Bombay, and consist of Mauritius sugar, and nearly the whole of the rest comes from the North-Western

Provinces. But the increase in imports over those of the previous year is entirely confined to Mauritius sugar.

The amount received from Bengal is utterly insignificant.

Local produce continues to decline, and the imports, as a whole, show a steady tale of progress.

Spices.—The principal articles under this head are betelnuts and chillies. The imports of betelnuts show only the ordinary trade fluctuations.

The direction of the traffic in chillies was, however, completely altered. The town of Calcutta sent the Central Provinces 14,858 maunds in 1892-93, but in the year under report it sent only 34 maunds and received 7,190 maunds from the Central Provinces against nothing in the preceding years. Whether this change is purely temporary cannot at present be determined. *Tobacco* does not quite maintain the figure of last year, the highest on record, but the imports valued 10 lakhs of rupees. *Silk* shows a remarkable rise accompanied by a fall in the imports of woollen piece-goods.

44. Comparative details of the last three years' trade under each of the most important import headings are given below:— Import traffic.

Commodities.	Quantity in Maunds.			Value in Rupees.		
	1891-92.	1892-93.	1893-94.	1891-92.	1892-93.	1893-94.
Coal and coke.	1,843,468	2,348,971	2,422,312	8,85,428	9,07,379	8,19,571
Cotton twist and yarn. { European	66,209	45,675	46,827	35,42,508	24,21,554	26,19,426
{ Indian	46,198	37,156	30,113	14,16,424	11,67,299	9,32,971
Cotton piece-goods. { European	125,831	115,124	114,097	57,28,526	51,49,858	52,49,137
{ Indian	25,000	23,784	26,425	9,98,749	8,74,377	10,00,744
Metals { Iron	286,985	377,722	232,853	13,12,910	18,68,136	11,53,289
{ Other kinds.	45,889	42,940	47,555	12,97,299	12,06,763	13,50,777
Kerosine oil	184,360	241,616	272,039	7,66,502	9,59,886	10,13,628
Provisions	270,31	238,325	249,741	36,80,312	33,58,275	33,31,221
Railway Plant and Rolling Stock	155,112	263,785	785,385	7,73,259	17,23,337	32,15,463
Salt	1,505,386	1,482,643	1,576,106	51,35,806	51,54,766	57,41,951
Sugar { Refined	159,424	84,089	136,723	14,67,744	9,08,141	14,67,404
{ Unrefined	468,469	560,727	548,781	23,15,539	22,12,458	26,77,304
Spices	101,942	94,229	64,587	11,78,750	10,84,576	8,61,801
Tobacco	69,363	110,345	102,782	7,44,161	11,68,690	9,91,612

Coal.—The expansion in imports of coal noticed last year has been more than maintained, and both Bengal and Umaria coal have been imported mainly for railway purposes in greater quantities than in the year preceding—the increase being common to all three blocks of Jubbulpore, Nagpur and Chhattisgarh

Cotton-goods.—The imports of European piece-goods and yarn remain at about the same figure as in the preceding year, but the expansion of local manufacture is certainly checking the imports of Indian cotton-goods, which have declined since 1891-92, though not with much rapidity; the decline is, however, confined to twist and yarn, in which local mills compete with outside manufacture to a far greater extent than is the case with piece-goods.

The opening of the Bengal-Nagpur Railway caused a remarkable development in the imports of the cotton-goods into Chattisgarh in 1891-92, but the import in that year seems to have been carried to excess, and importers have been obliged to slacken off considerably in the two following years. A fairly regular standard of consumption may be expected to be reached in the course of a few years.

Metals.—There has been a steady growth in the imports of metals, and the decline in the imports of iron as compared with those of the preceding year means nothing more than a return to more normal conditions, the imports of the preceding year having been fortuitously swelled by railway requirements and mill construction.

Kerosine oil.—The remarkable expansion of the imports of kerosine oil continues. The amount in the year being 2,72,039 maunds, in the purchase of which the Provinces spent over 10 lakhs of rupees,

Provisions.—Under this head the imports amount to 2½ lakhs of maunds, and the Provinces spent about 33 lakhs of rupees, but the most

important articles under this heading are dried fruits and nuts, the traffic of which during the past year is shown in the table below:—

Block into which imported.	Imports of dried fruits and nuts in maunds.							
	Average of five years, 1883-84 to 1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	Average of five years, 1888-89 to 1892-93.	1893-94.
Jubbulpore ...	*80,516*	24,835	29,879	27,323	56,779	38,762	*35,516*	32,688
Nerbudda ...	*53,046*	61,825	41,758	40,287	57,550	46,595	*49,603*	45,475
Nimar ...	*17,426*	20,321	18,463	18,191	22,941	21,008	*20,185*	21,918
Nagpur ...	*38,638*	49,065	55,234	54,813	59,047	45,094	*52,651*	46,544
Chhattisgarh ...	*2,532*	2,892	5,209	4,594	15,651	24,541	*10,577*	21,991
TOTAL ...	*142,158*	158,938	150,543	145,208	211,968	176,000	*168,532*	168,616

Cocoanuts form the bulk of the traffic.

Salt.—As was explained in last year's report, the figures of the Jubbulpore and Nerbudda blocks have to be considered together, as the salt consumed in Saugor and the neighbourhood is now conveyed *viâ* the Jubbulpore block by the Indian Midland Railway, instead of being unloaded as formerly at Kareli in the Nerbudda Division.

The increase of the imports of the year over the average imports of the preceding quinquennial period has been about 5 per cent. in these two Divisions. In the Nimar and Nagpur Divisions the increase has been 18 and 10 per cent. respectively. The development in Chhattisgarh has been very large, but the increase is mostly due to the substitution of salt brought by rail for the salt which previously came by road from the Madras Presidency.

Export traffic.

45. Comparative details of the amount and value of the leading articles of export are shown in the next statement:—

Commodities.	Weight in Maunds.			Value in Rupees.		
	1891-92.	1892-93.	1893-94.	1891-92.	1892-93.	1893-94.
Coal and coke	1,962,927	1,773,057	2,258,532	4,90,732	4,43,264	5,64,633
Cotton, raw	141,539	258,758	170,738	19,28,469	45,28,265	30,09,257

Tilseed	511,486	643,168	520,060	20,45,944	31,35,444	26,97,811
Myrabolams	409,939	362,711	537,159	11,27,332	9,97,455	11,41,462
Stick-lac	81,178	23,520	27,092	13,80,026	3,64,560	5,41,840
Ghi	26,842	24,111	21,580	7,28,089	8,19,774	6,50,097
Hides	31,078	64,774	41,463	7,46,609	14,03,984	9,51,464

The chief rise occurs in the case of coal, myrobalans and linseed, while the export of til and food-grains have fallen, except in the case of juar and bajra, which show a large increase. The exports of raw produce have generally followed the character of the harvests.

Cotton.—The exports of the year fell at no less than 25 per cent. below the average of the five preceding years,—the fall being due both to deficient crops and stagnation of trade,—the only block which maintained the average was Nimar, in which district the area sown had been much above normal, and the crop a fair one. But the exports were still much above those of 1891-92, in which year the crop was a very poor one.

The local industries doubtless absorb more of the raw produce than was formerly the case, but this has not much affected the course of the export trade, for the areas under cotton have been increasing in response to the change.

A revival of trade, coupled with better harvests, will restore the exports to the average figure, and the fall is, so far as can be judged at present, a temporary one. About treble the usual quantity of raw cotton was imported from the Berars for local manufacture.

Wheat.—The wheat exports of the past years are shown below:—

Period.	Exports of Wheat in maunds from—					
	Jubbulpore block.	Nerbudda block.	Nimar block.	Nagpur block.	Chhattisgarh block.	Total.
Average of five years, 1883-84 to 1887-88 ...	*1,043,091*	*4,795,720*	*157,904*	*1,154,688*	*838,010*	*7,989,413*
1888-89 ...	1,748,782	5,496,921	150,104	1,669,845	950,685	10,016,337
1889-90 ...	915,071	2,288,455	68,479	905,243	435,744	4,612,992
1890-91 ...	1,244,106	3,086,328	88,937	713,781	1,006,983	6,140,185
1891-92 ...	2,472,913	3,556,562	65,220	1,029,920	1,568,156	8,692,771
1892-93 ...	2,103,297	2,506,968	200,766	383,597	466,805	5,661,433
Average of five years, 1888-89 to 1892-93 ...	*1,696,834*	*3,387,047*	*114,701*	*940,477*	*885,675*	*7,024,734*
1893-94 ...	893,682	3,601,548	142,907	153,596	858,523	5,650,256

The exports of wheat continued at a low ebb, the figure being much the same as in the preceding year. The quantity available for export was larger than in the preceding year, but the foreign demand remained stagnant, and the quality of the rust-damaged grain did not satisfy the largest exporting firms. This was especially the case with the wheat of the Nagpur country, the exports from which fell to one-sixth of the average. The Nerbudda Valley and Chhattisgarh alone saved the wheat export trade from entire collapse, but Jubbulpore contributed only half the usual amount.

The progress made in the diversion of the wheat of these Provinces from Bombay to Calcutta by the Bengal-Nagpur Railway is very small. The Nagpur and Chhattisgarh blocks have, however, made a considerable advance as compared with last year.

Rice.—The great development of the rice export has been noticed in previous reports. It was fairly maintained during the year, but the rice crop in the Nagpur country was not quite a full one, and there has been some falling off in the exports of this Division.

The disposal of its surplus rice brought in nearly a crore of rupees to the Provinces. The distribution of the exported rice is very wide. Curiously enough, the Nagpur rice is taken up by Berar and the Bombay Presidency, while the Bombay port hardly touches Nagpur rice, but takes half the quantity exported from Chhattisgarh, which sent the other half to all parts of India. Thus 3½ lakhs of maunds went to the Bombay Presidency, 4¼ lakhs to Berar, 1¾ lakhs to the North-Western Provinces, 2¾ lakhs to Bengal, and even the Punjab received over a lakh of maunds from Chhattisgarh, as against 24,000 maunds in the preceding year.

Juar and Bajra.—The exports of juar from the Nerbudda and Nimar blocks were far in excess of the average, owing to good harvests, and in Nagpur, although exports were trifling, the amount imported was very small. In the previous year Berar sent 5½ lakhs of maunds, while in this year it received over 3½, chiefly from Nimar.

Gram and Pulse.—The amount exported was slightly less than in the previous year, Calcutta received about a sixth, chiefly from the Nerbudda and Jubbulpore blocks, and three-fourths of the total were consigned to the Bombay port. The exports to Calcutta were 50 per cent. larger than in the previous year.

Linseed.—There is a remarkable expansion of export under this head. The area under linseed has expanded, and the outturn was about 20 per cent. larger than in the preceding year. The exports of the year were nearly double those of the year preceding, and the largest on record, amounting to 27,26,766 maunds in weight, and a crore and seventeen lakhs in value.

The figures for the Nagpur, Nimar, Nerbudda and Chhattisgarh blocks are the highest on record, and more than double those of the year preceding. The seaports took practically the whole amount, Calcutta receiving a sixth, or about the same proportion as in the preceding year.

Tilseed.—Since the year 1890-91, when the til crop was specially good, the exports of tilseed have languished, and the year's export is less than the average of either of the two preceding quinquennial periods. In Jubbulpore and Nimar alone has there been a very marked increase, while the decline is specially large in the Nagpur block, where inopportune rain during the past few years has caused repeated failure of crops and much reduced the area sown.

Nearly the whole of the tilseed is taken by the Bombay port; Calcutta receiving a small quantity from Chhattisgarh.

Internal trade.

46. The traffic which passed between the several Provincial blocks was but slightly in excess of that of the year preceding, but was over a crore of rupees in value.

Almost a third of this trade represented cotton-goods manufactured in the Nagpur mills and consigned to Chhattisgarh, which paid for them in grain. The grain exports of Chhattisgarh to other parts of the Provinces amounted in value to 23⅘ lakhs of rupees, two-thirds of this being received by the Nagpur Division. About two lakhs of maunds of grain, principally rice, were sent from Chhattisgarh to the northern districts over the Bilaspur-Katni line; and the total exports of Chhattisgarh into other blocks amounted to 10½ lakhs of maunds, or over 40 per cent. in bulk of the whole local traffic, and about a third of the whole in value.

General.

47. The total balance of trade was in favour of the Provinces, the value of the exports exceeding that of the imports by 1 crore and 64 lakhs of rupees. This is a lower balance than that of the preceding year, owing to the continued depression of the wheat trade, the smallness of the cotton exports, and the low prices at which the Provinces were obliged to part with their raw agricultural produce. But notwithstanding these disadvantageous circumstances, this balance of trade is up to the average of the preceding years.

A feature of interest is the extent to which the opening of the Bengal-Nagpur Railway has affected the trade of the Provinces. This line was opened completely at the close of the year 1890-91.

The progress of Chhattisgarh has been very remarkable, and although the traffic of the Provinces with the east still bears but a small proportion to that with the west, yet it has certainly advanced by leaps and bounds. In the year 1890-91 the traffic with the east amounted both in bulk and value to only 5 per cent. of the total traffic of the Provinces. In the year 1893-94 the total traffic has been 27 per cent. larger than it was in 1890-91, and 16 per cent. of the whole has been with the east.

Indeed, of 59 lakhs of maunds added to the traffic, no less than 36 lakhs represent the addition to the trade with the east, and out of 2 crores added to the value of the total traffic over the value of that of 1890-91, one crore and 20 lakhs represent the value added to the trade with the east. The accession of trade with the east is therefore due to expansion and not diversion of traffic. The balance of trade with the east is against the Provinces, but the increase in value of exports from and imports to the east has been the same, so that the balance of trade is the same: while the effect of the new line has been, during the year under report, to allow the Provinces to purchase sixty lakhs worth of commodities in exchange for produce of a similar value which never reached the market before.

8.—*Public Works.*

48. An important feature of the year's administration was the inauguration of a scheme for the construction of roads and improving communications in the Feudatories and Zamindaris of the Chhattisgarh Division. It having come under observation that a considerable amount of money was available for expenditure on Public Works in certain Feudatory States and Zamindaris

under Government management, it was deemed desirable to utilize this money in the construction of roads with the view of bringing them into communication with the Bengal-Nagpur Railway. These parts of the country are in a very backward state, being entirely unprovided with the means of communication other than the merest country tracks, and consequently for a greater part of the year are inaccessible and isolated from the outer world. It is therefore apparent that immense benefit must inevitably result to these States and Zamindaris, both administratively and commercially, by being brought in touch with the railway system.

With the approval of the Government of India a new temporary division was accordingly sanctioned, designated the "Chhattisgarh States Roads Division," and placed in charge of an Executive Engineer on the Local Administration list, working under the orders of the Chief Engineer. In addition to bearing the charges on account of the salaries of the Executive Engineer and his staff, the States, &c., pay 5 per cent. on the cost of work done to cover the charges for Direction and Account. The Division was opened on the 1st June 1893. The expenditure up to 31st March 1894 amounted to Rs. 99,081, and was incurred chiefly in the Chhuikhadan and Kanker States and in the Pandaria Zamindari.

Since the close of the year another important administrative change was sanctioned in the amalgamation of the Kanhan and Plateau Roads Divisions; the combined division being termed the "Plateau Division" with head-quarters at Seoni in the Seoni District. This reduces the number of Public Works Divisions from six to five, thereby effecting a corresponding reduction in establishment.

49. The total expenditure incurred on public works by the Public Works Department during the year 1893-94, under the several branches of service, amounted to Rs. 30,62,477, as shown in the following table; the figures for the preceding year being also shown for the sake of comparison:—

Branch of Service.	Expenditure.		Remarks.
	1893-94.	1892-93.	
	Rs.	Rs.	
Imperial Military Works	13,086	3,873	
Do. Civil Works	14,489	21,100	
Provincial	18,33,498	17,46,205	
Incorporated Local Funds	1,81,703	1,29,256	
Contributions	1,60,918	4,78,041	
Warora Colliery (Capital)	1,934	*—60,665*	
Do. do. (Revenue)	5,66,827	5,06,742	
Umaria Colliery (Capital)	*—53,302*	28,070	
Do. do. (Revenue)	3,42,767	3,31,794	
Guaranteed Railways (Land)	557	728	
Total ...	30,62,477	31,85,144	

The decreased outlay of the year is due principally to the completion of the Balram Dass Water-works at Raipur in 1892-93, the expenditure on which appeared against the head "Contributions."

The expenditure entered against "Imperial Military Works" includes a grant of Rs. 5,000 made to the Raipur Municipality for extending the Water-

supply to the military lines in that station, and outlay on repairs of certain military buildings in charge of the Public Works Department.

Beyond a few minor works and the maintenance and repair of existing buildings, nothing was done under the head "Imperial Civil Works."

The total outlay on Provincial Services amounted to Rs. 18,33,498 against Rs. 17,46,205 expended during the previous year.

The expenditure on Original Works—Civil Buildings—was Rs. 5,15,373 against Rs. 5,51,535 in the preceding year. The following were the chief works in progress or completed during the year:—

Administration.—Nothing worthy of special notice was carried out under this head; the expenditure incurred being limited principally to minor alterations and additions to Circuit-houses and Tahsilies.

Law and Justice.—The new Law Courts at Nagpur, which were commenced in May 1892, were completed and occupied during the year. They were formally opened by the Chief Commissioner on the 18th August 1893.

A new Circuit-house at Saugor was completed and furnished, and the construction of similar buildings at Hoshangabad and Betul was sanctioned during the year, and fair progress made. Suitable furniture was also provided for all Circuit-houses.

At Raipur a bungalow was purchased for Rs. 25,000, and converted into a Court-house for the Commissioner at a further cost of Rs. 2,500. Additions and alterations to the District Court-houses at Raipur, Hoshangabad and Khandwa, were also sanctioned, but little progress made.

Central Jails.—At Nagpur a new ward for females was completed, and the old female ward altered so as to accommodate male convicts. Solitary cells for females, and additional worksheds were constructed, and such of the buildings as had not been re-roofed with Allahabad pattern tiles were taken in hand and completed. Arrangements were also made for improving the sub-soil drainage of the Jail enclosure and for the irrigation of the Jail garden.

At Jubbulpore, the double-storied hospital and boundary wall which were mentioned in last year's report, were entirely completed at an actual cost of Rs. 90,036 against an estimate of Rs. 95,184. During the year twenty additional solitary cells, and eighty-five cubicles for juvenile offenders were sanctioned. The latter were completed, and work on the former well advanced.

At Raipur, new quarters for warders and cubicles for juveniles were provided. The construction of new quarters for the Superintendent was also taken in hand.

District Jails.—At Wardha certain barracks and worksheds were re-roofed with Warora tiles, and solitary cells for females constructed. At Chanda, additional quarters for warders were built. An additional barrack to accommodate thirty females was sanctioned for the Damoh Jail. At Mandla, the warders' quarters commenced in last year were completed, besides some minor works of improvement. Estimates amounting to Rs. 70,044 and Rs. 29,484 for additions and alterations to the Narsinghpur and Bilaspur Jails, respectively, were sanctioned during the year.

Police.—The important work of providing better accommodation for the Police force at head-quarters and in the various districts continued during the year. The lines at Mandla were completed and handed over for occupation. Good progress was made in the construction of lines at Hoshangabad, but the work at Seoni and Narsinghpur advanced but little. Fair progress was also made in housing the Jubbulpore City Police. A station-house at Nagpur was completed, and similar buildings commenced at Sindhi (Wardha District) and Venkatapur (Chanda District). The construction of quarters at Nagpur, Wardha and Nachangaon was in progress; and those at Barodia, in the Saugor District, and at Patan, in the Jubbulpore District, were completed. In the Eastern Division the building of quarters at Simga and Gandai was well advanced, and the quarters at Sambalpur and Attabira completed.

Medical.—The old Court-house of the Judicial Commissioner at Nagpur, which is in close proximity to the Lunatic Asylum, was, on the transfer of that Court to the new Law Courts building, made over to the Asylum for the accommodation of European lunatics, and water from the Ambajheri high

level service reservoir laid on to the building. Mortuaries were constructed at Murwara in the Jubbulpore District, and at Dindori in the Mandla District.

Miscellaneous.—A new wing was added to the Secretariat Printing Office at Nagpur, the cost being about Rs. 4,000.

Repairs—Civil Buildings.—The outlay during the year on this head was Rs. 78,892 against Rs. 69,872 expended during 1892-93. The average expenditure of the four preceding years amounted to Rs. 55,616.

Original Works—Communications.—The total outlay under the head of Communications amounted to Rs. 3,12,287 against Rs. 3,16,797 in the previous year, and Rs. 5,71,791 in 1891-92.

In the Nagpur Division no new works were started, but progress continued on works incomplete in the previous years, some of which were finished during the year. The bridge on the Southern road over the Bhandak nala in the Chanda District, of which mention was made in last year's report, was completed during the year at a cost of Rs. 14,250.

The construction of bridges and culverts on the Chanda-Mul road, Class II, was taken in hand. An estimate for the 3rd section of the Kalmeshwar-Katol Road, Class III-B, was sanctioned late in the year; also estimates for the 1st and 2nd sections of the Mul-Muramgaon Road, Class III-B.

In the Jubbulpore Division no work was undertaken on I and II Class roads.

Fairly good progress was made on the construction of the important bridge over the Machna river at Shahpur on the Itarsi-Badnur section of the North-west Road in the Hoshangabad Division which was commenced in last year. The work has been completed since the close of the year. The bridge is of a submerged type, of 12 spans of 24 feet each, with the roadway 14 feet above the river bed, and is estimated to cost Rs. 41,735. In the Eastern Division the only work of some importance was the widening of the bank of the first 11 miles of the Class II road from Raipur to Dhamtari, which is a railway feeder.

With the exception of the construction of the 2nd section of the Lamtha-Behir, Class III-B road, from Paraswara to Behir (18 miles), no other work deserving special mention was undertaken in the Kanhan Division.

In the Plateau Roads Division the road from Seoni to Chhindwara, which was hitherto a Class II road, is now being raised to Class I. The collection of metal was completed, but, owing to scanty rainfall, consolidation was retarded. It is expected that the entire metalling will be completed during 1894-95. As regards bridging, the principal rivers crossed are the Pench and the Wainganga. These have been gauged, and a submerged bridge decided upon for the former: estimates for the work being under consideration. Another important work was improving the road from Seoni to Balaghat, length 54 miles. The 1st section, 14 miles, which was previously a district road, has been raised to Class I by improving the grades, metalling and bridging. The work was practically completed during the year, except bridging the Goddam in the 12th mile, the only major stream on this section for which an estimate is under consideration. The 2nd section, 11 miles, from Burghat to the village of Behree, as well as the remainder of the road to its termination at Balaghat, is to be raised to Class II only. The earthwork in the 2nd section has been completed, moorum collected for nine miles, and work on the minor bridges and culverts is in progress. In addition, three bridges of considerable importance have to be constructed, for all of which estimates are under consideration. The part of the 3rd section from Behree to Kanjai, owing to the irregular nature of the ground, is very difficult to align. There is a ghât to cross with a fall of 300 feet in 1½ miles. A practical line, however, has been worked out. From Kanjai the remaining length is on easy ground, and but little will be required to complete the estimates. The other works deserving mention are the Seoni-Mandla Road, Class III-B, length 44 miles, the earth-work on the 1st section (16 miles) of which was completed; and the reduction from Class II to III-B of the roads from Betul to Chhindwara and from Multai to the Berar frontier.

During the year estimates for new roads, aggregating 86¾ miles in length, were sanctioned.

50. The table below gives the number of miles of road maintained in 1892-93 and 1893-94:—

Class.	Mileage in 1892-93.	Mileage in 1893-94.	Average cost of maintenance per mile.
			Rs.
Metalled roads	1,220½	1,236½	381
Unmetalled roads	6,434	6,420	32
Total ...	7,654½	7,656½	.....

The expenditure on maintenance and repair of Provincial roads amounted to Rs. 4,89,474 against Rs. 4,06,016 in the previous year.

51. The Water-supply scheme for the town of Rajnandgaon, of which mention was made in last year's report, was completed during the year, and the works were formally opened by the Chief Commissioner on the 19th January 1894. Since then the scheme has worked well, and a constant supply of good water has been given to the town. At the request of the Feudatory Chief of Rajnandgaon, these works are called after his mother, the Rani Jotkunwar Bai, and are designated "The Rani Jotkunwar Bai Water-works."

Since the close of the year an estimate was sanctioned for the Jubbulpore Water-works extension, amounting to Rs. 2,44,110, and new schemes for water supply to the towns of Khandwa and Harda are under consideration.

The Water-works at Nagpur, Jubbulpore, Raipur and Hinganghat were efficiently maintained by the Public Works Department during the year.

9.—*Industries.*

52. The factories in the Central Provinces falling within the scope of the Act during the year 1893 were confined to the same districts as in the previous year, *viz.*, Nagpur, Wardha, Jubbulpore and Nimar. The Deputy Commissioner, Chhindwara, has reported on a cotton-ginning factory at Mohgaon, but this is not necessary, as the number of hands employed—14—is too small to bring it within the purview of the Act. The number of factories, however, increased from 16 to 22, three having been added in Jubbulpore and one each in the other districts named. The additions in Jubbulpore and Wardha were made on the Chief Commissioner's calling for a report on the subject, his attention having been drawn while on tour to the fact that certain factories within the meaning of the Act had not been registered.

Cotton forms the staple of the Central Provinces factory industries, five mills, eight cleaning factories and four presses being engaged with this product. Of the remaining five factories, one deals with oil and flour, one with pottery, one is a colliery * and two are railway workshops, all, except one of the last named, being included in the Jubbulpore return.

* Wrongly classed as "Iron-works" in the District Report.

At the request of the Chief Commissioner, the Government of Bombay last August kindly consented to allow the Inspector of Factories for that Presidency to inspect all the registered factories in the Central Provinces, instead of a limited number as previously arranged. The appointment was then vacant, however, and no inspections have yet been made by the officer subsequently appointed. In addition to District Magistrates, all Civil Surgeons have been appointed *ex-officio* Inspectors of Factories.

The provisions of the Act and of the rules framed thereunder appear to be generally observed in the registered factories. Numerous sanitary improvements were suggested by Inspecting Medical Officers, and these, as a rule, were attended to.

Two of the Wardha factories and all those in Nimar—9 in all—are shown as working by shifts, the remaining 13 by stoppages. Fourteen factories close on Sundays, the remainder taking a weekly holiday.

The sanitation in the factories under native management is somewhat defective. The health of the operatives is stated to be good.

Fencing is stated to be adequate, but as the majority of accidents were caused by contact with moving machinery, it seems that there is room for improvement in this matter. There were 69 accidents reported during the year, of which 32 were serious and 1 fatal. There was one prosecution during the year in the Nimar District for failing to report a serious accident. The accused was fined Rs. 10.

It is stated that the wages paid in factories are higher and the operatives better off than in other employments of corresponding status. Employment in the factories is eagerly sought after, and the managers of factories are ordinarily found ready to promote the welfare of their employés.

10.—*State Railways.*

53. There are no State Railways under the control of this Administration. The working of the Wardha Coal State lines was transferred to the Great Indian Peninsula Railway Company in 1891.

CHAPTER V.—REVENUE AND FINANCE.

Accounts.

The following is an abstract of the accounts of the Administration of the Central Provinces for the year 1893-94:—

Heads.	Receipts.	Expenditure.
	Rs.	Rs.
Cash Balance on 1st April 1893	60,53,145	...
Revenue and Service Heads.		
Imperial Revenue and Expenditure	69,23,404	10,11,349
Provincial Revenue and Expenditure	77,53,133	64,67,331
Local Revenue and Expenditure	11,09,914	10,38,754
Debt and Remittance Heads.		
Excluded Local Funds—Revenue and Expenditure	1,89,446	2,03,415
Civil Deposits	40,42,266	40,52,277
Municipal Funds	12,93,847	12,01,311
Miscellaneous Debt Accounts	39,77,518	39,43,188
Accounts with Native States	...	...
Departmental Accounts	1,085	388
Provincial Advance and Loan Account	1,67,405	2,20,390
Cash Remittances and Adjustments	78,64,685	78,65,669
Remittances by Bills—Local and Foreign	30,42,729	30,69,854
Foreign Remittances	17,36,000	64,28,882
Bills and Miscellaneous Accounts with other Governments ...	23,08,405	32,01,722
Post Office Department	50,37,905	5,50,074
Telegraph Department	35,260	1,19,226
Accounts Current between Civil and Marine	...	...
Military Department	1,24,787	33,86,333
Public Works Department (including State Railways)	44,63,552	65,04,973
Remittance Account between England and India	1,014	...
Cash Balance on 31st March 1894	...	68,60,064
Total ...	5,61,25,500	5,61,25,500

The cash balance of the Province has risen from Rs. 60,53,145 to Rs. 68,60,064, owing to the surplus money placed at the disposal of the Comptroller-General not having been removed.

The expenditure of Rs. 2,20,390 during the year 1893-94 under Provincial Advance and Loan Account is made up of the payment of Rs. 36,349 advanced under the Land Improvement Act, and of Rs. 1,84,041 under the Agriculturists' Loans Act. No loans were granted to Municipalities during the year under review.

The large figures under the head Foreign Remittances do not for the main part represent actual cash remittances in the ordinary acceptance of the term, but are on account of transfers temporarily made from and to local treasury balances, to and from currency chests, in response to opposite payments at Calcutta and Bombay. There was a net increase of about Rs. 13,86,000 under this head during the year under review in comparison with that of the previous year.

Total Revenue and Expenditure.

2. The total revenue of the year amounted to Rs. 1,58,33,477 and the expenditure to Rs. 1,05,32,935. These figures show a surplus of revenue over expenditure of Rs. 53,00,542 or about 4½ lakhs less than that for 1892-93. The distribution of the revenue and expenditure under the three heads of Imperial, Provincial and Local (including the Provincial receipts and the Provincial and Local Expenditure of the Public Works Department) is as follows:—

	Revenue.	Expenditure.
	Rs.	Rs.
Imperial	69,23,404	10,11,349
Provincial	78,00,159	83,01,129
Local	11,09,914	12,20,457
Total ...	1,58,33,477	1,05,32,935

Provincial Contract.

3. The arrangements with the Government of India for the administration of the Provincial Services, which were made for five years from the 1st of April 1892, remained in force during the year under review.

4. The following table exhibits the actual figures of the Provincial revenue and expenditure of this Administration of the two years 1892-93 and 1893-94:—

Revenue and Receipts.	Actuals.		Expenditure.	Actuals.	
	1892-93.	1893-94.		1892-93.	1893-94.
CIVIL HEADS.	Rs.	Rs.		Rs.	Rs.
I.—Land Revenue (¼ Provincial) ...	17,37,594	17,30,555	1. Revenue, Refunds, Provincial	26	17
IV.—Stamps (¾ Provincial)..	12,67,731	13,14,104	Do. divided heads ..	15,217	21,549

Contract deductions from Land Revenue.

5. Under the terms of the present Provincial Contract one-fourth of the land revenue is Provincial, and a lump assignment of Rs. 22,05,000 is made from Imperial to the credit of Provincial revenues. The variations in the Contract deductions from land revenue between the present and last Provincial Contracts were explained in paragraph 5 of the review for last year.

6. It will be seen from the statement given above that the Provincial revenue for 1893-94, including the one-fourth share of land revenue and the assignment of Rs. 22,05,000 from the Imperial Revenue (but excluding the contributions from Local) amounts to Rs. 78,00,159, while the total Provincial expenditure (excluding the contributions to Local) is Rs. 83,01,129.

7. On comparing the actuals for the two years 1892-93 and 1893-94, it will be observed from the statement that after adding the lump assignment of Rs. 22,05,000 to land revenue, and including the contributions to and from Local revenues, the actual Provincial revenue and expenditure of the year 1893-94 amounted to Rs. 78,48,588 and Rs. 84,59,043, respectively, as against Rs. 78,28,464 and Rs. 80,46,443 for the year 1892-93. The increase in revenue occurs chiefly under "IV Stamps," "V Excise," "X Registration," "XII—Interest," "XIX—Education," "XX—Medical," "XXIII—Stationery and Printing," and "XXV—Miscellaneous," while there has been a decrease under "I—Land Revenue," "VI—Provincial Rates," "IX—Forest," "XVII—Police" and under "Contributions from Local Revenue." On the other hand the expenditure has increased under all heads, except under the heads, "2—Assignments," "10—Assessed Taxes," "19-B—Law and Justice—Jails" and "45—Civil Works." The final result of the year's transactions is that

the Provincial balance has decreased from Rs. 18,36,360 on the 31st March 1893 to Rs. 12,25,905 on the 31st March 1894. The Provincial balance on the 31st March 1894 was therefore more by about 4½ lakhs than the minimum fixed by the Government of India.

A detailed review of the Provincial revenue and expenditure of the past official year is given in the following paragraphs :—

A.—REVENUE.

8. It has been shown that the total revenue of the year, excluding contributions from Local Funds, amounted to Rs. 1,58,33,477. The distribution under the several major heads of the Government accounts is shown in the following table :—

Major heads of Revenue.	Imperial Revenue.	Provincial Revenue.	Incorporated Local Funds Revenue.	Total.
	Rs.	Rs.	Rs.	Rs.
I.—Land Revenue	29,86,667	39,35,555	...	69,22,222
II.—Opium	2,40,039	...	...	2,40,039
III.—Salt	...	...	...	...
IV.—Stamps	4,38,035	13,14,104	...	17,52,139
V.—Excise	20,95,252	6,98,417	...	27,93,669
VI.—Provincial Rates	...	2,16,695	7,75 345	9,92.040

XIII.—Post Office	...	8,749	...	8,749
XVI-A.—Law and Justice—Courts of Law ...	...	1,42,699	...	1,42,699
XVI-B.—Law and Justice—Jails	...	2,69,261	...	2,69,261
XVII.—Police	...	20,537	1,85,373	2,05,910
XIX.—Education	...	76,614	9,737	86,351
XX.—Medical	...	8,352	8312	16,664
XXI.—Scientific and Minor Departments ...	...	11,982	4,811	16,793
XXII.—Receipts in aid of superannuation, &c. ...	47,245	13,271	113	60,629
XXIII.—Stationery and Printing	1,174	36,482	...	37,656
XXV.—Miscellaneous	1,589	70,279	33,383	1,05,251
XXXII.—Civil Works	...	10,851	92,557	1,03,408
Total Civil ...	69,23,404	77,53,133	11,09,914	1,57,86,451
Public Works Department—Revenue—Buildings and Roads...	...	4,7026	...	47,026
GRAND TOTAL ...	69,23,404	78,00,159	11,09,914	1,58,33,477

I.—Land Revenue.

9. The total Land Revenue collected during the year 1893-94 amounted to Rs. 69,22,222, as compared with Rs. 69,50,377 for 1892-93. The decrease is due chiefly to the stoppage of advance collections.

The division between Imperial and Provincial is given below :—

	1892-93. Rs.	1893-94. Rs.
Imperial share	30,07,783	29,86,667
Provincial share	39,42,594	39,35,555
Total ...	69,50,377	69,22,222

II.—Opium.

10. The revenue is wholly Imperial. It represents the cost price (fixed at present at Rs. 7-4 per seer) of Opium sold at the Treasuries for the Excise Department. The arrangement is that on the sale of Opium the credit for the gross proceeds is divided between Opium and Excise in the proportion of Rs. 7-4-0 per seer to Opium and the balance as Excise revenue, no charge being made for the Excise Department for the opium supplied to it by the Opium Department. The amount credited as Opium revenue in 1893-94 was Rs. 2,40,039 as compared with Rs. 2,27,979 for 1892-93. The increase is practically confined to the Chhattisgarh Division as a large quantity of Opium was purchased by the Feudatory Chiefs, Zamindars and Jagirdars there.

IV.—Stamps.

11. The total revenue under this head amounted to Rs. 17,52,139 as compared with Rs. 16,90,308 in 1892-93. Under the Provincial Contract the Stamp revenue is divided in the proportion of one-fourth to Imperial and three-fourths to Provincial. The details of the revenue for the two years are as follows :—

	1892-93. Rs.	1893-94. Rs.
Sale of General Stamps	4,91,593	5,20,265
Do. Court-fee Stamps	11,81,948	12,14,900
Do. Plain paper	11,829	11,446
Duty on Impressing documents ...	941	703
Fnes and Penalties	3,854	4,489
Miscellaneous	143	336
Total ...	16,90,308	17,52,139

12. The total revenue under this head in 1893-94 was the largest yet recorded. The increase falls mainly under the heads "General Stamps" and "Court-fee Stamps." Under the former it is attributed to the orders of the Judicial Commissioner requiring special powers of attorney to be written on non-judicial stamps of one rupee in value, instead of being stamped under the Court-fees Act with an adhesive label of eight annas, and to the expansion of business in the three railway districts of Raipur, Bilaspur and Sambalpur. Under "Court-fee Stamps" the increase is due to the increase in civil litigation.

V.—Excise.

13. The total Excise revenue in 1893-94 was Rs. 27,93,669 as against Rs. 27,56,084 in the previous year. Under the Contract one-fourth of the revenue is Provincial and three-fourths Imperial.

The details of the collections for the two years 1892-93 and 1893-94 are given below :—

	1892-93. Rs.	1893-94. Rs.
License and distillery fees and duties for the sale of liquors and drugs ...	21,65,424	21,73,898
Duty on ganja	1,25,099	1,29,857
Gain on sale proceeds of Excise opium ...	4,44,577	4,68,724
Fines, confiscations and miscellaneous ...	20,984	21,190
Total ...	27,56,084	27,93,669

The increase under "License and Distillery Fees" is due to payments on account of previous years and to sums paid in advance for 1894-95. The quantity of ganja issued to the Feudatory Chiefs and Zamindars rose for the sixth year in succession. Most of the increase is due to the prohibition of ganja growing in Bastar which has obtained its supplies from Raipur, and to stricter Excise administration throughout the territories under the supervision of the Political Agent, Chhattisgarh Feudatories. The cause of the increase under the head "Gain on sale proceeds of Excise opium" has been explained in paragraph 10.

VI.—Provincial Rates.

14. The following is a statement of the revenue credited under this head for the years 1892-93 and 1893-94 :—

Provincial—	1892-93. Rs.	1893-94. Rs.
Rates levied for the management of Wards Estates	33,571	24,759
Additional rates on lands	1,48,147	1,49,630
Education cess	3,511	3,475
District Post cess	37,848	38,831
Total Provincial ...	2,23,077	2,16,695

	1892-93. Rs.	1893-94. Rs.
Local—		
Road cess (District Fund) ...	... 1,67,403	1,71,402
Education cess (do.) ...	... 1,47,315	1,51,871
Patwari Fund Receipts ...	... 4,57,177	4,52,072
Total Local	... 7,71,895	7,75,345
GRAND TOTAL	... 9,94,972	9,92,040

The chief variation occurs under the head "Rates levied for the management of Wards' Estates," and is due to the management of the Bhonsla Estate having been made over to the Raja in September 1893.

VIII.—Assessed Taxes.

15. The total receipts under this head for the two years 1892-93 and 1893-94 were as follows:—

	1892-93. Rs.	1893-94. Rs.
Income Tax	4,04,077	3,98,092
License Tax (Pandhri)	86,537	86,663
Total ...	4,90,614	4,84,755

The revenue under this head varies according to the income of the persons assessed.

IX.—Forest.

16. The Forest revenue for 1893-94 shows a decrease of Rs. 96,380 as compared with 1892-93. The figures are classified as follows:—

	1892-93. Rs.	1893-94. Rs.
Timber and other produce removed from the forests by Government agency ...	57,732	32,116
Timber and other produce removed from the forests by consumers and purchasers...	11,29,563	10,74,855
Confiscated drift and waif wood ...	3,563	2,559
Revenue from forests not managed by Government	...	...
Miscellaneous	39,997	24,965
Total ...	12,30,855	11,34,475

The decrease under "Timber and other produce removed from the Forests by Government Agency" is attributed to a decline in the sale of Hurra (myrobolan), owing to the persistency in the fall of the price of that article, and to the fall in the sale of timber of larger girths from the located coupes. The decline in the receipts under the head "Timber and other produce removed from the forests by consumers or purchasers" is said to be due—(1) to the stoppage of unregulated and indiscriminate fellings by the licensed holders; (2) to the limitations imposed on the grazing areas; (3) to the lowering effect in revenue, consequent on the orders of the Chief Commissioner regulating grazing fees and the grant of licenses; (4) to the transfer of large forest areas to the Agricultural Department for ryotwari settlements; (5) to the fellings in the malguzari forests; (6) to the food scarcity prevalent in the Damoh and Saugor Districts; and (7) to the general pressure of want felt in the Nerbudda Valley owing to the partial failure of the wheat crop. The decrease under "Confiscated drift and waif wood" was due to a smaller quantity of wood having been confiscated and sold during the year, and that under "Miscellaneous" to the fewer number of offences committed and the consequent less compensation received.

X.—Registration.

17. The following are the figures for the two years :—

	1892-93. Rs.	1893-94. Rs.
Fees for registering documents	68,085	73,822
Fees for copies of registered documents ...	29,753	32,439
Miscellaneous	14,501	15,443
Total ...	1,12,339	1,21,704

The revenue under this head shows an upward tendency year by year. The increase in 1893-94 is confined to the head "Compulsory Registration," optional registrations being very slightly below the level of 1892-93.

XI.—Tributes.

18. The following are the figures under this head for the two years :—

	1892-93. Rs.	1893-94. Rs.
Tributes from various petty States ...	2,43,900	2,35,400
Fees on succession to Native States ...	17,500	7,500
Total ...	2,61,400	2,42,900

The decrease in 1893-94 is due to advance collections in 1892-93 short accounted for during the year, and also to the payment of Nazarana by the Sarangarh State having ceased from 1893-94.

XII.—Interest.

19. The details of the amounts credited under this head for the two years are as follows :—

	1892-93. Rs.	1893-94. Rs.
Imperial—		
Miscellaneous	36	37
Provincial—		
Interest on loans to Municipalities, &c. ...	19,634	24,165
Interest on loans to landholders and other notabilities	2,183	213
Interest on advances to cultivators—		
Under the Land Improvement Act ...	6,692	6,484
Under the Agriculturists' Loans Act...	9,391	13,828
Interest on Government Securities	4,407	4,122
Miscellaneous	10	5
Local—		
Interest on Government Securities ...	324	283
Total ...	42,677	49,137

The net increase in revenue is 6,460, and occurs chiefly under the heads "Interest on Loans to Municipalities, &c.," and "Interest on Advances to Cultivators." Under the former head the increase is due to the realization of interest for a whole year on the loan of Rs. 1,00,000 granted to the Nagpur Municipality, and on a similar loan granted to the Raipur Municipality in January 1893. In 1892-93, interest for a half year only was realized on the loan to the Nagpur Municipality and no interest was realized on the loan to the Raipur Municipality. Under the latter head the increase is due to the more extended operations of the Agriculturists' Loans Act.

XIII.—Post Office.

20. The figures for the two years are as follows :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
District Post collections—		
Contributions from Feudatory States on account of pay of District Post Establishment	7,595	8,344
Contributions from Feudatory States on account of pensions of District Post Establishment	635	401
Miscellaneous	59	4
Total ...	8,289	8,749

The receipts show an increase of Rs. 460, owing chiefly to the opening of new lines in the Bastar State and the consequent contributions paid by the State.

XVI-A.—Law and Justice—(Courts of Law).

21. The details of the amounts credited under this head are as follows :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Sale proceeds of unclaimed and escheated property	17,178	15,945
Court-fees realized in cash ...	12,359	15,551
General fees, fines and forfeitures ...	1,05,652	1,05,949
Pleadership examination fees ...	60	420
Miscellaneous fees and fines ...	2,343	2,623
Miscellaneous ...	2,769	2,211
Total ...	1,40,361	1,42,699

The revenue is wholly Provincial. The increase of Rs. 2,338 occurs chiefly under the head "Court-fees realized in cash."

XVI-B.—Law and Justice—(Jails).

22. The figures for the two years are as follows :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Jail manufactures ...	1,78,179	1,68,502
School of Industry ...	82,511	...
Reformatory School ...	...	98,063
Miscellaneous ...	6,340	2,696
Total ...	2,67,030	2,69,261

The revenue under this head, on the whole, shows an increase of Rs. 2,231 as compared with that of 1892-93. The School of Industry at Jubbulpore was abolished in January 1893, and the tent-making industry was transferred to the Reformatory School at that place, but the receipts from the latter institution, after the abolition of the school, were credited to the head Jail Manufactures during the year 1892-93. In 1893-94 the receipts from the Reformatory School were shown separately. The decrease under Jail Manufactures in 1893-94 is counterbalanced by an increase under Reformatory School, and the difference under the head "Miscellaneous" is chiefly due to a change in account procedure under which the cash recoveries of service payments made in previous years were not credited to Jails, as in 1892-93, but deducted from the charge head concerned.

The following table contrasts the receipts and expenditure on account of Jail Manufactures for the past five years :—

	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
	Rs.	Rs.	Rs.	Rs.	Rs.
Jail Manufactures—					
Receipts	2,48,399	2,13,273	1,77,767	1,78,179	1,68,502
Expenditure	2,24,775	2,15,736	2,41,881	1,93,837	2,16,429
	+23,624	—2,463	—64,114	—15,658	—47,927
School of Industry Manufactures—					
Receipts	97,461	94,317	1,05,220	82,511	...
Expenditure	82,420	68,036	38,307	26,938	...
Reformatory School Manufactures—					
Receipts	...	...	...	...	98,063
Expenditure	...	...	...	...	36,199
	+15,041	+26,281	+66,913	+55,573	+61,864

XVII.—Police.

23. The following table shows the revenue credited to this head for the two years :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Police supplied to Municipal, Cantonment and Town Funds ...	6,345	5,385
Police supplied to public departments, private companies and persons. ...	18,531	7,898
Superannuation receipts ...	3,041	2,925
Miscellaneous ...	4,817	4,329
Local (District Funds)—		
Cattle trespass fines ...	1,42,446	1,47,853
Sale proceeds of unclaimed cattle ...	32,164	36,954
Miscellaneous ...	364	566
Total ...	2,07,708	2,05,910

The falling off in the Provincial revenue in 1893-94 in comparison with that of 1892-93 is due to special credits in the latter year on account of contributions for Police supplied to certain zamindaris in the Sambalpur and Bilaspur Districts. These contributions are now realized as part of the takolis paid by the zamindars and credited to Local revenue. The increase under "Local" is presumably due to the impounding of more cattle.

XIX.—Education.

24. The following table shows details of the Educational receipts for the two years :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Fees, Government Colleges—General ...	2,671	3,279
Do. Do. —Professional ...	2,744	2,306
Do. Do. Schools—General ...	16,081	12,027
Contributions	19,709	12,672
Government Book Depôt receipts ...	22,432	40,668
Miscellaneous ...	5,500	5,692
Local—		
School fees	853	770
Contributions	7,991	7,095
Miscellaneous	1,606	1,872
Total ...	79,587	86,351

The decrease under the heads "Fees, Government Schools—General" and "Contributions" (Provincial) is caused by the transfer of certain schools to the control of the Municipal Committees. The increase under "Government Book Depôt" is owing to the sale of the "Government Book Depôt" at Nagpur to a private firm during the year. The variations under other heads are small and do not call for explanation.

XX.—Medical.

25. The following are the details of receipts under this head for the years 1892-93 and 1893-94.—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Lunatic Asylum receipts ...	1,716	1,717
Contributions	1,098	5,767
Miscellaneous	111	868
Local (District Funds)—		
Contributions	6,866	8,013
Miscellaneous	349	299
Total ...	10,140	16,664

The head "Contributions" under Provincial in 1893-94, included Rs. 5,163 on account of contributions for village sanitation, and the increase under the same head under Local is due to the generosity of the public in making large contributions towards the support of the dispensaries. These causes explain the variations under this head.

XXI.—Scientific and other Minor Departments.

26. The receipts for the two years are compared as follows :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Botanical and other public garden receipts ...	8,142	9,073
Receipts on account of experimental cultivation..	2,123	2,394
Veterinary and stallion receipts ...	151	321
Miscellaneous	445	194
Local—		
Botanical and other public garden receipts	2,374	1,845
Receipts on account of public exhibitions and fairs	4,010	2,916
Miscellaneous	12	50
Total ...	17,257	16,793

The actuals for the two years closely agree.

XXII.—Receipts in aid of Superannuation.

27. The receipts for the two years are given below :—

	1892-93. Rs.	1893-94. Rs.
Imperial—		
Subscriptions under the Indian Civil Service Family Pension Regulations ...	8,920	12,327
Subscriptions to the Bengal Civil Fund ...	17,332	15,844
Do. to the Bombay Civil Fund ...	1,320	1,760
Contributions for pensions and gratuities ...	10,592	13,449
Subscriptions to the Military Fund ...	...	3,019
Do. to the Military Orphan Fund ...	...	846
Provincial—		
Contributions for pensions and gratuities ...	12,048	13,271
Miscellaneous	7	...
Local—		
Contributions for pensions and gratuities ...	8	113
Total ...	50,227	60,629

The increase under "Subscriptions under the Indian Civil Service Family Pension Regulations" is caused by the increased number of junior civilians, and the decrease under "Bengal Civil Fund" to some of the senior civilians having been on furlough. The excess under "Contributions for Pensions and Gratuities" (Imperial) is owing to the payment of contributions by the Engineer-in-Chef of the Bina-Guna Railway into the Saugor treasury during the year. Under the orders contained in the Comptroller-General's letter No. 596, dated the 10th July 1893, subscriptions to the Military and to the Military Orphan Funds were credited under this head from July 1893. The increase under "Contributions for Pensions and Gratuities" (Provincial) is due to the arrear collections.

XXIII.—Stationery and Printing.

28. The receipts under this head compare as follows :—

	1892-93. Rs.	1893-94. Rs.
Imperial—		
Stationery receipts ...	67	431
Sale of Gazettes and other publications ...	...	317
Other Press receipts ...	340	426
Provincial—		
Stationery receipts ...	...	...
Sale of Gazettes and other publications ...	2,203	1,828
Other Press receipts ...	27,455	34,654
Total ...	30,065	37,656

The total increase for the year is Rs. 7,591, and is chiefly due to the large amount of printing work done at the Nagpur Jail Press for the quasi-commercial departments during the year.

XXV.—Miscellaneous.

29. The following is the statement of revenue under this head for the two years :—

	1892-93. Rs.	1893-94. Rs.
Imperial—		
Premium	513	1,107
Other items (unclaimed bills, &c.) ...	928	482
Provincial—		
Unclaimed deposits ...	22,348	24,884
Sale of lands and houses ...	2,563	3,093
Contributions ...	7,410	12,748
Rents (Dâk Bungalow fees) ...	6,932	7,553
Miscellaneous ...	19,573	22,001
Local (District Fund)—		
Contributions	2,127	1,442
Rents	22,340	21,366
Rates and taxes	10,894	9,294
Other items (sale of old stores, &c.) ...	555	1,281
Total ...	96,183	1,05,251

The revenue shows an increase of Rs. 9,068 in 1893-94 in comparison with that of 1892-93, which occurs chiefly under the heads "Unclaimed Deposits" and "Contributions" (Provincial.) Under the former it is due to the increase in the amount of Civil Court deposits lapsed to Government, and under the latter to the contributions realized from the Feudatory States towards the payment of local allowance to the Political Agent, and also to meet the cost of establishment attached to the Commissioner's office for auditing the accounts of the Feudatory States.

XXXII.—Civil Works.

30. The following are the figures for the two years :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Works in charge of Civil Officers ...	12,440	10,851
Local—		
Works in charge of Civil Officers ...	78,677	92,557
Total ...	91,117	1,03,408

The decline in the Provincial receipts is due to the smaller receipts from the ferry in the Narsinghpur District, and the rise under local receipts to the increase in tolls on roads and ferries.

Public Works Department Revenue.

31. The amount of revenue credited in the Public Works Department as communicated by the Examiner, Public Works Accounts, Central Provinces, to the Comptroller was Rs. 47,026 as compared with Rs. 46,096 in 1892-93. The slight increase does not call for remark.

B.—EXPENDITURE.

32. The following statement shows the distribution of expenditure of the year under the several major heads in the Government accounts :—

Major heads of expenditure.	Imperial expenditure.	Provincial expenditure.	Incorporated Local Funds expenditure.	Total.
	Rs.	Rs.	Rs.	Rs.
1.—Refunds and Drawbacks	21,880	21,566	1,012	44,458
2.—Assignments and Compensations	66,475	3,958	...	70,433
3.—Land Revenue	...	12,43,523	4,49,728	16,93,251
6.—Stamps	18,871	56,615	...	75,486
7.—Excise	34,525	11,508	...	46,033
10.—Assessed Taxes	...	...	...	...
11.—Forest	4,58,830	4,58,830	...	9,17,660
12.—Registration	21,393	21,393	...	42,786
13.—Interest on ordinary debt	...	38,603	...	38,603
14.—Interest on other obligations...	1,543	...	...	1,543
15.—Post Office	..	67,769	...	67,769
18.—General Administration	70,508	4,58,129	28,763	5,57,400
19-A.—Law and Justice—Courts of Law	...	8,47,616	...	8,47,616
19-B.—Law and Justice—Jails	...	5,31,418	...	5,31,418
20.—Police	...	14,35,402	58,423	14,93,825
22.—Education	...	3,43,204	2,57,180	6,00,384
23.—Ecclesiastical	50,006	....	...	50,006
24.—Medical	..	3,17,419	58,915	3,76,334
25.—Political	...	44,329	...	44,329
26.—Scientific and other Minor Departments... ...	5,892	55,426	7,307	68,625
27.—Territorial and Political Pensions	2,58,119	...	...	2,58,119
29.—Superannuation	...	2,62,836	1,826	2,64,662
30.—Stationery and Printing	...	2,03,993	2,199	2,06,192
32.—Miscellaneous	3,307	43,149	10,440	56,896
33.—Famine Relief	...	...	...	...
45.—Civil Works	...	945	1,62,961	1,63,906
Total Civil ...	10,11,349	64,67,631	10,38,754	85,17,734
Public Works Department—Buildings and Roads ...	...	18,33,498	1,81,703	20,15,201
GRAND TOTAL ...	10,11,349	83,01,129	12,20,457	1,05,32,935

33. The expenditure under the following heads continues to be wholly Imperial :—

14.—Interest on other obligations.
23.—Ecclesiastical.
27.—Territorial and Political Pensions.

Details of the expenditure under these heads are not given in the following review of the Provincial expenditure of the year.

1.—*Refunds and Drawbacks.*

34. The details of the charges under this head for the two years are given below :—

Heads.	1892-93.				1893-94.			
	Imperial.	Provincial.	Local.	Total.	Imperial.	Provincial.	Local.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Land Revenue	2,025	675	...	2,700	3,167	1,055	...	4,222
Stamps	3,877	11,632	...	15,509	3,524	10,571	...	14,095
Excise	722	240	...	962	400	134	...	534
Provincial Rates	...	26	449	475	...	17	1,012	1,029
Assessed Taxes...	2,362	2,362	...	4,724	2,578	2,579	...	5,157
Forest	232	232	...	464	7,206	7,206	...	14,412
Registration	75	76	...	151	5	4	...	9
Tributes	...	...	...	...	5,000	...	...	5,000
Total ..	9,293	15,243	449	24,985	21,880	21,566	1,012	44,458

The expenditure under this head is more by Rs. 19,473 than in the previous year owing to the refund of nazarana of Rs. 5,000 overpaid by the Sarangarh State, and to the unusually large Forest refunds during the latter part of the year.

2.—*Assignments and Compensations.*

35. The following are the figures for the two years :—

	1892-93. Rs.	1893-94. Rs.
Imperial—		
Pensions in lieu of resumed lands ...	5,524	5,737
Compensations	23,783	35,043
Miscellaneous	28,209	25,695
Provincial—		
Malikana allowance to excluded proprietors...	4,485	3,958
Total ..	62,001	70,433

The increase under the head "Compensations" is caused by the payment of Rs. 12,172 (being portion of the compensation of Rs. 41,470 sanctioned by the Government of India in the Department of Finance and Commerce No. E.-X.—1996, dated the 11th May 1893) to the Zamindars in the Chanda District on account of the resumption of their Abkari rights by Government.

3.—*Land Revenue.*

36. The details of the expenditure under this head for the two years are given below :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Charges of District Administration—		
Deputy Commissioners, &c., and their establishments.	6,85,398	7,09,944
Do. do. Contingencies ...	58,905	54,146
Management of Government Estates ...	4,580	1,992
Charges on account of Land Revenue collections ...	706	686
Land Settlement	4,05,992	4,16,904
Land Records and Agriculture ...	45,324	59,851
Local—		
Charges of District Administration—		
Patwari Fund	4,34,057	4,49,728
Total ...	16,34,962	16,93,251

The excess expenditure under the head "Deputy Commissioners and their Establishments" is due chiefly to the exchange compensation allowance, and also to a greater number of Extra Assistant Commissioners having been on duty. The diminished expenditure under "Management of Government Estates" is attributable to there having been special expenditure in 1892-93, referred to in paragraph 36 of the review for last year.

Under "Land Settlement" the expenditure varies according to the requirements of the Settlement Department in each year. The head "Land Records and Agriculture" shows an increase owing to the exchange compensation allowance and to the privilege leave allowances drawn by the Commissioner of Settlements and Agriculture, and also to the appointment of an Extra Assistant Commissioner as Assistant to the Commissioner of Settlements and Agriculture.

The increase of expenditure under "Patwari Fund" (Local) is due chiefly to the debit to the Patwari Fund of the cost of supervision and control in the Damoh District.

The following are the details of the expenditure under the head "Charges of District Administration" :—

	1892-93. Rs.	1893-94. Rs.
Deputy Commissioners	1,62,332	1,57,251
Assistant Commissioners	28,109	30,825
Statutory Civilians	1,832	167
Extra-Assistant Commissioners ...	1,02,058	1,09,316
Personal allowances	1,164	1,921
Establishment (including Tahsildars) ...	3,89,903	3,93,917
Exchange Compensation Allowance ...	...	16,547
Total ...	6,85,398	7,09,944

6.—*Stamps.*

37. The following are the details of expenditure under this head for the two years:—

	1892-93. Rs.	1893-94. Rs.
Discount on sales	16,087	16,714
Miscellaneous charges	3,485	3,982
Value of stamp paper supplied from Central Stores ...	41,592	54,790
Total ...	61,164	75,486

The expenditure is divided between Imperial and Provincial in the proportion of one-fourth to the former and three-fourths to the latter, and the increase occurs in the value of stamp paper supplied from the Central Stores.

7.—*Excise.*

38. The expenditure under this head for the two years 1892-93 and 1893-94 is given below:—

	1892-93. Rs.	1893-94. Rs.
District Establishment	25,157	30,874
Construction and Repairs	3,268	1,608
Conveyance of opium	538	630
Rewards	8,357	5,826
Miscellaneous	4,986	7,095
Total ...	42,306	46,033

The increase under "District Establishment" is caused by the introduction of the Bonded Warehouse System which necessitated the employment of 18 additional moharirs on salaries varying from Rs. 25 to 35. The decrease, in expenditure on construction and repairs of buildings is in the Chanda, Hoshangabad, Narsinghpur and Raipur districts. The natural consequence of a decline in the number of important prosecutions in the Bhandara, Saugor, Hoshangabad, Narsinghpur and Sambalpur Districts explains the decrease in expenditure under "Rewards."

10.—*Assessed Taxes.*

39. The expenditure under this head represents payment made to the Bengal-Nagpur Railway Company on account of commission at 3 per cent. on the gross amount of collections of Income-tax made by the Company from its employés. In 1892-93 the commission for 1891-92, amounting to Rs. 519, was paid, and the commission for 1892-93 was claimed and adjusted in 1894-95. Hence no expenditure under this head in the year under review.

11.—*Forest.*

40. The expenditure under this head in 1893-94 amounted to Rs. 9,17,660 (approximately) as against Rs. 8,50,940 in 1892-93. At present it is not possible to give the exact figures for the year under review, as the Comptroller-General has not yet communicated the Forest Survey charges for the year to the Comptroller, Central Provinces.

The expenditure is divided equally between Imperial and Provincial, and is classified as follows:—

	1892-93. Rs.	1893-94. Rs.
Conservancy and Works... ...	3,94,779	4,42,665
Establishment	4,56,161	4,74,995
Total ...	8,50,940	9,17,660

12.—*Registration.*

41. The expenditure under this head is classified as follows:—

	1892-93. Rs.	1893-94. Rs.
Superintendence	7,247	9,190
District charges.	32,640	33,596
Total. ...	39,887	42,786

The increase under "Superintendence" is caused by the reversion of a permanent Inspector from the rank of Extra-Assistant Commissioner and by the privilege leave allowances drawn by him. Under "District charges" the excess is due to the increase in the staff of Special Salaried Sub-Registrars.

13.—*Interest.*

42. The following are the figures under this head for the two years 1892-93 and 1893-94:—

	1892-93. Rs.	1893-94. Rs.
Imperial—		
Interest on Government of India Stock Notes	...	...
Commission on Stock Notes ...	...	...
Total ...	...	...
Provincial—		
Interest on Provincial Advance and Loan Account.	34,517	38,603
Total ...	34,517	38,603

The interest on Provincial Advance and Loan Account is calculated at 4 per cent. per annum on the mean between the opening and closing outstanding balances of the loans to Municipalities, Agriculturists, &c., and the amount is credited to Imperial. The interest received from persons to whom advances have been made is credited to Provincial Revenues under the head "XII.—Interest" Provincial. As the interest charged to Provincial is at the rate of 4 per cent. per annum only, while the interest received is calculated at rates varying from 4½ to 6 per cent., there is a profit to Provincial revenues. This profit in 1893-94 was Rs. 6,087.

The increase in 1893-94 in the debit under this head is due to the advances made to cultivators under the Land Improvement and Agriculturists' Loans Acts exceeding the recoveries realized on account of previous loans.

15.—*Post Office.*

43. The expenditure under this head is on account of District Post Establishments, and is wholly Provincial. It amounts to Rs. 67,769 in 1893-94 as against Rs. 62,240 in the previous year. The increase is due to the increase in the number of runners and postmen, and also to the opening of new lines in the Bastar State.

18.—*General Administration.*

44. This head includes Imperial, Provincial and Local Expenditure. The total charges and their distribution for the two years are given below:—

	1892-93. Rs.	1893-94. Rs.
Imperial—		
Civil Office of Account and Audit ...	73,551	70,508
Provincial—		
Salary of Chief Commissioner ...	54,000	51,465
Tour expenses of do.	15,129	29,614
Civil Secretariat	1,16,694	1,32,434
Commissioners	1,99,137	2,03,036
Civil Office of Account and Audit ...	7,719	16,109
Inspector-General of Stamps, Registration and Excise	24,987	25,471
Local—		
General Establishment of Local Funds ...	27,846	28,763
Total ...	5,19,063	5,57,400

The decrease under "Civil Office of Account and Audit" (Imperial) is attributable to there having been no probationer of the Financial Department attached to the Comptroller's Office in 1893-94.

The decrease under "Salary of the Chief Commissioner" is due to the permanent Chief Commissioner having been on deputation as Officiating Lieutenant-Governor of Bengal, and the salary of the Officiating Chief Commissioner having been less than the pay of the appointment. The excess

expenditure under "Tour expenses of the Chief Commissioner" is attributable to the purchase of tents and tent gear, costing Rs. 8,200, and to increase in the amount of travelling allowances and contingent expenditure.

Under "Civil Secretariat" the excess expenditure is due to the pay as Chief Secretary to the Government of the North-Western Provinces and Oudh drawn from 1st to 16th May 1893 by the present Chief Commissioner, Central Provinces; to the acting allowance drawn by the Revenue Secretary as Officiating Deputy Commissioner of a higher class, in ordinary course, in the Commission; to the exchange compensation allowance; to the changes made in the establishment of the General and Revenue Secretariats, and to the increase under postage charges and other contingent expenditure.

Under "Commissioners" the increase is due chiefly to the exchange compensation allowance. In 1892-93 one of the Commissioners was on privilege leave, and drew privilege leave allowance, which accounts for the variation in the salaries of Commissioners. The increase under establishment is counterbalanced by the decrease under contingencies.

The expenditure under "Civil Office of Account and Audit" (Provincial) represents the expenditure on Local Audit which was partly brought into effect from May 1892. During the year under review the full sanctioned establishment was entertained, and consequently the expenditure was greater.

The excess expenditure under "Inspector-General of Stamps, Registration and Excise" is due chiefly to the exchange compensation allowance.

The increase in the local portion of the expenditure under this head falls under contingent expenditure.

The following are the details of expenditure under the heads, "Chief Commissioner," "Civil Secretariat" and "Commissioners":—

		1892-93. Rs.	1893-94. Rs.
Details under Chief Commissioner—			
Salary of Chief Commissioner	...	48,000	43,535
Exchange compensation allowance	...	...	2,333
Sumptuary allowance ...	...	6,000	5,597
Total	...	54,000	51,465
Civil Secretariat—			
Salary of Chief Secretary ...	...	...	1,579
Do. of Secretary ...	...	24,161	22,697
Do. of Under Secretary ...	...	8,615	8,900
Do. of Assistant Secretary...	...	9,237	8,400
Do. of Revenue Secretary ...	...	15,360	18,363
Exchange compensation allowance	...	...	5,184
Establishment ...	...	42,932	46,152
Contingencies ...	...	16,389	21,159
Total	...	1,16,694	1,32,434
Commissioners—			
Salaries of Commissioners ...	...	1,22,810	1,16,090
Exchange compensation allowance	...	...	10,308
Travelling allowance of officers	...	12,064	12,167
Establishment ...	...	52,564	53,666
Contingencies ...	...	11,699	10,805
Total	...	1,99,137	2,03,036

19-*A.*—*Law and Justice*—(*Courts of Law*).

45. The expenditure under this head is wholly Provincial. The details for the two years are given below:—

		1892-93. Rs.	1893-94. Rs.
Provincial—			
Law Officers ...	...	3,000	3,000
Judicial Commissioners ...	...	59,205	59,051
Civil and Sessions Courts...	...	89,637	84,636
Courts of Small Causes ...	...	32,222	33,144
Criminal Courts ...	...	6,12,590	6,52,414
Pleadership Examination charges	..	4	5
Refunds ...	...	16,254	15,366
Total	...	8,12,912	8,47,616

The decrease under "Civil and Sessions Courts" in 1893-94, as compared with 1892-93, is due to the privilege leave allowances drawn in the latter year by one of the Additional Sessions Judges.

The increase under "Small Cause Courts" is due to the raising of the pay of the process-serving establishment.

The excess expenditure under "Criminal Courts" is owing to the exchange compensation allowance, and to the increase in the number and pay of the process-serving establishment.

The fluctuating nature of the expenditure under "Refunds" accounts for the difference between the actuals of the two years.

19-*B.*—*Law and Justice*—(*Jails*).

46. The following statement shows the expenditure on Jails and Jail manufactures for the two years:—

	1892-93. Rs.	1893-94. Rs.
Central Jails	1,85,316	1,69,960
District Jails	1,09,366	93,625
Lock-ups	8,173	7,410
School of Industry	16,414	...
Reformatory School	4,680	7,795
Manufactory charges in Jails ...	1,93,837	2,16,429
Do. do. in School of Industry ...	26,938	...
Do. do. Reformatory School ...	...	36,199
Total ...	5,44,724	5,31,418

The decrease under Central and District Jails is owing to the average daily attendance of prisoners having been less than in the previous year. The School of Industry was abolished in January 1883, and hence no expenditure under this head occurred in 1893-94. The increase under "Reformatory School" is due chiefly to the payment of subsistence allowance to certain approvers, and under Jail manufacturing charges in Jails and in the Reformatory School to the purchase of raw materials.

20.—*Police.*

47. The expenditure on Police, including the District Fund charges for the maintenance of Cattle Pounds, was Rs. 14,93,825 in 1893-94 against Rs. 14,46,567 in 1892-93.

The total is distributed as follows for the two years:—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Superintendence	52,026	47,227
District Executive Force	13,12,576	13,65,029
Special Police	2,821	2,963
Railway Police	20,421	20,059
Cattle Pounds	86	72
Refunds	16	52
Total Provincial ...	13,87,946	14,35,402
Local—		
Cattle pounds	58,204	57,736
Refunds	417	687
Total Local ...	58,621	58,423
TOTAL POLICE ...	14,46,567	14,93,825

The diminution of expenditure under "Superintendence" in 1893-94 is attributable to the privilege leave allowances drawn by the Inspector-General in 1892-93, and the excess under "District Executive Force" is due to the Police Force sanctioned by the Chief Commissioner for the Zamindaris in the Chhattisgarh Division, and also to the payment of exchange compensation allowance.

Further details of the expenditure under the head "District Executive Force" are given in the subjoined statement:—

	1892-93. Rs.	1893-94. Rs.
District Superintendents and Assistants ...	1,62,825	1,62,215
Exchange compensation allowance to District Superintendents and Assistants	...	13,097
Inspectors, Sub-Inspectors and Chief Constables...	1,65,236	1,61,983
Head Constables and Constables ...	7,50,543	7,79,659
Sergeants	2,811	3,025
Mounted Head Constables and Constables ...	25,141	26,222
Drill Instructors	1,571	1,467
Exchange compensation allowance ...	...	129
Arms and accoutrements	17,662	16,821
Clothing	46,566	53,004
Petty construction	17,357	25,940
Petty repairs	16,242	13,329
Travelling allowance of officers ...	17,177	18,293
Do. do. of establishment ...	13,090	14,158
Other charges	76,355	75,687
Total ...	13,12,576	13,65,029

22.—*Education.*

48. The following statement shows the distribution between Provincial and District Funds of the expenditure on Education for the two years:—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Direction	26,800	25,810
Inspection	72,950	75,941
Government Colleges—General ..	18,134	16,400
Do. do. —Professional ...	...	...
Do. Schools—General ...	93,642	96,769

Total Local ...	2,47,839	2,57,180
TOTAL ...	5,82,556	6,00,384

The decrease under "Direction" is due to the permanent Inspector-General of Education having been on deputation as Officiating Director of Public Instruction, Madras, and the salary of the Officiating Inspector-General, including the exchange compensation allowance, having been less than the pay of the appointment.

The increase under "Inspection" is due to the exchange compensation allowance, and also to the addition sanctioned to the number of the Inspecting staff.

The diminution of expenditure under "Government Colleges—General" is attributable to the changes made in the staff of Professors whose salaries are progressive.

The increase in expenditure under "Government Schools—Special" is due to the increase in expenditure on petty construction and repairs and on furniture for training schools.

The increase under "Grants-in-aid" is due to building grants and also to the grants-in-aid of Rs. 50 per mensem sanctioned for the Anjuman Hami-Islam Anglo-Oriental Middle School at Nagpur.

The decrease under "Government Book Depôt." is due to the abolition of the Government Book Depôt at Nagpur in 1893-94.

The diminution of expenditure under "Government Schools" (Local) is caused by a change in the classification of the fixed allowances to masters in the combined system schools under which the allowances were debited to the head "Grants-in-aid" in 1893-94 instead of to Government schools as in 1892-93. The decrease is also due to the amount spent on construction and repairs of primary schools being less than in the previous year. Under "Grants-in-aid" the rise in expenditure is due to the cause mentioned above, and also to a further additional grant of Rs. 25,000 for primary education.

24.—*Medical.*

49. The following statement shows the distribution between Provincial and District Funds of the expenditure under this head for the two years:—

		1892-93. Rs.	1893-94. Rs.
Provincial—			
Medical Establishment	... ...	1,76,864	1,89,782
Hospitals and Dispensaries	... ...	57,495	60,302
Sanitation and Vaccination	... ...	45,967	51,884
Lunatic Asylums	... ...	16,498	15,251
Other heads	... ...	39	200
Total Provincial	...	2,96,863	3,17,419
Local—			
Medical Establishment	... ...	1,083	1,086
Sanitation and Vaccination	... ...	36,616	35,399
Hospitals and Dispensaries	... ...	19,489	21,606
Grants for medical purposes	... ...	3,392	823
Other heads	... ...	26	1
Total Local	...	60,606	58,915
TOTAL MEDICAL	...	3,57,469	3,76,334

The advance in expenditure under the head "Medical Establishment" (Provincial) is attributable to the exchange compensation allowance, and that under "Hospitals and Dispensaries" to a greater number of Assistant Surgeons having been on duty.

The increase in expenditure under "Sanitation and Vaccination" (Provincial) is due to the increase in expenditure on Sanitary Board and Village Sanitation, and the decrease in expenditure under "Lunatic Asylums" to the Civil Surgeon of Jubbulpore having drawn allowance for the charge of the Lunatic Asylum at Jubbulpore at the reduced rate of Rs. 150 per mensem instead at Rs. 250 per mensem as in 1892-93.

Under Local expenditure the chief variation occurs under the head "Grants for medical purposes," the decrease under "Sanitation and Vaccination" being counterbalanced by increase under "Hospitals and Dispensaries." In 1892-93 there was an expenditure of Rs. 1,600 in the Raipur District under the head "Grants for medical purposes," and no expenditure was incurred in that district during 1893-94. This explains the greater portion of the decrease under that head.

25.—*Political.*

50. The expenditure under this head is entirely Provincial, the details of which for the two years 1892-93 and 1893-94 are given below:—

		1892-93. Rs.	1893-94. Rs.
Political Agent	... ...	27,804	35,272
Other heads	... ...	657	9,057
Total	...	28,461	44,329

The local allowance of the Political Agent, Chhattisgarh Feudatories, and the expenditure of the establishment in the Commissioner's office, Chhattisgarh Division, for auditing the accounts of the Feudatory States, were, for the first time, debited to Provincial during the year under review, and corresponding contributions realized and credited to Provincial revenues under the head "XXV—Miscellaneous," hence the increase under this head. Further, the

Political Agent drew exchange compensation allowance, and the expenditure of his office establishment was debited for a whole year instead of for a portion of the year as in 1892-93, and special expenditure was incurred in connection with the installation of the Feudatory Chiefs in the Chhattisgarh Division.

26.—*Scientific and other Minor Departments.*

51. The following are the charges under this head for the two years:—

	1892-93. Rs.	1893-94. Rs.
Imperial—		
Census	9,822	...
Veterinary and stallion charges	1,921	5,892
Total Imperial ...	11,743	5,892
Provincial—		
Agricultural experiments	1,782	5,378
Experimental cultivation	9,048	9,011
Botanical and other public gardens... ...	20,950	21,221
Provincial Museums	1,547	1,533
Provincial statistics	11,192	10,457
Public exhibitions and fairs	...	...
Veterinary charges	4,343	6,283
Other heads	797	1,543
Total ...	49,659	55,426
Local—		
Botanical and other public gardens... ...	842	738
Public exhibitions and fairs	6,947	5,916
Other heads	551	653
Total Local ...	8,340	7,307
TOTAL ...	69,742	68,625

There was no census expenditure in 1893-94. The increase under "Veterinary and stallion charges," both under Imperial and Provincial, was caused by the entertainment for a whole year of the Superintendent, Civil Veterinary Department, instead of for a portion of the year only as in 1892-93. The excess expenditure under "Agricultural Experiments" is attributable to the compensation of Rs. 3,499 awarded to the owners of the land acquired in the Bilaspur and Raipur districts for fuel and fodder reserves. The decrease under "Provincial Statistics" is due to special expenditure incurred in 1892-93 in connection with the compilation of statistics for the report on the moral and material condition of the people. The expenditure under "Public Exhibitions and Fairs" (Local) in 1892-93 included special expenditure for wire fencing of cattle enclosures in the Nimar District. Hence the decrease in 1893-94.

29.—*Superannuation Allowances and Pensions.*

52. The following are the figures for the two years:—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Superannuation and retired allowances ...	2,34,891	2,54,917
Compassionate allowances	6,703	6,585
Gratuities	1,171	1,334
Refunds	62	...
Total Provincial ...	2,42,827	2,62,836
Local—		
Superannuation and retired allowances ...	1,350	1,785
Compassionate allowances	41	41
Gratuities	9	...
Total Local ...	1,400	1,826
TOTAL ...	2,44,227	2,64,662

The advance in expenditure is caused by the new pensions sanctioned.

30.—*Stationery and Printing.*

53. The following are the figures for 1892-93 and 1893-94 :—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Stationery purchased in the country ...	7,446	7,372
Do. supplied from Central Stores ...	87,425	1,07,570
Government Presses	70,566	80,068
Printing at Private Presses	15,480	8,983
Other heads	1	...
Total Provincial ...	1,80,918	2,03,993
Local—		
Stationery purchased in the country	...	...
Do. supplied from Central Stores ...	1,257	918
Government Presses	915	1,174
Printing at Private Presses and other heads	...	107
Total Local ...	2,172	2,199
TOTAL ...	1,83,090	2,06,192

The head "Stationery supplied from Central Stores" (Provincial) shows an increase of Rs. 20,145 owing to the large amount of stationery supplied from the Store at Calcutta. The excess in expenditure under "Government Presses" is due to the earnings of the compositors in the Secretariat Press having exceeded the earnings in the previous year, owing probably to the increase in printing work done, and also to the large expenditure incurred in purchasing materials both for the Secretariat and Jail Presses.

The diminution of expenditure under "Printing at Private Presses" is caused partly by reduction in the rates of printing, and partly by the payments due in 1893-94 not having been completely discharged.

32.—*Miscellaneous.*

54. The distribution of the expenditure under this head is as follows :—

	1892-93. Rs.	1893-94. Rs.
Imperial	4,030	3,307
Provincial	39,255	43,149
Local	6,542	10,440
Total ...	49,827	56,896

The following are the details :—

Imperial—		
Charges for the remittance of treasure ...	4,030	3,288
Loss on specie remittance	...	19
Miscellaneous refunds	...	...
Total Imperial ...	4,030	3,307
Provincial—		
Donations for charitable purposes ...	1,350	1,902
Rewards for destruction of wild animals ...	18,128	17,003
Petty Establishments—		
Staging bungalows	10,424	10,022
Miscellaneous establishments	6,041	7,610
Miscellaneous unforeseen charges and other heads.	3,312	6,612
Total Provincial ...	39,255	43,149

	1892-93. Rs.	1893-94. Rs.
Local—		
Rewards for destruction of wild animals ...	73	78
Petty Establishments—		
Serai establishment	2,611	2,634
Market do.	492	582
Conservancy do.	1,478	1,420
Miscellaneous do.	109	139
Tonga do.	1,051	3,908
Petty construction	...	...
Nazul establishment	409	407
Miscellaneous and unforeseen charges ...	14	202
Miscellaneous refunds	305	1,070
Total Local ...	6,542	10,440
TOTAL MISCELLANEOUS ...	49,827	56,896

The fluctuating nature of the expenditure under this head accounts for the variations from year to year. The excess under "Tonga Dâk Establishment" (Local) is caused by the opening of the Tonga Dâk Service between Itarsi and Betul, for which contribution is made from Provincial revenues.

33.—*Famine Relief.*

55. There was no expenditure incurred during the year under review under this head. In 1892-93 the local expenditure of Rs. 416 was in the Betul district.

45.—*Civil Works.*

56. The expenditure under this head is classified as follows:—

	1892-93. Rs.	1893-94. Rs.
Provincial—		
Works in charge of Civil Officers ...	2,612	945
Local—		
Works in charge of Civil Officers ...	1,90,617	1,62,961
Total ...	1,93,229	1,63,906

The diminution of expenditure in 1893-94, in comparison with 1892-93, under Provincial, is attributable to the special expenditure in the latter year mentioned in paragraph 56 of the review for last year. The decrease under local expenditure is due chiefly to the District Councils having spent less in the repair of roads.

Public Works Expenditure.

57. The amount of Provincial and Local expenditure in the Public Works Department as communicated by the Examiner, Public Works Accounts, Central Provinces, to the Comptroller, was as follows:—

	1892-93. Rs.	1893-94. Rs.
Ordinary branches—		
Provincial	17,46,205	18,33,498
Local	1,29,256	1,81,703
Total ...	18,75,461	20,15,201

C.—LOCAL FUNDS.

58. These funds are of three kinds—namely, Incorporated Local Funds, Municipal Funds and Excluded Local Funds. The Incorporated Local Funds are those for which the income and expenditure are incorporated in Government accounts under the appropriate Revenue and Service heads as local public revenue and expenditure. There are only two Incorporated Local Funds in these Provinces, namely, the District Fund and the Patwari Fund.

The transactions of Municipal and Excluded Local Funds are not incorporated in the public accounts, but, as a rule, all such funds bank with the Treasury.

Incorporated Local Funds—District Funds.

59. The following is an abstract of the balanced accounts of the Incorporated Local Funds for the year 1893-94 :—

Receipts.	Amount.	Expenditure.	Amount.

CHAPTER VI.—VITAL STATISTICS AND MEDICAL SERVICES.

1.—*Census.*

For the results of the Census of 1891 see pages 34 to 56 of the Report for 1892-93.

2.—*Births and Deaths.*

Births.

2. The number of births registered during the year 1893 was 3,63,209, as against 3,64,745 in 1892. There is an increase of births in 11, and a decrease in 6 districts; while in 3 the birth-rate is nearly the same. The highest birth-rate is in the Nimar District, where it is 47·64, and the lowest is in Wardha, where it is only 33·29 per thousand of population. The highest birth-rate, as compared with that of 1892, is in the Burhanpur District, in which it is 5·20. Mandla returns 4·28, Nimar 3·65, Jubbulpore 3·45, Hoshangabad 3·30, Balaghat 2·56, Raipur 2·38 and Damoh 2·25 more than in 1892; while Narsinghpur, Bilaspur and Sambalpur return an increase of more than 1 per thousand. The largest decrease in the birth-rates of 1893 is 9·03 in the Chhindwara District. Wardha returns 7·44 and Betul 5·76 less than in 1892; Seoni, Nagpur and Chanda return upwards of 3 per thousand of population. The excess of male over female births for the whole Province is 6·65 per cent., the highest ratio recorded being 11·08 in the Nagpur District. There was an excess of births over deaths in all districts, the ratio for the Province being 10·53.

Deaths.

3. The total number of deaths registered during the year was 2,63,143, or 61,205 less than in 1892. The decrease is observed under all heads (excluding small-pox), and this is in great measure due to the diminished prevalence of cholera in the Province, from which cause there were only 557 deaths against 39,972 in 1892, or 39,415 less than in the previous year. There has not been so low a death-rate recorded since 1884. There is a decrease in the number of deaths in all districts, except Narsinghpur, Burhanpur and Chhindwara; while the figures at Nagpur and Wardha are nearly the same as those in 1892. The diminished death-rate is most marked in the Raipur District, in which it was 19·21. Sambalpur returned 17·66, and in Bilaspur the decrease is more than 15 per thousand of population.

Cholera.

4. The decrease of 61,205 in the number of deaths registered during the year was mainly due to the absence of the epidemic of cholera, which carried off 39,972 victims in 1892. Like 1880, 1884 and 1888, the year under report was one of the fortunate years of comparative exemption from cholera. The total number of deaths reported was 557. Pilgrims returning from the Pandharpur Fair appear to have originated an outbreak in Wardha, Chhindwara, Bhandara and Nagpur. Similarly an outbreak in Bilaspur and Sambalpur is attributed to pilgrims from Puri. The gathering of pilgrims at Mahadeo near Pachmarhi was prevented again this year, but isolated travellers from this shrine are said to have originated another outbreak in Nagpur.

The disease appeared more or less in 11 districts, but Wardha, Chhindwara, Sambalpur and Bilaspur are the districts which suffered most. At Nagpur only 29 deaths occurred, in Nimar 15, Saugor 3, Murwara 3, Narsinghpur 2, and in Seoni 2.

Small-pox.

5. The number of deaths registered from small-pox during the year was 1,602 or 607 more than in 1892. The death-rate is the lowest but two of any recorded in the past 20 years. In no district did the deaths reach 1 per 1,000; the highest ratio is 0·61 in Damoh. No mortality from small-pox occurred in Nimar, Burhanpur and Chhindwara, and in Murwara only one death is reported, and in other districts the mortality was not severe, except in Raipur, Bilaspur, Sambalpur, Saugor and Damoh. These results speak well for the vaccination work of the Province. It is probable that all eruptive fevers are entered as small-pox.

6. The number of deaths registered from fevers during the year was 1,69,918 or 18,099 less than in 1892. The Provincial ratio of deaths per thousand of population from fever is 17·88 against 19·79 in 1892 and 20·51 the mean of the previous five years. The death-rate from fever in the districts compared with 1892 shows a decrease in 14 and an increase in 6. Fevers.

7. The total deaths registered in 1893 under the heads dysentery and diarrhœa were 13,001 against 16,021 in 1892, or 3,020 less. The death-rate from this cause was 1·37 as compared with 1·69 in 1892 and 2·17 the mean of the previous five years. There was a decrease in the death-rate under these heads in almost all the districts. Dysentery and Diarrhœa.

8. The Raipur Water-works, as noted in last year's Report, were opened at the end of 1892. The Rajnandgaon Works were opened by the Chief Commissioner on the 19th January last, and the boon of pure water is reported to be much appreciated by the inhabitants. The extension of the Jubbulpore Water-works is in hand, and the Chief Commissioner has now finally addressed the municipality as to the extent to which they can carry their projects for water-supply and drainage upon the limited provision for local loans at the disposal of the Administration. A project for supplying water to Khandwa, where it is very badly needed, is in a similar position. The expenditure in all districts on works sanctioned by the Sanitary Board was Rs. 87,617. The Village Sanitation Act was extended to 28 villages during the year. Sanitary reform.

3.—*Medical Relief.*

9. The number of dispensaries open at the close of 1893 was 111, an increase of one on the preceding year. Their classification was as follows:— Number of Dispensaries.

	1892.	1893.
I.—State ...	6	6
II.—Local Fund ...	77	79
III.—Private ...	27	26
Total ...	110	111

The two additional Local Fund dispensaries were established at Simga in Raipur and Gondia in Bhandara. Two private dispensaries were closed—at Khuji and Dhondi Lohara—and one opened at Kondagaon.

10. The total number of patients, both in-door and out-door, treated during the year was 1,094,054 against 972,427 in the previous year, giving an increase of 121,627. Attendance.

There has been an increase during the year of 463 in the number of in-door patients. The daily average number has also increased by 14·45. Of the 18 Sadar Dispensaries 14 admitted more in-patients; 4 fewer than in the previous year. The increase in admissions was largest in the Narsinghpur Main Dispensary, where they rose during the year from 215 to 391, or 176 more than those of 1892.

There was an increase of 121,164 in the total and of 504·52 in the average of the daily number of out-patients treated in the whole of the dispensaries of the Provinces. The increase in the total numbers occurred in all districts except Mandla and Chanda. It ranged from 43,768 in the Nagpur District to 450 in that of Seoni. The decrease at Mandla and Chanda amounted to 815 and 1,268, respectively.

11. The number of beds available in 1893 was about the same as in the preceding year. Of the 774 beds available, 403, or 52 per cent., were occupied daily on an average. Accommodation.

12. The principal feature in the statistics of diseases is the decrease in the admissions for cholera by 97 per cent. Diseases.

13. In 1893 there has been a satisfactory improvement over former years in the surgical work done in the Province. The proportional increase over the last year's figures is 30 per cent. Operations performed.

Receipts.

14. The total income of the dispensaries was Rs. 1,50,039 as against Rs. 1,48,363 in the previous year. The total amount contributed from Government is Rs. 1,939-3-6 more than in 1892, the chief item in which the increase took place being "Salaries," due to the promotion of Civil Hospital Assistants to higher grades. Both the District and the Municipal Funds contributed less by Rs. 2,674-8-8 and Rs. 1,752-7-8, respectively. Of the amount realized by subscriptions, Europeans gave Rs. 18-9-9 less, and Natives Rs. 466-11-3 more, compared with 1892.

Expenditure.

15. The total expenditure, excluding investments and amounts spent on buildings and repairs, is less than in 1892 by Rs. 2,119-12-8. The chief items under which the reduction took place were "European medicines" (Rs. 4,862) and "Diet" (Rs. 221). There was an increase of nearly Rs. 500 under the head of "Menial servants". The average cost of each diet was nearly the same as in 1892.

4.—*Treatment of the Insane.*

16. There are two Lunatic Asylums in the Central Provinces, one at Nagpur and the other at Jubbulpore.

The statistics of admissions, discharges and deaths in the two Asylums during the year 1893 are given in the following table:—

	Nagpur.	Jubbulpore.
Remaining on the 1st January	138	141
Admitted and re-admitted	45	33
Total population ..	183	174
Discharged as cured or improved	17	10
Discharged otherwise	5	3
Died	7	11
Remaining on the 31st December ...	154	150

Admissions to Asylums.

17. In the case of both Asylums the number of inmates was higher than it has been for six years. The daily average strength also showed an increase on that of the preceding year—at Nagpur 146·6 against 130·76, and at Jubbulpore 150·46 against 139·86.

The number of admissions of criminal lunatics at each Asylum was much greater than in 1892. At Nagpur there were 14 fresh admissions against 4 in the previous year. At Jubbulpore 8 fresh admissions were made against 4 in the previous year. At Nagpur there were 3 re-admissions, while at Jubbulpore there was none.

Health of lunatics.

18. The daily average sick at Nagpur was 2·74, or 3·99 less than in 1892, and at Jubbulpore it was 4·56 against 6·09. There were no cases of cholera. The chief cause of sickness at both Asylums was, as usual, malarious fever, which gave 13 admissions at Nagpur against 53 in the preceding year, and at Jubbulpore the admissions under this head are equal both in 1892 and 1893, *i. e.*, 27. At Jubbulpore 2 cases were admitted for dysentery, 5 for diarrhœa, 6 for bronchitis and 2 for pneumonia, but no such cases were admitted at Nagpur under these heads, except 2 cases for acute pneumonia-phthisis.

There was no overcrowding at either institution.

Criminal lunatics.

19. The statistics relating to criminal lunatics are abstracted in the following table:—

			Nagpur.		Jubbulpore.
Remaining on the 1st January ...			44		30
Admitted and re-admitted (3 re-admitted into the Nagpur Lunatic Asylum) ...			17		8
Total ...			61		38
Discharged, &c.			3		...
Died			1		2
Remaining on the 31st December...	Males	51	57	32	36
	Females	6		4	
Daily average strength ...			51·71		33·87

20. The classification of the cases re mains much the same, mainly under mania and dementia. Of the causes at Nagpur 65 are recorded as known against 118 unknown, while at Jubbulpore the figures are 102 and 72 respectively. Fifty-five cases are attributed to ganja, 5 to opium-eating, none to opium-smoking, and 2 to alcohol. Types of insanity.

21. The average cost per head at Nagpur was Rs. 69-7-7 against Rs. 72-1-10 in the preceding year, or Rs. 2-10-3 less. At Jubbulpore it was Rs. 51-11-2 against Rs. 68-12-11, or Rs. 17-1-9 less. Receipts and Expenditure.

22. The opening of the new Law Courts in Nagpur during the year has enabled the building formerly used for the Judicial Commissioner's Court-house to be added to the premises of the Lunatic Asylum, which it adjoins. It is being made into a female ward, and this arrangement greatly improves the accommodation. The Jubbulpore Asylum has also obtained some increase of space. At Jubbulpore a wire fencing around the female Asylum and a new gate at the end of the garden entrance have been made during the year. The buildings on the portion of land formerly occupied by the Thaggi lines, which was made over to the Asylum, were demolished, and the whole enclosed by a wall 700 feet long and 6 feet high, exclusively by lunatics, without cost to the State. In the same way an open shed, with tiled roofing to protect the oil-mill, has also been erected. Buildings.

5.—*Vaccination.*

23. The strength of the vaccine establishment shows an increase of 7 vaccinators, as compared with its strength during the previous year. Of this increase 5 vaccinators are credited to the Provincial, and 2 to the Feudatory States establishment. Establishment.

24. The vaccinators of both Provincial and Feudatory States performed 380,488 primary and 60,168 secondary vaccinations, or a total of 440,656 operations. Last year the number of primary vaccinations performed by this staff was 394,194, and re-vaccinations 41,216, or a total of 435,410. The staff thus did 13,706 fewer primary vaccinations and 18,952 more re-vaccinations. On the whole, it will be observed that there was an increase of 5,246 operations as compared with the number last year. Amount of work.

The number of persons successfully vaccinated, including cases of re-vaccination was 411,362, or 4,464 less than in the previous year, thus :—

		Successful Primary Vaccinations.	Successful Re-vaccinations.		
1893-94	...	363,303	48,059		
1892-93	...	381,093	34,733		
		—17,790	+13,326	=	—4,464

The percentage of successful primary vaccination was 95·48 against 96·68 in 1892-93, and that of re-vaccination was 4·40 less than that of the preceding year. The total number of persons vaccinated by Provincial vaccinators in the year under review was 377,145 compared with 375,639 in the previous year, or 1,506 more than that of 1892-93. The number of primary operations was less (—16,171), while that of re-vaccinations was (+17,677) more.

25. The cost of the Provincial vaccine establishment of 1893-94 amounted to Rs. 49,700-8-10 against Rs. 47,918-14-6 in 1892-93, or Rs. 1,781-10-4 more than that of the previous year. The increase is partly due to promotions to some of the vaccinators and to the appointment of 5 additional vaccinators; also partly to more travelling allowance passed to Civil Surgeons. Expenditure.

The total cost of the vaccine establishment of the Feudatory States for 1893-94 amounted to Rs. 4,477-13-0 as compared with Rs. 4,240-6-4 for the previous year, or an increase in expenditure of Rs. 237-6-8. The increase is partly due to the employment of two additional vaccinators and partly in purchasing vaccine instruments, &c.

Cultivation of lymph.

26. Experimental cultivation was again carried on at Pachmarhi with the view to supply a sufficient quantity of animal lymph with which to begin the operations of the working season. Lanoline lymph "paste" was prepared after Dr. King's method, of the strength of 1 in 6 of lanoline. The quality of "paste" prepared last year was not so good as might be wished. This was chiefly due to the inferior quality of lanoline obtained—a thin yellow stuff, and not the *white* anhydrous sort which keeps so well in all weathers.

Extension of Vaccination Act.

27. The Vaccination Act was extended during the year to the 10 municipal towns of Burha, Chhindwara (Narsinghpur), Gadarwara, Chhindwara (Chhindwara), Burhanpur, Lalbara, Waraseoni, Katangi, Hoshangabad and Bhandara, on the application of the Committees concerned.

CHAPTER VII.—INSTRUCTION.

1.—*Education.*

A general view of the progress of Education during the past year is afforded by the table given below. There is an increase of 168 schools and 14,607 pupils. All classes of institutions have contributed to the increase, but it is most marked at the extremes of the educational system, Colleges and High Schools on the one hand, and Primary Vernacular Schools on the other, showing a larger percentage of increase than other institutions. Pupils in English Middle Schools remain almost stationary, and the increase of 1,698 in Middle Vernacular Schools is, to a great extent, nominal. Female education has made no considerable advance, the increase in pupils being mainly due to the opening of new schools. The table includes only those schools under inspection, the returns for Feudatory Schools not under inspection being omitted :— Number of schools and pupils.

Class of Institution.	1892-93.			1893-94.		
	Institutions.	Pupils.	Average number of pupils per school.	Institutions.	Pupils.	Average number of pupils per school.
Colleges	3	249	83	3	336	112
Secondary ... High School	12	584	49	12	733	61
Secondary ... Middle Schools ... English ...	65	5,758	89	65	5,853	89
Secondary ... Middle Schools ... Vernacular ..	190	21,262	112	196	22,960	117
Primary ... English	6	368	61	7	407	58
Primary ... Vernacular (Upper and Lower) ..	1,770	100,192	57	1,924	112,330	58
Special ... English and Vernacular schools for males	10	438	44	10	475	47

Female ... Secondary schools ..... Vernacular ...	4	214	53	6	337	56
Female ... Primary schools ... English ..	6	427	71	6	428	71
Female ... Primary schools ... Vernacular ..	136	5,590	41	141	5,800	41
TOTAL PUBLIC INSTITUTIONS ..	2,210	135,225	61	2,378	149,832	63

2. The percentage of Hindu boys at school has advanced with the general increase of pupils, but that of Mahomedan boys has increased in a still greater degree. A larger number of aborigines and low castes are under instruction. The number of Hindu girls in schools was 5,285 as compared with 5,037, and of Mahomedan 332 as against 430 in the previous year.

3. There is a decline in the number of the richer classes attending school: the explanation seems to be not that the richer classes have withdrawn their children from school, but that they represent themselves as poorer than they are to benefit by a lower scale of fees. There is an increase of nearly 8 per cent. in the middle classes with incomes of from Rs. 200 to Rs. 5,000 per annum, and among the poorer classes with incomes of less than Rs. 200 the increase is more than 11 per cent., the greatest increase being among agriculturists and labourers.

4. The total expenditure on Education has increased from Rs. 8,67,439 to Rs. 9,08,978, out of which the Provincial expenditure rose from Rs. 3,26,287 to Rs. 3,57,012. The total increase is Rs. 41,539, of which Rs. 30,725 would appear to be from Provincial sources, but the Inspector-General explains that this must be reduced by Rs. 10,000, representing a special grant-in-aid to salary-result schools in the Raipur District, which by mistake last year was shown as a Expenditure.

grant from Local Funds. The more important variations of expenditure from Provincial Funds may be briefly explained. Less was expended on the Jubbulpore College, as both the acting and new Principals drew the minimum pay of the post. Provincial expenditure on aided Colleges increased, as the grant to the Morris College, made in 1892-93, was drawn for a full year. The total receipts from fees rose from Rs. 1,03,351 in 1892-93 to Rs. 1,22,082 in the year under report, an increase of 18 per cent.

5. The sources from which expenditure was met are compared as below:—

Sources.	1892-93.	1893-94.
	Rs.	Rs.
(1) Provincial revenues	3,26,287	3,57,012
(2) Local rates and cesses	2,10,780	1,98,617
(3) Municipal funds	83,308	83,949
(4) Fees	1,03,351	1,22,082
(5) All other sources	1,43,713	1,47,318
Total ...	8,67,439	9,08,978

Results of examinations.

6. The results of the various examinations at which students from these Provinces appear are shown thus:—

	1892-93.	1893-94.	REMARKS.
M. A. Passes	2	4*	* Central Provinces students; passed from the Presidency College.
B. A. do.	17	36†	† Four with honours; two in English and two in Sanskrit.
F. A. do.	46	68	
Matriculation Passes	227	117	
School Final Examination, including High Standard	...	7‡	‡ One in School Final.
Middle School Passes	480	690	
Upper Primary do.	7,235	7,099	
Lower Primary do.	9,852	11,023	
School of Art do.	73	140	
L. M. and S. (Surgery) Passes ...	2	1	
B. L. Passes	7	4	
Law Certificate Examination ...	...	2	

The results of examinations indicate very varying degrees of success. In the University examinations the Provinces are shown to have done very well. Four Central Provinces students took the M. A. degree from the Presidency College, Calcutta, while the number of B. A. passes rose from 17 in the previous year to 36 (four with honours) in the year under report, and of F. A. passes from 46 to 68. In Matriculation, on the other hand, occurred an extraordinary want of success, for, while 349 candidates went up against 339 in the previous year, the number of passes fell from 227 to 117. This failure occurred from all High Schools, and alike at the Calcutta and Allahabad examinations; it is attributed to the raising of the standard by the Universities; if this actually occurred it will be necessary to raise the standard of the Middle School examination.

General education.

7. Both candidates and passes at the Middle School examination have largely increased, the latter having risen from 480 to 690. At the Lower Primary examination passes have increased from 9,852 to 11,023, but at the Upper Primary they fell from 7,235 to 7,099. In the School of Art examination there is a satisfactory increase in the number of passes from 73 to 140.

The number of students rose from 249 to 336, the average attendance from 208 to 287, and the income from fees and other sources from Rs. 25,721 to Rs. 30,949, while the cost to Provincial revenues fell from Rs. 15,342 to Rs. 13,452. The fee receipts aggregated Rs. 8,348 as against Rs. 5,221. The total cost of educating each pupil in the Government College was Rs. 159 against Rs. 123 in the aided Colleges, and the cost to Government Rs. 93 against Rs. 16. The number of High Schools remains the same, but the strength has increased from 584 to 733. The number of Anglo-Vernacular Middle Schools remains the same—65; that of the Vernacular Middle Schools has increased from 190 to 196. The number of pupils is 5,853 and 22,960 as against 5,758 and 21,262 last year.

Anglo-Vernacular Schools are everywhere popular institutions. They are attended by increasing numbers, regular attendance is easily secured, fees are paid up without difficulty, and the boys are generally anxious to learn. Discipline is generally good. There is nothing new to record in regard to instruction; the same methods and the same studies have been pursued as in former years. The advantages of the excellent system of drill and gymnastics are apparent to the most casual observer in the physique of the boys, and this applies not to pupils of English schools alone, but to all schools in which physical training is systematically followed.

The number of Primary Schools was 1,931 as against 1,776 with 112,737 scholars against 100,560 in 1892-93. An additional grant of Rs. 25,000 from the Provincial revenues was allotted to the scheme for the extension of primary education sanctioned by Sir A. MacDonnell during the past year.

With this grant primary education has been still further extended. Moribund aided schools in small and backward villages, where they could not be maintained on the results system, have been converted into combined schools and new schools opened; so that, during the year, 98 schools in the Northern Circle, 108 in the Southern and 61 in the Eastern have either been brought on the combined system or newly established. In this way vernacular education in primary schools has been brought within the reach of more than 12,000 new learners. The system has not attained to its fullest development with the funds available, as in some districts the allotment could not be fully made use of before the close of the year.

Inspection.

8. The establishment of so many new schools, attended by so large an increase of pupils, rendered an increase of the inspecting agency absolutely necessary, if these schools were to be properly managed and the children properly taught. The larger scheme for providing an adequate additional inspecting agency, mentioned in paragraph 4 of last year's Report, having been rejected by the Secretary of State on the ground of expense, a modified proposal for the appointment of four Joint Deputy Inspectors and three Sub-Inspectors was eventually sanctioned. Two of these were allotted to the Northern Circle, two to the Southern and three to the Eastern. Subsequently an additional Sub-Inspector was sanctioned for the Chanda District. These men have all been at work for some time. Thorough and systematic inspection of all schools is now possible; and those newly established will receive that care and attention without which it would have been impossible to maintain them in efficiency. A scheme has been proposed for the inspection of Feudatory Schools, which, if sanctioned, will relieve Departmental Deputy Inspectors of all work in Feudatory States.

Training classes.

9. It was stated in last year's Report that, with a view to supplying teachers for combined and aided schools, classes for training teachers were to be attached to selected Middle Vernacular Schools in each district. This was done, but the results have not yet proved satisfactory. At the examination for teachers' certificates held in October 1893, 189 candidates appeared from classes attached to 48 Middle Vernacular Schools, but only 40 passed. Classes were opened in too many schools: they could not be properly supervised by Deputy Inspectors, and the teachers were new to the duties required of them. It is hoped that a limitation of the classes to schools where they can receive adequate supervision, and where the staff is efficient, will produce better results in future.

Female education.

10. The progress of female education is summarized in the following table :—

Class of Schools.	Schools.		Pupils.	
	1892-93.	1893-94.	1892-93.	1893-94.
Secondary Schools	11	13	334	494
Primary „	142	147	6,017	6,228
Total ...	153	160	6,351	6,722

As a whole, girls' schools have increased by seven. Pupils have increased from 6,351 to 6,722 (including 115 little boys who read in girls' schools), and

attendance has improved in a larger proportion. To these figures have to be added 2,563 girls who read in boys' schools, raising the total number of girls under instruction to 9,170, or less than one out of every 100 females of a school-going age. Girls' education is more costly than boys', the total expenditure being Rs. 67,155, and the cost to Government Rs. 19,146. In the Northern Circle female education has improved. Attendance now averages 74 per cent., instruction is yearly getting better, as better qualified mistresses are supplied from the Normal School, and in places where a sound education is imparted, girls' schools have taken a fairly firm hold, and are regarded as much a matter of course as boys' schools. In this Circle kindergarten instruction, singing and needle-work have all improved. In the Eastern Circle girls' schools have advanced by opening new schools at Bilaspur and Raipur, and by an increase of the girls reading in boys' schools. Elsewhere the progress of female education is not so satisfactory.

Schools for Mahomedans and aboriginal tribes.

11. Mahomedan boys under instruction have increased from 9,167 to 9,836. Forty-one boys out of every 100 of school-going age are at school. There are 19 studying in Colleges against 10 in the previous year, and the number in secondary schools has increased by 196; 38 are in technical schools, 3 being students of the Engineering classes. These figures show a healthy activity in Mahomedan education, due in part to the efforts of the societies formed at Jubbulpore, Damoh and Nagpur by the better class of Mahomedans for promoting education among their co-religionists.

The number of aborigines at school has increased from 1,406 to 3,520, and the number of "others," chiefly low castes, according to the figures in the returns, has decreased from 7,123 to 6,580. It does not seem that these figures are quite correct, as it is almost certain that the number of low caste pupils has increased by the opening of special and the spread of rural schools; there may be some confusion in the classification. But massing "aborigines" and "others" there is a clear gain of 1,571.

Schools for Europeans and Eurasians.

12. The number of schools is stationary. The Orphanage, Kamptee, was closed during the year, and the Railway School, Bilaspur, brought on the list of aided schools. The Loretto Convent School, Saugor, is still unaided. Pupils have increased by 104—42 boys and 62 girls; and the average attendance has increased in a larger degree, the percentage being 83. The attendance at these schools is good and easily secured. This is in part attributable to the establishment within the last few years of separate infant schools, where instruction is made pleasant, kindergarten, action songs, musical drill and children's games, interposed with the usual subjects of study, making school more attractive than home. Six students passed the Matriculation examination, and six the final standard for High Schools, four being girls; and the passes by the Middle and Upper and Lower Primary standards show substantial increments. The physique of the boys is developed, and their health is improved by drill and gymnastics, which have their counterpart in calisthenics for the girls in Nagpur. The elder boys join the Cadet Corps of the Nagpur Volunteer Rifles, and as many as 37 qualified for the special capitation allowance granted to such cadets.

Technical education.

13. The Engineering School was transferred from Nagpur to Jubbulpore in 1893, located in the Government College and placed under the supervision of the Principal. At the close of the year there were 21 students on the roll, 4 in the senior class and 17 in the junior. At the annual examination held in April four candidates appeared for Sub-Overseer's certificates, of whom three were successful.

The removal of the Engineering class to Jubbulpore has resulted in a large supply of a better class of candidates for admission. Three of those admitted are Mahomedans, and several are matriculates. With the advice of the Chief Engineer, the number of admissions to the class will be limited to 14, out of whom, after a two-years' course of study, eight or nine may be expected to pass finally as Sub-Overseers—a number, it is calculated, as large as is likely to find employment in the Provinces and adjoining States. The total cost of the Engineering School is Rs. 3,367, and the cost of educating each pupil is Rs. 153.

Agricultural School.

14. The number of students at the close of the year in the Agricultural School was 21—9 in the senior class and 12 in the junior. The annual examination was held after the close of the official year. Seven of the nine students in the

senior class passed and were awarded certificates. In the junior class ten passed and two failed. The course of instruction, theoretical and practical, was fully described in last year's Report. The same system was followed in the past year. The value of the crop raised was Rs. 80 as against Rs. 74-15-0 realized last year.

The class for training schoolmasters in agriculture, attached to this institution, was attended by 64 students. The course of instruction extends to six months. The first batch of 33 entered in June, and the second of 31 in November; 61 passed the qualifying examination in the principles and practice of agriculture. The instruction is constantly illustrated by demonstration on the farm, and the students themselves are required to put what they learn into practice in the plots assigned to them for cultivation.

The Law Class.

15. The Law Class, Jubbulpore, contained 43 students at the close of the year, an increase of three. Four candidates appeared for the LL. B. examination of the Allahabad University, of whom two passed. The class is self-supporting, fees, indeed, amounting to a little more than the salary of the lecturer. There were 68 students in the Law Class, Nagpur, at the end of the year, an increase of 20. Five candidates appeared for the B. L. examination of the Calcutta University, of whom two passed.

Normal Schools.

16. At the Normal Schools there was a decrease of 12 teachers under training, while the number of those who obtained certificates increased by 17.

2.—*Literature and the Press.*

17. The publications noted below were issued during the year 1893:—

List of Publications.

No.	Subject.	Language.	Nature of Contents.
1	Drama	Marathi	"Sangit Veshia Kapat Vimochan, or Sangati-parinam Natak". (Drama describing results of the company of public women.)
2	History	Hindi	"First Canto of Walmiki Ramayan translated into Hindi verse."
		Marathi	"Hunter's History of India, English Period."

18. Presses exist in the following nine districts of the Central Provinces:—Nagpur, Jubbulpore, Saugor, Seoni, Hoshangabad, Narsinghpur, Nimar, Chhindwara and Raipur. There is also a Press in the Nandgaon Feudatory State and another in the Feudatory State of Bamra. Twelve Vernacular and

English newspapers are published in the Central Provinces. The Vernacular newspaper "Praja Hitaishi," published at Nandgaon, has ceased to exist, and in its place two Vernacular newspapers have been started—the "Gorakshan" at Nagpur and the "Tablig" at Jubbulpore.

3.—*Literary Societies.*

Libraries and Literary Societies.

19. The number of Libraries and Literary Societies is 31 as against 30 in the previous year. The following are the most important —

(1) Native General Library, Nagpur.
(2) Native Library, Umrer.
(3) Sitabaldi Reading Room.
(4) Public Library, Bhandara.
(5) Native General Library, Wardha.
(6) Station Library, Chhindwara.
(7) Public Library, Burhanpur.
(8) Hit Sabha, Saugor.
(9) Teachers' Association, Hoshangabad.
(10) Mahajani Sabha, Murwara.
(11) Anjuman Islamia, Murwara.
(12) Anjuman Islamia, Jubbulpore.
(13) Morris Memorial Library, Khandwa.
(14) Church Mission High School Library, Jubbulpore.

4.—*Arts and Sciences.*

20. The number of museums in the Central Provinces remains the same, *viz.*, two—the Provincial Museum at Nagpur and the local one at Raipur.

The institution at Nagpur is in charge of the Agricultural Department, and receives from the Provincial revenues an annual grant of Rs. 1,552. The expenditure during the year was Rs. 766-11-9 for salaries and Rs. 302-8-3 for contingencies. The balance at the close of the year was Rs. 2,413-13-11. The objects added to the collection during the year were specimens of coin, 100 specimens of Lucknow pottery, a collection of eggs of Indian birds, a model of a Hindu temple, and some images from an old temple of the Buddhist period. During the year the museum was visited by 213,216 persons, of whom 102,287 were men, 72,246 women and 38,683 children.

The Raipur Museum is in charge of the District Council. The year opened with a balance of Rs. 1,135-14-10, to which were added Rs. 400, the contribution from the District Funds. The contribution from the Municipality was discontinued some five years ago. The total expenditure during the year was Rs. 597-8-6, of which Rs. 179-5-6 were expended on account of the purchase of exhibits from the North-Western Provinces, through the Commissioner of Settlements and Agriculture, Central Provinces. Admission is free of charge. The number of visitors was 238,938 as against 128,500 in the previous year. The balance at the close of the year was Rs. 1,096-9-7.

CHAPTER VIII.—ARCHÆOLOGY.

This Department is not under Provincial management, and no operations were carried on in these Provinces during the year.

Secretariat Press, Nagpur:—13-3-95—325.

III. A.—Finance—2.

Account of Expenditure from the Net Income of the Central Provinces for the year 1893-94.

Head of Expenditure.	Amount. Last year.	Amount. Present year.	Cause of Increase or Decrease.
IMPERIAL.	Rs.	Rs.	
Civil and Political Establishments ...	1,15,531	1,18,470	
Civil Contingencies ...	(*a*)18,241	7,936	(*a*) Includes Rs. 9,822 on account of Census.
Registration ...	19,943	21,393	
Interest on Ordinary Debt ...	...	...	
Interest on Other Obligations ...	959	1,543	
Police ...	...	...	
Miscellaneous ...	4,030	3,307	
TOTAL IMPERIAL ...	1,58,704	1,52,649	
PROVINCIAL.			
Civil and Political Establishments ...	7,35,753	(*b*)7,87,196	(*b*) Increase is due principally to the payment of exchange compensation allowance; to the entertainment of Local Audit Staff according to the sanctioned scale; to the changes in the establishment of the Secretariats, to the Local Allowance of the Political Agent, Chhattisgarh Feudatories; to the charge of his establishment for the whole year; to the establishment in the Commissioner's office, Chhattisgarh Division, for auditing the accounts of the Feudatory States; and to pay of the Veterinary Superintendent's establishment for the whole year.
Civil Contingencies ...	2,15,930	(*c*)2,49,435	
Judicial charges—Courts, &c. ...	8,12,912	(*d*)8,47,616	
Registration ...	19,943	21,393	
Interest on Ordinary Debt ...	34,517	38,603	
Post Office ...	62,240	67,769	
Law and Justice—Jails ...	5 44,724	(*e*)5,31,418	
Police ...	13,87,946	(*f*)14,35,402	
Education ...	3,34,717	3,43,204	
Medical ...	2,96,863	(*g*)3,17,419	(*c*) The excess is due to the purchase of tents and tent gear for the Chief Commissioner's camp; to the increase in the contingent expenditure of the Civil Secretariat; to the special expenditure for the installation of the Feudatory Chiefs in the Chhattisgarh Division; and also to the increase in the expenditure on account of agricultural experiments.
Superannuation, &c. ...	2,42,827	(*h*)2,62,836	
Stationery and Printing ...	1,80,918	(*k*)2,03,993	
Miscellaneous ...	39,255	43,149	
Civil Works ...	2,612	945	
TOTAL PROVINCIAL ...	49,11,157	51,50,378	(*d*) The increase is due to the payment of exchange compensation allowance and to the increase in the number and pay of Process Serving Establishment.
LOCAL.			
Administration ...	27,846	28,763	(*e*) The decrease is due to the average daily attendance of the prisoners having been less than in the previous year.
Police ...	58,621	58,423	
Education ...	2,47,859	(*l*)2,57,180	
Medical ...	60,606	58,915	
Scientific and Other Minor Departments.	8,341	7,307	(*f*) The excess is due to the exchange compensation allowance and to the Police force sanctioned for the Feudatory States in the Chhattisgarh Division.
Superannuation, &c. ...	1,400	1,826	
Stationery and Printing ...	2,171	2,199	
Miscellaneous ...	6,542	10,440	(*g*) The increase is due to the exchange compensation allowance.
Famine Relief ...	416	...	
Civil Works ...	1,90,617	1,62,961	(*h*) The excess is caused by the new pensions sanctioned.
TOTAL LOCAL ...	6,04,399	5,88,014	(*k*) The increase is due chiefly to the increase in the cost of stationery supplied from Central Stores.
EXCLUDED LOCAL FUNDS.			
Cantonment Funds ...	1,70,828	1,75,866	(*l*) The excess is caused chiefly by the additional expenditure sanctioned for Primary Education.
Town and Bazar Funds ...	2,262	2,542	
Police Remount Fund ...	8,400	3,279	
Police Butchat Fund ...	37	20	
Education Fund ...	838	1,223
